No. MC 106401 (Sub-No. E8) (Correction), filed May 13, 1974, published in the FEDERAL REGISTER October 24, 1974. Applicant: JOHNSON MOTOR LINES, INC., P.O. Box 10877, Charlotte, N.C. 28234. Applicant's representative: Thomas G. Sloan (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except those of unusual value, Classes A and B explosives, livestock, household goods as defined by the Commission, commodities in bulk, commodities requiring special equipment, and those injurious or contaminating to other lading), from Corning and New York, N.Y., Hagerstown, Md., Danville, Lynchburg, Roanoke, and Winchester, Va., points in Bergen, Burlington, Cumberland, Essex, Gloucester, Hudson, Mercer, Middlesex, and Passaic Counties, N.J., and points in Pennsylvania east of a line from the Maryland-Pennsylvania State line along U.S. Highway 522 to Selinsgrove, Pa., and thence along U.S. Highway 11 to the Pennsylvania-New York State line, including points on the indicated portions of the highway specified, to points in Abbeville, Aiken, Anderson, Cherokee, Chester, Chesterfield, Darlington, Dillon, Florence, Greenville, Greenwood, Kershaw, Lancaster, Laurens, Lee, Lexington, Marion, Marlboro, Newberry, Oconee, Pickens, Richland, Spartanburg, Sumter, Union, and York Counties, S.C. (except points on U.S. Highway 123 between the Georgia-South Carolina State line and Greenville), points on U.S. Highway 29 between the Georgia-South Carolina State line and Lyman, points on Alternate U.S. Highway 29 between Lyman and the South Carolina-North Carolina State line, points on U.S. Highway 1 between the Georgia-South Carolina State line and the South Carolina-North Carolina State line, points on U.S. Highway 76 between Columbia and Florence, points on U.S. Highway 15 between Sumter and its junction with U.S. Highway 52 near Society Hill, and points on U.S. Highway 52 between Florence and the junction of U.S. Highway 1 just south of Cheraw, S.C. Restriction: The authority described above is restricted against the transportation of uncrated store fixtures, uncrated hotel equipment, and uncrated kitchen equipment, from New York, N.Y. The purpose of this filing is to eliminate the gateways of Nicholson, Pa., Newark, N.J., and Albermarle or Charlotte, N.C., and points within 10 miles thereof. The purpose of this correction is to include the restriction.

No. MC 106401 (Sub-No. E9) (Correction), filed May 13, 1974, published in the FEDERAL REGISTER October 24, 1974. Applicant: JOHNSON MOTOR LINES, INC., P.O. Box 10877, Charlotte, N.C. 28234. Applicant's representative: Thomas G. Sloan (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular

routes, transporting: *General commodities* (except those of unusual value, Classes A and B explosives, livestock, household goods as defined by the Commission, commodities in bulk, commodities requiring special equipment, and those injurious or contaminating to other lading), (1) between points in Russell County, Ala., on the one hand, and, on the other, Hagerstown, Md., Danville, Lynchburg, Roanoke, and Winchester, Va., points in Bergen, Burlington, Cumberland, Essex, Gloucester, Hudson, Mercer, Middlesex, and Passaic Counties, N.J., and points in that part of Pennsylvania east of a line beginning at the Maryland-Pennsylvania State line and extending along U.S. Highway 522 to Selinsgrove, Pa., and thence along U.S. Highway 11 to the Pennsylvania-New York State line, including points on the indicated portions of the highways specified; (2) between points in Russell County, Ala., on the one hand, and, on the other, Corning and New York, N.Y. Restriction: The authority described above is restricted against the transportation of uncrated store fixtures, uncrated hotel equipment, and uncrated kitchen equipment, to or from New York, N.Y. The purpose of this filing is to eliminate the gateways of Columbus, Ga., Graniteville, S.C., Pineville, N.C., points in Essex County, N.J., and points in Pennsylvania within 75 miles of Corning, N.Y. The purpose of this correction is to include the restriction.

No. MC 106401 (Sub-No. E21) (Correction), filed May 13, 1974, published in the FEDERAL REGISTER October 31, 1974. Applicant: JOHNSON MOTOR LINES, INC., P.O. Box 10877, Charlotte, N.C. 28234. Applicant's representative: Thomas G. Sloan (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except those of unusual value, Classes A and B explosives, livestock, household goods as defined by the Commission, commodities in bulk, commodities requiring special equipment, and those injurious or contaminating to other lading); (1) between points in Georgia (except Atlanta), on and south of a line from the South Carolina-Georgia State line along Interstate Highway 85 to the junction of U.S. Highway 78, thence along U.S. Highway 78 to the Alabama-Georgia State line, on the one hand, and, on the other, Hagerstown, Md., Danville, Lynchburg, Roanoke, and Winchester, Va., points in Bergen, Burlington, Cumberland, Essex, Gloucester, Hudson, Mercer, Middlesex, and Passaic Counties, New Jersey, and points in that part of Pennsylvania east of a line beginning at the Maryland-Pennsylvania State line and extending along U.S. Highway 522 to Selinsgrove, Pa., and thence along U.S. Highway 11 to the Pennsylvania-New York State line, including points on the indicated portions of the highways specified; (2) between points in Georgia (except Atlanta), bounded by a line from Dawsonville, along U.S. Highway 19 to Atlanta, thence along U.S. Highway 78 to the Georgia-Alabama State line, thence along the Georgia-Alabama State line to the junction of U.S. Highway 278.

Thence along U.S. Highway 278 to the junction of Georgia Highway 113, thence along Georgia Highway 113 to the junction of U.S. Highway 411, thence along U.S. Highway 411 to the junction of Georgia Highway 20, thence along Georgia Highway 20 to the junction of Georgia Highway 5, thence along Georgia Highway 5 to the junction of Georgia Highway 53, thence along Georgia Highway 53 to Dawsonville the point of beginning, on the one hand, and, on the other, Hagerstville, Md., Danville, Lynchburg, and Winchester, Va., points in Bergeh, Burlington, Cumberland, Essex, Gloucester, Hudson, Mercer, Middlesex, and Passaic Counties, N.J., and points in that part of Pennsylvania east of a line beginning at the Maryland-Pennsylvania State line and extending along U.S. Highway 522 to Selinsgrove, Pa., and thence along U.S. Highway 11 to the Pennsylvania-New York State line, including points on the indicated portions of the highways specified; (3) between points in Georgia bounded by a line beginning at the South Carolina-Georgia State line along Interstate Highway 85 to Atlanta, thence along U.S. Highway 19 to Palonaga, thence along Georgia Highway 115 to the junction of Georgia Highway 254, thence along Georgia Highway 254 to the junction of U.S. Highway 23, thence along U.S. Highway 23 to the junction of Georgia Highway 17, thence along Georgia Highway 17 to the junction of U.S. Highway 123, thence along U.S. Highway 123 to the Georgia-South Carolina State line, thence along the Georgia-South Carolina State line to the junction of Interstate Highway 85 the point of beginning, on the one hand, and, on the other, Hagerstown, Md., Winchester, Va., points in Bergen, Burlington, Cumberland, Essex, Gloucester, Hudson, Mercer, Middlesex, and Passaic Counties, N.J., and points in that part of Pennsylvania east of a line beginning at the Maryland-Pennsylvania State line and extending along U.S. Highway 522 to Selinsgrove, Pa., and thence along U.S. Highway 11 to the Pennsylvania-New York State line, including points on the indicated portions of the highways specified; (3) between points in Georgia north of a line from the Alabama-Georgia State line along U.S. Highway 278 to the junction of Georgia Highway 113, thence along Georgia Highway 113 to the junction of U.S. Highway 411, thence along U.S. Highway 411 to the junction of Georgia Highway 20, thence along Georgia Highway 20 to the junction of Georgia Highway 5, thence along Georgia Highway 5 to the junction of Georgia Highway 53, thence along Georgia Highway 53 to the junction of U.S. Highway 19, thence along U.S. Highway 19 to the junction of Georgia Highway 115, thence along Georgia Highway 115 to the junction of Georgia Highway 254, thence along Georgia Highway 254 to the junction of U.S. Highway 23, thence along U.S. Highway 23 to the junction of Georgia Highway 17, thence along Georgia Highway 17 to the junction of U.S. Highway 123, thence along U.S. Highway 123 to the Georgia-South Carolina State line, on the one hand, and, on the other, points in Bergen, Burlington, Cumberland, Essex, Gloucester, Hudson, Mercer, Middlesex, and Passaic Counties, N.J., and points in that part of Pennsylvania east of a line beginning at the Maryland-Pennsylvania State line and extending along U.S. Highway 522 to Selinsgrove, Pa., and thence along U.S. Highway 11 to the Pennsylvania-New York State line, including points on the indicated portions of the highways specified; (5) between points in Georgia (except Atlanta), on and south of a line from the Georgia-South Carolina State line along Interstate Highway 20 to the junction of U.S. Highway 78, thence along U.S. Highway 78 to the Georgia-Alabama State line, on the one hand, and, on the other, Corning, N.Y.; and (6) between points in Georgia (except Atlanta), on the one hand, and, on the other, New York, N.Y. Restriction: The authority described above is restricted against the transportation of uncrated store fixtures, uncrated hotel equipment, and uncrated kitchen equipment, to or from New York, N.Y. The purpose of this filing is to eliminate the gateways of Pineville, N.C., Graniteville, S.C., points in Essex County, N.J., and Nicholson, Pa. The purpose of this correction is to include the restriction.

No. MC 106401 (Sub-No. E27) (Correction), filed May 13, 1974, published in the FEDERAL REGISTER November 12, 1974. Applicant: JOHNSON MOTOR LINES, INC., P.O. Box 10877, Charlotte, N.C. 28234. Applicant's representative: Thomas G. Sloan (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except those of unusual value, Classes A and B explosives, livestock, household goods as defined by the Commission, commodities in bulk, commodities requiring special equipment, and those injurious or contaminating to other lading), from points in Alamance, Burke, Cabarrus, Caldwell, Catawba, Chatham, Cumberland, Davidson, Davie, Durham, Forsyth, Guilford, Granville, Harnett, Iredell, McDowell, Mecklenburg, Moore, Orange, Randolph, Rowan, Stokes, Surry, and Stanly Counties, N.C. (except points on U.S. Highway 29 between the Gaston-Mecklenburg County line and Charlotte, points on Highway 49 between Charlotte and the junction of unnumber Highway just south of Concord), points on unnumbered Highway between junction of North Carolina Highway 49 and Concord; points on Alternate U.S. Highway 29 between Concord and junction of U.S. Highway 29; points on U.S. Highway 29 between junction of Alternate U.S. Highway 29 and High Point; points on Alternate U.S. Highway 29 between High Point and Greensboro.

Points on Alternate U.S. Highway 70 between Greensboro and junction of U.S. Highway 70; points on U.S. Highway 70 between junction of Alternate U.S. Highway 70 and Durham; points on U.S. Highway 15 between Durham and Oxford; points on U.S. Highway 158 between Oxford and the Granville-Vance County line; points on U.S. Highway 220 between the Montgomery-Randolph County line and the junction of U.S. Highway 231, south of Randleman; points on U.S. Highway 311 between junction of U.S. Highway 220 and High Point; points on U.S. Highway 70 between Durham and junction of U.S. Highway 54 (formerly unnumbered U.S. Highway); points on North Carolina Highway 54 between junction of U.S. Highway 70 and the Durham-Wake County line; points on U.S. Highway 29 between Greensboro and the Guilford-Rockingham County line; points on U.S. Highway 70 between Salisbury and Hickory; points on U.S. Highway 321 between Hickory and junction of Alternate U.S. Highway 321; and points on Alternate U.S. Highway 321 between junction of U.S. Highway 321 to Valmead; to points in Russell County, Ala. The purpose of this filing is to eliminate the gateways of Graniteville, S.C., and Columbus, Ga. The purpose of this correction is to correctly describe the highway descriptions.

No. MC 106920 (Sub-No. E29) (Correction), filed June 4, 1974, published in the FEDERAL REGISTER February 4, 1975. Applicant: RIGGS FOOD EXPRESS, INC., P.O. Box 26, New Bremen, Ohio 45869. Applicant's representative: E. Stephen Heisley, 805 McLachlen Bank Bldg., 666 Eleventh St. NW., Washington, D.C. 20001. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Milk, cream*, and *buttermilk* (except concentrated whole milk and concentrated skim milk), in bulk, in tank vehicles, from points in Wisconsin east of a line beginning at the Minnesota-Wisconsin State line, and extending along Wisconsin Highway 35 to junction U.S. Highway 10, thence along U.S. Highway 10 to junction U.S. Highway 63, thence along U.S. Highway 63 to junction Wisconsin Highway 35, thence along Wisconsin Highway 35 to junction U.S. Highway 53, thence along U.S. Highway 53 to junction Wisconsin Highway 54, thence along Wisconsin Highway 54 to junction Wisconsin Highway 71, thence along Wisconsin Highway 71 to junction Wisconsin Highway 21, thence along Wisconsin Highway 21 to junction Wisconsin Highway 173, thence along Wisconsin Highway 173 to junction Wisconsin Highway 73, thence along Wisconsin Highway 73 to junction Wisconsin Highway 54, thence along Wisconsin Highway 54 to junction U.S. Highway 10, thence along U.S. Highway 10 to Lake Michigan, to points in Kentucky north and east of a line beginning at the Ohio-Kentucky State line and extending along Interstate Highway 65 to junction U.S. Highway 68, thence along U.S. Highway 68 to junction Kentucky Highway 90, thence along Kentucky Highway 90 to junction U.S. Highway 127, thence along U.S. Highway 127 to the Kentucky-Tennessee State line. The purpose of this filing is to eliminate the gateways of Drake, Mercer, and Auglaize Counties, Ohio. The purpose of this correction is to expand the territorial description.

No. MC 106920 (Sub-No. E56) (Correction), filed June 3, 1974, published in the FEDERAL REGISTER February 13, 1975. Applicant: RIGGS FOOD EXPRESS, INC., P.O. Box 26, New Breman, Ohio 45869. Applicant's representative: E. Stephen Heisley, 666 Eleventh St. NW., Washington, D.C. 20001. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Commodities classified as dairy products* under Section B in the Appendix to the report in *Modification of Permits of Motor Contract Carriers of Packinghouse Products*, 48 M.C.C. 628, from those points in Texas on and west of a line beginning at the Gulf of Mexico and extending along Texas Highway 356 to junction Interstate Highway 37, thence along Interstate Highway 37 to junction U.S. Highway 77, thence along U.S. Highway 77 to junction U.S. Alternate Highway 77, thence along U.S. Alternate Highway 77 to junction U.S. Highway 77, thence along U.S. Highway 77 to junction Texas Highway 21, thence along Texas Highway 21 to junction Texas Highway 6, thence along Texas Highway 6 to junction Texas Highway 14, thence along Texas Highway 14 to junction Interstate Highway 45, thence along Interstate Highway 45 to junction U.S. Highway 75, thence along U.S. Highway 75 to the Texas-Oklahoma State line, to points in Virginia on and north of a line beginning at the Virginia-West Virginia State line and extending along U.S. Highway 460 to junction Virginia Highway 42, thence along Virginia Highway 42 to junction Virginia Highway 311, thence along Virginia Highway 311 to junction U.S. Highway 460, thence along U.S. Highway 460 to junction Virginia Highway 40, thence along Virginia Highway 40 to junction U.S. Highway 460, thence along U.S. Highway 460 to junction U.S. Highway 58, thence along U.S. Highway 58 to the Atlantic Ocean. The purpose of this filing is to eliminate the gateways of Darke, Mercer, and Auglaize Counties, Ohio. The purpose of this correction is to redescribe the authority description.

No. MC 106920 (Sub-No. E82) (Correction), filed June 3, 1974, published in the FEDERAL REGISTER February 19, 1975. Applicant: RIGGS FOODS EXPRESS, INC., P.O. Box 26, New Bremen, Ohio 45869. Applicant's representative: E. Stephen Heisley, 666 Eleventh St. NW., Washington, D.C. 20001. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Commodities* classified as dairy products under Section B in the Appendix to the report in *Modification of Permits of Motor Contract Carriers of Packing House Products*, 48 M.C.C. 629, from points in Illinois north of a line beginning at the Iowa-Illinois State line and extending along U.S. Highway 34 to junction U.S. Highway 150, thence along U.S. Highway 150 to junction Interstate Highway 74, thence along Interstate Highway 74 to the Illinois-Indiana State line, to points in Georgia on and south of a line beginning at the Alabama-Georgia State line and extending along U.S. Highway Alternate 27 to junction Interstate Highway 85, thence along Interstate Highway 85 to junction U.S. Highway 129, thence along U.S. Highway 129 to the Georgia-North Carolina State line. The purpose of this filing is to eliminate the gateways of Darke, Mercer, and Auglaize Counties, Ohio. The purpose of this correction is to correct the territorial description.

No. MC 107295 (Sub-No. E205), filed May 14, 1974. Applicant: PRE-FAB TRANSIT CO., P.O. Box 146, Farmer City, Ill. 61842. Applicant's representative: Dale L. Cox (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Buildings* complete, knocked down or in sections, from points in Wisconsin to points in Colorado, Montana, Nevada, New Mexico, Utah, and to points in that part of Wyoming located in and south of Lincoln, Sweetwater, Carbon, Albany, and Laramie Counties. The purpose of this filing is to eliminate the gateway of points in Wapello County, Iowa.

No. MC 107515 (Sub-No. E55), filed January 27, 1975. Applicant: REFRIGERATED TRANSPORT CO., INC., P.O. Box 308, Forest Park, Ga. 33050. Applicant's representative: R. M. Tettlebaum, Suite 375, 3379 Peachtree Rd. NE., Atlanta, Ga. 30326. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen edible meat*, in vehicles equipped with mechanical refrigeration, from Nogales, Ariz., to Maryland, Delaware, District of Columbia, New Jersey, Connecticut, Massachusetts, and points in that part of New York on, south, or east of a line beginning at Lake Ontario and extending along New York Highway 98 to junction New York Highway 16, thence along New York Highway 16 to the New York-Pennsylvania State line. The purpose of this filing is to eliminate the gateway of Rocky Mount, N.C.

No. MC 107515 (Sub-No. E548), filed January 27, 1975. Applicant: REFRIGERATED TRANSPORT CO., INC., P.O. Box 308, Forest Park, Ga. 33050. Applicant's representative: R. M. Tettlebaum, Suite 375, 3379 Peachtree Rd. NE., Atlanta, Ga. 30326. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen meat*, from Nogales, Ariz., to points in Illinois on or east of U.S. Highway 51, points in Wisconsin on or east of U.S. Highway 41, points in the Lower Peninsula of Michigan, points in Indiana, West Virginia, Virginia, and Pennsylvania. Restriction: The operations authorized herein are restricted against the transportation of traffic originating at Nashville, Tenn. The purpose of this filing is to eliminate the gateway of Madison, Tenn.

V 40167 APR 75 XUM

No. MC 107515 (Sub-No. E549), filed January 27, 1975. Applicant: REFRIGERATED TRANSPORT CO., INC., P.O. Box 308, Forest Park, Ga. 30050. Applicant's representative: R. M. Tettlebaum, Suite 375, 3379 Peachtree Rd. NE., Atlanta, Ga. 30326. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen meats*, in vehicles equipped with mechanical refrigeration, from Nogales, Ariz., to Kentucky, Indiana, Ohio, Lower Peninsula of Michigan, Memphis, Tenn., that portion of Mississipi on, north, or east of a line beginning at the Alabama-Mississipi State line and extending along Interstate Highway 20 to junction Mississippi Highway 15, thence along Mississipi Highway 15 to junction Mississippi Highway 6, thence along Mississipi Highway 6 to junction Interstate Highway 55, thence along Interstate Highway 55 to the Mississippi-Tennessee State line, W. Memphis, Tenn., and points in Arkansas on or east of Interstate Highway 55. The purpose of this filing is to eliminate the gateway of Florence, Ala.

No. MC 107515 (Sub-No. E579), filed January 27, 1975. Applicant: REFRIGERATED TRANSPORT CO., INC., P.O. Box 308, Forest Park, Ga. 33050. Applicant's representative: R. M. Tettlebaum, Suite 375, 3379 Peachtree Rd. NE., Atlanta, Ga. 30326. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen foods*, in vehicles equipped with mechanical refrigeration, from points in California on and south of a line beginning at the California-Nevada State line extending along Interstate Highway 80 to junction California Highway 20, thence along California Highway 20 to the Pacific Ocean, to points in Tennessee and Kentucky. The purpose of this filing is to eliminate the gateway of Florence, Ala.

No. MC 107515 (Sub-No. E580), filed January 27, 1975. Applicant: REFRIGERATED TRANSPORT CO., INC., P.O. Box 308, Forest Park, Ga. 33050. Applicant's representative: R. M. Tettlebaum, Suite 375, 3379 Peachtree Rd. NE., Atlanta, Ga. 30326. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen foods*, from points in California on and south of a line beginning at the California-Nevada State line and extending along U.S. Highway 6 to junction California Highway 120, thence along California Highway 120 to junction Interstate Highway 205, thence along Interstate Highway 205 to junction Interstate Highway 580, thence along Interstate Highway 580 to junction Interstate Highway 80, thence along Interstate Highway 80 to San Francisco, Calif., to Detroit, Mich. The purpose of this filing is to eliminate the gateway of Florence, Ala.

No. MC 107515 (Sub-No. E581), filed January 27, 1975. Applicant: REFRIGERATED TRANSPORT CO., INC., P.O. Box 308, Forest Park, Ga. 33050. Applicant's representative: R. M. Tettlebaum, Suite 375, 3379 Peachtree Rd. NE., Atlanta, Ga. 30326. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen foods*, in vehicles equipped with mechanical refrigeration, from points in California on and south of a line beginning at the California-Nevada State line and extending along Interstate Highway 40/U.S. Highway 66 to junction California Highway 58, thence along California Highway 58 to junction California Highway 99, thence along California Highway 99 to junction California Highway 166, thence along California Highway 166 to the Pacific Ocean, to all points in the Lower Peninsula of Michigan. The purpose of this filing is to eliminate the gateway of Florence, Ala.

No. MC 107515 (Sub-No. E582), filed January 27, 1975. Applicant: REFRIGERATED TRANSPORT CO., INC., P.O. Box 308, Forest Park, Ga. 33050. Applicant's representative: R. M. Tettlebaum, Suite 375, 3379 Peachtree Rd. NE., Atlanta, Ga. 30326. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen meat, meat products*, and *meat by-products*, as described in Section A of Appendix I to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766, in vehicles equipped with mechanical refrigeration (except commodities in bulk, in tank vehicles), from points in California, to points in Kentucky, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, Pennsylvania, Rhode Island, Tennessee (except Memphis and its commercial zone), Vermont, Virginia, West Virginia, and the District of Columbia. The purpose of this filing is to eliminate the gateway of Booneville, Miss.

No. MC 107515 (Sub-No. E583), filed January 27, 1975. Applicant: REFRIGERATED TRANSPORT CO., INC., P.O. Box 308, Forest Park, Ga. 33050. Applicant's representative: R. M. Tettlebaum, Suite 375, 3379 Peachtree Rd. NE., Atlanta, Ga. 30326. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen meat, meat products*, and *meat by-products*, from points in California on and south of a line beginning at the California-Oregon State line and extending along U.S. Highway 395 to junction California Highway 36, thence along California Highway 36 to junction California Highway 44, thence along California Highway 44 to junction California Highway 299, thence along California Highway 299 to the Pacific Ocean, to all points in New York. The purpose of this filing is to eliminate the gateway of Booneville, Miss.

No. MC 107515 (Sub-No. E588), filed January 27, 1975. Applicant: REFRIGERATED TRANSPORT CO., INC., P.O. Box 308, Forest Park, Ga. 33050. Applicant's representative: R. M. Tettlebaum, Suite 375, 3379 Peachtree Rd. NE., Atlanta, Ga. 30326. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen foods*, from New Orleans and points in Louisiana, to points in California, Colorado, Idaho, Montana, Nevada, Oregon, Utah, Washington, Wyoming, and that part of Arizona on and north of a line extending from the Arizona-New Mexico State line and on U.S. Highway 70 to junction U.S. Highway 60, thence along U.S. Highway 60 to junction Interstate Highway 10 to the Colorado-Arizona State line. The purpose of this filing is to eliminate the gateway of Gilestown, Tenn.

No. MC 107515 (Sub-No. E589), filed January 27, 1975. Applicant: REFRIGERATED TRANSPORT CO., INC., P.O. Box 308, Forest Park, Ga. 33050. Applicant's representative: R. M. Tettlebaum, Suite 375, 3379 Peachtree Rd. NE., Atlanta, Ga. 30326. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen foods*, in vehicles equipped with mechanical refrigeration, from points in Cooke County, Ill., and Lake County, Ind., to points in that part of California on or south of a line beginning at the Nevada-California State line and extending along California Highway 88 to junction California Highway 12 to junction Interstate Highway 80, thence along Interstate Highway 80 to San Francisco and to points in Marin County, Calif. (except points which are both north of California Highway 168 and on or east of U.S. Highway 295). The purpose of this filing is to eliminate the gateway of Covington, Tenn.

No. MC 107515 (Sub-No. E590), filed January 27, 1975. Applicant: REFRIGERATED TRANSPORT CO., INC., P.O. Box 308, Forest Park, Ga. 33050. Applicant's representative: R. M. Tettlebaum, Suite 375, 3379 Peachtree Rd. NE., Atlanta, Ga. 30326. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen foods* (except commodities in bulk) (in vehicles equipped with mechanical refrigeration) from Cook, Will, Lake, and DuPage Counties, Ill., and Lake County, Ind., to points in Arizona. The purpose of this filing is to eliminate the gateway of Dyersburg, Tenn.

No. MC 107515 (Sub-No. E591), filed January 27, 1975. Applicant: REFRIGERATED TRANSPORT CO., INC., P.O. Box 308, Forest Park, Ga. 33050. Applicant's representative: R. M. Tettlebaum, Suite 375, 3379 Peachtree Rd. NE., Atlanta, Ga. 30326. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen foods* (except in bulk), in vehicles equipped with mechanical refrigeration, from Cook, Lake, Will, and Du Page Counties, Ill., and Lake County, Ind., to points in Clark County, Nev. The purpose of this filing is to eliminate the gateway of Dyersburg, Tenn.

No. MC 107515 (Sub-No. E596), filed January 27, 1975. Applicant: REFRIGERATED TRANSPORT CO., INC., P.O. Box 308, Forest Park, Ga. 33050. Applicant's representative: R. M. Tettlebaum, Suite 375, 3379 Peachtree Rd. NE., Atlanta, Ga. 30326. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen foods*, from points in California, to points in West Virginia. The purpose of this filing is to eliminate the gateways of Atlanta and Gainesville, Ga.

Chalmette, La., to California, Colorado, Idaho, Montana, Nevada, Oregon, Utah, Washington, Wyoming, and that part of Arizona on and north of a line extending from the Arizona-New Mexico State line and on U.S. Highway 70 to junction U.S. Highway 60, thence along U.S. Highway 60 to junction Interstate Highway 10 to the Colorado-Arizona State line. The purpose of this filing is to eliminate the gateway of Gilestown, Tenn.

No. MC 107515 (Sub-No. E597), filed January 27, 1975. Applicant: REFRIGERATED TRANSPORT CO., INC., P.O. Box 308, Forest Park, Ga. 33050. Applicant's representative: R. M. Tettlebaum, Suite 375, 3379 Peachtree Rd. NE., Atlanta, Ga. 30326. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen seafood*, when moving at the same time and in the same vehicle with commodities the transportation of which is subject to economic regulation, from points in Delaware to points in Arizona, California, Colorado, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, and Wyoming; and from points in Maryland (except points in Baltimore, Md., commercial zone as defined by the Commission), to points in Arizona, California, Colorado, Idaho, Nevada, New Mexico, Oregon, Utah, and Washington. Restricted to traffic originating in Delaware and Maryland (except points in the Baltimore, Md., commercial zone as defined by the Commission). The purpose of this filing is to eliminate the gateway of any point in Tennessee (except Memphis and its commercial zone).

No. MC 108380 (Sub-No. E7), filed June 5, 1974. Applicant: JOHNSTON'S FUEL LINERS, INC., P.O. Box 100, Newcastle, Wyo. 81701. Applicant's representative: C. W. Burnette (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Petroleum products*, from Billings and Laurel, Mont., to points in South Dakota north of U.S. Highway 212, points in Nebraska, and points in that part of Colorado on and east of a line beginning at the Wyoming-Colorado State line extending along Interstate Highway 25 to Denver, Colo., thence along U.S. Highway 285 to the Colorado-New Mexico State line. The purpose of this filing is to eliminate the gateway of Butte County, S. Dak.

No. MC 108380 (Sub-No. E10), filed June 5, 1974. Applicant: JOHNSTON'S FUEL LINERS, INC., P.O. Box 100, Newcastle, Wyo. 82701. Applicant's representative: C. W. Burnette (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Petroleum and petroleum products;* (1) from points in that part of Wyoming located on and west of a line beginning at the Wyoming-Montana State line, extending along the west county lines of Campbell, Converse, and Albany Counties, and on and east of a line beginning at the Wyoming-Montana State line, extending along U.S. Highway 310 to junction U.S. Highway 20, thence along U.S. Highway 20 to junction U.S. Highway 26, thence along U.S. Highway 26 to junction Wyoming Highway 789 to Lander, Wyo., thence along Wyoming Highway 28 to Farson, Wyo., thence along U.S. Highway 187 to junction Interstate Highway 80 to Wyoming Highway 430 to the Wyoming-Colorado State line, to points in Montana located in and east of Hill, Blaine, Phillips, Petroleum, Musselshell, Yellowstone, and that part of Big Horn located on and east of Montana Highway 47 and Interstate Highway 90; and (2) from points in that part of Wyoming located in and east of Campbell, Converse, and Albany Counties, to points in that part of Montana located on and west of a line beginning at the United States-Canada International Boundary line extending south along the east county lines of Phillips, Petroleum, Musselshell, and Yellowstone County lines to the junction of the east Yellowstone County line and U.S. Highway 94, thence along U.S. Highway 94 to junction Montana Highway 47, thence along Montana Highway 47 to junction Interstate Highway 90, thence along Interstate Highway 90 to the Montana-Wyoming State line, and on, east, and north of a line beginning at the United States-Canada International Boundary line, extending along U.S. Highway 89 to Great Falls, Mont., thence along U.S. Highway 91 to Helena, Mont., thence along U.S. Highway 287 to junction U.S. Highway 10, thence along U.S. Highway 10 through Livingston to Billings, Mont., thence along U.S. Highway 87 to the Montana-Wyoming State line. The purpose of this filing is to eliminate the gateway of the Pipeline Terminal located approximately ten miles south of Sheridan, Wyo.

No. MC 108380 (Sub-No. E11), filed June 5, 1974. Applicant: JOHNSTON'S FUEL LINERS, INC., P.O. Box 100, Newcastle, Wyo. 82701. Applicant's representative: C. W. Burnette (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Petroleum based urea*, dry, in bags or in bulk, *petroleum based urea solutions*, and *petroleum based ammonium nitrate solutions*, in bulk, in tank vehicles, from points in Montana on and east of a line beginning at the United States-Canada International Boundary line extending along Montana Highway 241 to junction U.S. Highway 2, thence along Montana Highway 376 to junction U.S. Highway 191, thence along U.S. Highway 191 to junction Montana Highway 19, thence along Montana Highway 19 to junction U.S. Highway 87, thence along U.S. Highway 87 to junction Interstate Highway 90, thence along Interstate Highway 90 to U.S. Highway 310, thence along U.S. Highway 310 to the Montana-Wyoming State line, and points in Wyoming on and east of a line beginning at the Montana-Wyoming State line, extending along Wyoming Highway 120 to Thermopolis, thence along U.S. Highway 20 to Shophoni, thence along U.S. Highway 20 to the western boundary of Natrona County, Wyo., thence along the western boundary of Natrona County, to its junction with U.S. Highway 287, thence along U.S. Highway 287 to Rawlins.

Thence along Wyoming Highway 71 to the Colorado-Wyoming State line, to points in Arizona on, east, and south of a line beginning at the Arizona-New Mexico State line, extending along U.S. Highway 66 to junction U.S. Highway 666, thence along U.S. Highway 666 to Springerville, thence south and west on U.S. Highway 60 to Phoenix, thence south and west on U.S. Highway 80 to the Arizona-California State line, points in Colorado on and east of the east County lines of Routt, Eagle, Lake, Chaffee, Saguache, Rio Grande, and Conejos Counties, points in Kansas, and points in that part of New Mexico on and east of a line beginning at the Colorado-New Mexico State line, extending along U.S. Highway 285 to Santa Fe, thence along U.S. Highway 85 to Albuquerque, thence on, south, and east of U.S. Highway 66 to the New Mexico-Arizona State line, points in Oklahoma and points in Texas. The purpose of this filing is to eliminate the gateway of the plant site of Wycon Chemical Co., near Cheyenne, Wyo.

No. MC 108449 (Sub-No. E56), filed May 17, 1974. Applicant: INDIANHEAD TRUCK LINE, INC., 1947 W. County Rd. C, St. Paul, Minn. 55113. Applicant's representative: W. A. Myllenbeck (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Petroleum products*, in bulk, in tank vehicles, from Noyes, Minn., to points in Illinois. The purpose of this filing is to eliminate the gateways of Grand Forks, N. Dak., and St. Cloud and Minneapolis, Minn., and Dubuque, Iowa.

No. MC 108449 (Sub-No. E64), filed May 21, 1974. Applicant: INDIANHEAD TRUCK LINE, INC., 1947 West County Road C, St. Paul, Minnesota 55113. Applicant's representative: W. A. Myllenbeck (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Petroleum* and *petroleum* products as described in Appendix XIII to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209, in bulk, from Wrenshall, Minn., to points in Montana. The purpose of this filing is to eliminate the gateway of Jamestown, N. Dak.

No. MC 108449 (Sub-No. E65), filed May 21, 1974. Applicant: INDIANHEAD TRUCK LINE, INC., 1947 West County Road C, St. Paul, Minnesota 55113. Applicant's representative: W. A. Myllenbeck (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Petroleum products*, as described in Appendix XIII to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209, in bulk, from Wrenshall, Minn., to points in Wyoming. The purpose of this filing is to eliminate the gateways of Superior, Wis., McGregor, Minn., and Aberdeen, S. Dak.

No. MC 108449 (Sub-No. E66), filed May 21, 1974. Applicant: INDIANHEAD TRUCK LINE, INC., 1947 West County Road C, St. Paul, Minnesota 55113. Applicant's representative: W. A. Myllenbeck (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Petroleum products*, as described in Appendix XIII to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209, in bulk, from Wrenshall, Minn., to points in South Dakota. The purpose of this filing is to eliminate the gateway of Superior, Wis., and McGregor, Minn.

No. MC 108449 (Sub-No. E67), filed May 21, 1974. Applicant: INDIANHEAD TRUCK LINE, INC., 1947 W. County Rd. C, St. Paul, Minn. 55113. Applicant's representative: W. A. Myllenbeck (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Petroleum products*, in bulk, from Rhinelander, Wis., to points in North Dakota. The purpose of this filing is to eliminate the gateway of McGregor, Wis.

No. MC 108449 (Sub-No. E68), filed May 21, 1974. Applicant: INDIANHEAD TRUCK LINE, INC., 1947 W. County Rd. C, St. Paul, Minn. 55113. Applicant's representative: W. A. Myllenbeck (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Petroleum products*, in bulk, in tank vehicles, from Rhinelander, Wis., to points in Iowa (except those in Delaware, Dubuque, Jones, Jackson, Cedar, Clinton, and Scott Counties). The purpose of this filing is to eliminate the gateway of Spring Valley, Minn.

No. MC 108449 (Sub-No. E69), filed May 21, 1974. Applicant: INDIANHEAD TRUCK LINE, INC., 1947 West County Rd. C, St. Paul, Minnesota, 55113. Applicant's representative: W. A. Myllenbeck (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Petroleum* and *petroleum products*, as described in Appendix XIII to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209, in bulk, in tank vehicles, from the Williams Bros. Pipe Line Company terminal in the town of Kronenwetter, Marathon County, Wis., to points in Minnesota. The purpose of this filing is to eliminate the gateway of Eau Claire, Wis.

No. MC 108449 (Sub-No. E76), filed May 21, 1974. Applicant: INDIANHEAD TRUCK LINE, INC., 1947 West County Rd. C, St. Paul, Minnesota 55113. Applicant's representative: W. A. Myllenbeck (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Petroleum* and *petroleum products*, as described in Appendix XIII to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209, in bulk, in tank vehicles, from Alexandria, Minn., and points within five miles thereof, to points in Wyoming. The purpose of this filing is to eliminate the gateway of Aberdeen, S. Dak.

No. MC 108449 (Sub-No. E77), filed May 21, 1974. Applicant: INDIANHEAD TRUCK LINE, INC., 1947 West County Rd., C, St. Paul, Minn. 55113. Applicant's representative: W. A. Myllenbeck (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Petroleum* and *petroleum products*, as described in Appendix XIII to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209, in bulk, in tank vehicles, from Alexandria, Minn., and points within 10 miles thereof, to points in Montana. The purpose of this filing is to eliminate the gateway of Jamestown, N. Dak.

No. MC 108449 (Sub-No. E78), filed May 21, 1974. Applicant: INDIANHEAD TRUCK LINE, INC., 1947 West County Rd., C, St. Paul, Minn. 55113. Applicant's representative: W. A. Myllenbeck (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Petroleum* and *petroleum products*, as described in Appendix XIII to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209, in bulk, in tank vehicles, from Marshall, Minn., to points in Nebraska, except those in Burt, Cuming, Madison, Pierce, Stanton, Thurston, Dakota, Dixon, Wayne, Knox, Antelope, Holt, Boyd, Cedar, Rock, Brown, Keyapaha, and Cherry Counties. The purpose of this filing is to eliminate the gateway of Spencer, Iowa.

No. MC 108449 (Sub-No. E79), filed May 21, 1974. Applicant: INDIANHEAD TRUCK LINE, INC., 1947 W. County Rd. C, St. Paul, Minn. 55113. Applicant's representative: W. A. Myllenbeck (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Petroleum* and *petroleum products*, as described in Appendix XIII to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209, in bulk, in tank vehicles, from Marshall, Minn., to points in Montana. The purpose of this filing is to eliminate the gateway of Aberdeen, S. Dak.

No. MC 108449 (Sub-No. E80), filed May 21, 1974. Applicant: INDIANHEAD TRUCK LINE, INC., 1947 W. County Rd. C, St. Paul, Minn. 55113. Applicant's representative: W. A. Myllenbeck (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Petroleum products*, in bulk, in tank vehicles, from the terminal of Duluth Petroleum Products, about eight miles from Duluth, Minn., and points within two miles thereof, to points in Nebraska. The purpose of this filing is to eliminate the gateways of Minneapolis, Minn.

No. MC 108449 (Sub-No. E81), filed May 21, 1974. Applicant: INDIANHEAD TRUCK LINE, INC., 1947 West County Road C, St. Paul, Minnesota, 55113. Applicant's representative: W. A. Myllenbeck (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Petroleum* and *petroleum products*, as described in Appendix XIII to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209, in bulk, in tank vehicles, from the site of the Duluth Petroleum Products terminal, about eight miles from Duluth, Minn., and points within two miles thereof, to points in Montana. The purpose of this filing is to eliminate the gateway of Jamestown, N. Dak.

No. MC 108449 (Sub-No. E82), filed May 21, 1974. Applicant: INDIANHEAD TRUCK LINE, INC., 1947 West County Road C, St. Paul, Minnesota, 55113. Applicant's representative: W. A. Myllenbeck (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Petroleum* and *petroleum products*, as described in Appendix XIII to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209, in bulk, in tank vehicles, to points in Iowa. The purpose of this filing is to eliminate the gateway of St. Paul, Minn.

No. MC 109692 (Sub-No. E2), filed January 31, 1975. Applicant: GRAIN BELT TRANSPORTATION CO., 340 North James St., Kansas City, Kans. 66118. Applicant's representative: Lucy Kennard Bell, Suite 910 Fairfax Bldg., 101 W. Eleventh St., Kansas City, Mo. 64105. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except those of unusual value, Class A and B explosives, perishable commodities, liquid commodities in bulk, household goods as defined by the Commission, and commodities requiring special equipment), between Kansas City, Kans., Kansas City, Mo., and St. Joseph, Mo., on the one hand, and, on the other, points in that part of Nebraska on and west of a line beginning at the adjoining county lines of Pawnee and Gage Counties., Nebr., at the Kansas-Nebraska State line, thence north to its junction with Nebraska Highway 8 near Liberty, Nebr., thence along Nebraska Highway 8 to junction Nebraska Highway 5–34A, thence along Nebraska Highway 5–34A to junction Nebraska Highway 4, thence along Nebraska Highway 4 to junction U.S. Highway 136, thence along U.S. Highway 136 to junction Nebraska unnumbered highway at Filley, Nebr., thence along Nebraska unnumbered highway to junction Nebraska Highway 41, thence along Nebraska Highway 41 to junction Nebraska Highway 43, thence along Nebraska Highway 43 to junction Nebraska Highway 2, thence along Nebraska Highway 2 to junction Nebraska Highway 43, thence along Nebraska Highway 43 to junction U.S. Highway 34, thence along U.S. Highway 34 to junction Nebraska Highway S–13B, thence along Nebraska Highway S–13B to junction U.S. Highway 6, thence along U.S. Highway 6 to junction

Nebraska Highway 31, thence along Nebraska Highway 31 to junction Nebraska Highway 36, thence along Nebraska Highway 36 to junction Nebraska unnumbered highway 2 miles east of Arlington, Nebr., thence along Nebraska unnumbered highway to junction Nebraska unnumbered highway four miles north of Spiker, Nebr., thence along Nebraska unnumbered highway to junction Nebraska unnumbered highway eight miles west of Herman, Nebr., thence along Nebraska unnumbered highway to junction U.S. Highway 73 at Macy, Nebr., and thence north on an imaginary line from Macy, Nebr., to the Nebraska-Iowa State line. The purpose of this filing is to eliminate the gateways of Hollenburg, Kans., and points in Nebraska and Kansas within 20 miles thereof and Lanham, Nebr., and points in Nebraska within 15 miles thereof.

No. MC 110817 (Sub-No. E6), filed May 13, 1974. Applicant: E. L. FARMER & COMPANY, Odessa, Tex. Applicant's representative: James W. Hightower, 136 Wynnewood Professional Bldg., Dallas, Tex. 75224. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Machinery, materials, supplies*, and *equipment*, incidental to, or used in, the construction, development, operation, and maintenance of facilities for the discovery, development, and production of natural gas and petroleum, except the picking up or stringing of pipe in connection with main or trunk pipelines; (2) *Earth drilling machinery* and *equipment*, and *machinery, equipment, materials, supplies*, and *pipe* incidental to, used in, or in connection with (a) the transportation, installation, removal, operation, repair, servicing, maintenance, and dismantling of drilling machinery and equipment, (b) the completion of holes or wells drilled, (c) the production, storage, and transmission of commodities resulting from drilling operations at well or hole sites, and (d) the injection or removal of commodities to or from holes or wells; and (3) *Machinery, equipment, materials*, and *supplies* used in or in connection with the construction, operation, repair, servicing, maintenance, and dismantling of pipelines, other than pipelines used for the transmission of natural gas, petroleum, their products, and by-products, water, or sewerage, restricted to the transportation of shipments moving to or from pipeline rights of way, between points in Nevada, on the one hand, and, on the other, points in Alabama. The purpose of this filing is to eliminate the gateway of any point in Oklahoma or Texas.

No. MC 110817 (Sub-No. E8), filed May 13, 1974. Applicant: E. L. FARMER & COMPANY, Odessa, Tex. Applicant's representative: James W. Hightower, 136 Wynnewood Professional Bldg., Dallas, Tex. 75224. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Machinery*, materials, supplies, and equipment incidental to, or used in, the construction, development, operation, and maintenance of facilities for the discovery, development, and production of natural gas and petroleum, except the picking up or stringing of pipe in connection with main or trunk pipe lines; (2) *Earth* drilling machinery and equipment, and machinery, equipment, materials, supplies, and pipe incidental to, used in, or in connection with (a) the transportation, installation, removal, operation, repair, servicing, maintenance, and dismantling of drilling machinery and equipment, (b) the completion of holes or wells drilled, (c) the production, storage, and transmission of commodities resulting from drilling operations at well or hole sites, and (d) the injection or removal of commodities to or from holes or wells; and (3) *Machinery, equipment, materials*, and *supplies* used in or in connection with the construction, operation, repair, servicing, maintenance, and dismantling of pipelines, other than pipelines used for the transmission of natural gas, petroleum, their products, and by-products, water, or sewerage, restricted to the transportation of shipments moving to or from pipeline rights of way, between points in Mississippi, on the one hand, and, on the other, points in Nevada. The purpose of this filing is to eliminate the gateway of any point in Oklahoma or Texas.

No. MC 110817 (Sub-No. E7), filed May 13, 1974. Applicant: E. L. FARMER & COMPANY, Odessa, Tex. Applicant's representative: James W. Hightower, 136 Wynnewood Professional Bldg., Dallas, Tex. 75224. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Machinery, materials, supplies*, and *equipment*, incidental to, or used in, the construction, development, operation, and maintenance of facilities for the discovery, development, and production of natural gas and petroleum, except the picking up or stringing of pipe in connection with main or trunk pipe lines; (2) *Earth drilling machinery* and *equipment*, and *machinery, equipment, materials, supplies*, and *pipe* incidental to, used in, or in connection with (a) the transportation, installation, removal, operation, repair, servicing, maintenance, and dismantling of drilling machinery and equipment, (b) the completion of holes or wells drilled, (c) the production, storage, and transmission of commodities resulting from drilling operations at well or hole sites, and (d) the injection or removal of commodities to or from holes or wells; and (3) *Machinery, equipment, materials*, and *supplies* used in or in connection with the construction, operation, repair, servicing, maintenance, and dismantling of pipelines, other than pipelines used for the transmission of natural gas, petroleum, their products, and by-products, water, or sewerage, restricted to the transportation of shipments moving to or from pipeline rights of way, between points in Florida, on the one hand, and, on the other, points in Nevada. The purpose of this filing is to eliminate the gateways of (1) any point in Mississippi, and (2) any point in Texas or Oklahoma.

No. MC 110817 (Sub-No. E9), filed May 13, 1974. Applicant: E. L. FARMER & COMPANY, Odessa, Tex. Applicant's representative: James W. Hightower, 136 Wynnewood Professional Bldg., Dallas, Tex. 75224. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Machinery, materials, supplies*, and *equipment* incidental to, or used in, the construction, development, operation, and maintenance of facilities for the discovery, development, and production of natural gas and petroleum; (2) *Earth drilling machinery* and *equipment*, and *machinery, equipment, materials, supplies*, and *pipe* incidental to, used in, or in connection with (a) the transportation, installation, removal, operation, repair, servicing, maintenance, and dismantling of drilling machinery and equipment, (b) the completion of holes or wells drilled, (c) the production, storage, and transmission of commodities resulting from drilling operations at well or hole sites, and (d) the injection or removal of commodities to or from holes or wells; and (3) *Machinery, equipment, materials*, and *supplies* used in or in connection with the construction, operation, repair, servicing, maintenance, and dismantling of pipelines, other than pipelines used for the transmission of natural gas, petroleum, their products, and by-products, water, or sewerage, restricted to the transportation of shipments moving to or from pipeline rights of way, between points in Arizona. The purpose of this filing is to eliminate the gateway of any point in Texas.

No. MC 110817 (Sub-No. E10), filed May 13, 1974. Applicant: E. L. FARMER & COMPANY, Odessa, Tex. Applicant's representative: James W. Hightower, 136 Wynnewood Professional Bldg., Dallas, Tex. 75224. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Machinery, materials, supplies*, and *equipment* incidental to, or used in, the construction, development, operation, and maintenance of facilities for the discovery, development, and production of natural gas and petroleum; (2) *Earth drilling machinery* and *equipment*, and *machinery, equipment, materials, supplies*, and *pipe* incidental to, used in, or in connection with (a) the transportation, installation, removal, operation, repair, servicing, maintenance, and dismantling of drilling machinery and equipment, (b) the completion of holes or wells drilled, (c) the production, storage, and transmission of commodities resulting from drilling operations at well or hole sites, and (d) the injection or removal of commodities to or from holes or wells; and (3) *Machinery, equipment, materials*, and *supplies*, used in or in connection with the construction, operation, repair, servicing, maintenance, and dismantling of pipelines, other than pipelines used for the transmission of natural gas, petroleum, their products, and by-products, water, or sewerage, restricted to the transportation of shipments moving to or from pipeline rights

of way, between points in Florida, on the one hand, and, on the other, points in Illinois and Missouri. The purpose of this filing is to eliminate the gateway of any point in Alabama.

No. MC 110817 (Sub-No. E11), filed May 13, 1974. Applicant: E. L. FARMER & COMPANY, Odessa, Tex. Applicant's representative: James W. Hightower, 136 Wynnewood Profesional Bldg., Dallas, Tex. 75224. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Machinery, materials, supplies*, and *equipment* incidental to, or used in, the construction, development, operation, and maintenance of facilities for the discovery, development, and production of natural gas and petroleum; (2) *Earth drilling machinery* and *equipment* and *machinery, equipment, materials, supplies*, and *pipe* incidental to, used in, or in connection with (a) the transportation, installation, removal, operation, repair, servicing, maintenance, and dismantling of drilling machinery and equipment, (b) the completion of holes or wells drilled, (c) the production, storage, and transmission of commodities resulting from drilling operations at well or hole sites, and (d) the injection or removal of commodities to or from holes or wells; and (3) *Machinery, equipment, materials*, and *supplies*, used in or in connection with the construction, operation, repair, servicing, maintenance, and dismantling of pipelines, other than pipelines used for the transmission of natural gas, petroleum, their products, and by-products, water, or sewerage, restricted to the transportation of shipments moving to or from pipeline rights of way, between points in Arkansas on the one hand, and, on the other, points in Utah. The purpose of this filing is to eliminate the gateway of any point in Texas or Oklahoma.

No. MC 110817 (Sub-No. E12), filed May 13, 1974. Applicant: E. L. FARMER & COMPANY, Odessa, Tex. Applicant's representative: James W. Hightower, 136 Wynnewood Professional Bldg., Dallas, Tex. 75224. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Machinery, materials, supplies*, and *equipment*, incidental to, or used in, the construction, development, operation, and maintenance of facilities for the discovery, development, and production of natural gas and petroleum; (2) *Earth drilling machinery* and *equipment*, and *machinery, equipment, materials, supplies*, and *pipe* incidental to, used in, or in connection with (a) the transportation, installation, removal, operation, repair, servicing, maintenance, and dismantling of drilling machinery and equipment, (b) the completion of holes or wells drilled, (c) the production, storage, and transmission of commodities resulting from drilling operations at well or hole sites, and (d) the injection or removal of commodities to or from holes or wells; and (3) *Machinery, equipment, materials, and supplies* used in or in connection with the construction, operation, repair, servicing, maintenance, and dismantling of pipelines, other than pipelines used for the transmission of natural gas, petroleum, their products, and by-products, water, or sewerage, restricted to the transportation of shipments moving to or from pipeline rights of way, between points in Mississippi, on the one hand, and, on the other, points in Utah. The purpose of this filing is to eliminate the gateway of any point in Oklahoma or Texas.

No. MC 110817 (Sub-No. E13), filed May 13, 1974. Applicant: E. L. FARMER & COMPANY, Odessa, Tex. Applicant's representative: James W. Hightower, 136 Wynnewood Professional Bldg., Dallas, Tex. 75224. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Machinery*, materials, supplies, and equipment, incidental to, or used in, the construction, development, operation, and maintenance of facilities for the discovery, development, and production of natural gas and petroluem; (2) Earth drilling machinery and equipment, and machinery, equipment, materials, supplies, and pipe incidental to, used in, or in connection with (a) the transportation, installation, removal, operation, repair, servicing, maintenance, and dismantling of drilling machinery and equipment, (b) the completion of holes or wells drilled, (c) the production, storage, and transmission of commodities resulting from drilling operations at well or hole sites, and (d) the injection or removal of commodities to or from holes or wells; and (3) *Machinery, equipment, materials*, and *supplies* used in or in connection with the construction, operation, repair, servicing, maintenance, and dismantling of pipelines, other than pipelines used for the transmission of natural gas, petroleum, their products, and by-products, water, or sewerage, restricted to the transportation of shipments moving to or from pipeline rights-of-way, between points in Louisiana, on the one hand, and, on the other, points in Utah. The purpose of this filing is to eliminate the gateway of any point in Texas or Oklahoma.

No. MC 110817 (Sub-No. E14), filed May 13, 1974. Applicant: E. L. FARMER & COMPANY, Odessa, Tex. Applicant's representative: James W. Hightower, 136 Wynnewood Professional Bldg., Dallas, Tex. 75224. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Machinery, materials, supplies*, and *equipment*, incidental to, or used in, the construction, development, operation, and maintenance of facilities for the discovery, development, and production of natural gas and petroleum; (2) *Earth drilling machinery* and *equipment*, and *machinery, equipment, materials, supplies*, and *pipe* incidental to, used in, or in connection with (a) the transportation, installation, removal, operation, repair, servicing, maintenance, and dismantling of drilling machinery and equipment, (b) the completion of holes or wells drilled, (c) the production, storage, and transmission of commodities resulting from drilling operations at well or hole sites, and (d) the injection or removal of commodities to or from holes or wells; and (3) *Machinery, equipment, materials*, and *supplies* used in or in connection with the construction, operation, repair, servicing, maintenance, and dismantling of pipelines, other than pipelines used for the transmission of natural gas, petroleum, their products, and by-products, water, or sewerage, restricted to the transportation of shipments moving to or from pipeline rights of way, between points in Alabama, on the one hand, and, on the other, points in Utah. The purpose of this filing is to eliminate the gateway of any point in Texas or Oklahoma.

No. MC 110817 (Sub-No. E15), filed May 13, 1974. Applicant: E. L. FARMER & COMPANY, Odessa, Tex. Applicant's representative: James W. Hightower, 136 Wynnewood Professional Bldg., Dallas, Tex. 75224. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Machinery*, materials, supplies, and equipment, incidental to, or used in, the construction, development, operation, and maintenance of facilities for the discovery, development, and production of natural gas and petroleum; (2) *Earth drilling machinery* and *equipment*, and *machinery, equipment, materials, supplies*, and *pipe* incidental to, used in, or in connection with (a) the transportation, installation, removal, operation, repair, servicing, maintenance, and dismantling of drilling machinery and equipment, (b) the completion of holes or wells drilled, (c) the production, storage, and transmission of commodities resulting from drilling operations at well or hole sites, and (d) the injection or removal of commodities to or from holes or wells; and (3) *Machinery, equipment, materials*, and *supplies* used in or in connection with the construction, operation, repair, servicing, maintenance, and dismantling of pipelines, other than pipelines used for the transmission of natural gas, petroleum, their products, and by-products, water, or sewerage, restricted to the transportation of shipments moving to or from pipeline rights of way, between points in Florida, on the one hand, and, on the other, points in Utah. The purpose of this filing is to eliminate the gateway of any point in Texas or Oklahoma.

No. MC 110817 (Sub-No. E31), filed May 13, 1974. Applicant: E. L. FARMER & COMPANY, Odessa, Tex. Applicant's representative: James W. Hightower, 136 Wynnewood Professional Building, Dallas, Tex. 75224. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Machinery, equipment, materials*, and *supplies* used in, or in connection with the discovery, development, production, refining, manufacture, processing, storage, transmission, and distribution of natural gas and petroleum and their products and by-products; and *machinery, equipment, materials*, and supplies used in, or in connection with the construction, operation, repair, servicing, maintenance, and dismantling of pipelines (including the stringing and picking up thereof), (2) *Earth drilling machinery and equipment, and machinery, equipment, materials, supplies and pipe* incidental to, used in, or in connection with (a) the transportation, installation, removal, operation, repair, servicing, maintenance, and dismantling of drilling machinery and equipment; (b) the completion of holes or wells drilled; (c) the production, storage, and transmission of commodities resulting from drilling operations at well or hole sites; and (d) the injection or removal of commodities to or from holes or wells; (3) *Machinery, equipment, materials, and supplies*, used in, or in connection with the construction, operation, repair, servicing, maintenance, and dismantling of pipelines, other than pipelines used for the transmission of natural gas and petroleum and their products and by-products, water, or sewerage, restricted to the transportation of shipments moving to or from pipeline rights-of-way, between points in Florida, on the one hand, and, on the other, points in Montana. The purpose of this filing is to eliminate the gateway of any point in Texas.

No. MC 110817 (Sub-No. E32), filed May 13, 1974. Applicant: E. L. FARMER & COMPANY, Odessa, Tex. Applicant's representative: James W. Hightower, 136 Wynnewood Professional Building, Dallas, Tex. 75224. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Machinery, equipment, materials, and supplies* used in, or in connection with the discovery, development, production, refining, manufacture, processing, storage, transmission and distribution of natural gas and petroleum and their products and by-products, and and *machinery, equipment, materials* and *supplies* used in, or in connection with the construction, operation, repair, servicing, maintenance, and dismantling of pipelines (including the stringing and picking up thereof), (2) *Earth drilling machinery and equipment, and machinery, equipment, materials*, and *supplies and pipe* incidental to, used in, or in connection with (a) the transportation, installation, removal, operation, repair, servicing, maintenance, and dismantling of drilling machinery and equipment; (b) the completion of holes or wells drilled; (c) the production, storage, and transmission of commodities resulting from drilling operations at well or hole sites; and (d) the injection or removal of commodities to or from holes or wells; (3) *Machinery, equipment, materials, and supplies*, used in, or in connection with the construction, operation, repair, servicing, maintenance, and dismantling of pipelines, other than pipelines used for the transmission of natural gas, petroleum, their products and by-products, water, or sewerage, restricted to the transportation of shipments moving to or from pipeline rights-of-way, between points in Alabama, on the one hand, and, on the other, points in Louisiana. The purpose of this filing is to eliminate the gateway of any point in Texas.

No. MC 110817 (Sub-No. E33), filed May 13, 1974. Applicant: E. L. FARMER & COMPANY, Odessa, Tex. Applicant's representative: James W. Hightower, 136 Wynnewood Professional Building, Dallas, Tex. 75224. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Machinery, equipment, materials, and supplies*, used in, or in connection with the discovery, development, production, refining, manufacture, processing, storage, transmission, and distribution of natural gas and petroleum and their products and by-products, and machinery, equipment, materials, and supplies used in, or in connection with the construction, operation, repair, servicing, maintenance, and dismantling of pipelines (including the stringing and picking up thereof); (2) *earth drilling machinery and equipment, and machinery, equipment, materials, supplies and pipe* incidental to, used in, or in connection with (a) the transportation, installation, removal, operation, repair, servicing, maintenance, and dismantling of drilling machinery and equipment; (b) the completion of holes or wells drilled; (c) the production, storage, and transmission of commodities resulting from drilling operations at well or hole sites; and (d) the injection or removal of commodities to or from holes or wells; (3) *machinery, equipment, materials, and supplies*, used in, or in connection with the construction, operation, repair, servicing, maintenance, and dismantling of pipelines, other than pipelines used for the transmission of natural gas, petroleum, their products and by-products, water, or sewerage, restricted to the transportation of shipments moving to or from pipeline rights-of-way, between points in Florida, on the one hand, and, on the other, points in Montana. The purpose of this filing is to eliminate the gateway of any point in Texas.

No. MC 110817 (Sub-No. E34), filed May 13, 1974. Applicant: E. L. FARMER & COMPANY, Odessa, Tex. Applicant's representative: James W. Hightower, 136 Wynnewood Professional Bldg., Dallas, Tex. 75224. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Machinery, equipment, materials, and supplies* used in, or in connection with the discovery, development, production, refining, manufacture, processing, storage, transmission, and distribution of natural gas and petroleum and their products and by-products; and machinery, equipment, materials, and supplies used in, or in connection with the construction, operation, repair, servicing, maintenance, and dismantling of pipelines (including the stringing and picking up thereof); (2) *earth drilling machinery and equipment*, and *machinery, equipment, materials, supplies and pipe* incidental to, used in, or in connection with (a) the transportation, installation, removal, operation, repair, servicing, maintenance, and dismantling of drilling machinery and equipment; (b) the completion of holes or wells drilled; (c) the production, storage, and transmission of commodities resulting from drilling operations at well or hole sites; and (d) the injection or removal of commodities to or from holes or wells; (3) *machinery, equipment, materials, and supplies*, used in, or in connection with the construction, operation, repair, servicing, maintenance, and dismantling of pipelines, other than pipelines used for the transmission of natural gas, petroleum, their products and by-products, water, or sewerage, restricted to the transportation of shipments moving to or from pipeline rights-of-way, between points in Oklahoma, on the one hand, and, on the other, points in Montana. The purpose of this filing is to eliminate the gateway of any point in Texas.

No. MC 110817 (Sub-No. E36), filed May 13, 1974. Applicant: E. L. FARMER & COMPANY, Odessa, Tex. Applicant's representative: James W. Hightower, 136 Wynnewood Professional Bldg., Dallas, Tex. 75224. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Machinery, materials, supplies and equipment*, incidental to, or used in, the construction, development, operation, and maintenance of facilities for the discovery, development, and production of natural gas and petroleum; (2) *earth drilling machinery and equipment*, and *machinery, equipment, materials, supplies and pipe* incidental to, used in, or in connection with (a) the transportation, installation, removal, operation, repair, servicing, maintenance, and dismantling of drilling machinery and equipment; (b) the completion of holes or wells drilled; (c) the production, storage, and transmission of commodities resulting from drilling operations at well or hole sites; and (d) the injection or removal of commodities to or from holes or wells; (3) *machinery, equipment, materials*, and supplies, used in, or in connection with the construction, operation, repair, servicing, maintenance, and dismantling of pipelines, other than pipelines used for the transmission of natural gas, petroleum, their products and by-products, water, or sewerage, restricted to the transportation of shipments moving to or from pipeline rights-of-way, between points in Illinois, on the one hand, and, on the other, points in New Mexico. The purpose of this filing is to eliminate the gateway of any point in Texas or Oklahoma.

No. MC 110817 (Sub-No. E37), filed May 13, 1974. Applicant: E. L. FARMER & COMPANY, Odessa, Tex. Applicant's representative: James W. Hightower, 136 Wynnewood Professional Bldg., Dallas, Tex. 75224. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Machinery, materials, supplies and equipment*, incidental to, or used in the construction, development, operation, and maintenance of facilities for the discovery, development, and production of natural gas and petroleum; (2) *earth drilling machinery and equipment*, and *machinery, equipment, materials, supplies and pipe* incidental to, used in, or in connection with (a) the transportation, installation, removal, operation, repair, servicing, maintenance, and dismantling of drilling machinery and equipment; (b) the completion of holes or wells drilled; (c) the production, storage, and transmission of commodities resulting from drilling operations at well or hole sites; and (d) the injection or removal of commodities to or from holes or wells; (3) *machinery, equipment, materials, and supplies*, used in, or in connection with the construction, operation, repair, servicing, maintenance, and dismantling of pipelines, other than pipelines used for the transmission of natural gas, petroleum, their products and by-products, water, or sewerage, restricted to the transportation of shipments moving to or from pipeline rights-of-way, between points in Tennessee, on the one hand, and, on the other, points in New Mexico. The purpose of this filing is to eliminate the gateway of any point in Texas or Oklahoma.

No. MC 110817 (Sub-No. E38), filed May 13, 1974. Applicant: E. L. FARMER & COMPANY, Odessa, Tex. Applicant's representative: James W. Hightower, 136 Wynnewood Professional Bldg., Dallas, Tex. 75224. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Machinery, materials, supplies and equipment*, incidental to, or used in, the construction, development, operation, and maintenance of facilities for the discovery, development, and production of natural gas and petroleum; (2) *earth drilling machinery and equipment*, and *machinery, equipment, materials, supplies and pipe* incidental to, used in, or in connection with (a) the transportation, installation, removal, operation, repair, servicing, maintenance, and dismantling of drilling machinery and equipment; (b) the completion of holes or wells drilled; (c) the production, storage, and transmission of commodities resulting from drilling operations at well or hole sites; and (d) the injection or removal of commodities to or from holes or wells; (3) *machinery, equipment, materials*, and supplies, used in, or in connection with the construction, operation, repair, servicing, maintenance, and dismantling of pipelines, other than pipelines used for the transmission of natural gas, petroleum, their products and by-products, water, or sewerage, restricted to the transportation of shipments moving to or from pipeline rights-of-way, between points in Missouri, on the one hand, and, on the other, points in New Mexico. The purpose of this filing is to eliminate the gateway of any point in Texas or Oklahoma.

No. MC 110817 (Sub-No. E39), filed May 13, 1974. Applicant: E. L. FARMER & COMPANY, Odessa, Tex. Applicant's representative: James W. Hightower, 136 Wynnewood Professional Bldg., Dallas, Tex. 75224. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Machinery, materials, supplies and equipment*, incidental to, or used in, the construction, development, operation, and maintenance of facilities for the discovery, development, and production of natural gas and petroleum; (2) *earth drilling machinery and equipment*, and *machinery, equipment, materials, supplies and pipe* incidental to, used in, or in connection with (a) the transportation, installation, removal, operation, repair, servicing, maintenance, and dismantling of drilling machinery and equipment; (b) the completion of holes or wells drilled; (c) the production, storage, and transmission of commodities resulting from drilling operations at well or hole sites; and (d) the injection or removal of commodities to or from holes or wells; (3) *machinery, equipment, materials, and supplies*, used in, or in connection with the construction, operation, repair, servicing, maintenance, and dismantling of pipelines, other than pipelines used for the transmission of natural gas, petroleum, their products and by-products, water, or sewerage, restricted to the transportation of shipments moving to or from pipeline rights-of-way, between points in Tennessee, on the one hand, and, on the other, points in Arizona. The purpose of this filing is to eliminate the gateway of any point in Texas or Oklahoma.

No. MC 110817 (Sub-No. E40), filed May 13, 1974. Applicant: E. L. FARMER & COMPANY, Odessa, Tex. Applicant's representative: James W. Hightower, 136 Wynnewood Professional Bldg., Dallas, Tex. 75224. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Machinery, materials, supplies and equipment*, incidental to, or used in, the construction, development, operation, and maintenance of facilities for the discovery, development, and production of natural gas and petroleum; (2) earth *drilling machinery and equipment*, and *machinery, equipment, materials, supplies and pipe* incidental to, used in, or in connection with (a) the transportation, installation, removal, operation, repair, servicing, maintenance, and dismantling of drilling machinery and equipment; (b) the completion of holes or wells drilled; (c) the production, storage, and transmission of commodities resulting from drilling operations at well or hole sites; and (d) the injection or removal of commodities to or from holes or wells; (3) *machinery, equipment, materials, and supplies*, used in, or in connection with the construction, operation, repair, servicing, maintenance, and dismantling of pipelines, other than pipelines used for the transmission of natural gas, petroleum, their products and by-products, water, or sewerage, restricted to the transportation of shipments moving to or from pipeline rights-of-way, between points in Missouri, on the one hand, and, on the other, points in Arizona. The purpose of this filing is to eliminate the gateways of any point in Texas or Oklahoma.

No. MC 110817 (Sub-No. E41), filed May 13, 1974. Applicant: E. L. FARMER & COMPANY, Odessa, Tex. Applicant's representative: James W. Hightower, 136 Wynnewood Professional Bldg., Dallas, Tex. 75224. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Machinery, materials supplies and equipment*, incidental to, or used in, the construction, development, operation, and maintenance of facilities for the discovery, development, and production of natural gas and petroleum; (2) *earth drilling machinery and equipment*, and *machinery, equipment, materials, supplies and pipe* incidental to, used in, or in connection with (a) the transportation, installation, removal, operation, repair, servicing, maintenance, and dismantling of drilling machinery and

equipment; (b) the completion of holes or wells drilled; (c) the production, storage, and transmission of commodities resulting from drilling operations at well or hole sites; and (d) the injection or removal of commodities to or from holes or wells; (3) *machinery, equipment, materials, and supplies*, used in, or in connection with the construction, operation, repair, servicing, maintenance, and dismantling of pipelines, other than pipelines used for the transmission of natural gas, petroleum, their products and by-products, water, or sewerage, restricted to the transportation of shipments moving to or from pipeline rights-of-way, between points in Illinois, on the one hand, and, on the other, points in Arizona. The purpose of this filing is to eliminate the gateways of any point in Texas or Oklahoma.

No. MC 110817 (Sub-No. E42), filed May 13, 1974. Applicant: E. L. FARMER & COMPANY, Odessa, Tex. Applicant's representative: James W. Hightower, 136 Wynnewood Professional Bldg., Dallas, Tex. 75224. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Machinery, materials, supplies and equipment*, incidental to, or used in, the construction, development, operation, and maintenance of facilities for the discovery, development, and production of natural gas and petroleum; (2) *earth drilling machinery and equipment*, and *machinery, equipment, materials, supplies and pipe*, incidental to, used in, or in connection with (a) the transportation, installation, removal, operation, repair, servicing, maintenance, and dismantling of drilling machinery and equipment; (b) the completion of holes or wells drilled; (c) the production, storage, and transmission of commodities resulting from drilling operations at well or hole sites; and (d) the injection or removal of commodities to or from holes or wells; (3) *machinery, equipment, materials, and supplies*, used in, or in connection with the construction, operation, repair, servicing, maintenance, and dismantling of pipelines, other than pipelines used for the transmission of natural gas, petroleum, their products and by-products, water, or sewerage, restricted to the transportation of shipments moving to or from pipeline rights-of-way, between points in Tennessee, on the one hand, and, on the other, points in Utah. The purpose of this filing is to eliminate the gateways of any point in Texas or Oklahoma.

By the Commission.

[SEAL] ROBERT L. OSWALD, *Secretary.*

Title 24—Housing and Urban Development

CHAPTER VIII—LOW INCOME HOUSING, DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. R-75-823]

PART 889—SECTION 8 HOUSING ASSISTANCE PAYMENTS PROGRAM—DETERMINATION OF INCOME FOR ELIGIBILITY AND GROSS FAMILY CONTRIBUTION

Interim Regulations

The Department of Housing and Urban Development (HUD) is hereby publishing interim regulations to amend Title 24 of the Code of Federal Regulations by adding a new Part 889 to Chapter VIII. HUD is rearranging and renumbering the other Parts within Chapter VIII; therefore all references below are to the new Part numbers.

Part 889 sets forth the policies and procedures for making the following determinations with respect to Eligible Families under the Section 8 Housing Assistance Payments Program: (1) The Family's Annual Income (as defined in § 889.102 of the regulations) for purposes of determining whether the Family is a Lower-Income Family or a Very Low-Income Family (as defined in § 889.102 of the regulations), and (2) the portion of the Family's Annual Income to be paid by the Family (Gross Family Contribution) under the Section 8 Program. These policies and procedures will be applicable in making such determinations for purposes of initial occupancy as well as in connection with periodic or interim reexamination of Family income, composition, and the extent of medical or other unusual expenses.

The method for determination of the Gross Family Contribution under this Part 889 results in an annual Gross Family Contribution for each Eligible Family in an amount equal to 15 to 25 percent of the Family's Annual Income. The actual percentage, or Gross Family Contribution rate, will vary with the Family's Annual Income, number of Minors and extent of Medical Expenses and Unusual Expenses.

HUD has determined that the public interest would be served by making the provisions of Part 889 effective upon publication to avoid unnecessary delay in the implementation of the Section 8 Housing Assistance Payments Program. Therefore, HUD has found that good cause exists for making these regulations effective upon publication on an interim basis.

Written comments and suggestions will be received until May 6, 1975. HUD will make such modifications as it deems appropriate in the final regulations. Comments should be submitted to the Rules Docket Clerk, Office of the General Counsel, Room 10245, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, D.C., 20410. A copy of each communication will be available for public inspection during regular business hours at the above address.

A Finding of Inapplicability respecting the National Environmental Policy Act of 1969 has been made in accordance with HUD procedures. A copy of this Finding of Inapplicability will be available for public inspection during regular business hours at the address set forth in the preceding paragraph.

Accordingly, the interim regulations shall read as follows:

Sec.
889.101 General.
889.102 Definitions.
889.103 Determination of income for eligibility.
889.104 Computation of annual income.
889.105 Computation of gross family contribution on a monthly basis.

AUTHORITY: Sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)); sec. 5(b) of U.S. Housing Act of 1937 (42 U.S.C. 1437 c(b)); sec. 8 of U.S. Housing Act of 1937 (42 U.S.C. 1437(f)).

§ 889.101 General.

(a) *Purpose and scope.* This Part sets forth the policies and procedures for determining Income for Eligibility, including Very Low-Income Family determinations, and the Gross Family Contribution for Eligible Families under the Section 8 Housing Assistance Payments Program—New Construction (24 CFR, Part 880), Substantial Rehabilitation, (24 CFR, Part 881), Existing Housing (24 CFR, Part 882) and Housing Finance and Development Agencies (24 CFR, Part 883). These policies and procedures shall be applicable in making such determinations for purposes of initial occupancy as well as in connection with periodic or interim reexaminations of Family income, composition, and the extent of medical or other unusual expenses.

(b) *Method for determining portion of family's annual income to be paid by family.* The method for determining the portion of the Family's Annual Income to be paid by the Family (Gross Family Contribution) under this Part 889 results in an annual Gross Family Contribution for each Eligible Family in an amount equal to 15 to 25 percent of the Family's Annual Income. The actual percentage, or Gross Family Contribution rate, will vary with the Family's Annual Income, number of Minors and extent of Medical Expenses and Unusual Expenses.

§ 889.102 Definitions.

Annual income. The anticipated total annual income of an Eligible Family from all sources for the 12-month period following the date of determination of income, computed in accordance with § 889.104.

Annual income after allowances. The Annual Income less:

(a) $300 for each Minor, and

(b) Medical expenses which exceed 3 percent of the Annual Income, and

(c) Unusual expenses.

Eligible family. See 24 CFR, 880.102, 881.102, 882.102, and 883.202, respectively.

Exceptional medical or other expenses. Medical Expenses, and/or Unusual Expenses, as defined in this section, which exceed 25 percent of the Annual Income.

Gross family contribution. See 24 CFR, 880.102, 881.102, 882.102, and 883.202, respectively.

HUD. The Department of Housing and Urban Development or its designee.

Income for eligibility. The anticipated total annual income of a family for the 12-month period following the date of determination of income, computed in accordance with § 889.103.

Large very low-income family. A very low-income family which includes six or more Minors.

Lower-income family. A Family whose income does not exceed 80 percent of the median income for the area as determined by HUD with adjustments for smaller or larger Families, except that HUD may establish income limits higher or lower than 80 percent on the basis of its findings that such variations are necessary because of the prevailing levels of construction costs, unusually high or low incomes, or other factors.

Medical expenses. Those medical expenses which are to be anticipated during the 12-month period for which the Annual Income is computed, and which are not covered by insurance (however, premiums for such insurance may be included as medical expenses).

Minor. A member of the Family household (excluding foster children) other than the Family head or spouse, who is under 18 years of age or is a full-time student.

Monthly income. One-twelfth of the annual income.

Monthly income after allowances. One-twelfth of the Annual Income After Allowances.

Public assistance. Welfare or other payments to families or individuals, based on need, which are made under programs funded, separately or jointly, by Federal, State or local governments.

Unusual expenses. Amounts paid by the Family for the care of Minors under 13 years of age or for the care of disabled or handicapped Family household members, but only where such care is necessary to enable a Family member to be gainfully employed, and the amount allowable as Unusual Expenses shall not exceed the amount of income from such employment.

Very large lower-income family. A lower-income family which includes eight or more Minors.

Very low-income family. A Family whose incomes does not exceed 50 percent of the median income for the area, as determined by HUD, with adjustments for smaller or larger Families.

§ 889.103 Determination of income for eligibility.

For purposes of determining whether a Family is a Lower-Income Family or a Very Low-Income Family, income shall be determined in accordance with § 889.104, except that where a family has Net Family Assets in excess of $5,000, income shall include the actual amount of income, if any, derived from all of the Net Family Assets or 10 percent of the value of all such assets, whichever is greater. For purposes of this section, Net Family Assets means value of equity in real property, savings, stocks, bonds, and other forms of capital investment. The value of necessary items such as furniture and automobiles shall be excluded.

§ 889.104 Computation of annual income.

(a) Except as provided in paragraph (b) of this section, all payments from all sources received by the Family head (even if temporarily absent) and each additional member of the Family household who is not a Minor shall be included in the Annual Income of a Family. Income shall include, but not be limited to:

(1) The gross amount, before any payroll deductions, of wages and salaries, overtime pay, commissions, fees, tips and bonuses;

(2) The net income from operation of a business or profession or from rental or real or personal property (for this purpose, expenditures for business expansion or amortization of capital indebtedness shall not be deducted to determine the net income from a business);

(3) Interest and dividends;

(4) The full amount of periodic payments received from social security, annuities, insurance policies, retirement funds, pensions, disability or death benefits and other similar types of periodic receipts;

(5) Payments in lieu of earnings, such as unemployment and disability compensation, workmen's compensation and severance pay (but see paragraph (b) (3) of this section).

(6) Public Assistance. If the Public Assistance payment includes an amount specifically designated for shelter and utilities which is subject to adjustment by the Public Assistance Agency in accordance with the actual cost of shelter and utilities, the amount of Public Assistance income to be included as income shall consist of:

(i) The amount of the allowance or grant exclusive of the amount specifically designated for shelter and utilities, plus

(ii) The maximum amount which the Public Assistance Agency could in fact allow for the Family for shelter and utilities,

(7) Periodic and determinable allowances, such as alimony and child support payments, and regular contributions or gifts received from persons not residing in the dwelling;

(8) All regular pay, special pay and allowances of a member of the Armed Forces (whether or not living in the dwelling) who is head of the Family or spouse (but see paragraph (b) (5) of this section).

(b) The following items shall not be considered as income:

(1) Casual, sporadic or irregular gifts;

(2) Amounts which are specifically for or in reimbursement of the cost of medical expenses;

(3) Lump-sum additions to Family assets, such as inheritances, insurance payments (including payments under health and accident insurance and workmen's compensation), capital gains and settlement for personal or property losses (but see § 889.103);

(4) Amounts of educational scholarships paid directly to the student or to the educational institution, and amounts paid by the Government to a veteran for use in meeting the costs of tuition, fees, books and equipment. Any amounts of such scholarships, or payments to veterans, not used for the above purposes of which are available for subsistence are to be included in income;

(5) The special pay to a serviceman head of a Family away from home and exposed to hostile fire;

(6) Relocation payments made pursuant to Title II of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970;

(7) Foster child care payments;

(8) The value of coupon allotments for the purchase of food pursuant to the Food Stamp Act of 1964 which is in excess of the amount actually charged the eligible household;

(9) Payments received pursuant to participation in the following volunteer programs under the ACTION Agency:

(i) National Volunteer Antipoverty Programs which include VISTA, Service Learning Programs and Special Volunteer Programs.

(ii) National Older American Volunteer Programs for persons aged 60 and over which include Retired Senior Volunteer Programs, Foster Grandparent Program, Older American Community Services Program, and National Volunteer Program to Assist Small Business Experience, Service Corps of Retired Executive (SCORE) and Active Corps of Executives (ACE).

(c) If the circumstances are such that it is not feasible reasonably to anticipate a level of income over a 12-month period, a shorter period may be used subject to a redetermination at the end of such period.

§ 889.105 Computation of gross family contribution on a monthly basis.

(a) *Families for whom contribution is based on 15 percent ratio.* The monthly Gross Family Contribution shall be 15 percent of the Family's Monthly Income if the Family is:

(1) A Large Very Low-Income Family, or

(2) A Very Large Lower-Income Family; or

(3) A Family which has Exceptional Medical or Other Expenses.

(b) *Other eligible families.* In the case of other Eligible Families, the monthly Gross Family Contribution shall be 25 percent of the Family's Monthly Income After Allowances but in no event less than 15 percent of the Family's Monthly Income.

Effective date. These interim regulations shall be effective April 7, 1975.

H. R. CRAWFORD,
Assistant Secretary for Housing Management.

Title 47—Telecommunication

CHAPTER I—FEDERAL COMMUNICATIONS COMMISSION

[Docket Nos. 18893, 19554; FCC 75-369]

PART 73—RADIO BROADCAST SERVICES

PART 76—CABLE TELEVISION SERVICE

Subscription and Conventional TV Operations

In the matter of Part 76, Subpart G, of the Commission's rules and regulations pertaining to the cablecasting of programs for which a per-program or per-channel charge is made, Docket No. 19554; Amendment of §§ 73.643(b)(2) and 74.1121(a)(2) of the Commission's rules and regulations pertaining to the showing of sports events on over-the-air subscription television or by cablecasting, Docket No. 18893.

First report and order.

Introduction

1. This proceeding, commenced by a notice of proposed rulemaking released July 24, 1972,[1] and expanded in scope by a further notice of proposed rulemaking released August 12, 1974,[2] inquiries into how the Commission can best regulate subscription cablecast cable television system operations and over-the-air subscription television stations in the public interest. Or, put more concretely, how can these operations be so regulated that their subscribers receive the maximum quantity, quality, and diversity of programming without the service they receive impairing the service supplied to the viewing public by conventional advertiser supported television broadcast stations.

2. The discussion below is subdivided as follows:

	Para.
Introduction	1
Summary of comments received	23
Broadcast television	25
Broadcast subscription television	47
Cable television	51
Subscription cable television	74
Motion picture and television program production industries	86
Sports interests	104
Theatre owners and operators	119
Miscellaneous individuals and groups	125
Discussion and resolution of proceeding	
Purpose of rules	144
Jurisdiction	147
General discussion	152
Feature film rules	160
Sports rules	186
Series rules	209
Ninety percent advertising rules	212
Application of rules to leased channel programming	214
Preemption of local regulation of subscription television operations	216
Rulemaking proceeding to remain open	218

3. Subscription television broadcasting involves the broadcasting of a scrambled television signal which, on payment of a fee, subscribers are authorized to unscramble. Subscription cablecasting involves the closed-circuit cable television system distribution of non-broadcast programming for which the cable television system subscriber is charged an additional program or channel fee beyond the regular monthly fee for the system's television signal reception service. Subscription cablecasting may either be undertaken by the system operator or by an independent entrepreneur, who contracts with the system operator for the distribution of his programming. The Commission has, in its regulations, distinguished between subscription cablecasting and regular cablecasting for which no additional per-program or per-channel charge is made.

4. Technically, the systems for distributing subscription cablecasting, guarding against unauthorized access to the programming, and billing for it are varied. Perhaps the simplest method is to distribute the programming on one or more of the channels on a cable television system that cannot be received on conventional television receiving sets. Those system subscribers who wish to receive the additional programming are supplied with a device which converts the programming to a channel receivable on a conventional television set. Those ordering the service are typically billed $5–7 monthly for the additional channel of programming received. Other systems in use or under development permit a separate charge to be made for each program viewed. These systems either require the subscriber to purchase a ticket for each program in advance, which, when inserted into the decoding device in the subscriber's home, provides access to the programming or utilizes the return communications capacity of the system or a telephone connection to activate a central computer facility which releases the programming through the subscriber's decoding device and performs the billing functions. At the time of the second oral argument in this proceeding (October 23–25, 1974), there were approximately 100,000 subscribers in the United States receiving pay cable television service.

5. As with subscription cable systems, there are a variety of technical systems under consideration for use in connection with subscription television stations. Whatever the specific configuration of the system, however, it is basically intended to permit access to subscription programming only by those who have paid for it. Although no subscription television station is now on the air broadcasting subscription programming, applications have been granted to permit such operations in Newark, New Jersey; Milwaukee, Wisconsin; and Boston, Massachusetts. Applications are pending to operate subscription stations in a number of other cities.

6. Although pay cable television system operations are of relatively recent origin and there are no operating TV stations, efforts have been in progress for almost forty years to establish a legally, technically, and economically sound system for the mass distribution of feature films and other programming through a system of subscription television. The Commission's concern with subscription television issues dates back to at least 1950, when the WOR–TV facilities in New York City were used for an early pay television test. In 1952, Commission approval for a nationwide system of subscription television was sought. In 1955, a rulemaking proceeding was commenced to look into the matter. In 1961, an experimental over-the-air subscription operation was authorized to operate in Hartford, Connecticut.[3]

7. Debate in these early proceedings appears to have focused largely on the following questions:

If subscription service were instituted, would the public continue to receive the same service it had previously obtained free?

Would part of the public, including especially the poor, be deprived of programming to which it previously had free access?

Would subscription television cause the closing of theatres, sports arenas, concert halls, and other places of public assembly, adding to the decay of urban centers?

Would subscription television operations occupy frequency space that might be better used for other purposes?

Would the advent of pay television operations result in impairment or the total destruction of free broadcast operations?

Would subscription service result in the creation of new and diverse programming?

Would it contain more educational and culturally enlightening programming than is found on free television?

Would it enable people to see movies, sports, and other entertainment in their homes at lower cost than they would incur in going out to see them?

Would the competition provided to conventional television result in an upgrading of the programming found on conventional television?

Is there a public interest in providing a forum for the televising of programming free from the influence of commercial advertisers?

Would it provide a method for distributing programming that did not have mass audience appeal?

Under the free enterprise system, do not program producers have a right to market their product through avenues other than on conventional television?

Would not a system of direct payment television be preferable to a government funded and influenced system of public broadcasting?

Would not the development of a pay system of program distribution help to cut back the network domination of program production and dissemination?

[1] Notice of proposed rulemaking and memorandum opinion and order in Docket 19554, FCC 72–652, 35 FCC 2d 893 (1972).

[2] Further notice of proposed rulemaking and order for oral argument in Docket 19554, FCC 74–878, 48 FCC 2d 453 (1974).

[3] The early history of the Commission's concern with this issue is reflected in the following document: Notice of proposed rulemaking in Docket 11279, FCC 55–165, 20 FR 968 (1955); Notice of further proceeding, FCC 57–530, 22 FR 3758 (1957); First Report in Docket 11279, FCC 57–1153, 23 FCC 532 (1957); Second Report in Docket 11279, FCC 58–182, released February 27, 1968; Third Report in Docket 11279, FCC 59–217, 26 FCC 265 (1959); Further Notice of proposed rulemaking and notice of inquiry in Docket 11279, FCC 66–268, 7 RR 2d 1501, released March 24, 1966; Order setting oral argument and Second further notice of proposed rulemaking in Docket 11279, FCC 67–891, released July 31, 1967; Report to the FCC by its Subscription Television Committee, FCC 67–819, 10 RR 2d 1617, released July 14, 1967.

Would not rules limiting the operation of pay television systems violate the First Amendment?

8. In its Fourth Report and Order in Docket 11279,[4] released in December of 1968, the Commission concluded that subscription television operations subject to appropriate regulation, could add significantly to the quality and diversity of television programming available to the American public and rules were adopted authorizing and regulating over-the-air subscription television station operations.

9. The rules adopted regulating STV operations essentially provided that:

Sports events regularly telecast in the community during the preceding two years may not be shown;

Feature films more than two years old may not be shown, except that 12 films a year that are more than 10 years old may be shown;

No series type of program may be shown;

Commercial advertising announcements may not be shown; and

No more than 90 percent of the total programming carried may consist of feature films and sports events combined.[5]

10. Although in Docket 11279 there was some mention of wired pay television systems, its principal focus was on over-the-air operations. On December 12, 1968, the same day the over-the-air subscription television rules were adopted, the Commission issued its Notice of proposed rulemaking and notice of inquiry in Docket 18397,[6] commencing a broad ranging inquiry into the CATV industry and its regulation. In this document, the subject of pay television operations received only brief and passing mention. Subsequently, the Commission adopted rules in Docket 18397 regulating and to some extent requiring cable system program origination.[7] In response to petitions for reconsideration of this decision, rules virtually identical to those earlier applied to over-the-air subscription television were applied to cable program originations for which "per-program or per-channel charge is made."[8]

11. In response to this action, further reconsideration petitions were received. The principal requests came from the Association of Maximum Service Telecasters, urging generally that the rules should be applied to all cablecast programming regardless of the absence of a per-program or per-channel charge, and by the Motion Picture Association of America, alleging that the rules were overly restrictive and would aggravate the already difficult economic situation of motion picture film producers by denying them an outlet for their feature films. The MPAA petition received strong support from the United States Department of Justice, which asked that the rules be eliminated or that less anticompetitive rules be adopted. The National Association of Theatre Owners, alleging that it was not aware that subscription rules were under consideration in Docket No. 18397, did not seek reconsideration of the rules until after they were re-codified in connection with the February 1972, Cable Television Report and Order.[9] In its reconsideration petition, NATO argued that the rules had been adopted in violation of the Administrative Procedure Act because proper notice had not been given and that the growth of pay cable operations threatened the continued viability of theatre operations as well as the restaurants and other businesses that depend on theatre patrons for their survival.[10]

12. With this background in mind, the present proceeding was commenced, both to lay to rest all questions as to whether the proper procedure had been followed in adopting the rules and to ascertain whether the rules, originally formulated without regard to cable television operations, were subject to improvement. The Commission indicated that it felt the central issue was not the desirability vel non of cable pay TV, but rather "how pay-cablecasting can best be regulated to provide a beneficial supplement to over-the-air broadcasting without at the same time undermining the continued operation of that 'free' television service." In addition to addressing this general issue, comments were invited with respect to the following specific questions:

(a) What are the legal, technical, and economic differences between over-the-air subscription television and pay cablecasting?

(b) Are there, as the Department of Justice suggests, means of protecting the viewing public by less restrictive means than the existing rules?

(c) Are the rules appropriate for and how should they be administered with respect to access and leased channel cablecasting for which there is a per-program or per-channel charge and not subject to the control of a cable television operator?

(d) Have there been significant and relevant changes in the motion picture industry that should be reflected in the rules?[11]

13. With a decision in this proceeding not yet having been made, the Commission concluded it would be advantageous to receive additional written and oral comment in this proceeding. By its Further notice of proposed rulemaking and order for oral argument,[12] the Commission requested the comment of interested parties on a number of specific rule making proposals relating to the feature film and sports rules. In addition the scope of the proceeding, previously concerned only with subscription cablecasting regulation, was expanded to consider changes in the rules applicable to subscription television stations.

14. The specific alternative proposals on which additional comment were sought are set forth more fully in the further notice but briefly included the following with respect to feature films:

(a) A rule permitting pay use of films until they are 3, 4, or 5 years old;

(b) A rule permitting pay use of a film for a fixed period (9, 18, or 24 months) after first pay use.

(c) A rule prohibiting pay use of all but a fixed number (10?, 20?, 30?) of films between two and ten years old. Those "wild card" films available for use as an exemption to the basic prohibition would be available for pay use for a fixed period of time after first pay use.

(d) A rule prohibiting subscription television or broadcast television from obtaining exclusive use of a feature film for more than one year at a time and requiring that use in one medium be followed by use in the other medium.

15. Specific proposals were also set forth regarding the manner in which sports programming should be regulated. The existing rule essentially provides that sports events may not be subscription cablecast if televised "live on a non-subscription, regular basis in the community during the two years preceding their proposed cablecast." In practice the rule works as follows: events are broken into categories of specific and non-specific events. Specific events are generally those specifically identifiable by name and significance, e.g., the Super Bowl or the World Series. Non-specific events would generally be regular season games—the 162 regular season games of major league baseball or the 82 regular season games of a NBA basketball team. Application of the rule to specific events is relatively simple. If the event was on free television in the community during each of the two preceding years, it may not be shown on a pay basis. If the event was televised in only one of the two years, that is not considered "regularly" telecast and the event is available for pay use. Thus, in actuality the event need be off free television only one year before it is available on a pay basis.

16. Non-specific events are further categorized in accordance with existing sports and broadcast practice. Each separate category, as for example home games or away games, is then looked at separately. If a "substantial" number of games in the category were broadcast in each of the preceding two years, then none of the games in that category may be used on a pay basis.

17. Finally, a separate rule restricts use of specific events like the Olympics, which do not occur every year but which were telecast when the event last occurred.

[4] FCC 68–1174, 15 FCC 2d 466 (1968).

[5] *Id.* The rules governing the presentation of sports programming on over-the-air subscription television were subsequently modified. The principal change being a prohibition against subscription use of sports events regularly telecast in the community during the preceding *five years*. Report and Order in Docket 18893, FCC 72–263, 34 FCC 2d 271 (1972).

[6] FCC 68–1176, 15 FCC 2d 417 (1968).

[7] First Report and Order in Docket 16397, FCC 69–1170, 20 FCC 2d 201 (1969).

[8] Memorandum Opinion and Order in Docket 18397, FCC 70–677, 23 FCC 2d 825 (1970).

[9] FCC 72–108, 36 FCC 2d 141. (1972).

[10] NATO also questioned the jurisdiction of the Commission to adopt rules regulating subscription cablecasting operations and sought judicial review of their adoption. National Association of Theatre Owners v. FCC, Docket 18397 420 F. 2d 194 (D.C. Cir. 1969), cert. denied, 397 U.S. 92 (1970).

[12] Supra note 2.

V 40 167 APR 7 75 XUM

18. As the result of changes adopted in Docket 18893,[13] the rules governing the use of sports programming on over-the-air STV stations are somewhat different than the cable rules. Although the rules basically follow the same concepts, they differ in the following respects:

No event televised in the preceding five years may be used on a pay basis,

"Regularly" is defined as telecast in any one of the preceding five years in contrast to the prior rule requiring use in each of the preceding years,

New events never previously telecast are not immediately available for pay use if they are the result of a restructuring of the sport,

The rules are applied to events that might be used on a pay basis on a same day delayed basis as well as to live events.

19. With respect to this existing pattern of regulation, we sought comment on the following specific questions:

What should be the definition of a "substantial" number of games?

Under the rules, events must be placed in categories. Among the categories are home games, away games, and games of the week. Do the rules now permit or should they permit additional categories such as weekend and weekday games, day and night games, and East and West Coast games? If there are additional categories, what criteria should be used in establishing the categories? What if events fall into more than one category?

Should all sports be treated alike or should there be distinctions between professional and amateur sports, major sports and minor sports, team sports and individual sports?

Generally, should the changes adopted in Docket 18893, supra., which are now applicable only to STV stations be applied to pay cablecasting? [14]

20. Finally, with respect to the manner in which use of non-specific events should be regulated, we questioned whether it would be possible to develop rules (1) permitting subscription use of all events for which local broadcasters had a right of first refusal at prices consistent with those paid for similar events and which had not been accepted for broadcast use, or (2) permitting subscription use of at least a percentage of those events in a category which a substantial number but not all were being broadcast.

21. The scope of the proceeding was further expanded to give specific consideration to two further matters not previously considered. The first related to the alleged warehousing of feature film product. During the earlier course of this proceeding, pay cable interests had expressed their concern that the intended operation of the existing rules was being frustrated by the pre-emptive purchase of feature films by national television networks in an anti-competitive effort to deprive pay operations of feature films and so drive from the market at an early date a potential new competitive force. It was said that the networks were purchasing films with exclusive rights against pay use, before the films were two years old and even though they did not themselves intended to make use of the films until two or three years after the rights were initially obtained. Comment was sought on whether rules should be adopted by the Commission regulating such film purchasing practices.

22. The final matter on which comment was sought was prompted by a rule making petition filed by the National Association of Theatre Owners. It concerned the question of whether rules should be adopted requiring persons commencing pay cable operations to give advance notice to the Commission so that the Commission would be informed as to the growth and development of such operations.

Summary of Comments

23. Initial comments and reply comments in this proceeding were filed November 1 and November 29, 1972, respectively. Oral argument before the Commission en banc was held on November 5, 6, and 7, 1973. Comments and reply comments in response to the further notice were filed September 23 and October 4, 1974, with the second oral argument taking place October 23, 24, and 25, 1974. In response to the initial notice, some 40 comments and reply comments were received totaling over 800 pages. Some 56 persons appeared at the initial argument. In response to the further notice, comments from over 100 persons were received totaling over 1,500 pages. Eighty-two individuals appeared and spoke at the second oral argument.

24. For purposes of reviewing the comments submitted, we have found it useful to divide them into the following categories:

1. Broadcast television
2. Broadcast subscription television
3. Cable television
4. Subscription cable television enterpreneurs
5. Motion picture and television program production industry
6. Sports interests
7. Theater owners and operators
8. Miscellaneous individuals and groups

Broadcast television. 25. Comments were received from 14 broadcast interests including comments from the National Association of Broadcasters, the Association of Maximum Service Telecasters, and the three major networks—ABC, CBS, and NBC.

26. Each of the broadcast parties reiterates the basic arguments against the initiation of direct payment forms of television program distribution: that the subscription method of distribution carries with it sufficient economic potential for it to out-bid and remove programming from over-the-air conventional or free television, forcing viewers to pay a direct charge for what it now obtains free, depriving those unconnected to the system and those without money to pay for the programming of access to it, and impairing the ability of free television to originate local programming and news of service to the public.

27. Many of the broadcast interests argue that cable television unfairly competes with broadcast television because cable operators are permitted to carry broadcast television signals for which they pay nothing.[15] Even assuming that the pending copyright legislation is passed by Congress, the compulsory license fee contained in the proposed legislation is only a token payment and would not alter the unequal competitive status enjoyed by the cable industry. Additionally, it is argued that since cable operators are not obligated to provide news and public interest type programming as are broadcasters, cable is able to channel more of its revenues into bidding up the price of programming than are broadcasters. Because of these competitive advantages, it is asserted that pay interests ought not be allowed to siphon programming away from broadcast television. The present programming restrictions are a proper quid pro quo for cable's free use of broadcast signals, and necessary to provide broadcasters with the revenue needed to support unprofitable news and public interest programs.

28. Some of the comments are critical of the cable industry for failing to fulfill its promise to supply its subscribers with innovative and diverse programming. It is said that the present rules should be retained to encourage diverse programming and discourage reliance on feature films and sports programs which are already abundantly supplied over conventional television. The rules, it is argued, should encourage cable to supplement conventional television, not siphon away its programs.

29. With regard to the economic ability of pay cablecast operations to outbid advertiser supported television for popular program material, several parties point out championship boxing bouts and Evel Knievel's recent stunt as illustrations of how the economic clout of pay interests can remove such events from broadcast coverage and restrict viewers to only those who can get to a closed circuit outlet and can afford to pay the price of admission. To indicate the extent of this economic clout, ABC cites the March, 1974, Report of Standard Research Institute, which predicted that by 1980 the number of pay subscribers, both cable and STV, will reach 11,805,000, and pay revenue will reach $1.67 billion; more than the combined program expenses of the three television networks in 1973. In its illustration of the point, NBC uses the following examples: Six

[13] Report and Order in Docket 18893, FCC 72-263, 34 FCC 2d 271 (1972).

[14] See paragraph 24 of the further notice, supra note 2. We stated in footnote 11 of that document that the remaining petitions for reconsideration of our Report and Order in Docket 18893, FCC 72-263, 24 FCC 2d 271 (1972), would be considered in this proceeding. The portions of those petitions which remain pending relate to the STV sports rules. We have considered the petitions as part of our general consideration of the STV rules and will therefore terminate the proceeding in Docket 18893.

[15] In its comments, CBS stated that if cable television were required to pay its fair share for the television programming it carries, antisiphoning measures would be undesirable and inconsistent with our system of free enterprise.

million cable homes could raise over $43 million to compete for pro football rights if $1 were charged for each regular game and 25 percent of subscribers watched, and $3 were charged for the Super Bowl and 50 percent of subscribers watched. According to the NAB comments, by serving four million subscribers and imposing an additional monthly fee of $1, cable television could take in $1 million more revenue than free television derives from its broadcast of all NFL games and the World Series.

30. The most comprehensive attempt to develop a methodology for making this comparison is contained in the reply comments of the American Broadcasting Company. If there developed a formula for estimating the pay cable dollars available for the purchase of any particular program. The formula, in somewhat simplified terms, is as follows:

(Total households) x (percent of households with tv sets) x (percent of housholds with tv sets that are cable tv subscribers) x (percent of cable tv subscribers that have pay cable option available) x (percent of subscribers with pay option that are pay subscribers) x (percent of pay subscribers that view program in question) x (charge to subscriber for program) x (percent of subscription charge passed through to program supplier) = (total national pay cable dollars available for the purchase of program in question).

ABC's own assumptions as to the state of the pay cable television industry in 1980 are as follows:

Total household	75,400,000
TV set penetration (percent)	97
CATV penetration (percent)	35
CATV penetration with pay tv potential (percent)	80
Pay subscriber penetration of systems with pay potential (percent)	15
Percent of pay subscribers viewing program (percent)	50
Charge to subscriber for program	$2.25
Percent of pay fee collected passed on to program producers (percent)	35

In the circumstance posited by ABC, slightly more than 1.5 million homes would pay $2.25 each for a particular program making available slightly more than $1.2 million dollars to the pay cable industry for the purchase of the program in question. This, ABC suggests, compares with the $1.5 million dollars a network might pay for two showings of a "blockbuster" feature film like "Love Story" during a five-year period, and with the $1 million dollars that might be paid for a movie of somewhat less appeal.

31. In sum, and based on the kind of analysis presented by ABC, the broadcast interests conclude that pay cable operations will have more money than television stations or television networks to purchase programming and, being creatures of a competitive economic system, will inevitably purchase much of the best programming now broadcast on free television and leave free television only with what is left over. The growth projections of NCTA and other cable interests are discounted by broadcasters who claim the projections look only to the short run and incorrectly assume that penetration rates and subscriber rates will remain static. They assert that once the pay interests obtain a foothold, the industry will grow rapidly, the percentage of potential subscribers who actually subscribe will increase because good programs will have been siphoned away from conventional broadcasting, and subscription rates will go up.

32. Because of this potential for program siphoning from free to pay television, the broadcast interests conclude that there is a clear need for regulation. Ample legal authority to enact regulations is said to be found in "U.S. v. Southwestern Cable Company", 392 U.S. 157 (1968) upholding the Commission's authority to regulate cable television broadcast signal carriage; in "General Telephone Company of California v. FCC" 413 F. 2d 390 (D.C. Cir. 1969) upholding the Commission's authority to regulate the provision of cable television facilities by telephone common carriers; and in "National Association of Theatre Owners v. FCC", 420 F. 2d 194 (D.C. Cir. 1969), cert. denied, 397 U.S. 92 (1970) affirming the Commission's authority to authorize and regulate over-the-air subscription television stations. The broadcast interests contend that, at least, regulation of program siphoning is reasonably ancillary to the performance of the Commission's duties. The NAB and others assert that the Communications Act of 1934 is a statutory mandate to prevent program siphoning in order to protect the public interest and facilitate an efficient, nationwide communications network. Furthermore, it is argued by some that since the 1934 Act contemplated only conventional television service, the Commission should obtain Congressional guidance before it promulgates any rule which would permit pay interests to use programming now found on conventional television.

33. All of the broadcast interests urge that the existing rules be retained or strengthened. With regard to feature films, the broadcasters claim that pay interests now have available to them all of the film product that they need. ABC points out that in the 1973 oral arguments, cable interests stated that they needed 4–8 feature films each month to operate successfully. Citing statistics from Paul Kagan Associates, publisher of "The Pay TV Newsletter," ABC states that pay interests now have available over 20 feature films each month. The availability of adequate film product is demonstrated by the dramatic growth of the pay cable industry—pay cable subscribers have increased from 16,000 in March of 1973, to over 100,000 as of September, 1974. Because of the danger of siphoning and the lack of need for more product by pay interests, the broadcast interests are unanimously opposed to any relaxation of the feature film rule.

34. Although the broadcast parties generally urge that the existing rules be retained, the following specific alterations are suggested. The existing rules apply only to cablecast programming distributed for a per-program or per-channel charge. It is suggested that the rules ought also to apply to cablecast programming distributed without any additional charge on the grounds that the same potential for program siphoning exists here as in the per-channel or per-program charge area. It is also suggested that pay operations be limited to one channel on cable television systems, and that pay cable be required to originate a substantial number of hours of non-pay programming to equalize pay cable's role with that of STV. ABC proposes a modification to the present two-year feature film rule. It would require that prior to the pay exhibition of a feature film, such film must be licensed for conventional television broadcast not later than 25 to 30 months after theatrical release. This would prevent rest and re-release and would insure that feature films reach conventional television within a short period after their theatrical run.

35. All four feature film proposals included in the Commission's further notice are rejected because the broadcasters claim they would result in delay between theater and conventional television exhibition at best, and at worst would completely remove some films from the television market. It is asserted that the average time taken by feature films to reach conventional television put forth by the program producers is misleading because of the inclusion of a few blockbuster films which weights the average on the long side. In 1974, ABC claims to have purchased 28 feature films which averaged 29 months between theater release and their broadcast period. The exclusion of a few blockbuster films would shorten this period. Therefore, the broadcast interests claim that the present two-year rule reflects actual market distribution practice and any relaxation of it would at least delay the broadcast use of feature films. The NAB asserts that the two-year rule actually aids pay interests because it encourages program producers to make films available for home pay exhibition before the two-year period runs. Any relaxation of the rule would delay the conventional broadcast use of a film and would interfere with the public's ability to see the film when its appeal is still fresh.

36. It is claimed that any shrinkage of the eight-year period between a feature film's second and tenth year after theatrical release during which home pay use is now banned would encourage program producers to withhold at least the best films from conventional television use. Since network exhibition of a film diminishes its value for pay use, the broadcasters claim that the program producers will distribute their best films in the following manner: Theatrical release—home pay release—rest—second run theatrical release—second run home pay release * * * Thus the film would never reach conventional television. The fact that a very few blockbuster films like "The Godfather" do not reach home pay

V 40 67 APR 7 75 XUM

distribution during the present two-year period does not outweigh the benefit to the public of having such films offered via conventional television on the earliest possible date.

37. Independent broadcasters in particular oppose any relaxation of the present ten-year rule. Metromedia claims that older films constitute between 25 and 40 percent of the programming on three of its television stations. Statistics submitted by the NAB indicate that during a three-week period, 66 percent of all the films broadcast by Washington, D.C. and Baltimore television stations were ten years or older. The figure was 79 percent to 92 percent for the three independent stations in those markets. Kaiser Broadcasting states that it holds rights to 5,036 films of which 4,512 are more than ten years old. Metromedia has devised an economic model which indicates that a pay cable operation with only 5,500 subscribers would have the economic potential to outbid television broadcast stations like WTTG, Washington, D.C., which pays an average of $1200 for the films it shows.

38. The broadcast interests contend that the large number of feature films "available" for broadcast use is misleading. Metromedia claims that only about one-half of the older films available are suitable for television broadcast use; and only about 23 percent could be called desirable. It is asserted that these few desirable older films would be siphoned by the pay operators should the present ten-year restriction be relaxed. Metromedia claims that talk of simultaneous use of older feature films by pay and conventional broadcast interests is unsound. It would be in the best interest of both the program producers and the pay operators to maximize revenues by withholding the best older films from conventional television for exclusive pay use.

39. Among the broadcast interests only ABC proposed a change in the present rule prohibiting subscription use of all series type programs. ABC proposed a rule which would permit subscription use of non-network series which have not been shown on conventional television for five years, and all original productions which are innovative and diverse.

40. A number of broadcast interests suggest that the existing rule requiring that no more than 90 percent of subscription cablecasting consist of feature films and sports combined be amended to a requirement permitting less use of films and sports events. This is alternatively suggested as necessary to restrict the amount of program siphoning that might take place or as necessary to encourage the development of a more diversified type of programming offering. ABC, for example, would have us lower to no more than 60 percent sports and films combined.

41. With regard to the sports rule, there was unanimous support among the broadcast interests for amending the cable rule to comply with that now in effect for STV. They contend that the danger of sports siphoning is even more apparent with regard to pay cable than STV because of cable's multichannel capability.

42. Although the broadcast interests agree that the sports rule should be strengthened, there is a wide range of opinion as to the amendments which should be made. The MST comments proposed a ban on all sports carriage within one week of the occurrence of the event. ABC would retain the existing STV rule for specific events and have the Commission consider requests by pay interests to carry non-specific events on an ad hoc basis rather than attempt to refine the existing rule. Another proposal along this line would ban pay use of the four major sports except where a showing is made that pay carriage would not affect the sport's availability on conventional television.

43. The opinion of what should constitute a substantial number of non-specific sports events ranges from 10 percent, MST, to 25 percent, Metromedia and NAB. The remainder game proposal contained in the further notice is generally regarded by broadcast interests as unworkable. It is contended that sports events are not fungible because of differing spectator interests in teams and the differing times at which games are played. Thus the remainder game concept would result in all the most desirable games being placed on pay operations, leaving the least desirable games for conventional television broadcast. The right of first refusal concept is also rejected by the broadcasters because of the administrative difficulty in determining the reasonableness of an offer. CBS, however, advocates the right of first refusal concept when applied to new sports events. There is absolute agreement among broadcast interests that no new categories of sports events be recognized. Any further categorization, it is asserted, would increase the ability of pay interests to carry sports programming.

44. The broadcast interests generally deny that "warehousing" of feature films takes place. It is admitted that in a very few instances a network may contract for exclusivity during a portion of the two-year period after a film's theatrical release, but this only occurs when the film is scheduled for early network exhibition. Such exclusivity protection, it is argued, is necessary to protect the film's value to the network. ABC asserts that of all feature films to which it purchased rights between August 1, 1969, and July 31, 1974, only two were not telecast. It is charged that the proposal made by NCTA to ban all exclusivity arrangements would benefit only the pay interests, since the usual market distribution pattern makes feature films available to pay interests before conventional broadcast interests.

45. The broadcast interests supported the proposal that pay operations be required to notify the Commission prior to the commencement of their activities. Such notification would assist the Commission in assessing the development of pay cable television operations.

46. The proposal to suspend the subscription rules for four years which was submitted by NCTA and supported by many other cable interests and program suppliers is fiercely opposed by the broadcasting interests. Metromedia characterizes the proposal as an "insidious trap." It is argued that, should the Commission suspend the rules, they would never again be given effect because entrenched pay interests would meet any attempt to reinstate the rules with arguments that to do so would disrupt established viewing habits of subscribers and would interfere with the economic expectations of the pay cable investors who will have invested billions of dollars on the basis of the status quo.

Broadcast subscription television. 47. Four parties with interests in over-the-air subscription stations filed comments in this proceeding. Each of these comments is brief and suggests essentially that the program content regulations applicable to subscription cablecasting and to subscription broadcasting should be the same. The STV interests also support the proposed requirement that cable television systems provide notification to the Commission within thirty days of the commencement of subscription programming.

48. Pay Television Corporation states that the alternatives contained in the further notice involve complicated formulas which would inhibit the free flow of competition for product and contends that the present rules should remain unchanged. However, the comments provided by Mr. Robert S. Block suggest several alternatives to the existing rules.

49. Mr. Block favors a three-to-nine-year rule for feature films with a provision that a film would be available for subscription use after the three-year availability period if a contract had been signed for its network exhibition. Additionally, a film would continue to be available to pay interests after the three-year period if the film had been made available in good faith to conventional television and no contract had been signed for its telecast. Mr. Block believes that the three-year period should begin to run not from the date on which a film is initially shown in any theaters, as under the present rules, but only after the film has been generally released in the top 25 metropolitan areas in the country. As to films over nine years old, Mr. Block sees no public interest in restricting their subscription use.

50. With regard to sports, Mr. Block proposes a rule which would average the number of games telecast in a specific market over the previous five years prior to proposed STV or pay cable showing. The remainder of games in the "home" and "away" categories would then be made available for pay use. To resolve the concern of those who feel that such a rule would eliminate the possibilities of conventional television expansion, Mr. Block suggests that provision be made such that a ten percent increase in games be made available each year, over the five-year average, to conventional television, which would have the option to

accept or reject the added number of games.

Cable television. 51. The views of the cable television industry in this proceeding were set forth in comments filed by the National Cable Television Association (NCTA), various state and regional cable television associations, and over 20 individual cable television system owners and operators. In general, the position of the cable television industry is that the Commission has no jurisdiction to impose the pay cable rules and that the rules violate the antitrust laws, the Copyright Act and the Communications Act insofar as the rules discourage competition.[16] Furthermore, it is asserted that the existing cable rules constitute an impermissible restraint on free speech in violation of the First Amendment. In the broadcast area, regulations which affect speech are justified solely on the ground that there is a technical limitation to the availability of frequency space. "National Broadcasting Company v. United States," 319 U.S. 190 (1943), "Red Lion Broadcasting Company v. FCC," 295 U.S. 367 (1969), "National Association of Theater Owners v. FCC," 420 F. 2d 194 (D.C. Cir. 1969). In the subscription cable area, frequency space is not used so content regulations cannot be sustained. If the rules do not violate the First Amendment on their face, it is argued that because they certainly restrain speech there must be at least most compelling evidence that they are essential to preserve the objectives of the Communications Act. Available evidence indicates that no such showing can be made. Absent any hard evidence that the public would suffer, there should be no pay Cable restrictions. The cable industry asserts that a record based on actual marketplace experience is required to justify restrictions on pay cable programming. Therefore the present rules must be at least suspended to allow the marketplace to determine whether restrictive rules are needed to protect the public.

52. It is argued by pay cable proponents that subscription operations are needed to make cable television viable, especially in urban markets where broadcast signals are available. Pay operations are regarded as necessary in many cases to provide the gross revenue base cable systems need to build and provide other non-broadcast services. Revenues obtained from subscription programming are essential if advanced cable systems in the larger markets are to be constructed and comply with the requirements of the rules. As with conventional television, cable television must provide entertainment programming like feature films and sports events to support less profitable news, special interest and public service programming. The present restrictions, it is argued, do not permit an adequate supply of entertainment programming to attract subscribers. This situation in turn adversely affects the willingness of investors to finance cable operations. The California Community Television Association points to a large demand for more "G" rated feature films on the subscription operation serving San Diego. However, the present program restrictions force the operator to carry a large number of "R" rated films which do not have family appeal. The TM Communications Company claims that it has reached only between 9 and 16 percent pay penetration on its systems because there is not enough film product to attract subscribers. Telecable Corporation asserts that after careful study, it has decided not to introduce subscription service on any of the systems it operates because of the lack of sufficient product to attract subscribers. Because the program restrictions restrict the market to which programming may be sold, thereby reducing the return to the program creator, it is argued that the rules stifle creative effort; a loss shared by the general public.

53. Arguments that development of direct payment forms of television distribution will prejudice the poor are incorrect according to cable interests. Pay systems, rather than requiring payment for what is now available free will make available box office films, sports, educational, and cultural programming which is either not now available at all except to a very few, or which is available only upon payment of high box office prices and the parking, baby sitting and other expenses attendant thereto.

54. The NCTA asserts that it is impossible to offer irrefutable proof against the broadcasters' siphoning predictions because it is impossible to prove a negative, i.e. that siphoning will not occur. Therefore, the burden of proof should be placed on the broadcast interests.

55. Although the NCTA agrees that it is not in the public interest to allow programs now seen on conventional television to be removed from that medium, it claims that no factual basis presently exists to support any rules restricting pay cable exhibition of feature films and series type programs. There are presently only some 89,000[17] pay cable subscribers. But even with one million subscribers, the NCTA claims that a maximum of $2,400,000 would be available for the purchase of 8 feature films nationwide in any given month. This works out to be $300,000 per film. In 1973, the average film sold to the networks for two runs brought $750,000 to $800,000 and an additional $250,000 to $350,000 was obtained from the independent stations in syndication. This evidence indicates that there is no danger of siphoning in the foreseeable future. The NCTA claims that the broadcasters' predictions of the economic power of pay cable ignores the high capital and labor costs to the cable industry; the division of revenues among program supplier, channel lessee, and system operator; the multiplicity of operators purchasing different programs; and the impossibility that all subscribers would want to watch the same programs. But even if pay cable had the magnitude of economic resources in the future to buy up features, the motion picture suppliers would never permit exclusive use by pay interests. The exhibition of feature films on conventional television, regardless of prior showings in the theater and on pay cable, will continue to be a critical source of income for the motion picture companies.

56. On the issue of siphoning, Viacom International Inc., points to a Stanford Research Institute study which predicted that pay television viewers in 1985 will not spend more than seven percent of their viewing hours watching pay programming. This indicates that the effect of pay cable on conventional television will be slight, if there is any effect at all. In support of this view, the California Community Television Association states that only six tenths of one percent of California television households are pay cable subscribers. These figures show that the conventional television audience is not now, nor is it likely to be, threatened by pay cable. With its vast viewing audience in tact, conventional television will continue to have the economic resources to provide the quality of programming which it now delivers. The extent of these economic resources is demonstrated by several recent network film purchases: $10 million for "The Godfather," $5 million for "Gone With The Wind," and $3 million for "The Poseidon Adventure."

57. The NCTA states that the broadcast interests speak much of delay with regard to feature films, but that is not the issue. It asserts that the basis for the Commission's pay television and pay cable rules has been the concern of depriving the public of programming it now receives free. For the first-time in the further notice, the Commission raised the issue of delay. The Commission should not, it is said, establish regulatory precedent that it will regulate the timing of which programming is shown on broadcast television. The Commission does not restrict theatrical runs to force movies to reach conventional television earlier, and no more reason exists, it is argued, to restrict the length of time feature films are used by pay cable. In any case, the NCTA states that pay cable exhibition of feature films without restraint will not delay the exhibition of feature films on conventional television. The average time between first theatrical release and first telecast has remained at five years and two months for the

[16] By way of underlining the importance of antitrust policies, NCTA quotes the following language from "United States v. Topco Associates, Inc.", 405 U.S. 596, 610 (1972): "Antitrust laws in general, and the Sherman Act in particular, are the Magna Charta of free enterprise. They are as important to the preservation of economic freedom and our free enterprise system as the Bill of Rights is to the protection of our fundamental personal freedoms. And the freedom guaranteed each and every business, no matter how small, is the freedom to compete—to assert with vigor, imagination, devotion, and ingenuity whatever economic muscle it can muster. Implicit in such freedom is the notion that it cannot be foreclosed with respect to one sector of the economy because certain private citizens or groups believe that such foreclosure might promote greater competition in a more important sector of the economy."

[17] Other estimates place this figure at 100,000.

V 40 67 APR 7 75 XUM

seven television seasons since 1967–68. The imposition of the present two-year rule has not hastened the market process by which feature films reach conventional television.

58. Additionally, the cable interests join the program suppliers in stating that the present rules ignore the fact that any significant increase in demand for feature film and series product will result in an increase in the supply of such program product. The supply of programming is elastic. Production studios are in difficult economic straits and unemployment among actors and production personnel is chronically high. With increased outlets for its programming, the program software industry would gird itself for increased production to meet the demand. This increase in supply would aid not only the subscription cable industry, but also provide more programming and particularly more general audience programming for both theaters and broadcasters. Any argument that more programming cannot be produced is refuted by the recent increase in made-for-television movies.

59. The cable television interests are unanimous in their opinion that the existing rules which generally prohibit use of feature films more than two years after their first general theatrical release are overly restrictive and result in the better films never becoming available for pay cable use because they continue to be used in theaters for the whole two-year period. The NCTA states that the pay rules in effect "warehouse" feature films because of the restrictions placed on their use. It claims that since there is no rationale for the feature film and series rules, the NCTA is opposed to all of the alternatives listed in the further notice as well as to the existing rule. Most cable interests agree with the position of the NCTA, although a few specific alternative proposals were advanced.

60. TM Communications Company favors the first proposal set out in the further notice as the one freeing the most films for pay use. It suggests a five-year rule with the caveat that pay use of a film would be limited to a 24-month period from its first pay cable use.

61. Cablecom-General, Inc., favors the second proposal contained in the further notice. It suggests that a film should be made available for pay use for a period of time related to the length of its theatrical run. Then conventional television should be allowed the same amount of time to exhibit the film, after which there should be no restrictions on its use.

62. TelePrompTer Corporation agrees with the position of the NCTA that all feature film restrictions on pay use should be removed. Moreover, it suggests that the Commission should prohibit a film's use by conventional television until pay interests have had an adequate opportunity to exhibit it. TelePrompTer states that there should be a "window" for pay use—for instance a floating one year rule—during which pay interests would have exclusive use of a film between its theatrical run and its exhibition on conventional television. The NCTA rejects the "window" concept, whether or not it is for exclusive pay use. It states that such a rule unfairly affects subscribers of new systems built after the window has closed.

63. Cable television interests contend that the series and feature film rules are unnecessary and self-defeating because there exists considerable quantities of unsold program product that could be used by pay cable operations without withdrawing any product from broadcast use. Comments filed in Docket 18179 (concerning limitations of exclusive purchases of programming by broadcast stations) indicate that there is substantial program product available for broadcast use which remains unsold. Of the 54 separate series programs placed in syndication in the top 50 markets between 1965 and 1970, 5.1 percent of the markets remained unsold and of the 31 feature film packages placed in syndication, 32.1 percent of the markets were unsold. Of the many thousands of films over ten years old, subscription cable may only use 12 films a year under existing rules, although it is clear most of these films will not have broadcast exposure during that time.

64. The NCTA contends that there should be no limitation on the exhibition of feature films by pay cable after network exhibition. Once the film has been shown on network television or even contracted for, there can be no hypothetical concern about siphoning or delay. There is a large supply of feature films available for both broadcast and pay cable use. According to NCTA's study of the Detroit market, for example, the five television stations in that market televised 2,271 films during the 12-month period. Of the 18,000 films available in the market, 15,729 were not televised. Similar situations exist in the markets of Houston, Sacramento, Syracuse, San Antonio, Orlando/Daytona Beach, Cedar Rapids/Waterloo, Portland/Poland Springs, Sioux Falls/Mitchell, Amarillo and Washington. The anti-warehousing rule proposed by the NCTA (see paragraph 68, infra) would insure unrestricted simultaneous use of older films by pay interests and conventional television because the film producers will be anxious to exploit both markets. In response to the contention of Metromedia (see paragraph 38, supra.) that there are only a very limited number of suitable older films available for broadcast use, the NCTA asserts that in a recent 12-month period all of the Washington, D.C. television stations purchased only 530 film titles. With something like 18,000 titles available, it is claimed that there is an abundance of quality film product available for both conventional television and pay use.

65. The NCTA and many other cable interests would have the Commission abandon its series rule altogether. The California Community Television Association states that at least pay cable should be allowed to carry series which have been rejected by conventional television. This proposal is somewhat in line with that of ABC (see paragraph 39, supra.). Viacom International, Inc., proposes that pay interests be allowed to develop their own series programs. It states that pay cable provides an opportunity to air series programs with less than mass audience appeal.

66. Cable interests submit that the sports rules are overly restrictive because there is a significant number of sports events which will not be broadcast and which the rules prohibit subscription television systems from using. The NCTA suggests that the existing two-year rule be retained but not expanded to five years as it has been for STV. For non-specific events, the network or local broadcaster should be granted a right of first refusal to the larger of the number of games in a given category telecast in either of the last two years. All games in a category above the two-year high-water mark, remainder games, could be licensed to pay cable without first giving broadcasters the right of first refusal. In this way all sports events could be made available to the public, either by broadcasters or pay interests. The NCTA points out that the Commission's recent Home Box Office letter [18] demonstrates that the use of remainder games by pay cable has no adverse impact on conventional television and results in the public having the opportunity to watch events not televised. Additionally, Cablecom-General states that there should be no restrictions on delayed pay cablecasting of sports events.

67. With regard to the question of whether the Commission's pay cable and STV rules should be the same, most of the cable interests which commented on this issue were of the opinion that because STV involves the use of the broadcast spectrum the STV rules should be considered separately from the cable television rules. However, it is urged that, if new cable rules are adopted, they apply equally to all forms of cable communication, whether it be subscription cable, multipoint distribution service, laser, closed circuit or any other technology which is developed. With regard to the broadcasters' proposal that the subscription cable rules be extended to programming for which no additional charge is made, the cable interests reply that they have been engaged for some time in such cablecasting and no evidence has been presented to suggest why the subscription rules should be extended to this type of programming.

68. Those cable interests which commented upon the warehousing issue assert that broadcast interests should be prohibited from withholding feature films from pay cable by way of exclusivity contracts. The NCTA claims that broadcasters now use exclusivity contracts to warehouse films before they are two years old and after they are ten years old. Thus, warehoused films may be withheld from pay cable during much of the time now left open for

[18] Letter from the Commission to Home Box Office, Inc., September 17, 1974.

cable by the Commission's rules. To guard against such warehousing, the NCTA proposes the following rule:

Networks shall not in the licensing of feature films restrict by contract or otherwise their exhibitions on pay cable except that a reasonable period of exclusivity can be contracted for, provided it does not commence more than thirty days preceding the first network broadcast under the initial network contract.

The NCTA also proposes the following rule to protect against warehousing by cable interests:

Cable companies shall not in the licensing of feature films for pay cable restrict by contract or otherwise limit their broadcast over the air.

69. The California Community Television Association agrees that broadcast interests must be prohibited from purchasing unreasonable period of exclusivity, and additionally, proposes that the broadcast interests be required to make available to pay cable any film in which they have a financial interest.

70. TelePrompTer Corporation states that the NCTA proposal does not go far enough to protect pay cable from the "predatory practices" of the broadcast industry.[19] TelePrompTer asserts that the networks have purchased "The Godfather," "Fiddler on the Roof," "The Poseidon Adventure," "Love Story" and "Patton" in an effort to kill the infant pay cable industry,[20] and proposes a rule which would prohibit the exhibition of a film by conventional television until pay cable has had an adequate opportunity to exhibit it.

71. As to the proposed requirement that cable systems notify the Commission prior to instituting pay service which was incorporated into Docket 19554 by the further notice, most cable interests are of the opinion that such information could more easily be procured with minor revisions of the Commission's present Form 325. Aurovideo, Inc., expressed concern that if objections could be filed to the proposed notification and such objections would stay a cable system's right to provide pay service, the result would be tantamount to requiring Commission permission to provide pay service. Such a requirement has already been rejected by the Commission. See paragraphs 32–35, "Clarification of rules and notice of proposed rulemaking," FCC 74–384, 46 FCC 2d 175 (1974). Viacom International Inc., specifically opposed the petition for rulemaking initially filed by the National Association of Theater Owners (RM–2371), stating that the proposed rule would place an unnecessary burden upon cable system operators and that the proposal was an attempt by the theater owners to use the Commission's process to obtain competitive information.

72. The general substance and tenor of the industries' comments are perhaps well summed up in the following statement from the comments of Columbia Cable Systems, Inc., et al.:

The immediate effects of § 76.225 are threefold. First, the freedom of both buyers and sellers of programming covered by the rule to buy and sell such programming in the open market is unlawfully and unjustifiably restrained. "See Klor's, Inc. v. Broadway-Hale Stores, Inc.," 359 U.S. 207 (1959). Second, the rule undermines existing policies favoring competition in the distribution and licensing of programming in the movie and sports industries. "See e.g., Bigelow v. RKO Radio Pictures, Inc.," 327 U.S. 251 (1946); "United States v. Loew's, Inc.," 371 U.S. 38 (1962). And third, and ultimately, by withholding from pay cablecasters the essential resource—programming—without which they cannot compete with broadcasters, the rule preserves, and strengthens, the existing monopoly position of many broadcasters and, particularly, of the networks. Each of these aspects of § 76.225, whether taken individually or collectively, would, if they were the result of private as opposed to governmental conduct, constitute a violation of the antitrust laws. "See Silver v. New York Stock Exchange," 373 U.S. 341 (1963). These restrictions on the ability of pay cablecasters to freely compete with broadcasters are directly in conflict with the procompetitive policy of the Communications Act and with Congressional policy favoring competition unless expressly excluded, and may only be imposed upon a compelling showing that they are required to effectuate, and will not obstruct, objectives of the Communications Act.

. . . . . .

The restrictions imposed upon pay cablecasting by § 76.225 rest upon the Commission's assumption that pay cablecasting, at some point in the future, may result in the siphoning of programs from "free" television, thereby depriving viewers of some programming which they might otherwise receive without charge. This assumption, to date, is totally unsupported by any documented evidence and is founded, essentially, upon speculation.

73. Because there is allegedly no evidence to support pay cable restrictions, at least as to feature films and series type programs, the cable interests led by the NCTA propose a four-year moratorium on such rules after which time the networks and broadcast interests should be required to justify any proposed restrictions on pay cable service. It is claimed that such a four-year period would allow the marketplace time to determine whether any restrictions on the pay use of feature films and series programs are necessary to protect the public interest. Cablecom-General, Inc., suggests that the Commission undertaken its own study during the proposed moritorium period to assess the possible effects of pay cable programming on conventional television service.

Subscription cable television entrepreneurs. 74. Comments were received from five subscription cable television entrepreneurs. The comments of this group generally reflect those submitted by the cable television interests, asserting that the Commission has no jurisdiction to impose the cable television program restrictions and, in any case, the restrictions with regard to feature films and series programs are not needed to protect the public interest, and the restrictions with regard to sports programs should be relaxed to permit pay cable carriage of events not televised.

75. In addition to the anti-trust and constitutional issues raised by the cable television interests (paragraph 72, supra) and the Justice Department (paragraph 124, infra), Home Box Office, Inc., et al., asserts that the subscription rules are constitutionally defective in that they are vague and overboard. "NAACP v. Button," 371 U.S. 415 (1963), "United States v. Robel," 309 U.S. 258 (1967). The over-breadth of the rules is demonstrated by the fact that they prohibit the pay cable exhibition of feature films and sports events even when there is no danger of siphoning, the evil against which the rules were designed to guard. HBO points out that the rules frustrate its desire to exhibit "Butch Cassidy and the Sundance Kid" even though ABC has contracted to show the film in 1976. Pay cable exhibition of the film could in no way affect its exhibition on conventional television. In the sports area, the rules operate to withhold from pay cable hundreds of events which conventional television has no desire to telecast. As to the issue of vagueness, HBO points to § 76.225(a) (2) of the rules which prohibits the subscription cablecast of sports events which "have been televised live on a nonsubscription, regular basis." The Commission has never provided concrete guidance as to how this rule will be applied in specific circumstances, thereby making compliance with the rule an impossibility.

76. The pay cable interests state that they provide a unique form of entertainment, even when the same product is available in theaters and on conventional television, and that this diverse entertainment opportunity should not be denied the public on the speculative ground that to do so might in the future affect conventional television. Optical Systems Corporation points out that "There are several distinct features of pay cable programming, particularly feature films, which fulfill the desires of many American families: The opportunity to see feature films in the privacy and security of one's own home in their original form; uninterrupted by commercials; at the viewer's convenience; and most significant, at a cost for the entire family that is less than a single child's admission ticket to a movie theater." With regard to the siphoning issue, Warner Communi-

[19] Referring to a December 20, 1973, letter of Mr. Everett Ehrlick of ABC to the then Chairman, Dean Burch, TelePrompTer states:

Thus, for example, "Diamonds Are Forever" was contractually barred from pay cable during all but the first three months of the two year up-front period permitted by the Commission's rules even though ABC was not licensed to broadcast the film until three years after initial theatrical release. Of the 142 films covered by Mr. Ehrlick's letter, exactly half were barred from pay cable during at least part of the two-year period following initial theatrical release. The effect of such prohibitions was to reduce the period allowed to pay cable by 17.4 months—or almost ⅔rds of the time allotted to pay cable by the Commission's rules. Mr. Ehrlick's somewhat muted suggestion that exclusivity of this sort is necessary to ensure that films be properly "rested" before network showing is obviously ludicrous when viewed in the context of a pay cable industry with 70,000 subscribers. Note, moreover, that the contracts entered into by ABC do not provide for exclusivity against in-flight exhibition, armed forces network exhibition, or closed-circuit hotel distribution, each of which has larger audiences than pay cable.

[20] TelePrompTer claims that the intent of the networks to harm the pay cable industry is indicated by the fact that NBC will actually lose money on its airing of "The Godfather."

to programming other than feature films the producer. This estimate is based on 91. Even if delay does result in some

V 40167 APR 7 75 XUM

cations, Inc., states that pay cable now reaches only about two tenths of one percent of the nation's television homes, and all pay cable operations have been operating at losses. Under these circumstances, Warner questions the ability of pay cable, now or in the foreseeable future, to outbid conventional television for programming.

77. The subscription cable entrepreneurs cite lack of sufficient film product as one of the most important restraints on their continued growth. Optical Systems Corporation states that 104 feature films are required each year by a pay cable operation. It says that from September, 1972, to August, 1973, only 370 feature films were released. Of these only 114 were acceptable for pay cable showing, the rest having "X" or "hard R" ratings, or being undubbed foreign films, etc. Of these 114 acceptable films, only 89 were made available to Optical by the film owners. Many of the 89 films, particularly the better ones, had theatrical runs lasting most of the two-year period which the rules allow for pay cable exhibition. But even if the two-year rule were relaxed to a three or four-year rule, Optical asserts that very little new product would be made available for pay use because most of the acceptable film product of the past two years has already been exhibited by subscription systems. Pay cable must have access to the vast number of films over two years old in order to fill its program schedules. Optical attributes most of its subscriber disconnects to the lack of sufficient quantity and quality of feature films, particularly family oriented films.

78. Optical asserts that films over ten years old can neither be purchased from their producers nor distributed to subscribers at the rate of only 12 per year. It states that these older films can only be purchased in large packages and must be exhibited in film festival type blocks of 20 to 30 a week along with at least two current movies. Because of these marketplace realities and the restrictions placed on older films by the rules, Optical states that it has never purchased or exhibited feature films over 10 years old.

79. Commenting on the series program rule, Home Box Office suggests that the rule should be changed so that it bars at the most only series which have been distributed by a national television network within the two years preceeding the date of the proposed cablecast. It claims that the present rule bans any type of innovative or special interest series program, as well as series which have been rejected by conventional television.

80. Because none of the four alternatives to the present feature film rule contained in the further notice would adequately meet their product needs, the pay cable interests consider the alternatives unacceptable. Instead, they favor the proposal of the NCTA and other cable interests that the feature film and series program rules be suspended for at least four years during which time the effects of unrestricted film use could be studied. Since the results of such action would not occur overnight, it is claimed that the Commission would have plenty of time to take remedial action should harmful effects develop.

81. Home Box Office, Inc., states that both alternatives to the present sports rule contained in the further notice would be more acceptable than the existing rule, and that the second alternative is better than the first because it would free more sports events for pay cable use. However, HBO claims that both alternatives still suffer from overbreadth because they would deny to pay cable some games which would not appear on conventional television. HBO supports a rule which would give a right of first refusal to conventional television only as to those games which have been previously telecast. Regardless of the number of games which had been telecast in the past in any given category, such a rule would allow pay cable to carry any games which conventional television elected not to carry during the forthcoming season. Thus the public would not have to wait one year or three years or five years for an opportunity to view games not seen on conventional television.

82. In response to several questions presented for discussion in the further notice, HBO states the following:

The base period for the cable television sports rule should remain the same and not be increased to five years as it was in the STV rule.

The "substantial number" of games necessary to invoke the sports rule's prohibition of pay cable carriage should be 75 percent.

The Commission should recognize additional categories of events on a ad hoc basis. The categories presently recognized are sufficient in most situations.

The sports rule should be applied no differently to a situation in which a team's telecasts fall into more than one category than if they fall into only one category.

No distinctions should be made between professional and amateur sports, major sports and minor sports, team sports and individual sports.

Additionally, HBO suggests that, if the sports rule is not significantly altered, the Commission should clarify the status of post-season or playoff games in the various sports.

83. On the warehousing issue, Optical Systems Corporation states that the following warehousing instances have been reported:

1. That early in 1974, CBS acquired 4 films from MGM under a contract that prohibited pay cable exhibition during at least portions of the 2-year available exhibition period. These films were "Slither," "Soylent Green," "They Only Kill Their Master," and "Pat Garrett and Billy the Kid." In fact, Optical was informed by the distributor of these films, soon after they were licensed by CBS, that they would no longer be available for pay cable exhibition;

2. That NBC acquired "Day of the Dolphin" by a pre-release contract that prohibited pay cable exhibition during the entire two year period, and through the broadcast period. In fact, "Day of the Dolphin" has never been made available to pay cable;

3. That "Cabaret" and "Papillion" were excluded from pay cable exhibition by arrangement between ABC and Allied Artists. Neither film was ever made available to Optical;

4. That the "French Connection", which was first released theatrically on October 7, 1971, was sold to CBS in October 1972 with an exclusivity clause that barred any pay cable exhibition subsequent to October 7, 1973. This, despite the fact that the license precluded the network from showing the film until October of 1975.

5. Exclusivity provisions can be implied where films that originally were made available to pay cable have been "yanked", i.e. removed from pay cable availability prior to the expiration of the two year period. This is the case with the following films: "Poseidon Adventure"; "Slither"; "Soylent Green"; "Charlotte's Web"; "Young Winston"; "1776"; "Valachi Papers"; "Shamus"; "Godspell"; "40 Carats"; "The Stone Killer"; "Oklahoma Crude"; "Lost Horizon"; "Dillinger"; "Crazy Joe"; "Summer Wishes Winter Dreams"; and "The Getaway";

6. Coincidently, no films produced or financed for theatrical release by ABC have been made available to pay cable. These films include such titles as: "Cabaret"; "Kotch"; "Charley"; "They Shoot Horses Don't They?"; "Straw Dogs"; "Take the Money and Run"; "Song of Norway"; "Junior Bonner"; and "The Torch."

7. Despite numerous requests, theatrical films produced by Cinema Center Films, a CBS-subsidiary, were never made available to pay cable. These films include: "Little Big Man"; "Scrooge"; "The War Between Men and Women"; "The Boys in the Band"; "Prime Cut"; "A Man Called Horse"; "The Reivers"; and "Blue Water White Death."

To guard against such anticompetitive practices, Optical submits that the Commission should prohibit any arrangement, by contract or otherwise, whereby commercial broadcasters preclude the licensors of feature films the right to license those films for exhibition on non-broadcast media. Alternatively, the Commission could reach the same result by interpreting the "financial interest rule" (§ 73.658(j)(ii)) to preclude the television networks from obtaining exclusivity rights against other, non-broadcast media. Home Box Office states that broadcast exclusivity against pay cable should be limited to a maximum period of 30-days prior to the first presentation by the broadcast purchaser, plus the run of the contract, provided that the contract is not unnecessarily long.

84. In summary, the position of the subscription cable television entrepreneurs is reflected in the following statement of Home Box Office:

Pay cable needs access to feature films and sports at this stage of its development. Because the market for specialized programming is still being plumbed, and its shape and directions are still unknown, there is little specialized programming of suitable quality • • •. not only would the public be forbidden to experience a new dimension in entertainment, it would be absolutely denied the right to see those feature films which either will not appear on the networks or will appear at inconvenient times or several years hence and would be deprived permanently of the large warehouse of sporting events which do not reach conventional television. The public should not be asked to pay a penalty to protect broadcasting, particularly where that penalty is not necessary to achieve the objective.

Finally, putting aside all of these positive reasons why pay cable should not be limited

to programming other than feature films and sports, the answer is that the Constitution, the Communication's Act and the antitrust laws require that the question be posed in the converse—the beginning presumption must be that pay cable may carry any programming it wishes; and the question must be why should pay cable be limited, not why not. The proper legal point of departure is that pay cable is not to be restricted in any manner unless there is clear and convincing evidence of a direct, adverse affect upon the totality of television service.

Motion picture and television program production industries. 85. Comments in this proceeding were received from MCA, Inc., and a group of motion picture industry entities which includes The Motion Picture Association of America, Inc., and various program suppliers and copyright owners. The basic position of these program suppliers is that the rules restricting the use of feature films and series programs by subscription cable television are contrary to the public interest, are based on erroneous assumptions of fact, violate the First Amendment, exceed the Commission's statutory authority and are contrary to the antitrust laws. To the extent that these arguments were discussed by the cable television interests and the subscription entrepreneurs, they will not be repeated here. However, a number of points made by the program suppliers sheds additional light upon the issues in this proceeding.

86. The program suppliers assert that subscription cable television will not replace either the theatrical or the conventional television outlet for motion pictures, but will expand the total audience which will see feature films. At the same time, it will furnish an incentive for the production of high-quality programs and of programs for minority tastes. Rather than siphoning product from conventional television, the program suppliers argue that the introduction of the new cable television market will decrease the cost of film product to theaters and television and increase the supply of feature films.

87. The program suppliers state that the unrestricted showing of feature films by subscription cable television will not result in the siphoning of these films from conventional television. This conclusion is based on (1) a comparison of the relative size and economic importance of the conventional television and pay cable markets and the dependence of producers on revenues from conventional television; (2) hard data concerning the average time period that elapses between the general theatrical release of a feature film and its first showing on network television; and (3) the emergence of a new form of motion picture—the made-for-TV movie—which has replaced the theatrical feature as the dominant movie shown on network television and which demonstrates the elasticity of supply of feature film product.

88. MCA claims that the potential sale of a feature film to pay cable at the present time would earn at most $27,000 for the producer. This estimate is based on a subscription to the film by 30 percent of the total pay cable homes and a $2 charge by the cable system split 50–50 with the producer. This contrasts with the estimated average price of a feature film sold to conventional television during 1973 of approximately $800,000 for network showing and $250,000 to $350,000 for showing by local stations in syndication. MCA argues that these figures conclusively disprove any assertion that pay cable will be able to outbid or siphon movies away from conventional television.

89. The program suppliers state that as a general rule, motion pictures made for theatrical exhibition will be licensed in sequence to (1) theaters, (2) subscription television, (3) networks, and (4) local stations. This distribution is consistent with the historical pattern of motion picture distribution. In the Joint Comments of the Program Suppliers, it is stated that "It is impossible to imagine any reason other than insanity which would cause a distributor to continue licensing the picture indefinitely for Family Choice Cable after the revenue from this market has dried up—and when a pot of gold can be gained from a network exhibition."

90. The program suppliers also assert that unrestricted feature film distribution will not result in delay to conventional television. Statistics are provided which indicate that the average (mean) number of months which elapsed between the theatrical general release of a film and its first showing on network television for the last seven years was 61.95 months—more than five years—and that during the 1973–74 season this figure has even increased to 62.26 months. The median age of theatrical features shown on commercial television during the same seven-year period was 51 months and that age has increased during the 1973–74 season to 54 months. During the 1972–73 season, the average age of blockbusters was 71.56 months and the median age was 60 months. During the 1973–74 season, the average age of blockbusters had declined slightly to 69.8 months while the median age had increased to 65 months. Looking at these figures from a different angle, the program suppliers state that during the 1973–74 season, 101 movies out of a total of 115 theatrical movies shown for the first time on commercial television—88 percent—were over two years old. The program suppliers regard as unpersuasive the statement of ABC (see paragraph 35, supra.) that contracts for 28 feature films entered into by it in 1974 show an average elapsed time between theatrical exhibition and permissible broadcast period of 29 months. The program suppliers assert that the ABC data is apparently based only on availability dates and not telecast dates; and that the more reliable guide is the entire schedule for the 1973–74 season. During that season ABC telecast 42 features with an average elapsed period of 70.43 months from theatrical release.

91. Even if delay does result in some instances from unrestricted pay cable exhibition of feature films, the program suppliers claim that the potential audience for these films would not decrease. A correlation analysis demonstrated with regard to 1,027 features covered by national Nielson ratings that the time lapse between the first general theatrical release of each motion picture and its first showing on conventional television had no significant impact on its popularity with television viewers. Therefore, it is argued that delay would reduce neither the popularity of the feature with the viewing public nor the income generated for conventional television.

92. Finally, the program suppliers claim that any increase in demand for film product created by subscription markets will be met by an increase in the supply of such product because of the present unused capacity of the film production industry. The best proof of the elasticity of supply, they state, is the recent and accelerated trend toward made-for-television films. In 1970, such features constituted only about 20 percent of all movies telecast by the networks. Today, they constitute more than 60 percent. Furthermore, it is noted that because these features are specially made for network television, they cannot be withheld from the networks and are subject neither to siphoning nor delay.

93. The program suppliers urge the Commission to allow a free feature film program market to exist without regulation in order to permit the gathering of experience from which policy decisions by the Commission may be made and regulations, if warranted, be issued. Because of the present lack of experience with regard to pay cable television, the program suppliers do not favor adoption of any one of the four alternatives proposed in the further notice.

94. The first alternative, which would extend the present two-year rule to three, four or five years, is preferred by the program suppliers to the existing rule, but they claim that many desirable features would still not be made available to pay cable. Features such as "Sound of Music," "Romeo and Juliet," "2001," "Gone with the Wind," "Bonnie and Clyde," "Harold and Maude," the Disney features and many others are more than three, four or five years old. A five-year rule would not free many of these pictures for pay cable use. The suppliers submit that any time period geared to theatrical release is unworkable and arbitrary in that the date of theatrical release triggers a most unreliable time clock for determining the end of the film's theatrical life. Additionally, they state that any revision of the two-year rule makes no provision for "grandfathering" or for systems not in being. Assuming the adoption of a revised two to ten year rule effective January 1, 1975, the program suppliers ask what provision would be made for films more than two, three or four years

V 40 I 67
APR 7 75
XUM

old that have never been shown on pay cable? Further, what provision would be made for systems which come into being thereafter? Depending on the starting date, they would be barred completely from showing a substantial number of features, or have a choice of a number of features with fore-shortened availability periods. The problem is particularly acute, they say, in light of the fact that there are only a relative handful of pay cable subscribers today—some 90,000.

95. The second alternative, the provision of a window for pay cable's use of a film commencing on the date of its first pay cable exhibition, is criticized by the program suppliers as being overly rigid and not taking into consideration the various requirements of each specific feature and the need for varying the time periods for the showing of a particular feature by a particular cable system. Also, they state that the effect of such a rule would be to require the smaller operators to accommodate their choice of features and the timing of their exhibition to the selection and scheduling of dominant cable operators. Moreover, cable systems which may not even have been in existence at the time a feature was first exhibited for pay would never get a chance to play it.

96. In the view of the program suppliers, the basic shortcoming of the third, or "wild card," alternative is that the wild cards will necessarily be blockbusters and that the rule would deny pay cable access to other movies, some of which will be needed to appeal to more specialized audience tastes, which now would be barred by the current two-year rule. They argue additionally that there is no basis in fact or logic for determining the number of wild cards; that the alternative does not provide for systems not in being which would be precluded from showing wild cards previously exhibited on other systems; that there is no basis in fact or logic for determining the permissible limited period of use; that large cable systems would control the selection and timing of exhibition of wild cards; and that as a consequence of the foregoing, the Commission and the affected industries would necessarily be embroiled in frequent and protracted waiver requests.

97. The fourth alternative, which would expose a feature film to cyclical bidding by cable and television interests, is impractical in the opinion of the program suppliers because it is incompatible with the business economics of sequential motion picture distribution by which feature films move from the theaters to subscription exhibition to networks and finally to local stations.

98. Commenting on the proposal of ABC (see paragraph 34, supra.) which would allow a feature film to be shown on pay cable only after a license has been issued to a network for a showing within 25–30 months from theatrical release, the program suppliers claim that such a rule would greatly strengthen the monopsony position of the networks. Networks could bar a feature from pay cable entirely by failing to make a contract for its exhibition within two years.

99. The program suppliers also urge the Commission to abandon its restrictions on the pay cable exhibition of films over ten years old. They claim that under the restraints of the present rule, pay cable systems have not been able to experiment with the offering of a channel of classical or older films, or group of older films which cater to minority tastes. In answer to the assertion of Metromedia (see paragraph 37, supra.) that a relaxation of the ten year rule would permit pay cable to outbid local television stations for this older film product, the program suppliers state that the absence of an unregulated market for the carrying of these features by cable systems has made any assumption of what a viewer would be willing to pay for such older features pure guesswork. Additionally, they claim that Metromedia's assertion (see paragraph 38, supra.) that only some 20 percent of the supply of older films are suitable for broadcast use serves to strengthen the argument that at least the large unused part of the supply of older films should be made available to pay cable and not be barred as it is under the present rules. The suppliers note that the comments of Metromedia listed as undesirable films on opera such as "Aida"; historical drama such as "Abraham Lincoln"; foreign productions such as Ingmar Bergman's "Virgin Spring"; the French classic "The Umbrellas of Cherbourg" and the Russian "Ballad of a Soldier"; ballet type films including Balanchine's "Midsummer Night's Dream" and the "Bolshoi Ballet '67"; films appealing to minorities such as "Malcolm X"; and "The Adventures of Chico"; pictures of religious and human interest such as "Albert Schweitzer"; films appealing to juveniles such as "Penrod and Sam"; and many others which would be marketable by pay cable. The program suppliers contend that it is no answer to say that features which cannot be sold to television shall be available to pay cable only upon a convincing showing to the Commission that bona fide attempts have been made to sell the films on reasonable terms for conventional television broadcasting and that they have been refused. They submit that if the Commission should let itself be led along the path of waivers and exceptions, it would end up in a quagmire. Such a procedure would make the Commission the reluctant arbiter as to which pictures are suitable for television and which ones are not, as to the price at which they should be offered and as to whether the negotiations were conducted in good faith.

100. The program suppliers contend that there is no danger that series programming will be siphoned from conventional television should the present restrictions be removed. They claim that producers of such programs simply will not and, indeed, cannot transfer a series that has received favorable ratings on the network to the more limited subscription market. The potential network losses would be staggering compared to the potential reward from pay cable either now or in the foreseeable future. Further, all network series contracts give the purchaser an option for the next television seasons. These options will extend for a period of five years or more and will prevent the transfer of the series to other media. Similarly, the producer is completely dependent on syndication revenues when a successful series has completed its network run and is ready for re-runs on conventional television. The producers would not sacrifice the essential revenues returned by syndication sales for a speculative audience that might or might not materialize from the pay cable market. Moreover, the suppliers claim that it is highly questionable whether the public would be willing to pay to view re-runs of series previously seen on conventional television.

101. With regard to the Commission's suggestion in its further notice that the progression of films be plotted on charts through the distribution chain under various regulatory schemes, the program suppliers conclude that it would be impossible to plot any valid and meaningful data on such charts. Because of the many imponderables and unpredictable reactions of the public to a particular feature, they claim that it is impossible to plot or forecast with any degree of accuracy the path which a motion picture will actually take in the course of its distribution.

102. Of the program suppliers, only MCA supplied comments on the warehousing issue. It states that its experience is that pay cable has not been excluded from the use of feature films by pre-emptive buying of the networks. A review of MCA's agreements licensing feature films to networks since 1970 shows that they do not grant exclusivity during the two-year period of availability. Nonetheless, MCA recommends as a prophylactic measure that the Commission adopt a rule which would simply provide that the networks and television broadcast licensees on the one hand, and cable systems on the other hand, may not enter into agreements for the licensing of feature films which restrict their showing on the other medium.

103. With regard to the major issues of this proceeding, the following quotation from the comments of MCA summarizes the position of the program producers:

> The Commission has recognized that the development of a viable cable television industry as a supplement to conventional broadcast service, offering a diversity of choice to the viewing public, is in the public interest. Cable Television Report and Order, 36 FCC 2d 143 (1972). It has also recognized that CATV program origination is in the public interest and should be encouraged. First Report and Order, 20 FCC 2d 201 (1969). However, the rules which it adopted have fettered the development of a Family Choice Cable service be restricting the sale and distribution of feature film and series programs where a per-program or per-channel charge is made. These restrictions were based on the premise that it is necessary to protect conventional television against "siphoning" of programs by Family Choice Cable.

MCA submits that there is no factual or evidentiary basis which supports the present restrictions on the sale and distribution of feature films and series programs to Family Choice Cable. The evidence previously presented by MCA and other program suppliers and updated for the present proceeding conclusively demonstrates that the threat of "siphoning" is purely speculative, without rational foundation, and asserted solely as a protectionist device to insulate the broadcasting industry from free market competition. The ultimate issue is not "siphoning" but rather whether the public will be given a choice and whether there will be competition in the marketplace by another distribution medium for the attention and favor of the viewing audience.

Further, the evidence fails to establish any basis for the assertion that feature films would be unreasonably delayed in their exhibition on conventional television if the present restrictions were removed. Indeed, if "delay" rather than "siphoning" were to become the asserted rationale for the rules, their anti-competitive bias would become even more obvious and their claimed public interest justification even less valid.

Moreover, there can be no rationale which justifies the absolute ban on the showing of all series type programs by Family Choice Cable. Such an absolute ban can only frustrate the Commission's expressed and basic objective of augmenting the public's choice of programs through new types of services.

For these reasons MCA urges the Commission immediately to repeal or suspend for at least four years the present restrictions on the showing of feature films and the absolute ban on series type programs by Family Choice Cable. At that time, based on the free play of market forces, the Commission would be in a position to examine and judge the evidence and to determine what restrictions, if any, are required in the public interest. Of course, the Commission could always act sooner if remedial action appeared warranted.

Such a free and unrestricted period is the only method of obtaining sound answers to the myriad questions posed in the further notice. All of the alternatives suggested by the Commission are necessarily based on conjecture and speculation as to how the marketplace would or may develop. Untested by the crucible of experience, the imposition of restrictions can only serve to limit competition and to deny freedom of choice to the viewing public.

Sports interests. 104. During the initial phase of this proceeding, the only filing from a sports team owner, league, or related interest was filed by the National Hockey League. A number of other persons from the world of sports appeared at one or the other of the oral proceedings, including representatives of, or individuals connected with professional baseball, hockey, basketball, bowling, duckpin bowling, golf, and tennis. In response to the further notice written comments were received from the Commissioner of Baseball, the National Hockey League, the National Basketball Association, and California Sports, Inc. (operator of the Los Angeles Lakers franchise of the National Basketball Association, the Los Angeles Kings franchise of the National Hockey League and The Forum, a sports arena in Los Angeles).

105. In its initial filing in this proceeding, the National Hockey League's comments were largely directed toward changes in various specific aspects of the existing rules. Included were the following suggestions:

(a) Explicit authorization for the subscription showing of those games in a category of events, as for example away games, beyond those broadcast on conventional television.

(b) If the broadcast of a substantial number of games in a category precludes use of the remaining games on a subscription basis, then the definition of substantial should be high, e.g., 50 percent of the events in the category.

(c) In addition to the home and away game categories discussed when the existing rules were adopted, the inclusion of further categories such as weekday and weekend games, East Coast and West Coast Hockey games.

(d) Events shown live and those shown on a delayed basis should be treated differently.

(e) New events should be available for subscription use. More particularly, events resulting from the establishment of new sports franchisees should not be unavailable for subscription use for a five year period.

106. Although pressing these specific changes in the details of the existing rules, the NHL in a more philosophical vein appears to suggest that the reasons for the existing pattern of sports broadcasts, including the need to preserve gate receipts, the need for broadcast exposure to develop team loyalty, and the inability to clear broadcast time on local stations, would continue to exist and dictate broadcast patterns even if the Commission had no subscription television rules.

107. In its comments in response to the further notice, the NHL responded specifically to the questions raised in Paragraph 24, as follows:

(a) If the Commission is to retain the substantial number concept, substantial should be defined at a figure no less than 50 percent. The rationale for retaining the concept at all, however, is questioned. The NHL questions the wisdom, for example, in a market with no independent station of protecting all away games; in a market where a team must purchase television time to get on the air at all, of protecting all away games for conventional broadcast. And in a situation in which 90 percent of the games are broadcast, not allowing the pay use of the remaining 10 percent.

(b) The use of the existing as well as additional categories of events is supported. As evidence that the use of home and away game division comports with existing broadcast practices, the following review of hockey broadcasts scheduled during the 1973–1974 regular season is presented:

	Home	Percent	Away	Percent
Atlanta	0	0	20	51
Boston	39	100	31	80
Buffalo	4	10	22	56
California	0	0	0	0
Chicago	0	0	39	100
Detroit	0	0	28	72
Los Angeles	0	0	15	38
Minnesota	3	7	27	69
New York Islanders	0	0	16	38
New York Rangers	0	0	29	74
Philadelphia	0	0	32	82
Pittsburgh	0	0	13	33
St. Louis	0	0	30	77

Similar patterns, it is urged, can be found in other categories. For example, because of line charges and time differences, it is said, that Eastern Time Zone teams do not televise West Coast games. A similar pattern is also said to exist in the telecasting of weekday and weekend hockey games—half of the games and half of the telecasts taking place on either Saturday or Sunday.

(c) With respect to the extension of those changes in the rules adopted for STV stations in Docket 18893 to subscription cable, the NHL suggests that there is no need for the extension of the anti-siphoning period to five years, that games broadcast as the result of Pub. L. 93–107 should not trigger the anti-siphoning period, that the protected period should not apply to new events, or be triggered by the broadcast of a tape delayed event unless it is obvious that the tape delay is merely a ruse to avoid the impact of these rules.

108. With respect to the specific proposals for regulating the carriage of sports events set forth in the further notice, the NHL objects to the right of first refusal concept as embroiling the Commission in disputes as to the reasonableness of offers, and to the idea of only permitting pay use of a fraction of the "remainder" games as an unnecessary attempt to protect from siphoning games which will not in any case be broadcast.

109. The National Basketball Association and California Sports, Inc. comments include many of the same points made by the NHL. California Sports notes particularly that in any delineation of categories, the Commission should not assume that broadcast patterns for all sports will be the same but should realize that each is sui generis. It is also particularly concerned that the rules not in any way prohibit the use of remainder games on a pay basis, stating:

> Protecting "remainder" games for "free" television constitutes the grossest form of bootstrapping by conventional television broadcasters. They start by demanding "anti-siphoning" rules to protect their existing monopoly; then they claim some preemptive right to similar "remainder" games even though not previously telecast by them, thus extending their monopolistic grip to new products as well.

110. The NBA comments suggest that the "substantial" number definition be a number no less than 33⅓ percent of the events in a category, that all remainder games should be available for pay use, and that in any event, games offered for broadcast at a fair price and not accepted should be available for pay use.

111. The Comments of the Commissioner of Baseball focus principally on two points. The first being that rules relating to the carriage of sports on a pay basis by cable television systems need to be related to rules under consideration relating to the importation of sports on distant signal channels carried by cable television systems.[21] Distant signal sports carriage, it is said, will both disrupt pay use of sports and may at the same time so undermine the financial strength of sports teams as to drive them toward pay distribution of sports events.

112. The second major point is that any new rules should be experimental and tentative because there simply does not now exist "enough reliable market data to make sensible prediction and decision on how the development of pay

[21] Notice of proposed rulemaking in Docket 19417, FCC 72–109, 36 FCC 2d 641 (1972).

V 40 67
APR 7 75
XUM

cable will affect broadcast viewing patterns; sports gate receipts; the value of over-the-air broadcast packages; advertiser response; and, finally the financial health of broadcasters, professional team sports, and the cable industry." During this experimental period, it is suggested that the following rules be in force:

Section 76.225 a) (2):

A. *Specific events.* A specific event shall not be available for cablecasting in a community where the event has been televised live on a nonsubscription basis for the preceding two (2) years.

B. *Nonspecific events.* The number of nonspecific events of a team which shall be available for pay cablecasting in a community shall be the average number of games of that team not televised live on a nonsubscription basis in the community during the two (2) years preceding their proposed cablecast: *Provided,* That, notwithstanding the number of games telecast in the prior two years, any sports team may make available number of its games for cablecasting.

113. This rule would maintain the existing situation with respect to specific events and, with respect to non-specific events, would generally permit pay use of that number of nonspecific games not shown on free, over-the-air television in the two preceding years. That is, sports teams could sell for pay use those games not sold for over-the-air broadcast. The Commissioner of Baseball terms these games the "overage." In order to avoid penalizing those teams that have in the past made the maximum number of their games available to over-the-air television and to permit these teams to participate in the experiment, an exception to the general rule would permit pay use of a specified, limited number of games of these teams no matter what the prior broadcast pattern. Baseball notes that in the past, something over 40 percent of all major league professional baseball games have not been broadcast and that there is no reason why pay use of these games should not be permitted.[25] Anticipating the argument that the rule proposed could allow pay use of the best games leaving the less attractive games for conventional broadcast, baseball urges that the problem is largely a theoretical one but one which the Commission should monitor for during the course of the experimental period.

114. To the extent the Commission rejects this approach and maintains its model, it is suggested that the definition of "substantial" should be a percentage approaching or greater than 50 percent, that the relevant categories should be increased to include day/night and weekday/weekend games, and that the existing two year period should not be extended to a five year period for nonspecific events.

115. During the initial oral argument in this proceeding, a number of additional points were made by sports interests which should be briefly mentioned. The Professional Bowlers Association made the point that it has been attempting to obtain regular network television coverage but has had only limited success. Those tournaments televised have been the high prize money tournaments during the first quarter of the year. Bowlers would like to have exposure during the rest of the year as well, so that if networks do not purchase tournaments during the rest of the year then these events should be available for use by pay systems.

116. A number of sports interests including particularly basketball, note the precarious financial position of some of their franchisees and urge that, insofar as time is unavailable on local stations to broadcast all their games and because pay use of some games could prevent the financial failure of the teams, all games not broadcast should be available for pay use. Likewise hockey, as a relatively new sport, finds itself in a financial bind, needing whatever additional revenues it can obtain. Fears that games will be withdrawn from broadcast use are discounted both because experiments with pay distribution of hockey games show speculation as to the financial attractiveness of this outlet to be greatly exaggerated and because it is essential to the success of a professional team that it obtain the maximum public exposure in order to generate fan interest.

117. The Duckpin Bowlers state that in spite of attempts to obtain broadcast coverage, they have had no success even as part of a sports anthology program. The Duckpin Bowlers concern, accordingly, is not with the rules prohibiting pay use of events regularly televised in the past but with the possibility that, as a new event, Commission approval might have to be obtained before pay use would be authorized.[26] It is suggested that whatever burden they would have to meet be clearly spelled out or, better yet, that the rules be limited to the four major sports covered in the recent anti-blackout legislation (Pub. L. 93–107).

118. The spokesman for the PGA Tournament Players Division and the Women's Tennis Association make the point that there is now a need for new markets for owners of television rights to sports events. Ten years ago, it is said, it was possible to find the "network window" for many sports events. Today this is seldom the case. The major sports, by expanding their schedules and otherwise restructuring, have blanketed the networks. Stations do not now want more sports events. Thus, the rules should be so structured that the minor sports which obtain only occasional broadcast exposure are not denied a market for their programming.

Theater owners and operators. 119. The interests of the theater owners and operators in this proceeding were represented by the National Association of Theatre Owners, Inc., (NATO).[27] NATO asserts that motion picture theaters provide public service contributions that are unique in a community and cannot be replaced by any electronic service. They provide a place for the people in a community (including underprivileged and handicapped children, convalescing war veterans, and the elderly) to be entertained and diverted away from their homes and institutions. Theaters are said to be the magnet that attracts people into the downtown areas of cities in the evening hours and the presence of theater patrons in these areas attracts other people who are not attending a theater. Thus, the vitality of a city is kept alive by the theaters and the other businesses such as restaurants, which thrive on theater patrons.

120. Theater owners are opposed to the development of cable television systems distributing feature films because these systems, in competition with theaters for patrons, pose an economic threat to continued profitable theater operations. If theaters fail, the community will lose the unique benefits of having theaters and the failure of theaters would lead to continued inner city decline. According to NATO's analysis of the situation, if cable systems are authorized to exhibit on pay television channels the same movies upon which theaters must rely to sustain their operations, the motion picture theater industry would be seriously, if not fatally, undermined. It is said that there are far from enough quality motion pictures now available, and if those pictures and the revenues they generate had to be shared with cable systems, the theaters' already marginal profits would evaporate entirely and the flow of revitalizing new capital into the industry would quickly terminate. Simple competition would not be fair. Cable systems, it is said, will be able to present motion pictures to

[25] The pattern of planned telecasts of baseball games during the 1973 season was as follows:

	Number of games telecast	Home games telecast	Away games telecast
Atlanta Braves	48	0	48
Baltimore Orioles	52	8	44
Boston Red Sox	65	17	48
California Angels	30	0	30
Chicago Cubs	148	81	67
Chicago White Sox	129	81	48
Cincinnati Reds	25	5	20
Cleveland Indians	32	0	32
Detroit Tigers	40	12	28
Houston Astros	20	0	20
Kansas City Royals	28	0	28
Los Angeles Dodgers	22	0	22
Milwaukee Brewers	30	10	20
Minnesota Twins	30	0	30
New York Mets	112	58	54
New York Yankees	69	37	32
Oakland Athletics	22	0	22
Philadelphia Phillies	70	24	46
Pittsburgh Pirates	38	0	38
St. Louis Cardinals	29	0	29
San Diego Padres	0	0	0
San Francisco Giants	22	0	22
Texas Rangers	22	0	22
	1,093	321	772

[26] Section 73.643(b) (2) of the rules applicable to programming carried on over-the-air STV stations, states in pertinent part: "Determination as to whether new sports events that are not the result of the restructuring of existing sports may be shown on a subscription basis will be made by the Commission as such new events occur."

[27] NATO consists of 42 state and regional theater organizations and motion picture theaters and represents more than 8,000 theaters and theater circuits, according to its comments.

the public at a lower cost than that which could be sustained by the motion picture theater industry. Some systems are offering feature films at 20 cents per person per film,[28] a price that cannot be met by the motion picture theater industry under the present structure. This allegedly unfair situation is said to result from cable systems amortizing their construction costs as part of the regular monthly subscription fee for basic CATV service and including no percentage in their pay TV charge to cover the cost of construction. Because theaters cannot do this, they are said to suffer from an unfair competitive disadvantage. Additionally, the theater owners charge that the Commission's distant signal carriage rules and franchise fee limitations amount to financial subsidization and economic protectionism which exacerbates the unfair competitive advantage which cable television has over the theaters.

121. NATO states that pay TV revenues are not essential to the viability of cable and it, therefore, urges the Commission to adopt a regulation which would prohibit cable systems from showing on a pay TV channel any motion picture that had been released for theatrical exhibition. As an alternative, and assuming the Commission is determined to authorize some form of cable pay TV motion picture exhibition, NATO suggests the adoption of a rule which would prohibit the pay cable showing of any feature film until one year after the date of the film's first theater exhibition or 90 days after the date, within that one year period, when such film was last exhibited in the community in which the cable system operates.

122. This alternative position is justified, NATO asserts, because the theater industry lives off about ten pictures a year, the rest being essentially fill-in. More pictures are needed. Pay cable operations also need film product, but the theatrical promotion of the films is essential to successful pay cable use. The proposed rule, intended to rationalize the distribution process and protect theatrical access to feature films, would essentially codify the existing distribution system, preserving the maximum number of outlets for each film, and permit the distribution of films first to theaters, second to pay cable, and third to broadcast television.

123. NATO claims that the Commission's present rules could upset the established feature film distribution pattern by forcing movie suppliers to forego completion of normal theatrical distribution in order to meet the Commission's deadline for sale of a film to pay television within two years after its first theatrical release. Therefore, NATO urges the Commission not to adopt any deadline for introduction of films to pay television. Without such a deadline, distributors could preserve all their potential markets and would not be forced to choose distribution to one at the expense of another. Of the alternatives set forth in the further notice, NATO looks most favorably upon the second one which would permit pay use of a feature film in a particular market for a specified period after its first pay exhibition in the market. This alternative, NATO argues, would best prevent the siphoning of feature films from theaters through the distribution of such films to pay television at an earlier time than would otherwise be the case.

124. In its comments in this proceeding, the Department of Justice questions the authority of the Commission to adopt rules designed to protect theater owners. It says that "Many forms of nonbroadcast entertainment and communications compete to some extent with broadcasting. Congress, however, has not conferred upon the Commission either the jurisdiction or the authority to balance these non-broadcast related interests in regulating the broadcast and related industries." To this argument, NATO replies that the Justice Department has urged and the Commission has adopted rules in other proceedings where it was determined that such action would benefit the general public. Specifically cited is the Commission's adoption of equal employment opportunity rules which were supported by Justice because of the contribution they would make "* * * toward reducing and ending discrimination in other industries." 16 RR 2d 1561, 1563. Similarly, it is stated that failure to adopt appropriate subscription cablecasting rules would have a serious and adverse impact on the future quality of urban life in the United States and that this provides ample justification for adoption of the rule suggested.

Miscellaneous individuals and groups. 125. The Department of Justice in its comments urges that the restrictions on pay cablecasting cannot be supported at this point in time as necessary to preserve even a minimum amount of over-the-air broadcasting necessary to satisfy the public interest, that the organization of pay cablecasting programs by local program sources does not, on its face, threaten any valid Commission policy, and that, in view of the nascent status of the pay cablecasting industry, no empirical evidence exists which would indicate that allowing pay cablecasters to provide popular programming will have any serious adverse effects on over-the-air broadcasting. According to the Department, if pay cablecasting is allowed to provide attractive programs and subsequent experience indicates that the public interest is threatened as a result thereof, there will be time enough for the Commission and/or Congress to act on the basis of accumulated experience. Such a course of action which allows a new industry the opportunity to compete with established interests would, it is said, seem much more consistent with the competitive policies embodied in the Communications Act and this nation's general competitive policy than adoption of a policy which cripples a new industry in its attempt to offer new services because of speculative fears as to possible effects upon established firms.

126. The Justice Department states that the Commission's restrictive policy with regard to pay programming frustrates its goal of achieving program diversity and acts as a significant deterrent to investment in pay cable. The Department points out that the Commission has repeatedly recognized the value of promoting competition in communications services in other areas subject to its jurisdiction and urges the Commission to take the same pro-competitive position with respect to subscription cable television. See e.g.: "In the Matter of Allocation of Microwave Frequencies Above 890 Mcs," Docket No. 11866, 27 FCC 359 (1959), 29 FCC 825 (1960); "Computer Services Inquiry," Docket No. 16979, 28 FCC 2d 291 (1970); "Specialized Common Carrier Decision," Docket No. 18920, 29 FCC 2d 870 (1971); "Domestic Satellite Decision," Docket No. 16495, 35 FCC 2d 844 (1972); and "In the Matter of An Inquiry Relative to the Future Use of the Frequency Band 806–960 MHz," Docket No. 18262, 46 FCC 2d 752 (1974). The department asserts that the Commission's present restrictive policy is protectionist in outlook and fails to recognize the public benefits to be derived from free competition between pay cable and conventional television.

127. At the oral phase of this proceeding, it was urged that the Commission interfere with the free operations of the market place only with the greatest reluctance and it was suggested that we look at other areas such as energy or transportation policy to see examples of the disasterious effects of government interference with the incentives of the market place.

128. The Department notes that there are technical and legal considerations that require the Commission to approach pay cablecasting not merely as a variant of pay television but as an entirely separate communications problem, particularly because no spectrum space is used in the operation of pay cable systems. It suggests that the Commission's jurisdiction to regulate non-broadcast cable program services conducted by channel lessees is highly questionable. Finding no evidence that the provision of popular programs by local pay cablecasting systems or lessees would, either on its face or on the basis of experience, threaten a valid Commission policy, it is questioned whether the Supreme Court decisions in "United States v. Southwestern Cable Co. 392 U.S. 157 (1968) and United States v. Midwest Video Corporation", 406 U.S. 649 (1972) support the Commission's attempt to adopt the rules proposed in this proceeding.

129. The fear of program siphoning, the Department asserts, ignores the fact that program material is not fixed in amount. It sees no evidence that the creative and financial capabilities of the

[28] NATO uses cable pay TV operation in San Diego as an example. This, it is said, involves the offering of current movies for as little as $1.50 for the whole family, for the whole week. According to NATO, no San Diego theater would be able to long withstand this kind of competition.

V 40 167 APR 7 75 XUM

program production industry will not be able to meet almost any predictable demand which pay cable and conventional television together might engender. In any case, siphoning will not take place overnight, but over a long period of time. The Department suggests that a five-year suspension of the program rules would place the Commission in a position to obtain hard, empirical information upon which it could base any future actions with respect to pay cable that might be shown to be necessary or desirable. The Department claims that the Commission has placed upon the proponents of pay cable the burden of proving a negative—that its development will not harm the public interest—rather than following the policy set out in "FCC v. Sanders Bros. Radio Station," 309 U.S. 470 (1940), which imposed strict burdens of showing public harm upon parties seeking to block new competition in broadcasting.

130. The Department's comments conclude that if leased channel operations are to succeed, there is no practical open alternative to raising the necessary revenues through per-program or per-channel charges; that the combined effect of restricting cablecasting advertising and prohibiting the carriage of most types of conventional popular programs on a per-program or per-channel charge basis will be to eliminate the economic base and the financial incentives for independent commercial leased channel operations; and that an alternative policy which allowed cable system operators and channel lessees to engage in unrestricted pay cablecasting would appear to better promote both the goals of diversity of programming and local source origination. It suggests that the Commission consider, as a minimum, a phased schedule under which pay cablecasters would be relieved of the present restrictions.

131. Comments were filed by representatives of several cities, among them San Diego and New York. These comments generally favor the relaxation or total elimination of the Commission's pay cable program restrictions until a clear need for such restrictions has been demonstrated. It is stated that subscription cable television has the potential to bring new and diverse programming to city residents and should not be impeded on the basis of unproven fears that pay cable may some time in the future adversely affect conventional television. It is urged that the Commission allow pay cable television to compete freely in the marketplace, thereby encouraging and preserving consumer choice in the broad area of entertainment.

132. Several representatives of the financial community filed comments in this proceeding. Their comments reflect the view that in order to expand, the cable television industry must improve its profitability. Cable television stocks have declined far more than the general market and the equity market is virtually closed to most cable television companies. Similarly, debt financing is all but impossible to obtain in most cases. Additional revenues from rate increases will not provide enough capital for new investment. This means that added revenues and profits must be derived from the sale of new services. In addition, these services may add sufficient income in new urban systems where saturations may be relatively low to make them economically viable. At this time, the financial interests assert, pay cablecasting seems like the most feasible of the services that are possible. Therefore, they advocate a relaxation in the Commission's pay cable program rules in order to make more and better product available to subscription cable which would, in turn, improve the chances of profitability for cable television. In support of its request for a relaxation of the subscription rules, Paul Kagan Associates, Inc., an investment advisory firm, states that it projects only about 2,250,000 pay cable subscribers by 1980, generating revenues of $90 million for the purchase of programming. Such an amount was equal to six percent of commercial television's program budget in 1973. Kagan concludes that there is no danger of program siphoning from conventional television to pay cable in the foreseeable future and that the Commission's program restrictions are not warranted.

133. The Office of Telecommunications Policy (OTP) is of the view that the development of new programming and other information services that can be offered over cable should not be impeded by government-established barriers to the consumers' opportunity to purchase those services. In its comments, OTP states that the national interest, in fostering competition and in avoiding governmental restrictions on the free flow of entertainment and information, requires that the imposition of restrictions be based on evidence that the threatened injuries complained of are substantially probable in the absence of such restrictions. It asserts that the burden of proving injury to the public in the absence of programming restrictions should be on the proponents of such restrictions, and that they have not met that burden.

134. OTP concludes that pay cable television presents no credible threat to the public's continued reception of broadcast entertainment programming and recommends an experimental suspension of the Commission's pay cable program restrictions, with the exception of the sports rule.

135. Numerous comments were filed by representatives of minority groups and cultural organizations. The general tenor of these comments is that the subscription cable television program rules should be relaxed in order to further the development of cable television which will lead to increased minority access to and participation in the cable television medium and more diverse programming catering to minority tastes and interests. In its comments, the Metropolitan Opera claims that pay cable must be given access to mass entertainment programs such as sports and feature films in order to attract the wide audience base which is necessary to support programming of less than mass audience appeal. The National Black Media Coalition urges the Commission to remove all program restrictions from pay cable because pay cable will make black and minority oriented programming economically viable; will increase the outlets for product created by black talent and stimulate minority employment in the television industry; will provide black people with inexpensive access to movies, cultural and sports events; will open up new opportunities for black ownership and control of communications mediums; will help make the cable industry viable enough to support the kinds of access programming consistently advocated before the Commission by black groups; and will stimulate healthy competition within the communications industry.

136. The minority interests assert that conventional television is not responsive to minority tastes because conventional television serves advertisers who demand programs with mass audience appeal. They state that specialized and minority taste programming is more likely to be presented on pay cable than conventional television because pay programming will be based directly upon the intensity of consumer desire for particular programs. By purchasing programming directly, pay cable subscribers will be able to attract programs tailored to individual interests. Additionally, pay cable will stimulate the production of programs which will be available to both conventional television and pay cable and lower the cost of programs to each medium because of the additional revenue available for its purchase.

137. It is claimed that the development of pay cable will promote diversity of ownership in communications properties because cable television lacks the barriers of limited spectrum space and of high capital outlay which have prohibited minority entrepreneurial activity in other communications industries. Once the basic cable system has been constructed, the cost to the minority entrepreneur of leasing channel space on which to carry subscription operations is relatively low.

138. Finally, it is asserted that pay cable can both increase the productivity of the performing arts and open access to cultural entertainment to many middle and lower income families. Pay cable will afford the producers of cultural entertainment an expanded audience and new sources of revenue in the form of subscription or per program charges. The viewing public will benefit by having an opportunity to enjoy cultural entertainment at lower prices than live performances.

139. Instead of its present program restrictions, the National Citizens Committee for Broadcasting urges the Commission to adopt the following forms of public interest regulation:

1. A requirement that pay cable operators present a minimum of 25 percent cultural and educational programming.
2. Franchising guidelines that give weight to such factors as minority participation in ownership.

3. Clarification that FCC EEO affirmative action guidelines apply specifically to pay cable operations.
4. FCC adoption of reasonable ranges for pay TV subscription and program charges, or requirement for local hearings on initial charges and any subsequent increases.

Such a regulatory scheme, it is argued, would promote diversity in program content, diversity in ownership, equal employment opportunities, and inexpensive access to movies, sports and cultural events.

140. The comments of the American Civil Union likewise argue against the imposition of pay cable program content restrictions. Describing itself as an enthusiastic supporter of the advent of subscription television, the ACLU expresses its opposition to all anti-siphoning restrictions as unwarranted intrusion of government regulation on program content, constituting a form of censorship. It urges that free competition will allow enterprising programmers to search out new audiences, including minority audiences, and provide a new avenue for the development of program diversity. Its comments also urge the right of open access by all originators of program and content services to the pay electronic carrier systems.

141. Two manufacturers of cable television equipment filed comments in this proceeding. The comments of General Instruments Corporation and The Magnavox Company reflect the view that a substantial relaxation or elimination of the Commission's subscription rules is necessary for the development of profitable subscription operations and such profits are necessary for the viability of the cable television industry. The manufacturers state that the successful implementation of pay cable services is absolutely essential to maintain the viability of the growth and development of modern urban cable television operations and equally essential to serve as a spur to greater research and development to improve existing technology and create new technology that will make the broadband communications network of cable a reality in the next decade. They contend that the development of subscription television will preserve the competitive technological position of the United States, enhance the growth of new social services and provide new employment in the economy. Should the Commission not suspend its subscription rules entirely, General Instruments favors the Commission's first feature film alternative—a five-year rule with no restrictions on films over ten years old. As to sports, it suggests that all events not carried by conventional television be made available for subscription use.

142. Various members of the staff of the Cable Television Information Center of The Urban Institute and associates of the Rand Corporation filed comments on their own behalf. Their comments do not necessarily reflect the views of the respective organizations. While agreeing that it is appropriate for the Commission to promulgate rules designed to prevent program siphoning, these parties assert that the Commission's present rules go beyond preventing siphoning and are not justified. It is stated that the present rules provide exclusive or severely restricted markets for product to television broadcast licensees. Allocation of these broad markets by the Commission is unsound policy, and represents an excessively protectionist type of conduct in which regulators have often engaged in the past and of which they should be more wary. They argue that it would be far more appropriate for the Commission to adopt a rule which focuses with precision on siphoning of programs rather than on allocating broad categories of programming to the exclusive domain of broadcast television. A rule is suggested which would:

Require that two years after a theatrical feature film has been shown anywhere in the U.S. on pay cable, it must be sold for a prime time showing on conventional television either on a network or on a local station in the community located in a major market, if it is to continue to be shown on pay cable in that community; provided that each cable system has a certain number of "wildcard" exemptions that could be shown for pay each year, irrespective of whether sold to conventional television, and provided further that neither a pay cable entrepreneur nor a conventional television licensee can obtain or enforce an exclusivity contract against the other service;

Permit cable casting of events in a sports category in an amount that maintains for conventional television the highest number of games shown on conventional television in the community in any one of the last five years;

Eliminate the ban of series programming on pay cable;

Eliminate the ninety percent restriction on feature film and sports programming.

143. The foregoing review of comments summarizes the various positions and arguments which were presented to the Commission as part of this proceeding. Because of the vast number of comments submitted, only a few of the more comprehensive comments have been given specific mention. However, we believe that the views of each party to this proceeding are fairly represented in our summarization.

Discussion and Resolution of Proceeding

Purpose. 144. The fundamental issue that we have considered throughout the Commission's many deliberations concerning subscription television "is whether subscription television would provide a beneficial supplement to the program choices now available to the public and an increase of financial resources which would facilitate significant increases in the numbers of services available to the public under the present system; or whether it would seriously impair the capacity of the present system to continue to provide advertiser-financed programming of the present or foreseeable quantity and quality, free of direct charge to the public." [3] We believe that the existing conventional television structure performs a valuable service to the public and that our statutory mandate to act in the public interest requires that we strive to maintain the public's ability to receive the informational and entertainment programming now provided by conventional television at no direct cost. We also believe that the public interest requires that we encourage the development of alternative media which will increase the number of program choices available to American households. Indeed, section 303(g) of the Communications Act of 1934, as amended, states that the Commission shall "Study new uses for radio, provide for experimental uses of frequencies, and generally encourage the larger and more effective use of radio in the public interest." It is these two public interest considerations, maintenance of existing sources of programming and development of additional sources, that we must weigh in this proceeding. Our goal is to strike a balance between the two which best serves the long-range interests of the entire public.

145. Because conventional television is confined to a finite broadcast spectrum and must depend upon advertiser support, the programming it provides is limited in quantity and must appeal to the tastes of a broad majority of the viewing public. Since conventional television often cannot, because of its nature, cater to minority tastes and interests, we encourage the development of new technologies which promise viewing diversity. Subscription television promises to bring both diversity of programming and diversity of format to those who are willing to pay a direct charge for the service. Neither STV nor cable television must attract advertiser support with programming having a broad mass appeal. Cable television, with its abundant channel capacity, is particularly able to program for audiences with specialized interests. Subscription television's potential to expand the public's program choices, to supplement the programming now provided by conventional television, gives it an important role to play in our national communications structure. It is this supplemental role that our subscription programming rules are designed to promote, while at the same time insuring that the public's reliance on conventional television is not unreasonably impaired.

146. Since 1955 the Commission has been engaged in weighing the arguments of those who claim that subscription television, left unrestrained, will topple the existing conventional television structure, and those who assert that subscription television should be given the opportunity to freely compete with the established conventional television structure. During the course of this debate, the Commission has authorized over-the-air subscription television service and promulgated rules designed to insure that subscription television evolves to supplement present conventional television service and not supplant that service. In so doing, we have recognized that the public interest requires both the maintenance of the existing conventional television structure and the development

[3] First Report in Docket 11279, FCC 57-1153, 23 FCC 532, 542 (1957).

V 40 67 APR 7 75 XUM

of alternative sources of television programming, and have sought to establish the kind of regulatory framework in which both conventional television and subscription television can coexist." In Docket 19554 we have undertaken an extensive review of that framework to determine whether our present subscription programming rules are appropriate in light of our regulatory goals. This review has led us to the conclusion that a number of changes are warranted.

Jurisdiction. 147. The Commission has been given broad authority to regulate "interstate and foreign commerce in communication by wire and radio so as to make available, so far as possible, to all the people of the United States a rapid, efficient, nationwide wire and radio communication service with adequate facilities at reasonable charges * * *."[25] Notwithstanding this broad authority, several parties to this proceeding assert that it is not within the Commission's jurisdiction to place restrictions on subscription programming, particularly with regard to cable television, and that such restrictions are violative of the freedom of speech clause of the First Amendment. It is also asserted that the present program restrictions are vague and overbroad, and that they violate the policy of the anti-trust laws.

148. These jurisdictional and Constitutional questions were decided in favor of the Commission in "National Association of Theatre Owners v. Federal Communications Commission," 420 F 2d 194 (D. C. Cir. 1969). In upholding the Commission's program restrictions with regard to over-the-air subscription television, the circuit court said, "it seems obvious that the Commission sought only to insure the continuing economic vitality of free television and not to affect the ideas which could be presented on either free or subscription television. Thus, when the net effect of the program restrictions is considered, it seems quite likely that the public in STV areas will receive more rather than less diversity of expression in its television programming." At 208. As to vagueness and overbreadth, the court stated that the Commission's regulations were within the limits set by the courts. The court concluded that "the Commission found that STV would be a beneficial supplement to present television offerings *Provided*, That neither service could acquire sufficient economic power to drive the other from the marketplace. The program restrictions are designed to preserve this balance and to insure against programming duplication * * *" At 208.

149. Although the Commission's rules governing the programming of subscription cable television have not been specifically considered by the courts, the Supreme Court's decision in "United States v. Midwest Video Corp", 406 U.S. 649 (1968), provides ample justification for the action which we have taken. At issue before the court was the propriety of the Commission's now defunct mandatory origination rule. Like subscription cablecasting, the local originations required by the Commission's rule under attack did not make use of the broadcast spectrum. The Supreme Court stated, "But the regulation is not the less, for that reason, reasonably ancillary to the Commission's jurisdiction over broadcast services. The effect of the regulation, after all, is to assure that in the retransmission of broadcast signals viewers are provided suitable diversified programming * * *." At 669. Upholding the origination rule, the court said, "In sum, the regulation preserves and enhances the integrity of broadcast signals and therefore is 'reasonably ancillary to the effective performance of the Commission's various responsibilities for the regulation of television broadcasting.'" At 670. We believe that it is even more clear in the case of our subscription programming rules that the action we have taken is designed to enhance the integrity of broadcast signals and is a proper execution of our responsibility under section 2(b) of the Communications Act of 1934, as amended.[26]

150. The remaining question concerns the effect of the program restrictions upon competition between subscription and conventional television. That our rules affect competition between the two forms of television is apparent and uncontroverted. The proper question is not whether our rules affect competition, but whether the public interest considerations which underlie the rules outweigh the public interest considerations in support of unfettered competition. This Commission has consistently stated that unregulated competition by cable television and both forms of subscription television could have serious adverse effects upon the existing conventional television structure and we have taken steps to shield that structure from what we regard to be destructive competition. In the "Second Report and Order in Docket 14895," et al., FCC 66–220, 2 FCC 2d 725, 736 (1966), we said "our determination to adopt the carriage and nonduplication requirements rested on two basic grounds: (1) That failure to carry local stations and duplication of their programs are unfair competitive practices, which are inconsistent with the supplementary role of CATV * * *, and (2) that these requirements were necessary to ameliorate the risk that the burgeoning CATV industry would have a future adverse impact on television broadcast service, both existing and potential * * *." Upholding the cable television rules, the Supreme Court in "United States v. Southwestern Cable Co.", 392 U.S. 157, 175, (1968), concluded that "The Commission has reasonably found that the achievement of each of these purposes (regarding the structure of conventional television) is 'placed in jeopardy by the unregulated explosive growth of CATV.'" (citation omitted). The rationale underlying the cable television signal carriage and nonduplication rules is similar to that of the subscription program restrictions. In both instances, the public interest in maintaining the conventional television structure has outweighed the interest in unregulated competition.[27]

151. A number of parties to this proceeding suggest that the Commission obtain Congressional guidance before it establishes any policy which would permit subscription interests to use programming now found on conventional television. Similar suggestions were presented prior to our authorization of over-the-air subscription television in 1968. In a letter dated September 3, 1968, to the Honorable Harley O. Staggers, Chairman of the House Committee on Interstate and Foreign Commerce, then Chairman Rosel H. Hyde of this Commission stated:

> Subscription television has been the subject of formal Commission consideration for some 13 years and, in view of that background and the present circumstances, the Commission has found it necessary to determine its future course of action. We believe that we cannot, consistent with our responsibilities to the public, continue to delay resolution of this important question. Indeed, further substantial delay in this matter would constitute, in effect, a failure of the administrative process. We therefore propose to take up the matter for consideration at an early date looking toward further Commission action on the long-pending issues before the end of this year.[28]

In the six years since our STV decision, Congress has not seen fit to establish guidelines with regard to subscription television. We now have substantial evidence before us which indicates that the subscription television rules should be revised. We believe that this evidence cannot be ignored and that our responsibility to the public requires today's action. We emphasize, however, that our action today does not foreclose the opportunity for judicial review or full congressional review should such action be considered appropriate.

General discussion. 152. In our further notice, the scope of this proceeding was expanded to include three new issues; the warehousing of feature films, the appropriateness of revising the over-the-air subscription rules as well as the cable rules, and the need for a reporting procedure for new subscription cable operations. The warehousing issue will be discussed in conjunction with our consideration of feature films, paragraphs 180–182, infra. The remaining issues are discussed in the succeeding paragraphs.

[25] See paragraphs 10 and 11, supra.
[26] 47 U.S.C. 1.
[27] *See* paragraphs 10 through 14 of Memorandum Opinion and Order in Docket 20018, et al., FCC 74–1278, 49 FCC 2d 1078 (1974). Reaffirming our intent to preempt regulation of access channels, we concluded that our jurisdiction over cable television extends to non-broadcast services because they are "reasonably ancillary" to our jurisdiction over broadcasting.
[28] As we have previously stated, "Our concern, as it must be, is with the over-all public interest and not with protection of any existing service as such. It may well be that competition between conventional and subscription TV for viewing audience and program material may result in improved and more varied fare, both for subscription viewers and those who continue to rely on conventional television. But we also emphasize that we regard the preservation of conventional television service and the continued availability of good program material to the free service as extremely important considerations." Further notice of proposed rulemaking and notice of inquiry in Docket 11279, 7 RR 2d 1501, 1508 (1966).

153. The arguments in opposition to making the over-the-air and cable subscription rules uniform are based primarily on the theory that since STV operations make use of the broadcast spectrum where cable operations do not, the two services are not susceptible to uniform regulation. It is asserted that the cable rules need not be as strict as the STV rules. We must reject this argument. The subscription program restrictions placed on both STV and cable operations are meant to insure that programs now provided over conventional television are not siphoned away to subscription television. The rationale behind the anti-siphoning rules applies equally to both forms of subscription service, and whether the broadcast spectrum is used is not an issue. Special obligations are placed on STV operations by §§ 73.642, 73.643 (c) and (d), and 76.644 of the rules which result from STV's use of the broadcast spectrum. But with regard to subscription programming, we see no justifiable distinction between over-the-air and cable operations which would warrant unequal treatment under our rules. Therefore, we have decided that our subscription program restrictions should be applied uniformly to both STV and cable operations.

154. The suggestion, advanced by theater owners and supported by many parties to this proceeding, that the Commission require notice prior to the commencement of subscription cable operations merits serious consideration. Whereas STV operations require licensing by the Commission, there is presently no Commission requirement that cable operators advise the Commission as to their subscription activities. We recognize that some reporting procedure is necessary to keep the Commission informed as to the growth and development of subscription cable operations. The Commission's Annual Report of Cable Television Systems (Form 325) would seem to be the appropriate vehicle through which to obtain the needed information without materially adding to the paperwork burden now placed on cable operators by our rules. However, in light of our intention to undertake a wholesale review of Form 325, as we are now doing as to the Cable Television Annual Financial Report (Form 326),[29] we have decided to defer action on the subscription notice proposal and take up the matter in a separate proceeding along with other proposed revisions of Form 325.[30]

155. The comments contain a number of suggestions which would expand the scope of the subscription rules and place additional obligations upon subscription entrepreneurs. Broadcast interests have long contended that the subscription program limitations should apply to all cable casting; not just cablecasting for which a per-channel or per-program charge is made.[31] It is argued that all forms of cablecasting have the potential to siphon programming from conventional television and that cable interests could easily circumvent the present anti-siphoning rules by incorporating cablecasting fees into the charges assessed for regular subscriber service.

156. We believe that there is little likelihood that the anti-siphoning rules will be circumvented in the manner suggested above. In light of the fact that fewer than fifty percent of cable subscribers now choose to subscribe to a pay channel where one is offered, it seems unlikely that system operators could incorporate special subscription fees into basic subscriber charges without incurring major subscriber losses among those not wanting the additional subscription service. On the other hand, our policy of encouraging origination cablecasting is furthered by permitting cable operators to supplement their origination programming with some feature films, sports events and series programs. It seems most unlikely that sufficient revenues could be generated by such programs to pose a siphoning threat. Therefore, we will decline to make our anti-siphoning rules applicable to origination cablecasting for which no special charge is made. Should it come to our attention at a future date that the intent of the anti-siphoning rules is being frustrated in the manner suggested by the broadcast interests, we will at that time consider broadening the applicability of the rules.

157. Many broadcast interests suggest that pay operations be limited to one channel on cable television systems, and that pay cable operators be required to originate a substantial number of hours of nonpay programming to equalize pay cable's role with that of over-the-air subscription television. As we pointed out in paragraph 153, supra, both pay cable and STV present siphoning potential, and the program restrictions should apply uniformly to both services. There are substantial differences between the two services, however, and we have adopted regulations tailored to the particular characteristics of each. Since STV makes use of scarce spectrum space, § 73.642 of our rules limits STV to one station per market and § 73.643(c) requires a minimum number of hours of non-subscription programming. Cable television, on the other hand, does not make use of broadcast frequencies and has extensive channel potential. Substantial public service obligations are placed upon cable television by §§ 76.251 and 76.253 of the rules, which require that channel space and production facilities be made available for government, educational and public use. We see no interest to be served by restricting the number of subscription channels to one per cable system and by requiring non-subscription programming on pay channels where sufficient channel space is available to meet public service programming needs.

158. It is suggested that the anti-siphoning rules be made applicable to all forms of subscription program distribution, including Multipoint Distribution Service (MDS), laser and closed circuit systems. The transmission of program material to hotels and similar locations is presently the subject of a rule making proceeding in Docket 19671 [32] and the question of whether the anti-siphoning rules should cover these other distribution services will be considered in the context of that proceeding. Therefore, we will confine our decision in the instant proceeding to cable television and STV service.

159. Finally, it is suggested that the Commission's rules require a minimum amount of educational and cultural programming on subscription cable channels, encourage minority participation in subscription cablecasting, regulate the rates which may be charged for subscription programming, and establish various other requirements directed toward minority interests. Although these suggestions might be appropriate for Commission consideration, we are not disposed to expand the scope of this proceeding into areas not germane to the subject of program siphoning. Our long pending study of the subscription program rules should not be further delayed by consideration of tangential issues. We think the better course is to take up these other issues as part of a separate proceeding initiated by an appropriate petition for rule making.[33]

Feature films. 160. Cable television proponents devote a great deal of attention in their comments to the proposal that the feature film program restrictions be suspended until the alleged siphoning potential of subscription television is substantiated. It is submitted that the siphoning argument propounded by the broadcast interests is speculative; that no evidence has been presented indicating that siphoning has ever taken place; and that program restrictions should not be imposed until their need has been

[29] Notice of proposed rulemaking in docket 20247, FCC 74–1270, 49 FCC 2d 911 (1974).
[30] The Commission is currently considering rules which would require the maintenance of program logs for cablecasting activities. Notice of proposed rulemaking in Docket 19128, FCC 71–45, 27 FCC 2d 18 (1971).

[33] This is consistent with our statement in paragraph 23 of memorandum opinion and order in Docket 20018, et al., supra note 30, where we denied a request of the National Black Media Coalition for reconsideration of the Clarification of cable television rules and notice of proposed rule making and inquiry, FCC 74–384, 46 FCC 2d 175 (1974). There the Coalition had asked for new rules applicable to channel lessees regarding nondiscrimination in hiring and programming.

V 40167 APR 7 75 XUM

clearly established. In reply to these arguments, subscription opponents contend that the siphoning potential of subscription television has been clearly established and that prophylactic measures should be taken now rather than later when siphoning will have taken place and the imposition of program restrictions will disrupt the established viewing habits of subscription television patrons.

161. We have studied the evidence and have concluded that preventative measures are needed to avert the potential ill effects of siphoning before they are actually felt. We have previously stated that "Remedial action in this area should not wait upon the threat becoming actuality * * * Protection of the public requires that action be taken at a time when it involves no disruption of existing patterns."[27] When the STV rules were adopted in 1968, we said:

> We cannot agree with those who urge that the type of programming that STV will show is known, that it is clear that it will not siphon from free TV, and that therefore no rule is necessary. The ultimate path that STV will follow is not clearly known * * *. We would be remiss in our duties if we did not take regulatory steps to afford some assurance that free TV will continue to be available in ample quantity and quality.[28]

The six years since that statement was made have not provided us with a clear picture as to the effects of subscription television upon conventional broadcasting. The cable television industry is still in its early stage of development; the first STV station has yet to become fully operational. However, our experience since 1968 substantiates the basic conclusion upon which the program restrictions were premised—that subscription programming will consist largely of feature films, series and sports events, all of which are mainstays of conventional television programming. Whatever cable television and STV might become in the future, and we believe that their potential to serve the public is great, the evidence clearly shows that a primary element of subscription programming will continue to be programs which have broad public appeal similar to what is found on conventional television. The availability of this programming to conventional television should be maintained to preserve the quantity and quality of programming now delivered to the public by the conventional system.

162. We have not been persuaded that a moratorium on the feature film provision is appropriate. The evidence indicates that many of the films shown on conventional television are desired for subscription exhibition and that reasonable restrictions are required to insure that subscription television continues to be an optional alternative to conventional television and does not become the exclusive television outlet for feature films. Even at its present subscriber strength, subscription cable television could delay the exhibition of films on conventional television. The film producer has an economic incentive to exploit the subscription market prior to a film's sale to conventional television. As subscribers become more numerous, subscription runs, and reruns, will become more lengthy. At some point, the potential subscription audience will be sufficiently large to cause the permanent withdrawal of at least the most popular films from conventional television. While some delay of the conventional exhibition of feature films may be unavoidable because subscription exhibitions of new films may take place before conventional exhibitions, just as theater exhibitions now precede television exhibitions, long delays or complete withdrawal from the conventional market can, and should, be avoided. Consistent with subscription television's supplementary role, the public's choice to view films either on subscription or conventional television should be maintained. Our rules are designed to maintain that choice while providing for the orderly development of both the subscription and conventional television industries. We believe that the existing regulatory framework for subscription programming should be retained, even though the industry is not fully developed, so that subscription entrepreneurs can exercise their business judgment with reasonable certainty as to the rules of the game. The evidence before us demonstrates that our concern with feature film siphoning is real, not imagined, and that the protection afforded the public by our rules will increase in importance along with the growth of the subscription industry. We intended to proceed with our established policy in an orderly fashion, refining our rules as we gain experience. Our experience to date suggests that our existing rules should be revised in several areas, and these revisions will be discussed in the succeeding paragraphs.

163. The present feature film rule is applied to all cable television systems and STV stations without regard to the conventional television markets in which they are located. The new feature film rule, like the existing sports rule, will take a market approach for determining when a program is available for subscription use. The relevant television market for STV stations and cable television systems will be defined somewhat differently, reflecting the Commission's respective regulations governing the operation of the two services.

164. For purposes of our new subscription rules, the market of an STV station is defined to include all commercial television broadcast stations which place a Grade A contour entirely over the community to which the STV station is licensed. This is consistent with § 73.642 of the rules, which states that an STV authorization will be issued only for a station the principal community of which is located entirely within the Grade A contours of five or more commercial television broadcast stations, including the station of the applicant. The rules regard these stations as "local," i.e., they provide television service to the community of the STV operation." The market of a cable television system is defined to include all commercial television broadcast stations which are required to be carried by the system upon request of the respective stations pursuant to Subpart D of Part 76 of the Commission's rules. These "must carry" stations are considered to be "local" stations by the cable television signal carriage rules, i.e., these stations generally are licensed to serve the audience located within the community served by the cable system upon which carriage is required." In the very rare case where the signal carriage rules do not require a cable system to carry any commercial television broadcast stations, compliance with the subscription program rules will not be required.

165. For STV stations and cable television systems subject to the "must carry" requirements of the signal carriage rules, subscription use of feature films will be limited to four situations. The first is when the film to be cablecast or broadcast is less than three years old. This new provision provides an additional year during which films may be exhibited by subscription television. We have determined that the present two-year rule does not provide sufficient time for the subscription exhibition of some feature films. While most films conclude their theatrical run twelve to eighteen months after theatrical release, some "blockbuster" films run considerably longer. Even for the average film, the present rule generally allows for only a six to twelve month subscription run. Because of scheduling practices and various other difficulties, we think that such a period is unduly restrictive. By expanding the feature film rule to permit subscription use of films during the first three years after their theatrical release, we believe that almost all films will be allowed some subscription exposure, and most films will be available for twelve to eighteen months. For the rare case where a film runs for three years in theaters, its subscription use may be permitted by the other provisions of the film rule.

166. We believe that the three year provision provides a reasonable balance between the interest in allowing for subscription exposure of new films and the interest in their timely exposure over conventional television. Few films are televised before they are three years old, and most are four years or older before their first telecast. Therefore, we expect our new rule to provide for an adequate period for the subscription use of most new films without detracting from the public's ability to view them over conventional television.

167. The term "feature film" refers to a film which is produced to be released in theaters where an admission fee is charged. A movie which is produced specifically for television exhibition is not a "feature film" for purposes of our rules.

[27] Memorandum opinion and order, in Docket 18397, supra note 8, at 828.

[28] Fourth report and order, supra note 4, at 556.

[29] See paragraphs 155–179, Fourth Report and Order in Docket 11279, supra note 4, at 515–523.

[30] See paragraphs 78–87, Cable Television Report and Order, supra note 9, at 173–176.

The age of a feature film for the purpose of our rules will be computed from the date of general release in theaters. By "general release" we mean the first showing of a feature film in theaters on a non-reserved seat basis with continuous performances in several theaters throughout the United States. "General release" does not include special situations such as the first run "road show" or "reserved performance" showing of a feature film, which means the showing of a film on an exclusive basis at usually one theater in an area, with non-continuous performances where the theater is cleared after each showing, usually at prices greater than the normal general release admission price.

168. The second situation in which a feature film will be available for subscription use is when the film is available for telecast by a conventional broadcast station located in the market of the subscription station or cable system. When a film becomes available for conventional television exhibition, the issue of program siphoning disappears, as does the need for anti-siphoning restrictions. In such a situation, the public interest in receiving a film over conventional television has been realized and there is no longer any justification for restricting the exhibition of the film by subscription television. Since the public is able to view the film over conventional television at no charge, those who choose to pay a special fee to view the film over subscription television should not be prevented from doing so by our rules.

169. To determine when a film is available for conventional telecast, the rules look to whether a conventional broadcast station in the market has a present contractual right to exhibit the film. A film under contract, but which is not available for exhibition until some future date, will not be considered as available for telecast. This distinction between films which are under contract and those which are available for telecast is necessary to remove any incentive on the part of the program producer to demand film contracts which call for long periods between contract date and first telecast availability date during which the films could be sold for exclusive subscription exhibition. Therefore, the subscription exhibition of a film will be restricted to the period between the date specified in the television contract at which the film may be first exhibited, and the date at which the film may no longer be televised. If the television contract calls for a certain number of conventional telecasts during a specified period, the rules will allow for subscription exhibition from the film's "availability date" for first conventional telecast to the date when the broadcaster's right to telecast the film is terminated.

170. For the purposes of this provision, a conventional television station affiliated with a television network will be deemed to hold a present contractual right to exhibit a film if the network to which it is affiliated holds such a right. Where a television station may exhibit a film provided by a television network, or where the station itself contracts for the film's exhibition, siphoning cannot result and there is no need for subscription restrictions. Therefore, our rule will permit the subscription use of films which are available over conventional television pursuant to either local station contracts or network contracts.

171. The foregoing "under contract" provision is premised upon the existing pattern of feature film distribution. Comments filed in this and other proceedings indicate that films are generally sold to conventional television individually or in packages for extended periods and multiple showings or runs. A typical feature film contract might provide for five to seven showings of a film during a five to six year period, or for 120 showings of a fifty-film group during the same period." We do not expect this pattern to change as a result of the operation of our subscription rules. Indeed, if the provisions of film contracts are altered, our conclusions underlying the subscription rules may become invalid, requiring refinements in the rules. Therefore, we intend to watch closely for modifications in feature film contracts which might place the effectiveness of our rules in question. Should new patterns of feature film distribution develop, such as a contraction or expansion of the customary length of availability periods in relation to the number of permitted showings, we may be required to take a second look at our subscription rules and if necessary, adjust them to reflect the change in circumstances.

172. The third situation in which a feature film will be available for subscription use is when the film has been in general theatrical release for ten years and has not been exhibited over conventional television in the market for three years prior to its proposed subscription exhibition. This provision is designed to replace the existing provision which limits the number of older films which may be exhibited by subscription television to one film per month. It is argued that the present rule is overbroad because it does not permit the subscription exhibition of thousands of older films which are not desired for conventional television exhibition. The comments of Metromedia indicate that only one half of the films outstanding are suitable for conventional television exhibition, and that only about 23 percent could be called desirable. (See paragraph 38, supra.) Therefore, it is claimed that the present rule precludes the subscription use of many films which are not wanted by and would never appear on conventional television. Since these films are not shown over conventional television and siphoning is not at issue, it is said that our rules should not restrict their subscription use. We agree with this contention and we have adjusted our rules accordingly.

173. Our new provision applies only to feature films which are more than ten years old. Generally, by the time a film is ten years old it has completed its theatrical run and has been available for both network and syndication exhibition for several years. If such a film has received no conventional television exposure in a market over a three-year period, it is reasonable to expect that the film is not particularly desirable to television stations in that market or that it will never be made available for conventional telecast. An example of such films would be those which are not rated for family viewing. If we find, however, that our rules are being used to keep desirable films off conventional television, it may be necessary for us to revise these rules.

174. Feature films are typically made available for purchase by conventional television during or immediately after their theatrical run. Motion picture interests claim that film producers are required to sell their product to television as soon as possible in order to obtain needed revenue. It is said that many films do not generate enough revenue in theaters to cover their production costs, and that producers depend upon television sales to recover their expenditures. Because producers are anxious to sell their works to television, desirable films generally have been purchased for television exhibition soon after their theatrical run, although they are often rested for some time before they are actually telecast. If a film is purchased by a television network, it is generally offered for sale for local syndication soon after the expiration of the network contract or even during the network contract. Older films not under either a network or syndication contract are typically those which are undesirable to stations in the market or which will never be made available for television exhibition. This marketing pattern indicates that films not exhibited over conventional television for a significant period of time are not highly desirable and that their use by subscription interests will have little or no effect on conventional television programming. We have decided that a film over ten years old which has not been exhibited in the market for a period of three years is, as a general rule, either undesirable or permanently unavailable to conventional television stations in the market and should not be precluded from subscription use. The record indicates that economic pressures will not permit film producers to withhold desirable films from the conventional television market for three years in order to sell them for exclusive subscription use. We are persuaded that those films which have not been exhibited by conventional television for this period of time need not be precluded from the subscription market should sufficient demand develop to warrant their exhibition on a subscription basis.

175. Once a film has been exhibited on a subscription basis pursuant to the provision discussed in the preceding paragraph, our rules will not preclude subsequent subscription showings even though the film is occasionally exhibited over conventional television. The rules assume that any film over ten years old

[31] See paragraph 2, Further notice of proposed rulemaking in Docket 18179, FCC 71-42, 27 FCC 2d 13, 14 (1971).

V 40 I 67 APR 7 75 XUM

and not exhibited in the market over conventional television during the past three years is generally undesirable for conventional exhibition. But to the extent that there may be some conventional television market for these films, our rules should not discourage their sale to conventional television by precluding subscription exhibitions for three years after each conventional telecast. Therefore, the new rules will leave such films available to both conventional and subscription television once it has been established that they are not generally desirable for conventional exhibition and they have been exhibited by subscription television.

176. We believe that this provision accomplishes our objective to prevent siphoning and does not unfairly restrict the film product available for subscription use. Absent evidence to the contrary, it is unreasonable to assume that motion picture interests will forego potential revenues from conventional television for a period of at least three years in order to "save" an older film for the subscription market. Such action seems particularly unlikely where the motion picture interest may sell his product to conventional and subscription television simultaneously pursuant to our new rules. On the other hand, this new provision will make available for subscription use thousands of older films which have not been exhibited over conventional television and which were previously precluded from subscription exhibition. We wish to make absolutely clear, however, that our intent is not to encourage the withholding of films from conventional television. Our conclusion is that film producers and distributors will not seek to withhold their product from the conventional television market. Should this conclusion be placed in question, we may be required to lengthen the quired hiatus period or otherwise revise the rule to ensure its effectiveness.

177. Foreign language films constitute the fourth category of feature films made available for subscription use by the new rules.[a] We have consistently encouraged the dissemination of foreign language programming and in the case of cable television signal carriage have determined that foreign language programming would have no significant impact upon local television service.[a] Similarly, we foresee little likelihood that the unrestricted subscription use of foreign language films will have a significant impact upon conventional television programming. Therefore, we are not prepared to restrict the subscription use of foreign language films at this time. We recognize, however, that there are some television broadcast stations, such as the Spanish language stations in the southwest, which televise primarily foreign language programs. Should it be demonstrated that foreign language films are being siphoned away from these broadcast stations by subscription operations, we will consider remedial action on an ad hoc basis.

178. We believe that the foregoing provisions focus sharply on the problem of feature film siphoning, provide adequate protection against that eventuality, and make available sufficient feature film product to satisfy the needs of the subscription television industry. However, we realize that there will be instances where the new rules will preclude the subscription exhibition of feature films which would in any case not be shown over conventional television. Therefore, we have retained the waiver policy announced in paragraph 287 of the Fourth report and order.[a] Pursuant to this policy, waivers will be granted upon a convincing showing to the Commission that a film desired for subscription exhibition is not desired for exhibition over conventional television in the market, or that the owner of the film, even absent the existence of subscription television, would not make the film available to conventional television.

179. Subscription entrepreneurs will be required to maintain public files listing each feature film exhibited, the date of its exhibition and the provision of these rules pursuant to which it was exhibited. When a film is exhibited pursuant to the "under contract" provision, the station or network serving the market and holding a present contractual right to exhibit the film must also be specified. These records are needed to preserve data relative to the subscription use of feature films and to afford the Commission and members of the public an opportunity to ensure that compliance with the rules is being achieved.

180. In the further notice of this proceeding, we asked for comment on the alleged warehousing of feature film product by television networks. Subscription interests have expressed concern that the intended operation of our rules is being frustrated by the preemptive purchase of feature films by national networks and by their purchase of exclusive rights to some films which they have no intention of ever exhibiting. In reply to these allegations, network officials have stated that it is not their policy or intention to negotiate exclusive contracts for films which unnecessarily impinge upon the ability of subscription operations to exhibit them.[a] We assume the sincerity of these expressions and will expect the networks to refrain from demanding exclusivity provisions in their feature film contracts with producers which preclude subscription exhibition of films for an unreasonable length of time prior to their network showing.

181. Notwithstanding this denial of warehousing practices by the national television networks, the question of warehousing alludes to a larger, more fundamental question. That is, should the Commission's rules prohibit or limit in any way the purchase of exclusive rights to programming by conventional television as against subscription television? The effect of our anti-siphoning rules is to reserve programming for use by conventional television. Without these restrictions, programs now found on conventional television might be bid away by subscription interests, thereby threatening the established broadcast structure. But having restricted the use of programming by subscription television in order to conserve conventional television programming, should we then allow conventional television to further restrict the programming available to subscription television by demanding exclusive rights to programs? Or, does the public interest require, in addition to the anti-siphoning protection afforded conventional television, measures which limit or prohibit conventional television from excluding the subscription industry from access to programs which conventional television holds present or future rights to exhibit and where the danger of siphoning is not present?

182. In Docket 18179 we established an inquiry with respect to the availability of programming to commercial television stations and cable systems. In the

[a] Foreign language films for purposes of this provision include all films with predominantly non-English discourse. Such films would include domestic films dubbed in a foreign language, but not foreign produced films dubbed in English. In Puerto Rico, films with English discourse will be considered to be foreign language films. "See, Cable Television Company of Puerto Rico," FCC 74-497, 46 FCC 2d 1096 (1974).

[a] See paragraph 96 of "Cable Television Report and Order," supra note 9, at 180-181.

[a] Supra note 4, at 557.

[a] Mr. Everett Erlick, speaking for the American Broadcasting Company, stated ABC's policy as follows: "If we do not have the right to telecast a title within two years following first theatre exhibition, we do not seek exclusivity against pay cable during that two year period. Where we do acquire broadcast rights within 30 months or less, we will seek exclusivity for up to 6 months as a reasonable resting period prior to permissible play date. Where the permissible play date is 30 months or later after theatrical exhibition, we negotiate reasonable exclusivity provisions subject to the Commission's two year rule." October 25, 1974 oral argument transcript at page 1503.

In written comments filed on October 25, 1974, the policy of CBS, Inc., was stated as follows: "In its most recent major feature film negotiation (completed July, 1974) CBS agreed to waive any exclusivity against pay cable exhibition for a period of two years after the theatrical release date of each film involved. It is our present intention, as a matter of policy, to apply the pattern established in that transaction to our other feature film purchases, except in cases where CBS acquired the right to broadcast, and expects to broadcast, a particular film within or very shortly after two years from the date of theatrical release. In such cases, the network will seek exclusivity for a reasonable period in advance of the expected broadcast of the film." At page 2.

The policy of the National Broadcasting Company, Inc., was stated in written comments filed on September 20, 1974: "The NBC Television Network does not attempt to prevent a film supplier from licensing pay cable within the two year period permitted by the rule where the film is not available to the network until subsequent to that two-year period. Furthermore, the usual feature film contract which NBC has recently been entering into calls for about two plays over about two or three years from the date the producer agrees to make the film available to us, so there is no possibility of 'warehousing.'" At page 21.

further notice in that proceeding we sought comments on whether the Commission should prohibit exclusive program contracts vis-a-vis television stations and cable systems.[a] In a separate document to be issued today, we are commencing a new proceeding inquiring into the question of whether the Commission should adopt rules restricting the ability of conventional television networks and stations to require program exclusivity against subscription operations. We intend to thoroughly explore the warehousing issue as well as the more general question of program exclusivity. Should the evidence demonstrate that measures are required to prevent unreasonable restraints on the program product available to the subscription television industry, we will consider adopting new rules designed to limit or remove such restraints.

183. In adopting the foregoing rules, we are not unmindful of the comments of the National Association of Theatre Owners (NATO) which suggest that we adopt rules designed to protect the motion picture theaters in the United States from subscription television competition. Their urging that we take such action raises the question of whether our jurisdiction extends to the adoption of rules of this type and, assuming the regulations suggested do not exceed our jurisdiction, whether a case has been made for their adoption.

184. Concerning the first of these questions, the Department of Justice has stated in its comments that "Congress has not conferred upon the Commission either the jurisdiction or the authority to balance these non-broadcast related interests in regulating the broadcast and related interests." NATO's acknowledgement that there is question as to the extent of the Commission's jurisdiction is brief and its support for such jurisdiction principally relies on analogy to the Commission's adoption of equal employment opportunity rules. In taking its actions in the area of equal employment, NATO notes, the Commission acknowledged the contribution the rules would make "toward reducing and ending discrimination in other industries." 16 RR 2d 1561, 1563. Reference is also made to "Report of Subcommittee No. 6, Select Committee on Small Business, 89th Cong. 2d Sess.," wherein the Commission was urged to consider the interests of small businesses in adopting advertising regulations.

185. We find, however, no evidence of any substantial sort that NATO's dire predictions of the collapse of urban centers will in fact occur, and thus need not resolve the jurisdictional question. In the absence of any stronger showing than has been made, we do not think it necessary to proceed further in this area and are not adopting the rules which the theater owners have suggested.

186. *Sports.* Most parties agree that some restrictions are needed to insure that the quantity and quality of sports events now shown over conventional television is not diminished by subscription operations. Unlike feature films which have continuous audience appeal, sports events have substantial entertainment value only at the time of their occurrence. Thus, with regard to sports events, our anti-siphoning rules must address the question of which programs should be reserved for conventional television rather than when they should be reserved, as was the case with feature films.

187. In keeping with our established policy, the new sports rules are designed to restrict the subscription exhibition of events which have been regularly televised in a community on a non-subscription basis, thereby assuring the public that the events now viewed over conventional television are not siphoned away to subscription operations. In determining whether a sports event has been televised in a community on a nonsubscription basis, the existing rules consider only those commercial television broadcast stations which place a Grade A contour over the entire community. This standard has been retained for purposes of the STV rule, but a new standard has been adopted for purposes of the cable television rule. Consistent with the television market definition incorporated in the cable television feature film rule (paragraph 164, supra), in determining whether a sports event has been televised in a community on a nonsubscription basis, the new cable sports rule will consider all commercial television broadcast stations which are required to be carried on the cable system upon demand pursuant to the cable television signal carriage rules. Accordingly, an event will be considered to have been broadcast in the market of an STV station if the community to which the station is licensed lies wholly within the Grade A contour of a nonsubscription commercial television station broadcasting the event. An event will be considered to have been broadcast in the market of a cable television system if the event was broadcast by a nonsubscription commercial television station which the cable system is required to carry upon demand of the station pursuant to the signal carriage rules.

188. The original sports rules for both STV and subscription cable television restricted the live subscription use of events which had been previously shown live over conventional television. In the 1972 Report and Order in Docket 18893, the sports rule applied to STV was revised to limit subscription use of events, either live or on a same-day delayed basis, which had been previously televised, either live or on a same-day delayed basis.[a] These changes were made because the Commission was concerned about situations where the delayed exhibition of an event amounts in effect to a "live" showing. Thus, in paragraph 13, the Commission stated:

> It is clear, for example, that instant replays [taped delays] could siphon sporting events just as surely as live showing of those events could. Thus, as MST states, the entire World Series could be put on instant replay over STV under the proposed rules regardless of the fact that this event had in the past been regularly shown over conventional television.[a]

With regard to providing anti-siphoning protection to events which had been previously televised on a delayed basis, Mr. John R. Fitzgerald in his comments pointed out that certain events had been televised in New York on a one or one-half hour delayed basis and that these events should be protected from siphoning. Noting this, the Commission said, "Thus, we think it clear that protection should be given in the type of situation mentioned by Fitzgerald where the delayed viewing of the event is virtually like viewing it live."[a]

189. We remain of the opinion that where the delayed exhibition of an event is "virtually like viewing it live," the anti-siphoning rules should treat the event as if it were exhibited live. However, when the delayed exhibition occurs after the event has been played, the exhibition is no longer virtually like a live exhibition and the rules should recognize that fact. Since the public interest in viewing a sporting event is greatest at the time the event is actually being played, our rules should encourage its live exhibition over conventional television. On the other hand, a few people might be willing to pay to view an event after its conclusion and we see no reason to preclude this opportunity. These considerations have persuaded us that the best course is to make the anti-siphoning rules applicable only to live exhibitions, but to define the term "live" as any telecast or cablecast that is simultaneous with the actual occurrence of the event or the delayed tape showing of which is begun while the event is still in progress. Thus, the rules will permit the delayed subscription exhibition of any sports event, and will not proscribe the live subscription exhibition of an event which was previously televised on a delayed basis over conventional television. We feel that this provision best serves the vast majority of people who would rather view a sporting event live, as well as those who would still be interested in viewing the event after its result is known.

190. Some confusion may develop in applying our definition of live telecasts to events such as auto races, golf matches and the Olympics, which take place over an extended period of time. Typically, only portions of such events are televised and the telecasts often occur on a delayed basis because of such factors as time zone differentials. This is especially true of telecasts of the Olympic games. Consistent with our statement

in paragraph 295 of the Fourth Report and Order in Docket 11279,[40] and our discussion in the preceeding paragraph, if a substantial portion of such games or matches are telecast, and the telecasts take place during the period in which the events are actually taking place (this period may extend over several days in the case of the Olympics), the events will be considered to have been telecast live for purposes of the rules. What will constitute a "substantial portion" of a particular event cannot be narrowly defined due to the diverseness of the events to which the term will be applied. In this area, we must leave it to the parties involved to apply a standard of reasonableness. Should disputes arise, we will consider them on an ad hoc basis.

191. The new sports rules continue to define sports events as indicated in paragraph 292 of the Fourth Report and Order in Docket 11279,[41] and to divide events into two groups; specific events, such as the baseball World Series or the Football Super Bowl, and nonspecific events, such as regular season football or baseball games. The examples listed in paragraph 294 of the Fourth Report and Order in Docket 11279,[42] with two exceptions, continue to represent the type of events which will be regarded as specific events within the meaning of the new rules, although the list is by no means exhaustive. The two exceptions are the college basketball National Invitational Tournament (NIT) and professional basketball's NBA championship games. Consistent with our treatment of the NCAA basketball championships, only the final and semi-final games of the NIT playoffs will be regarded as specific events. With respect to the NBA playoffs, only the final seven game series will be regarded as a specific event. For the reasons set out in the succeeding paragraph, the events leading up to these final NIT and NBA playoff games will be treated as non-specific events.

192. We previously recognized in paragraph 297 of the Fourth Report and Order in Docket 11279,[43] that certain playoff games such as the NBA and NHL playoffs are customarily regarded as features of the regular sports season and should be classified as non-specific events rather than specific events. The features which we regard as distinguishing non-specific playoff events, such as the NHL playoffs, from specific playoff events, such as the World Series, are the number of games played and the period of time consumed during the playoffs. For instance, the Stanley Cup hockey playoffs involve as many as sixty-one games and cover a period as long as six weeks. Such contests are distinguished from the World Series, which involves a maximum of seven games and is scheduled to cover a period of less than two weeks. Therefore, except as indicated in the previous paragraph, we will treat these games as non-specific events.

193. Subscription exhibition of specific events is limited to those which have not been broadcast live over conventional television in the market during any one of the five seasons preceding the proposed subscription exhibition. Application of the five-year standard to cable as well as STV operations is consistent with our findings discussed in paragraphs 8 through 10 of the Report and Order in Docket 18893.[44] We have used the term "season" rather than "year". Thus, the rule looks back over the previous five sport seasons rather than the previous five one-year period or calendar years. As to specific events which do not have commonly defined seasons and recur on an irregular basis, such as heavyweight title boxing matches, they will be treated as set forth in paragraph 40 of the Report and Order in Docket 18893.[45] If a regularly recurring event takes place at intervals of more than one year, such as the Olympic games, the event will be precluded from subscription exhibition if it has been broadcast over conventional television in the market during any one of the ten years preceding the proposed subscription exhibition.

194. When the STV sports rules were amended in Docket 18893, subscription exhibition of new events brought about by restructuring of existing sports was proscribed for a period of five years after their first occurrence.[46] The rules were not made applicable to new events not brought about by restructuring of existing sports. The Commission indicated that it would defer action as to entirely new events until its need had been demonstrated. Discussion of this matter in Docket 18893 centered around new specific events such as the Super Bowl, and no mention was made of new non-specific events such as those played by an expansion team pursuant to a new franchise.

195. While we are persuaded that the existing STV rules applicable to new specific events should be retained and applied to cable operations, we have decided to take a different approach with regard to new nonspecific events. A five-year prohibition of the subscription exhibition of all games played by a newly franchised sports team would be overly restrictive. On the other hand, the public interest would not be served if all such games were reserved for exhibition on a subscription basis to the exclusion of conventional telecasts. In order to provide some possibility for subscription television exposure of new non-specific events brought about by a restructuring of an existing sport, while preserving for the public an opportunity to view a portion of these games on conventional television, we have decided to treat these events in a similar manner as those played by previously existing teams. The manner in which this will be accomplished is set out below in paragraph 201.

196. With regard to existing non-specific events, we have departed from the all or nothing approach taken by the present rules and have adopted modified "remainder games" provisions. The concept of "substantial number" has been retained to distinguish between games regularly televised and games not regularly televised, but the watershed has been specifically set at twenty-five percent. The concept of "categories" has also been retained, but categories of events in each sport for purposes of the rules will be limited to the following: Preseason home, pre-season away, regular season home and regular season away. The four categories that we have specified are generally recognized, and to allow for the application of additional categories would introduce a large element of uncertainty into the sports rules and would likely lead to much confusion.

197. The old "games of the week" category has been eliminated because such games do not usually exist in their own right, but are so called only as a promotional term in relation to their network exhibition. Most games of the week cannot be forecast from league schedules, but come into being only upon their designation by the networks. We have not provided for a category of post-season home or away games with regard to non-specific events because the number of such events to be played by a particular team or individual in any given season cannot be foretold, but generally is determined by some type of playoff procedure. (See our discussion of post-season non-specific events in paragraph 192, supra.) Since the new rules assume that the number of events to be played in a category is known in advance of their occurrence and allow for the subscription exhibition of some percentage of this number, non-specific playoff games cannot be easily introduced into our formulae. We have not found a way to completely resolve this problem, but the best procedure seems to be that adopted in the original STV rules.[47] There it was determined to regard non-specific playoff games as part of the regular season rather than a separate category of events. If non-specific playoff events are exhibited by subscription interests, we will expect them to arrange their schedules so that the limitations prescribed by our rules are not exceeded. For instance, if our rules permit the subscription exhibition of twenty percent of the events in a certain category and prior to the playoffs twenty percent have been exhibited, at least five playoff games must be scheduled before an additional game may be exhibited by the subscription operation.

198. We realize that this is not a perfect solution for the handling of non-specific playoff games, but lacking a more suitable alternative, we must trust in the good faith of the parties involved to apply our rules in a manner consistent with their intent. By placing playoff

games in the regular season category, we have left open the possibility of "frontloading," i.e., arranging telecasts so that most conventional telecasts take place during the early part of the season, leaving the more popular end-of-season events for exhibition on a subscription basis. It is not our intent that frontloading take place. We expect that the uncertainty as to whether a particular team will reach the playoffs, or if it does, as to whether it will be eliminated at an early stage of the playoffs, will discourage temptations to frontload conventional telecasts. Should our expectations prove wrong, and should we discern the development of a trend to frontload conventional telecasts and "backload" subscription exhibitions, we will be required to take whatever additional action is appropriate to preserve the intended operation of the rules.

199. The number of non-specific events which may be exhibited on a subscription basis during any sports season will depend upon the number of such events shown over conventional television during the preceding "highwater mark" season; that is, that season among the preceding five seasons when the largest number of events in the relevant category were broadcast. All, or some, of the events not broadcast over conventional television in the highwater mark season—the remainder games—will be available for subscription exhibition, depending upon the level of previous conventional broadcasts. If less than twenty-five percent of the events in a category were broadcast live over conventional television in the market during the highwater mark season, the number of events available for subscription exhibition shall be equal to the number of remainder games in the highwater mark season.

200. If twenty-five percent or more of the events in a category were broadcast live over conventional television in the market during the highwater mark season, the number of events available for subscription exhibition shall be equal to fifty percent of the remainder games in the highwater mark season. This provision relaxes the present restriction which prohibits altogether the subscription exhibition of games in a category of events of which a substantial number were previously carried by conventional television. To discourage a gradual siphoning away of these games from conventional television to subscription television, the events available for subscription exhibition will be reduced when the number of games conventionally televised is reduced from previous seasons. Thus, where twenty-five percent or more of the games in a category have been broadcast live over conventional television in the highwater mark season and the number of games in the category to be broadcast in the current season is a reduction from the number of events broadcast in the highwater mark season, the number of events in the category which may be exhibited on a subscription basis in the current season shall be reduced in proportion to the reduction in events broadcast. Consider the following example: Forty games in a category consisting of eighty games were carried by conventional television in the market in the highwater mark season. This leaves forty as the number of remainder games at the five year highwater mark, of which fifty percent, or twenty, are left for subscription exhibition. Thirty-four games were conventionally televised in the market last season and only thirty-two will be televised in the current season. The twenty games otherwise available for subscription exhibition during the current season must be reduced in proportion to the reduction in the number of games conventionally televised, a reduction of twenty percent in this case. Therefore, only sixteen games will be available for subscription exhibition in the current season. Of course, there may be many cases where the number of games televised is voluntarily reduced by a conventional television station for reasons completely unrelated to program siphoning. Upon a proper showing that this is the case, we will be disposed to grant a waiver of the proportional reduction provision.

201. As we pointed out in paragraph 195, supra, new teams which result from the restructuring of existing sports must be treated in a special manner. With no previously established pattern of telecasts in the market, the first season games played by a new or transferred team in an existing sports league are not susceptible to allocation between conventional and subscription television pursuant to our formulae set forth above. Therefore, we must substitute an alternate telecast history for such new teams which can be applied by our rules in lieu of an actual telecast history. We have decided that the average of all telecasts, by category, of games played by teams in the league of the new team will provide a reasonable basis for allocating events between conventional and subscription television during the team's initial seasons of play. During the new team's first season of play, subscription exhibition of its games will be determined from the previous season's average of telecasts in the category of all events played in the league. In the second season of play, subscription exhibitions will be determined from either the league average of telecasts which was used the previous season, or the previous season's actual telecasts of games played by the new team, depending upon which figure represents the highwater mark in the category. This procedure will continue through the new team's fifth season of play, using the highwater mark of actual telecasts and the league average figure applied the first season to determine allowable subscription exhibitions. In the sixth season, subscription exhibitions will be determined by the highwater mark of actual telecasts during the previous five seasons in the same manner as for the older teams in the league.

202. The dichotomous nature of our non-specific events rule reflects what we perceive to be different public interest considerations attached to events which have been regularly televised and those which have not. The public is most interested in the continuation of conventional television coverage of events regularly televised in previous years, and less interested in the telecasting of those events which have received only intermittent coverage. The existing sports rule seeks to give effect to this distinction, but in the process of applying the rule, considerable confusion has resulted because of the many subjective responses which may be given to the question of whether events have been "regularly" televised. Our new rule continues to distinguish between events regularly televised and those not regularly televised, and also establishes a definite standard for making the distinction. The new rule permits the subscription exhibition of all remainder games where the category of events in question has not received substantial conventional television coverage, and only half of the remainder games where the category of events has received substantial coverage. The remainder games not made available for subscription exhibition allow for expanded conventional telecasts of those events which have been most often televised in the past and which, presumedly, the public has the greatest interest in viewing. This rule, we believe, provides for reasonable subscription exhibition of sports events without diminishing the public's opportunities to view events on conventional television.

203. We have established twenty-five percent as the watershed between a substantial and an insubstantial number of telecasts. Twenty-five percent is no magic number, but rather a reasonable figure to distinguish between a substantial number and an insubstantial number of events. Some pre-determined figure is necessary for the administration of our sports rules. Because of the more or less arbitrary nature of the twenty-five percent figure, we intend to apply the rules flexibly in certain situations. Consider this hypothetical: a conventional independent television station historically has telecast approximately twenty percent of the Yankee away baseball games in its market. Last season a television network affiliate in the same market telecast one Yankee away game as a network game of the week which resulted in more than twenty-five percent of the Yankee away games having been telecast in the market last season. Should this happenstance severely diminish the Yankee away games available for pay exhibition during the next five seasons? Possibly not. Therefore, presented with situations similar to our hypothetical and where the public interest would not suffer, we will consider granting waivers to permit the subscription exhibition of more events than would be permitted by a strict application of our rules.

204. It has been alleged that any rule which permits the subscription exhibition of remainder games will result in the best events, in terms of popularity, location and time of occurrence, being purchased for subscription exhibition, leaving the less attractive events for conventional exhibition. To guard against this eventuality, we have considered allowing con-

V 40167 APR 7 75 XUM

Accordingly, it is ordered, That effec-

ventional broadcast stations and networks to preempt certain events which they would like to carry. We would permit conventional television to choose the events it wishes to televise and preclude these events from being exhibited on a subscription basis.

205. Having studied the merits of this proposal, we have concluded that a preemption provision would add unwarranted complexity to the rules and might produce anomalous results. Therefore, at least for the present, we have decided not to include such a provision in our rules. We are nonetheless concerned that the quality of events offered to conventional television might be reduced. Should this happen, we might be required to include the concept of preemption in the rules. For the present, we will trust in the good faith of the parties involved to conduct their operations in accordance with the spirit as well as the letter of the rules.

206. One final matter with regard to sports events must be discussed. We have been advised that some sports teams pay for local television coverage of away games in order to gain media exposure and promote attendance at home games. It is submitted that the anti-siphoning rules are not meant to reserve events for conventional television at the expense of the sport promoter, and that events televised in whole or in part at the expense of the local team should not be figured into the anti-siphoning formulae.

207. This example points out potential problems which will be encountered as the anti-siphoning rules are applied in real-life situations. Although solutions to anticipated problems such as this might be incorporated into the rules, every potential problem cannot be provided for in advance without rendering the rules unduly complicated. Therefore, we will leave problems such as that mentioned above for resolution by the Commission on an ad hoc basis. As we have repeatedly stated during the course of this discussion, we intend to closely monitor the operation of the rules and we expect to grant waivers in appropriate circumstances. We believe that the new sports rules clear up many of the ambiguities present in the existing rules, but some problem areas remain. The rules have been drafted for general application and they are unavoidably imprecise in several areas. We have not sought to define all of our terms with absolute specificity, for to do so would build in rigidity which would be incompatible with the unsettled environment in which the sports rules must operate. We intend that the rules be administered flexibly, but in a manner consistent with their purpose. If necessary, we will resolve uncertainties and make adjustments in later actions. By this policy, we hope to maximize the amount of sports programming made available to the public by both conventional and subscription services.

208. The foregoing paragraphs set out the manner in which the terms "sports events," "new sports events," "specific events," "non-specific events," "live telecast" and "category" will be construed. Additionally, the legislative history contained in the Fourth Report and Order in Docket 11279, and the Report and Order in Docket 18893, unless modified herein, will be given effect in our administration of the new sports rules.

Series type programs. 209. The comments filed in this proceeding evidence a striking paucity of information with respect to series type programs. The comments which address the issue at all generally fall within two categories—those urging retention of the existing rule, and those urging its deletion. The evidence in favor of retention is sparse, and proponents of the opposite point of view argue that this very lack of evidence is sufficient grounds for the Commission to reach a decision to delete the series rule.

210. There is considerable agreement that the proscription contained in the existing rule is overly broad. ABC, one of the few parties taking an intermediate position between retention and deletion of the series rule, states in its comments that the present rule discourages the presentation of new and innovative programming on subscription operations, and suggests that the rule might be modified without creating a substantial risk of siphoning programs from conventional television. The testimony of representatives of The Motion Picture Association of America, Inc., indicates the existence of a large quantity of unused talent and production capacity which could produce series programming for subscription exhibition without affecting the availability of such programming to conventional television. This evidence suggests that, at the very least, subscription interests should be able to exhibit series programs produced especially for the subscription market, and that perhaps restrictions on series programs are not required to prevent siphoning.

211. Based on the sparse record before us, we are reluctant to either delete or engage in a wholesale revision of the present series rule. Series programs constitute a large portion of conventional television programming, and any step which might affect the continued availability of that programming to conventional television viewers should not be taken lightly. Therefore, we will not now revise the rule beyond allowing for the subscription exhibition of any new series, no episode of which has been exhibited on conventional television. To determine whether restrictions are needed with regard to series previously shown over conventional television, and, if so, what form they should take, we have invited additional comments on the series question in a second further notice of proposed rulemaking in Docket 19554,[55] issued concurrently with this First Report. The limited action which we have taken today does not represent a final determination of the series issue, and additional action will be taken if called for on the basis of our continuing inquiry into the matter.

Ninety percent and advertising rules. 212. The present rules prohibit subscription operations from devoting more than ninety percent of their subscription programming hours to feature films and sports combined. We believe that this provision has been successful in encouraging diverse and innovative programming such as that now provided on many subscription cable television channels. Therefore, we will retain the ninety percent provision, but will not increase it. We believe that feature films and sports will continue to be the staples of subscription operations and that rules requiring a substantial decrease in the amount of this programming would result in "a harshness that could spell the death knell of STV before it even began."[56]

213. Existing rules, both as to over-the-air STV and subscription cable operations, prohibit the presentation of commercial advertising other than for promotions of other subscription programs. Retention of these rules, which were initially adopted to assure that subscription operations provided a different and diverse type of programming from that found on advertiser supported television, has produced little dissent and we see no reason not to retain our original view that such restrictions on the presentation of commercial advertising are desirable. We do note the oral argument testimony of Mr. Laird Kelly, Director of Community Medical Cablecasting, an organization which offers continuing medical educational programming to practicing physicians. Mr. Kelly stated that distribution of this high cost programming would be facilitated if its support were to be shared by a combination of commercial advertisers and subscribers rather than only one or the other.[57] It is not our intention, in retaining the advertising limitation, to preclude the presentation of specialized programming of this type. However, based on the comments received in the course of this proceeding, we believe the type of programming referred to by Mr. Kelly to be sufficiently unique that it is better dealt with on an ad hoc special relief basis than by attempting to fashion an exemption to the general rule.

Application of rules to leased channel programming. 214. In the initial notice in this proceeding, we asked the following questions:

> Are the rules appropriate for and how should they be administered with respect to access and leased channel cablecasting for which there is a per-program or per-channel charge and not subject to the control of the cable television operator? At paragraph 12.

Although in the filings received there was little comment on this matter, it requires resolution. Insofar as our concern is with the impact that subscription television operations will have on conventional over-the-air broadcasting, our concern extends equally to programming distributed by a cable system operator himself or to that which another entrepreneur distributes over his facilities on a leased channel basis. Like rules must logically apply to each.

215. In administering these rules, at least two alternatives are open to us. We can charge the cable operator with assuring his own compliance and that of others using his facilities or we can ourselves look directly only to that individual or entity exercising "editorial" control over the programming, be it system operator or channel lessee. While the existing rules on the subject are not altogether clear, having been adopted prior to our leased channel requirements, we have, on at least one occasion, looked to the entity exercising direct content control or compliance with our rules. See letter dated September 17, 1974 to Home Box Office, Inc. concerning carriage of Yankee baseball games. Because our authority to regulate the content of subscription programming appears to fall squarely within the bounds of "U.S. v. Southwestern Cable Co.", 392 U.S. 157 (1968), as "reasonably ancillary to the effective performance of the Commission's various responsibilities for the regulation of television broadcasting," we see no jurisdictional bar to looking directly to channel lessees for compliance. Further, direct application of the rules in fairer to all involved and likely to be more effective in achieving compliance because the entity making the programming choices must do so with knowledge that he, rather than the cable operator whose facilities he uses, will be held accountable for compliance with the rules. We have accordingly drafted the rules that we have adopted to make clear that both channel lessees and cable system operators are subject to their requirements.

Preemption of local regulation of subscription television operations. 216. As a final matter, we note that a number of cable television franchises contain provisions purporting to regulate subscription cable television or to ban the service entirely. We have specifically stated that "• • • the Commission has preempted the field of pay television cablecasting so that local franchise terms (purporting to regulate subscription cablecasting) are inoperative • • •"[58] In paragraph 130 of the Cable Television Report and Order, the Commission stated:

> • • • it is this Commission that must make the decisions as to conditions to be imposed on the operation of pay cable channels; and we have already taken steps in that direction. (See § 76.225). Federal regulation is thus clearly called for.[59]

217. Although we have not ourselves undertaken the regulation of rates for the sale of subscription programming, we regard our prior statements concerning the regulation of subscription operations as preempting local regulation of rates as well as program content. We do not believe that regulation of subscription rates is either practicable or necessary at this time. The competitive alternatives to subscription television are plentiful, including most particularly free television, motion picture theatres, live sports, and other entertainment events. As we said with respect to over-the-air subscription rates:

> The public is free to subscribe or not to subscribe to STV services. We believe that the marketplace will regulate the charges that are paid and that if they are excessive, the operations will not succeed • • •"[60]

In any case, we believe that the complex nature of subscription cablecasting and broadcasting, with implications not coincident with state boundaries, dictates that its regulation emanate from a single source, and that determinations as to when and how to regulate the service must be made at the federal level.

Rulemaking proceeding to remain open. 218. Our action today is the result of some twenty years of study and consideration during which time every aspect of subscription television and its possible effects upon the conventional broadcast structure has been scrutinized and debated. The rules we have adopted here mark our second major attempt to design a regulatory program to ensure that the public's access to programming now delivered by conventional television is not diminished by subscription operations. We very clearly recognize, however, that, in a complex matter such as this, there may be gaps which remain to be filled or particular provisions that need to be refined. In some areas we have expressed our concerns but chosen not to adopt rules until further experience provides a better indication of their need and direction. With respect to series programming, we have explicitly sought further comment. We are concerned that not merely the letter of our rules but their spirit be carried out and believe it appropriate to continue to keep a careful watch on developments to be sure that this occurs. We have thus denominated this document as a First Report and Order in this proceeding and are leaving the proceeding open to be a repository for comments on how the rules operate and whether they achieve their intended goals, and to facilitate our taking prompt further action should that become necessary. For now, we are convinced that our rules reflect a fair and reasonable effort to provide for the orderly development of subscription television while preserving for the public the benefits now derived from the conventional broadcast structure.

Authority for adoption of the rules herein is contained in sections 2, 4(i) and (j), 303, 307, 308, and 309 of the Communications Act of 1934, as amended.

Accordingly, it is ordered, That effective May 27, 1975, Parts 73 and 76 of the Commission's rules and regulations are amended as set forth below.

It is further ordered, That the proceeding in Docket 18893 is terminated.

It is further ordered, That the proceeding in Docket 19554 is retained open.

(Secs. 2, 4, 303, 307, 308, 309, 48 Stat., as amended, 1064, 1066, 1082, 1083, 1084, 1085; (47 U.S.C. 152, 154, 303, 307, 308, 309))

Adopted: March 20, 1975.

Released: April 4, 1975.

FEDERAL COMMUNICATIONS COMMISSION,[61]
[SEAL] VINCENT J. MULLINS,
Secretary.

Parts 73 and 76 of Chapter I of Title 47 of the Code of Federal Regulations are amended as follows:

1. Section 73.643 is revised to read as follows:

§ 73.643 General operating requirements.

Subscription television broadcast programming shall comply with the following requirements:

(a) Feature films shall not be broadcast except as provided in this paragraph.

(1) A feature film may be broadcast if—

(i) The film has been in general release in theaters anywhere in the United States for three (3) years or less prior to its proposed broadcast;

(ii) A conventional television broadcast station licensed in the market of the subscription television broadcast station holds a present contractual right to exhibit the film. For purposes of this subdivision, a television station affiliated with a television network will be deemed to hold a present contractual right to exhibit a film if the network to which it is affiliated holds such a right;

NOTE: The manner in which the term "present contractual right" will be construed is explained in paragraphs 169 and 170, "First Report and Order in Docket 19554," FCC 75-369, 40 FR 75540.

(iii) The film has been in general release in theaters anywhere in the United States for more than ten (10) years prior to its proposed subscription broadcast and the film has not been exhibited over conventional television in the market of the subscription television broadcast station for three (3) years prior to its proposed subscription broadcast. Once a film has been broadcast in the market pursuant to this subdivision or cablecast on a subscription basis pursuant to § 76.225(a)(1)(iii), such film may thereafter be broadcast on a subscription basis in the market without regard to its subsequent exhibition over conventional television;

(iv) The film is in a foreign language;

(2) Feature films otherwise excluded by this paragraph may be broadcast

upon a convincing showing to the Commission that they are not desired for exhibition over conventional television in the market or that the owners of the broadcast rights to the films, even absent the existence of subscription television, would not make the films available to conventional television.

(3) Every subscription television broadcast station over which a feature film is broadcast pursuant to this paragraph shall maintain for public inspection a file listing the title of the film, the date on which it was broadcast and the provision of this paragraph pursuant to which it was broadcast. When a feature film is broadcast pursuant to subparagraph (1)(ii) of this paragraph, the station or network, serving the market and holding a present contractual right to exhibit the film shall be specified. These files shall be retained for a period of two years.

(b) Sports events shall not be broadcast live except as provided in this paragraph.

(1) A specific event may be broadcast if the event has not been broadcast live over conventional television in the market of the subscription television broadcast station during any one of the five (5) seasons preceding the proposed subscription broadcast. If a regularly recurring event takes place at intervals of more than one year (e.g., summer Olympic games), the event shall not be broadcast on a subscription basis if it has been broadcast live over conventional television in the market of the subscription television broadcast station during any one of the ten (10) years preceding the proposed subscription broadcast.

(2) New specific sports events that result from the restructuring of existing sports shall not be broadcast on a subscription basis until five (5) seasons after their first occurrence. Thereafter, subscription broadcasts shall be governed by paragraph (b)(1) of this section.

(3) The number of non-specific events which may be broadcast on a subscription basis in any given season shall be determined as follows:

(i) If less than twenty-five (25) percent of the events in a category of non-specific events were broadcast live over conventional television in the market of the subscription television broadcast station during each of the five (5) seasons preceding the proposed subscription broadcast, the number of events in the category broadcast on a subscription basis shall not exceed the number of events in the category not conventionally broadcast in that season among the preceding five (5) seasons when the largest number of events in the category were broadcast over conventional television.

(ii) If twenty-five (25) percent or more of the events in a category of non-specific events were broadcast live over conventional television in the market of the subscription television broadcast station during any one of the five (5) seasons preceding the proposed subscription broadcast, the number of events in the category broadcast on a subscription basis shall not exceed fifty (50) percent of the number of events in the category not broadcast in that season among the preceding five (5) seasons when the largest number of events in the category were broadcast over conventional television. However, if the number of events in the category to be broadcast over conventional television in the current season is a reduction from the number of events broadcast in that season among the preceding five (5) seasons when the largest number of events in the category were broadcast, the number of events in the category which may be broadcast on a subscription basis pursuant to this subparagraph shall be reduced in proportion to the reduction in events broadcast over conventional television.

NOTE: The manner in which this paragraph will be administered and in which "sports events," "new sports events," "specific events," "non-specific events," "live telecast" and "category" will be construed is explained in paragraphs 186–208 of the First Report and Order in Docket 19554, FCC 75–369, 40 FR 15540.

(c) No series type of program with interconnected plot or substantially the same cast of principal characters, any episode of which has been broadcast over conventional television, shall be broadcast.

(d) No commercial advertising announcements shall be carried during subscription television operations except for promotion of subscription television broadcast programs before and after such programs.

(e) Not more than 90 percent of the total subscription programming hours shall consist of feature films and sports events combined. The percentage calculations may be made on a yearly basis, but, absent a showing of good cause, the percentage of such programming hours may not exceed 95 percent of the total subscription programming hours in any calendar month.

(f) Any television broadcast station licensee or permittee authorized to broadcast subscription programs shall broadcast in addition to its subscription broadcasts, at least the minimum hours of nonsubscription programming required by § 73.651.

(g) Except as they may be otherwise waived by the Commission in authorizations issued hereunder, the rules and policies applicable to regular television broadcast stations are applicable to subscription television operations.

NOTE: As referred to in this section, "the market" of a subscription broadcast station includes all commercial broadcast stations which place a Grade A contour over the entire community to which the subscription station is licensed.

2. Section 76.225 is revised to read as follows:

§ 76.225 Subscription cablecasting.

Cable television system operators or channel lessees engaging in origination or access cablecasting operations for which a per-program or per channel charge is made shall comply with the following requirements:

(a) Feature films shall not be cablecast by a cable television system subject to the mandatory signal carriage requirements of Subpart D of this Part 76, except as provided in this paragraph.

(1) A feature film may be cablecast if—

(i) The film has been in general release in theaters anywhere in the United States for three (3) years or less prior to its proposed cablecast;

(ii) A conventional television broadcast station licensed in the market of the cable television system holds a present contractual right to exhibit the film. For purposes of this subdivision, a television station affiliated with a television network will be deemed to hold a present contractual right to exhibit a film if the network to which it is affiliated holds such a right;

NOTE: The manner in which the term "present contractual right" will be construed is explained in paragraphs 169 and 170, First Report and Order in Docket 19554, FCC 75–369, 40 FR 15540.

(iii) The film has been in general release in theaters anywhere in the United States for more than ten (10) years prior to its proposed cablecast and the film has not been exhibited in the market of the cable television system over conventional television for three (3) years prior to its proposed cablecast. Once a film has been cablecast in the market pursuant to this subdivision, or broadcast on a subscription basis pursuant to § 73.643(a)(1)(iii), such film may thereafter be cablecast in the market without regard to its subsequent exhibition over conventional television;

(iv) The film is in a foreign language;

(2) Feature films otherwise excluded by this paragaph may be cablecast upon a convincing showing to the Commission that they are not desired for exhibition over conventional television in the market of the cable television system, or that the owners of the broadcast rights to the films, even absent the existence of subscription television, would not make the films available to conventional television.

(3) Every cable television system over which a feature film is cablecast pursuant to this paragraph shall maintain for public inspection a file listing the title of the film, the date on which it was cablecast and the provision of this paragraph pursuant to which it was cablecast. When a feature film is cablecast pursuant to subparagraph (1)(ii) of this paragraph, the station or network serving the market and holding a present contractual right to exhibit the film shall be specified. These files shall be retained for a period of two years.

(b) Sports events shall not be cablecast live by a cable television system subject to the mandatory signal carriage requirements of Subpart D of Part 76, except as provided in this paragraph.

(1) A specific event may be cablecast if the event has not been broadcast live over conventional television in the market of the cable television system during any one of the five (5) seasons preceding the proposed cablecast. If a regularly recurring event takes place at intervals of more than one year (e.g., summer Olympic games), the event shall not be cablecast if it has been broadcast live over conventional television in the market during any one of the ten (10) years preceding the proposed cablecast.

(2) New specific sports events that result from the restructuring of existing sports shall not be cablecast until five (5) seasons after their first occurrence. Thereafter, subscription cablecasts shall be governed by paragraph (b)(1) of this section.

(3) The number of non-specific events which may be cablecast in any given season shall be determined as follows:

(i) If less than twenty-five (25) percent of the events in a category of non-specific events were broadcast live over conventional television in the market of the cable television system during each of the five (5) seasons preceding the proposed cablecast, the number of events in the category cablecast shall not exceed the number of events in the category not broadcast in that season among the preceding five (5) seasons when the largest number of events in the category were broadcast.

(ii) If twenty-five (25) percent or more of the events in a category of non-specific events were broadcast live over conventional television in the market of the cable television system during any one of the five (5) seasons preceding the proposed cablecast, the number of events in the category cablecast shall not exceed fifty (50) percent of the number of events in the category not broadcast in that season among the preceding five (5) seasons when the largest number of events in the category were broadcast. However, if the number of events in the category to be broadcast in the current season is a reduction from the number of events broadcast in that season among the preceding five (5) seasons when the largest number of events in the category were broadcast, the number of events in the category which may be cablecast pursuant to this subparagraph shall be reduced in proportion to the reduction in events broadcast.

NOTE: The manner in which this paragraph will be administered and in which "sports events," "new sports events," "specific events," "non-specific events," "live telecast," and "category" will be construed is explained in paragraphs 186-208 of the "First Report and Order in Docket 19554," FCC 75–369, 40 FR 15540.

(c) No series type of program with interconnected plot or substantially the same cast of principal characters, any episode of which has been broadcast over conventional television, shall be cablecast by a cable television system subject to the mandatory signal carriage requirements of Subpart D of this Part 76.

(d) Not more than ninety (90) percent of the total cablecast programming hours shall consist of feature films and sports events combined. The percentage calculations may be made on a yearly basis, but absent a showing of good cause, the percentage of such programming hours may not exceed ninety-five (95) percent of the total cablecast programming hours in any calendar month.

(e) No commercial advertising announcements shall be carried on subscription channels during such operations except before and after such programs for promotion of other programs for which a per-program or per-channel charge is made.

NOTE: As referred to in this section, "the market" of a cable television system includes all commercial broadcast stations which must be carried by the cable television system upon request pursuant to Subpart D of this Part 76.

12. In accordance with the provisions

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Part 76]

[Docket No. 19554; FCC 75-370]

CABLE TELEVISION SERVICE

Cablecasting of Programs for Which a Per-Program or Per-Channel Charge Is Made

Second further notice of proposed rulemaking. In the matter of amendment of Part 76, Subpart G, of the Commission's rules and regulations pertaining to the Cablecasting of Programs for which a Per-Program or Per-Channel Charge is Made.[1] Docket No. 19554.

1. The so-called anti-siphoning rules for feature films, sports, and series type programs were adopted for over-the-air subscription television service (STV) in 1968.[1a] In 1970, virtually the same rules were adopted for cablecasting for which a per-program or a per-channel charge is made.[2] The sports rule for STV was amended in March 1972 but a similar amendment for pay cablecasting was deferred.[3]

2. The present proceeding began on July 24, 1972, with the release of a Notice of proposed rulemaking[4] which invited comments on possible amendments to the anti-siphoning rules for pay cablecasting. The scope of the proceeding was later enlarged to consider whether changes should also be made in the STV rules.[5] In a First report and order[6] adopted March 20, 1975, essentially identical anti-siphoning rules for both pay cablecasting and STV were adopted. These new rules modify the previous feature film and sports rules in important respects and relax the rule for series type programs by permitting pay TV to show series that have not been previously shown on conventional television.

3. The former series rule stated that no series type of program with interconnected plot or substantially the same cast of principal characters may be transmitted by STV or by pay cablecasting. In relaxing that rule, we questioned whether such a rule was needed at all, and referred to the paucity of information which we had on the subject. We also stated that we were simultaneously with the adoption of the First report and order adopting the present Second further notice of proposed rulemaking in the hope of developing information that would provide a basis for a decision as to whether a series rule is necessary to serve the public interest and, if so, whether it should be modified from its present form.

4. Although the record in this proceeding contains much material concerning feature films and sports, relatively little appears about series. Mostly, those supporting the series rule merely made the assertion that it was necessary to prevent siphoning of series type programs from conventional television. Those who opposed the rule generally stated that it should be deleted since there was no evidence of a need for it.

5. Some comments, rather than supporting retention of the rule or outright deletion of it, pointed to the possibility of a middle ground. Thus, ABC agreed that the rule was overly broad and suggested that it might be modified without creating a substantial risk of siphoning. Observing that the basic purpose of the rule was to produce innovative programming on pay TV and that the series rule barred innovation that could be presented, ABC proposed that there be no ban on the showing of original innovative programming. However, it warned that the Commission should be alert to the possibility that talent presently associated with series programming for conventional television might be siphoned to the making of such programs for pay TV with resultant detriment to the public interest. ABC suggested that if such a trend were to occur, the Commission should take corrective action if necessary. Program producers, although favoring deletion of the rule on the grounds that it was unnecessary, at least for the foreseeable future, indirectly pointed to a middle ground by arguing that the absolute prohibition of series is contrary to the public interest since it bars exhibition of series for limited audiences—such as educational audiences or minority groups—that could be successfully produced for pay TV although not for conventional television.

6. Consistent with its view, ABC suggested a rule that would retain a ban on the pay TV showing of off-network series because, if carried on pay TV, there would be a risk of siphoning from conventional television. It also suggested that the rule prohibit the showing of any non-network series program (e.g., Wild Kingdom) that had appeared on conventional television during any one of the five years immediately preceding proposed pay TV showing in order to prevent siphoning of such programs that are produced for syndication and are widely available for conventional television.

7. Since, as previously stated, we wish to develop information on which to base a decision as to whether a rule is necessary or what kind of rule may be necessary, we invite comments on the following proposal which lies between a complete ban of series programming and having no rule at all. This proposal, which is modeled after the rule adopted today for feature film showings on pay TV, would read as follows for pay cablecasting:

§ 76.225 Subscription cablecasting.

* * * * * * *

(e) Series type programs shall not be cablecast by a cable television system except as provided in this paragraph.

(1) The series has never been purchased for broadcast over conventional television;

(2) A conventional television broadcast station licensed in the market holds a present contractual right to exhibit the series. For purposes of this subparagraph, a television station affiliated with a television network will be deemed to hold a present contractual right to exhibit a series if the network with which it is affiliated holds such a right;

(3) The series has not been exhibited in the market over conventional television for three (3) years prior to its proposed cablecast;

(4) The series consists of fifty (50) or fewer episodes.

NOTE: For purposes of this paragraph, the exhibition of any episode of a series shall constitute the exhibition of the series.[7]

8. The rationale underlying the foregoing proposal is as follows: *Paragraph* (e)(*1*). This provision is intended to permit pay TV to compete with conventional TV for new series that have not appeared on conventional TV and to produce series programs especially for pay TV. It is founded on the view, supported by evidence in the record in this docket, that there are sufficient unused resources within the program production industry to serve both pay TV and conventional TV markets. *Paragraph* (e)(2). As was the case with the feature film rule, this provision reflects the policy that programs that are available on conventional television cannot be siphoned and thus ought not be restricted as to their subscription use. *Paragraph* (e)(3). This provision is directed to the situation where a series that appeared on network television has concluded its network run but has not been purchased by individual stations for a second run in syndication. The rationale of this provision is that if the series has not been purchased for a period of three years, it may be assumed that it is not subject to siphoning and that it should be available for use by pay TV. *Paragraph* (e)(*4*). Most series are first run on network television on a pilot basis and many are dropped after a short time because of low audience ratings. In most such cases, the series are not syndicated to local stations not only because of their poor ratings on network television but also because they consist of too few episodes to make syndication worthwhile. Because of this, there appears to be no reason to exclude such series from the subscription market since there would apparently be no siphoning from conventional TV.

9. As mentioned previously, the series rule defines a series type program as one with an interconnected plot or substantially the same cast of principal characters. Although the rule proposed above contains no definition of the term, if such a rule were adopted, it would, of necessity, have to contain such a definition. In paragraph 334 of the "Fourth Report and Order in Docket No. 112798"[8] we stated, in adopting the rule, that variety shows such as the "Ed Sullivan Show" or the "Bob Hope Show" were not series type programs for the purposes of the rule. The same would have been true for host shows such as the "Merv Griffin Show." Parties are invited to comment on whether, if a modified series rule is adopted, the definition of "series type program" should remain as it is in the present rule, should be expanded from what it is, or should be otherwise modified. Thus, for example, should that term include such a program as "Police Story" which has no interconnected plot or substantially the same cast of principal characters but which, nevertheless, has a continuity of theme—police episodes?

10. Comments are not only invited on the above-mentioned proposal, and on that of ABC, but on the basic question of whether an anti-siphoning rule is necessary for series programs. It is hoped that by focusing on this particular aspect of siphoning, we shall obtain sufficient information on which to base a decision as to whether to delete or modify the present rule on this subject.

11. All interested persons are invited to file written comments on the matters discussed above on or before May 23, 1975, and reply comments on or before June 27, 1975. In reaching a decision in this matter, the Commission may take into account any other relevant information before it, in addition to the comments invited by this notice.

12. In accordance with the provisions of § 1.419 of the Commission's rules and regulations, an original and 14 copies of all comments, replies, pleadings, briefs or other documents filed in this proceeding shall be furnished the Commission. Responses will be available for public inspection during regular business hours in the Commission's Public Reference Room at its Headquarters in Washington, D.C. Authority for the rulemaking proposal herein is contained in sections 4 (i), 303, and 403 of the Communications Act of 1934, as amended.

Adopted: March 20, 1975.

Released: April 4, 1975.

FEDERAL COMMUNICATIONS COMMISSION

[Docket No. 20402; FCC 75-371]

SUBSCRIPTION AND CONVENTIONAL TV OPERATIONS

Inquiry Into Exclusive Practices

In the matter of inquiry into policies and practices concerning the exclusive purchase of television program product and the ability of conventional television stations, subscription television stations, cable television systems, and subscription cable television operations to obtain programming, Docket No. 20402.

1. On this day the Commission adopted comprehensive new rules governing the use of programming by subscription television stations and cable television operations.[1] These rules, popularly referred to as "anti-siphoning rules," are designed to ensure that subscription television [2] provides a beneficial supplement to conventional broadcast television without at the same time undermining the continued operation of that television service. The practical effect of the rules is to restrict the programming available to subscription television so that the kind of programming now found on conventional television is not siphoned away to subscription operations, thereby forcing the public to pay a special fee for the same kind of programs now delivered by conventional television without a direct charge.

2. In adopting the new anti-siphoning rules the Commission concluded that the public interest in maintaining the present conventional television structure outweighed the interest in free competition between subscription and conventional television for program product.[3] However, having issued rules which significantly restrict the programming available to subscription television, we expressed concern that the programming available to subscription television might be further restricted by operation of exclusive contracts between conventional television interests and program producers.[4] Therefore, we determined to establish a new proceeding inquiring into the subject of exclusivity against subscription television.

3. The purpose of this notice is to commence an in-depth exploration dealing with the effects of exclusive contracts entered into either by conventional or subscription television interests which give one form of television service exclusive use of program material vis-a-vis the other, and to elicit comments of interested persons on this subject. Our primary concern is that the programming made available to subscription television may be severely and unduly limited by the combined effects of our anti-siphoning rules and exclusive program contracts. For reasons we consider to be of great importance and which are fully set forth in the Fourth Report and Order in Docket 11279[5] and the First Report and Order in Docket 19554,[6] we have not found it in the public interest to allow unfettered marketplace competition to allocate feature film program product between subscription and conventional television operations. Given the effects of our rules on the ability of subscription television to obtain feature film programming, we are concerned that private program exclusivity practices not unnecessarily further restrict the availability of programming. The purpose of this proceeding is to obtain a factual record and an analysis of the relevant issues in order to determine if further rule making should be undertaken.

4. Although the factual setting with which this proceeding is concerned is new, the Commission's concern with the scope of exclusive program rights held by its licensees is not. In 1968, the Commission initiated Docket 18179, which commenced a study of non-network television programming practices and their effects upon television broadcast stations.[7] In 1971, the scope of Docket 18179 was expanded to include an inquiry into the duration of exclusive program contracts and their effects upon both broadcast television stations and the emerging cable television industry.[8] The first study resulted in the Commission's adoption of Section 73.658(m) which restricts the territory which may be covered by exclusive non-network program arrangements.[9] The second portion of Docket 18179 is presently pending before the Commission.

5. In the further notice of proposed rulemaking and order for oral argument in Docket 19554, the Commission requested comments on the alleged preemptive purchase of feature films by national networks.[10] That inquiry was precipitated by complaints from cable television interests who stated that feature films were being "warehoused" by the networks, i.e. it was said that the networks were purchasing exclusive rights to feature films during periods when the films would otherwise be available for subscription use under the Commission's rules, and for terms longer than necessary to preserve conventional television audiences. In the further notice we inquired as to whether such practices actually existed and whether rules were called for to inhibit them.

6. In adopting the new subscription programming rules, the Commission declined to issue rules addressing the warehousing problem. Since warehousing of feature films is but one element of the much broader exclusivity question, we left the subject of warehousing for more detailed study as part of the instant proceeding. (Footnote 4, supra.) The inquiry which we have initiated by this notice will deal with many of the same issues taken up in earlier proceedings, but will focus on the effects of exclusive contracts upon subscription television vis-a-vis conventional television, and particularly on how these effects relate to our antisiphoning rules. The basic issue posed in this proceeding is whether the degree of exclusivity now generally contracted for is necessary for the well being of conventional broadcasters, and whether this degree of exclusivity, when viewed in conjunction with the Commission's antisiphoning regulations, will markedly inhibit the development of subscription television services. We are concerned with two closely related but separable issues—the first relating to alleged warehousing of feature film product and the second to exclusivity provisions of network and local station contracts. Our concern with the alleged warehousing of film product was articulated in our earlier further notice in Docket 19554.[11]

> • • • pay cable interests have expressed their concern that the intended operation of our existing rules is being frustrated by the pre-emptive purchase of feature films by national networks. That is, the networks are said to be buying films with exclusive rights against pay use before the films are two years old even though they do not themselves intend to make use of the films until two or three years after the rights are initially obtained.

After referring to prior attempts to discourage unreasonable periods of exclusivity, e.g., Docket 18179, we went on to state that:

> If it is true that significant program purchases are being made solely to foreclose pay system use and not with any need or intent to use the program within a reasonable period of time, this could well tend to frustrate the operation of the rules now under consideration.

7. In connection with the proceedings in Docket 19554, each of the three national television networks placed in the record statements of the policies they proposed to follow in purchasing exclusive feature film rights against pay cable television operations. Each denied that conscious attempts were made to "warehouse" feature films. Each, however, indicated that it intended to obtain what it considered a "reasonable" degree of exclusivity or clearance prior to its own exhibition of the films it purchased.[12] ABC indicated that while it had a general policy of not seeking exclusivity vis-a-vis pay cable during the two-year period following first theater exhibition unless it obtained the right to telecast the film within that period, if the anti-siphoning rules were changed "we would clearly have to reconsider the wisdom and reasonableness of such judgment in light of the financial considerations that attend our acquisition and exhibition of feature films." [13]

8. Through this inquiry we seek answers to the question of whether the purchase of such contractual exclusivity in advance of the first broadcast exhibition of a film is simply an effort by broadcasters to protect their legitimate rights in programming purchased, or whether such provisions may have the effect of stifling an emerging competitive medium beyond the degree necessary to protect rights in the product purchased. As we said in the further notice of proposed rulemaking in Docket 18179, FCC 71-42, 27 FCC 2d 13, para. 3 (1971):

> The issue is somewhat analogous to that in the motion picture field where the courts have held that clearances are reasonable only "when not unduly extended in area or duration" and are not reasonable "if in excess of what is reasonably necessary to protect the licensee in the run granted." U.S. v. Paramount Pictures, Inc., 66 F. Supp. 323, 70 F. Supp. 53 (S.D.N.Y., 1947), noted with approval by the Supreme Court, 334 U.S. 131, 145, 147, (1948).

9. The second major focus of this inquiry concerns the question of what measure of contractual exclusivity, if any, is appropriate as between the conventional and subscription television services. Comments filed in Docket 19554 have suggested that such exclusivity should be prohibited. For example, the comments of MCA Inc., a major producer and distributor of theatrical feature films, state the following:

> It would seem reasonable to anticipate that in light of the grossly disparate economic positions and leverage of conventional television and particularly the networks as compared with emerging Family Choice Cable systems, and the economic need of producers to obtain the television income for film use, that network pressures for exclusivity against pay cable will in the future be effectively exercised. This will be especially true if the two year rule is eliminated or modified. To preclude such an event, it is recommended that the Commission adopt a rule which would simply provide that the networks and television broadcast licensees on the one hand, and cable systems on the other hand, may not enter into agreements for the licensing of feature films which restricts their showing on the other medium.

10. Because of the nature of the rules adopted in Docket 19554, the issue of the permissibility of exclusive contracts has increased in importance. In order to assure against program siphoning, we have provided that the more desirable feature films over three years past their first theatrical release may not be shown on a pay basis unless already under contract to a national television network or a local conventional television station and available for broadcast. Because the films, as a matter of contractual right, are available for free broadcast the possibility of siphoning is eliminated. There is no guarantee in this rule, however, that any of the film product in question will actually be made available for subscription use because such availability depends on the contracts in question being non-exclusive, or at least having a limited amount of exclusivity.

11. We did not, in adopting this rule, in fact, intend that it guarantee subscription television interests access to the films in question. Rather, we saw no public interest or siphoning reason for not allowing their subscription use and envisaged that the interplay of market forces would determine whether the contracts in question were exclusive or not. We do recognize, however, that so long as the public interest benefits of conventional broadcasting are not impaired and the public continues to have the films in question available on a non-subscription basis, that there is a public interest in fostering an alternative system whereby film product may be made available free of commercial interruption and with the additional flexibility of viewing times which subscription operations may make possible.

12. The foregoing discussion sets forth the subject matter and issues of this proceeding. As a starting point for consideration by commenting parties, we raise the following specific questions upon which we would like to receive comments:

a. Would it be within the jurisdiction or authority of the Federal Communications Commission to adopt rules restricting exclusivity rights between subscription and conventional television?

b. How pervasive is the practice of negotiating exclusive program contracts by conventional television interests against subscription operations, and vice versa?

c. How much program product made available to subscription operations pursuant to our anti-siphoning rules will likely be under exclusive conventional television contracts?

d. In terms of both time and geography, what degree of program exclusivity, if any, is reasonably necessary to protect the legitimate interests of conventional broadcasters? Of subscription operators?

e. If the operation of the marketplace does not eliminate, or at least limit, conventional broadcasters' exclusivity against subscription television, what, if anything, does this indicate about the economic potential of subscription operations to siphon programming? In considering whether the market will eliminate exclusivity, is it appropriate to compare the overall program purchasing resources of the different media in a particular market or is it more appropriate to look to per capita revenues and program expenses?

f. Will the operation of normal market forces result in the elimination of or limitations on exclusive contracts between subscription and conventional television? If not, why not? If so, what are the specific economic factors that will cause this to occur?

g. What, if any, impact would the elimination of exclusive contracts, either by operation of Commission rules or through marketplace competition, have on the ability of conventional television stations to serve the public?

h. What impact does subscription use of a film have on subsequent broadcast audiences? Does it, like prior theatrical promotion and exhibition, tend to increase the broadcast audience or does it decrease the broadcast audience?

i. If exclusivity restrictions are in the public interest, should they apply to all programming or just some kinds of programming, e.g., feature films?

j. If the Commission adopts some form of exclusivity restriction, should it be directed to both conventional and subscription interests, or just one or the other?

k. Should all exclusivity between conventional and subscription interests be prohibited, or should the periods of allowable exclusivity be restricted, e.g., to six months before each exhibition of the program? Should the zones of protection similarly be restricted, e.g., to within thirty-five miles of the broadcast station or cable system exhibiting the program?

l. What are the relevant anti-trust implications of existing or foreseeable exclusivity arrangements? Given that conventional broadcasters are competing for advertiser revenues and subscription television is competing for consumer revenues, can the two mediums be considered "substantial competitors," F.T.C. v. Motion Picture Adv. Co., 344 U.S. 392 (1952)?

13. The foregoing are just some of the

[12] The statements of the three networks were set forth in the First Report and Order in Docket 19554 and are repeated here for the sake of convenience:

Mr. Everett Erlick, speaking for the American Broadcasting Company, stated ABC's policy as follows: "If we do not have the right to telecast a title within two years following first theatre exhibition, we do not seek exclusivity against pay cable during that two year period. Where we do acquire broadcast rights within 30 months or less, we will seek exclusivity for up to 6 months as a reasonable resting period prior to permissible play date. Where the permissible play date is 30 months or later after theatrical exhibition, we negotiate reasonable exclusivity provisions subject to the Commission's two year rule." October 25, 1974 oral argument transcript at page 1503.

In written comments filed on October 25, 1974, the policy of CBS, Inc., was stated as follows: "In its most recent major feature film negotiation (completed July, 1974) CBS agreed to waive any exclusivity against pay cable exhibition for a period of two years after the theatrical release date of each film involved. It is our present intention, as a matter of policy, to apply the pattern established in that transaction to our other feature film purchases, except in cases where CBS acquired the right to broadcast, and expects to broadcast, a particular film within or very shortly after two years from the date of theatrical release. In such cases, the network will seek exclusivity for a reasonable period in advance of the expected broadcast of the film." At page 2.

The policy of the National Broadcasting Company, Inc., was stated in written comments filed on September 20, 1974: "The NBC Television Network does not attempt to prevent a film supplier from licensing pay cable within the two year period permitted by the rule where the film is not available to the network until subsequent to that two-year period. Furthermore, the usual feature film contract which NBC has recently been entering into calls for about two plays over about two or three years from the date the producer agrees to make the film available to us, so there is no possibility of "'warehousing.'" At page 21.

[13] Letter of December 20, 1973, to former Chairman Burch.

13. The foregoing are just some of the questions which must be considered as part of this proceeding. We invite interested parties to address themselves to the above questions and to offer any additional information which may be pertinent to our study. We emphasize that we have reached no final or tentative conclusions in this matter.

In view of the foregoing, Notice of inquiry in Docket 20402 is hereby announced. All interested persons are invited to file written comments on or before September 26, 1975, and reply comments on or before October 30, 1975. In reaching a decision in this matter, the Commission may take into account any other relevant information before it, in addition to the comments invited by this notice.

In accordance with the provisions of § 1.419 of the Commission's rules and regulations, an original and 14 copies of all comments, replies, pleadings, briefs or other documents filed in this proceeding shall be furnished to the Commission. Responses will be available for public inspection during regular business hours in the Commission's Public Reference Room at its Headquarters in Washington, D.C.

Authority for the inquiry herein is contained in sections 4(i), 303, and 403 of the Communications Act of 1934, as amended.

Adopted: March 20, 1975.

Released: April 4, 1975.

FEDERAL COMMUNICATIONS COMMISSION,[1]
[SEAL] VINCENT J. MULLINS,
Secretary.

FAIR MARKET RENTS FOR HOUSING ASSISTANCE PAYMENTS PROGRAMS

Section 8 Existing Housing and
Section 23 Existing Housing

V 40-67 APR 7 75 XUM

Title 24—Housing and Urban Development

CHAPTER VIII—LOW INCOME HOUSING, DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. R-75-311]

FAIR MARKET RENTS FOR HOUSING ASSISTANCE PAYMENTS PROGRAMS

Section 8 Existing Housing and Section 23 Existing Housing

Notice was given on January 9, 1975 at 40 FR 1901, that the Department of Housing and Urban Development (HUD) was proposing to amend Title 24, Chapter VIII, Part 1280 of the Code of Federal Regulations by adding a § 1280.102, which sets forth the regulations concerning Fair Market Rents for existing housing (including the Housing Finance and Development Agencies Program), and a Schedule B which sets forth such Fair Market Rents.

Interested parties were invited to submit written comments concerning the proposed regulations and Fair Market Rents, and HUD received more than 70 comments in response. Most of the comments expressed concern that the Schedule B rents were not high enough with respect to specific housing market or submarket areas. All comments were seriously considered in HUD's final evaluation of the Schedule B rents. As a result of these comments and the HUD evaluation, the Schedule B rents for over 100 market areas have been revised.

HUD is renumbering all Parts within Chapter VIII, including changing the Part number for the regulations below from Part 1280 to Part 888. All references below are to the new Part numbers.

The Schedule B Fair Market Rents set forth below are also to be applicable to housing utilized under the Section 23 Housing Assistance Payments Program—Existing Housing, 24 CFR, Part 802, formerly Part 1274. Therefore, for purposes of the Section 23 program, these Fair Market Rents supersede the rents set forth in Schedule B of 24 CFR, Part 803, formerly Part 1279, Section 23 Housing Assistance Payments Program—Fair Market Rents and Contract Rents Automatic Annual Adjustment Factors, as published in the FEDERAL REGISTER on July 8, 1974 at 39 FR 25120.

A Finding of Inapplicability respecting the National Environmental Policy Act of 1969 has been made in accordance with HUD procedures. A copy of this Finding of Inapplicability will be available for public inspection during regular business hours in the office of Rules Docket Clerk, Room 10245, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, D.C.

Effective Date—These regulations and schedules shall become effective April 7, 1975.

(Sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)); sec. 5(b) of the U.S. Housing Act of 1937 (42 U.S.C. 1437f).)

1. HUD is recodifying all Parts within Chapter VIII as follows:

Name	New part No.	Old part No.
Section 23 housing assistance payments program:		
New construction	800	1272
Substantial rehabilitation	801	1276
Existing housing	802	1274
Fair market rents and contract rents, automatic annual adjustment factors	803	1279
Low rent housing, homeownership opportunities	804	1270
Section 8 housing assistance payments program:		
New construction	880	1273
Substantial rehabilitation	881	1277
Existing housing	882	1275
Housing finance and development agencies	883	1278
Fair market rents and contract rent, automatic annual adjustment factors	888	1280

2. Section 888.102 and Schedule B are added to read as follows:

§ 888.102 Fair Market Rents for Existing Housing.

(a) *Purpose and Applicability.* Schedule B of this Part sets forth the Fair Market Rents, as determined by HUD, for the Section 8 Housing Assistance Payments Program for Existing Housing (including Housing Finance and Development Agencies Program, 24 CFR, Part 883). (See 24 CFR 881.102 for the definition of Fair Market Rents.)

(b) *Categories.* These Fair Market Rents are established by unit size and by two structural categories, i.e., non-elevator buildings and elevator buildings.

(c) *Geographic Area.* The Fair Market Rents for existing housing are established by county as specified in Schedule B. Uniform schedules are established for (1) all counties within each standard metropolitan statistical area as defined by the Office of Management and Budget in April, 1974, and (2) other counties within individual blocks of counties grouped by the U.S. Bureau of Census into entities with population of over 250,000 for purposes of special statistical summaries.

DAVID M. DEWILDE,
Acting Assistant Secretary for Housing Production and Mortgage Credit/FHA Commissioner.

V 40167 APR 7 75 XUM

an invaluable reference tool

1974–75 Edition

This official guidebook provides useful information about U.S. Government agencies, including:

- Major programs and functions
- Listings of key officials
- Organization charts for many agencies

Most agency descriptions include a "Sources of Information" section that gives addresses and telephone numbers for obtaining specifics on employment, government contracts, environmental programs, small business opportunities, publications, speakers and films available to civic and educational groups, and other topics of public interest.

This handbook is a "must" for teachers, students, librarians, researchers, businessmen, and lawyers who need current official information about the U.S. Government.

$5.75
per copy. Paperbound, with charts

Rules Going Into Effect Today

DOT/FAA—Airworthiness directives; Sikorsky Model S–58 and S–58T (3 documents) 12995; 3–24–75

List of Public Laws

NOTE: No acts approved by the President were received by the Office of the Federal Register for inclusion in today's LIST OF PUBLIC LAWS.

ATTENTION: Questions, corrections, or requests for information regarding the contents of this issue only may be made by dialing 202–523–5266. For information on obtaining extra copies, please call 202–523–5240. To obtain advance information from recorded highlights of selected documents to appear in the next issue, dial 202–523–5022.

federal register

Area Code 202 Phone 523–5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $45 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

Title 3—The President

PROCLAMATION 4362

World Trade Week, 1975

By the President of the United States of America

A Proclamation

America approaches the 200th anniversary of national independence at a time when events at home and abroad demonstrate the interdependence of the community of nations.

Interdependence and its impact on all Americans is particularly apparent in world trade.

Through world trade, Americans expand with others the flow of goods and services to all peoples and enhance the economic well-being of all countries. In so doing, we recommit the United States to an open world economic order and reconfirm our pledge to international peace and understanding.

The Congress of the United States underscored America's dedication to more free and fair international commerce with passage of the Trade Act of 1974. That act enables us to move toward multilateral negotiations that will open the way to improved access to foreign markets for American goods and to vital raw materials.

In the face of economic stress at home, more exports mean more jobs for Americans, more purchasing power for America's consumers and more business for our manufacturers. Exports help us meet the swiftly rising cost of the energy we consume. They are the source of equilibrium in our balance of payments.

World trade joins nations in peaceful and creative partnership. It has greater significance today than ever before.

NOW, THEREFORE, I, GERALD R. FORD, President of the United States of America, do hereby proclaim the week beginning May 18, 1975, as World Trade Week, and I call upon all Americans to cooperate in observing that week by participating with the business community and all levels of government in activities that emphasize the importance of world trade to the United States economy and to our relations with other nations.

IN WITNESS WHEREOF, I have hereunto set my hand this fifth day of April, in the year of our Lord nineteen hundred seventy-five, and of the Independence of the United States of America the one hundred ninety-ninth.

Gerald R. Ford

PROCLAMATION 4363

National Maritime Day, 1975

By the President of the United States of America

A Proclamation

Trade and commerce, which helped to stimulate our Nation's economic growth, continue to be vital to the welfare of all Americans.

The American merchant marine is now being assisted by the largest peacetime shipbuilding program ever undertaken in this country. This will enable America's imports and exports to be moved efficiently over the world's trade routes.

The ships of highly advanced designs coming down the ways will greatly improve the competitiveness and capabilities of our merchant fleet. They will restore the United States to the rank of a first-class maritime power.

To promote public recognition of the importance of the American merchant marine, the Congress in 1933 designated the anniversary of the beginning of the first transatlantic voyage by a steamship, The SAVANNAH, on May 22, 1819, as National Maritime Day, and requested the President to issue a proclamation annually in observance of that day (48 Stat. 73, 36 U.S.C. 145).

NOW, THEREFORE, I, GERALD R. FORD, President of the United States of America, do hereby urge the people of the United States to honor our American merchant marine on May 22, 1975, by displaying the flag of the United States at their homes and other suitable places, and I request that all ships sailing under the American flag dress ship on that day.

IN WITNESS WHEREOF, I have hereunto set my hand this fifth day of April, in the year of our Lord nineteen hundred seventy-five, and of the Independence of the United States of America the one hundred ninety-ninth.

Gerald R. Ford

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

EDITORIAL NOTE: FR Doc. 75-8495 originally published at 40 FR 14737, April 2, 1975, was misprinted. For the convenience of the user, the correct text of the document is being republished in full as set forth below.

Title 12—Banks and Banking

CHAPTER V—FEDERAL HOME LOAN BANK BOARD

SUBCHAPTER C—FEDERAL SAVINGS AND LOAN SYSTEM

[No. 75-262]

PART 541—DEFINITIONS

PART 545—OPERATIONS

Amendments Relating to Farm Loans

Summary

MARCH 19, 1975.

The following outline regarding the amendments adopted by this Resolution is included for the reader's convenience and is subject to the full description in the preamble as well as the specific provisions in the regulations.

I. Previous Regulations.

1. Loans on farm residences which were not paid on a monthly basis were limited to 15 year terms, 80 percent loan-to-value ratios, interest payments made at least semi-annually, and principal payment at least annually under § 545.6-1(a)(2).

2. Commercial farm loans—it was unclear whether they were "other improved real estate"; even if so defined they were restricted to 60 percent loan-to-value ratios, 5 year terms, and interest payments at least semiannually under § 545.6-1(c)(2).

II. Amended Regulations.

1. Farm residence loans may be for 25 year terms, principal and interest payments at least annually; loan-to-value ratios unchanged.

2. "Commercial farming enterprise" loans—specifically included in "other improved real estate"; 80 percent loan-to-value ratios, 25 year terms, annual interest and principal payments.

a. "Commercial farming enterprise" is defined as excluding hobby and vacation properties, and requires that the enterprise must be operational within a reasonable time (to exclude speculation).

3. Restatement of the other provisions in § 545.6-1(c) for clarification; no substantive change.

III. Reason for Amendment.

To make the permissible loan terms for farm loans more consistent with the financing needs of farmers.

By Resolution No. 74-514, dated June 5, 1974, the Federal Home Loan Bank Board proposed to amend §§ 541.12 and 545.6-1(a)(2) and (c) of the rules and regulations for the Federal Savings and Loan System (12 CFR 541.12, 545.6-1(a)(2) and (c)) for the purpose of expanding the authority of Federal savings and loan associations to make farm loans. Notice of such proposed rulemaking was duly published in the FEDERAL REGISTER on July 1, 1974 (39 FR 24242), with an invitation for interested persons to submit written comments by July 30, 1974. On the basis of its consideration of all relevant material presented by interested persons and otherwise available, the Board hereby amends §§ 541.12 and 545.6-1(a)(2) and (c) with one change from the proposal, as set forth below, effective April 8, 1975.

Farm loans are generally repayable on other than a monthly installment basis. Prior to the present amendment, § 545.6-1(a)(2) provided that non-insured and non-guaranteed loans on homes or combinations of homes and business properties which a Federal association may make on a monthly installment basis could also be made with interest payable at least semi-annually and principal payable annually, but only for 15-year terms. As amended, § 545.6-1(a)(2) authorizes such a loan to be made for up to a 25-year term with annual interest payments. This provision applies to any loan made on a farm residence or on a combination of a commercial farming enterprise and one to four family farm residences, because it is a "combination of home and business property" as defined by § 541.11.

Section 541.12 is amended by adding a new paragraph (c) to provide explicitly that the term "other improved real estate" shall include real estate to be used for a commercial farming enterprise. The term "commercial farming enterprise" is defined as excluding hobby and vacation property and is required to be operational within a reasonable time.

Section 545.6-1(c), which previously restricted a loan on other improved real estate which is not an insured or guaranteed loan or a construction loan and is not repayable on a monthly installment basis to a 60 percent loan-to-value ratio and a 5-year term, is amended to authorize Federal associations to make such loans secured by real estate used for a commercial farming enterprise with up to an 80 percent loan-to-value ratio, a 25-year term, and annual principal and

interest payments. The other regulatory provisions of § 545.6–1(c) are restated for purposes of clarification, without making any substantive changes thereto.

1. Section 541.12 is amended by adding a new paragraph (c) thereto to read as follows (paragraphs (a) and (b) are not changed and are restated here for the purpose of clarity):

§ 541.12 Other improved real estate.

The term "other improved real estate" means either:

(a) Real estate other than that defined in § 541.10, § 541.10–1, § 541.10–2, § 541.10–3, § 541.11, or § 541.11–1 improved by (1) a permanent structure or structures having a value of at least 25 percent of the value of the real estate as a whole, or (2) improvements which render the real estate usable by a business or industrial enterprise;

(b) Building lots or sites which, by reason of installations and improvements that have been completed in keeping with applicable governmental requirements and with general practice in the community, are building lots or sites ready for the construction on each such building lot or site of a structure designed for residential use for one family; or

(c) Real estate which is used, or to be used, for a commercial farming enterprise (the term "commercial farming enterprise" excludes hobby and vacation properties, and the enterprise must be operational within a reasonable time).

2. Paragraphs (a)(2) and (c) of § 545.6–1 are amended to read as follows:

§ 545.6–1 Lending powers under sections 13 and 14 of Charter K.

* * * * *

(a) *Homes or combinations of homes and business property.*—

* * * * *

(2) *Other installment loans.* Loans that such an association may make on a monthly installment basis may also be made with interest payable at least semiannually and with regular periodic principal installments payable at least annually in an amount sufficient to retire the debt, interest and principal, within 15 years: *Provided*, That insured or guaranteed loans may be repayable upon such terms as are acceptable to the insuring or guaranteeing agency: *Provided further*, That loans made on farm residences or combinations of such residences and property used for commercial farming enterprises may be made with interest and principal payable at least annually in an amount sufficient to retire the debt, interest and principal, within 25 years.

* * * * *

(c) *Other improved real estate.* Subject to the limitations of § 545.6–7, a Federal association may, if permitted by the terms of its charter, make loans on other improved real estate, as defined in § 541.12 (a) and (c), to the extent authorized by this paragraph (c):

(1) A monthly installment loan, whether fully or partially amortized, may be made in an amount not exceeding 75 percent of the value of such real estate, and shall be repayable in not more than 25 years, except that it may be combined into a single loan with a loan for the purpose of construction which meets the requirements of paragraph (c)(5) of this section, in which case the term of the monthly installment loan shall be considered to begin at the end of the term allowed for construction;

(2) A loan repayable on any other plan may be made in an amount not exceeding 60 percent of the value of such real estate, and shall be repayable in not more than 5 years and with interest payable at least semi-annually, except that a commercial farming enterprise loan may be made under this paragraph (c)(2) in an amount not exceeding 80 percent of the value of such real estate and with interest and principal payable at least annually in an amount sufficient to retire the debt, interest and principal, within 25 years;

(3) Any insured loan may be made in such amount and may be repayable upon such terms and conditions as are acceptable to the insuring agency;

(4) Any guaranteed loan at least 20 percent of which is guaranteed, and any guaranteed loan which does not exceed the amount that the association may otherwise lend plus the amount guaranteed, may be made and may be repayable upon such terms and conditions as are acceptable to the guaranteeing agency;

(5) A loan made for the purpose of construction may be made in an amount not exceeding 75 percent of the value of such real estate and for a term of not more than 36 months without regard to any requirement of this part for amortization of principal prior to the end of the term and with interest payable at least semiannually; and

(6) Loans made under § 545.6–16 and § 545.6–18 may be made in amounts provided for in those sections.

* * * * *

(Sec. 5, 48 Stat. 132, as amended; (12 U.S.C. 1464). Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR, 1943–48 Comp., p. 1071)

By the Federal Home Loan Bank Board.

Title 14—Aeronautics and Space

CHAPTER I—FEDERAL AVIATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. 75–NW–11–AD; Amdt. 39–2164]

PART 39—AIRWORTHINESS DIRECTIVES

Boeing Model 727 Series Airplanes

There have been reports of loosening of the blind rivets which secure the outboard aileron tab mast fittings to the tab on Boeing Model 727 series airplanes. Three cases of loose rivets on both fittings were found following wing vibration in-flight. If both masts on one tab separate, flutter could occur. Since this condition is likely to exist or develop in other airplanes of the same type design, an airworthiness directive is being issued to require a one-time inspection for loose blind rivets in the mast fittings on Boeing Model 727 series airplanes.

Since a situation exists that requires immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than 30 days.

In consideration of the foregoing, and pursuant to the authority delegated to me by the Administrator (31 FR 13697) § 39.13 of the Federal Aviation regulations is amended by adding the following new airworthiness directive:

BOEING: Applies to all Boeing Model 727 series airplanes certificated in all categories. Compliance required as indicated.

To prevent wing vibration from loose blind rivets in all outboard aileron tab mast fittings, accomplish the following:

(A) Within the next 200 flight hours from the effective date of this AD, unless accomplished within the last 400 flight hours, inspect all outboard aileron tab mast fittings for looseness, and repair, as necessary, in accordance with Boeing Alert Service Bulletin 727–57–137, or later FAA approved revisions, or in a manner approved by the Chief, Engineering and Manufacturing Branch, FAA Northwest Region.

(B) Within fifteen (15) days from the time of the inspection required in Paragraph A of each airplane, report all findings, positive or negative, to the Chief, Engineering and Manufacturing Branch, FAA Northwest Region, FAA Building, King County Airport, Seattle, Washington 98108, or call the FAA project engineer at (206) 767–2516. The report must include the following:

1. Airplane model number.
2. Airplane total time.
3. Description of looseness condition, if applicable, including number and type of fasteners loose and number of fittings per tab with loose fasteners.

(Reporting approved by the Bureau of the Budget under BOB No. 04–R0174).

The manufacturer's specifications and procedures identified and described in this directive are incorporated herein and made a part hereof pursuant to 5 U.S.C. 552(a)(1).

All persons affected by this directive who have not already received these documents from the manufacturer may obtain copies upon request to Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124. The documents may also be examined at FAA Northwest Region, 9010 East Marginal Way South, Seattle, Washington.

This amendment becomes effective April 21, 1975.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958 (49 U.S.C. 1354(a), 1421, and 1423); sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).)

Issued in Seattle, Washington on March 31, 1975.

C. B. WALK, Jr.,
Director, Northwest Region.

The incorporation by reference provisions in the document were approved by the Director of the Federal Register on June 19, 1967.

[FR Doc.75–9014 Filed 4–7–75;8:45 am]

[Airspace Docket No. 75–SW–17]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Revocation of Transition Area

The purpose of this amendment to Part 71 of the Federal Aviation Regulations is to revoke the Lovington, N. Mex., transition area.

On August 19, 1971, a transition area was established at Lovington, N. Mex., to accommodate the proposed NDB instrument approach procedure.

Since that date, no instrument approach procedure to serve the Lovington, N. Mex., Lea County Airport has been published, nor is one contemplated. The Fort Worth Air Route Traffic Control Center has no requirements for continuance of the transition area airspace.

In the consideration of the foregoing, in § 71.181 (40 FR 441), the following transition area is deleted:

LOVINGTON, N. MEX.

That airspace extending upward from 700 feet above the surface within a 5-mile radius of the Lovington, N. Mex., Lea County Airport (Lat. 32°57'30" N., Long. 103°24'30" W.) and within 3.5 miles each side of a 244° bearing from the Lovington, N. Mex., NDB (Lat. 32°56'40" N., Long. 103°24'08" W.), extending from the NDB to 11.5 miles southwest.

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348); Sec. 6(c), Department of Transportation Act [49 U.S.C. 1655(c)].)

Issued in Fort Worth, Tex., on March 31, 1975.

ALBERT H. THURBURN,
Acting Director, Southwest Region.

[FR Doc.75–9015 Filed 4–7–75;8:45 am]

Title 15—Commerce and Foreign Trade

CHAPTER III—DOMESTIC AND INTERNATIONAL BUSINESS ADMINISTRATION, DEPARTMENT OF COMMERCE

PART 377—SHORT SUPPLY CONTROLS

Method of Licensing Exports of Petroleum Products in the Second Quarter 1975

The licensing system used in the first quarter 1975 for the export of petroleum products other than crude oil is generally continued on the same basis during the second quarter 1975, except that the base period for determining exporters' shares of quota entitlements for Commodity Group I (butane, propane, and natural gas liquids) will be that from April 1, 1972 thru June 30, 1972.

The country quotas for each Petroleum Commodity Group that will be available during the second quarter 1975 are announced in Supplement No. 2 to Part 377 of the Export Administration Regulations and contained herein. As previously, 5 percent of the overall quota for each Commodity Group will be reserved for contingencies and the announced quotas represent 95 percent of the overall authorized exports.

As during the first quarter 1975, carbon-black feedstock oils (Commodity Group H) will not be subject to quota limitations during this quarter, but will be subject to validated export licensing. However, consignees of carbon-black feedstock oils must be established users of this product as a petrochemical feedstock in the manufacture of carbon-black. Also, exporters of carbon-black feedstock oils are required to submit certain additional documentation as described in § 377.6(e)(4) to support an application for export license.

All licenses issued during the second quarter 1975 will expire 30 days after the end of the calendar quarter. Requests for extension of the validity period of such licenses will normally not be entertained.

The policy for the export of crude oil will remain the same as that announced in the FEDERAL REGISTER for May 1, 1974.

Accordingly, Supplement No. 2 to Part 377 of the Export Administration Regulations (15 CFR Part 377) is revised to read as follows:

SUPPLEMENT No. 2

PETROLEUM AND PETROLEUM PRODUCTS SUBJECT TO SHORT SUPPLY LICENSING CONTROLS

Petroleum Licensed Only in Accordance With § 377.6(d)(1)

GROUP A

Schedule B No.	Commodity description
331.0100	Crude petroleum.
331.0200	Petroleum partly refined for further refining.

Petroleum Products Subject to Historical Quotas

GROUP B

332.1015	Aviation gasoline.

GROUP C

332.1030	Gasoline, not elsewhere classified.
332.1050	Gasoline blending agents, hydrocarbon compounds only, not elsewhere classified.

GROUP D

332.2010	Kerosene, except kerosene-type jet fuel.

GROUP E

332.2020	Jet fuel.

GROUP F

332.3000	Distillate fuel oils.

GROUP G

332.4000	Residual fuel oils.

GROUP I

341.1025	Butane.
341.1030	Propane.
341.1040	Natural gas liquids, including LPG, not elsewhere classified.

Petroleum Products Not Subject To Quotas

GROUP H

332.9160	Carbon black feedstock oil.

Quantities: Report the above commodities in barrels of 42 gals.

Shipping tolerance: 10 percent.

Submission dates: Not prior to the beginning of the applicable quarter, and not later than:

Historical exporters of petroleum commodities other than crude oils.	June 20, 1975. 2d quarter 1975.
Hardships, crude oil exporters, and carbon black feed-stock oil exporters.	At any time.

Title 16—Commercial Practices

CHAPTER I—FEDERAL TRADE COMMISSION

[Docket C-2637]

PART 13—PROHIBITED TRADE PRACTICES, AND AFFIRMATIVE CORRECTIVE ACTIONS

J. D. Adams Co.

Subpart—Corrective actions and/or requirements: § 13.533 *Corrective actions and/or requirements:* § 13.533–20 *Disclosures.* Subpart—Dealing on exclusive and tying basis: § 13.670 *Dealing on exclusive and tying basis:* § 13.670–10 *Clayton Act, Sec. 3;* § 13.670–20 *Federal Trade Commission Act.* Subpart—Enforcing dealings or payments wrongfully: § 13.1045 *Enforcing dealings or payments wrongfully.*

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interpret or apply Sec. 3, 38 Stat. 731; 15 U.S.C. 14)

In the Matter of J. D. Adams Company, a Corporation

Consent order requiring a Colorado Springs, Colo., manufacturer and distributor of truss fabricating equipment and truss connecting plates, among other things to cease tying the sale of wood roof truss connecting plates and/or engineering services to the sale, lease or license of fabricating equipment.

The order to cease and desist, including further order requiring report of compliance therewith, is as follows: [1]

I. For purposes of this Order, the following definitions shall apply:

A. The term "respondent" refers to J. D. Adams Company, a corporation, and its subsidiaries, affiliates, successors, assigns, officers, agents, representatives and employees.

B. The term "truss fabricating equipment" refers to all machinery and equipment sold, leased, or licensed by respondent to be used in the assembly, production and construction of wood roof trusses used in the construction of residences, multiple dwellings, commercial or industrial buildings and farm structures.

C. The term "truss connecting plates" refers to all metal plates bearing any number of nails or other sharp devices used to permanently connect the joints of wood roof trusses used in the construction of residences, multiple dwellings, commercial or industrial buildings and farm structures.

D. The term "engineering services" refers to design specification services provided by respondent in connection with the assembly, production and construction of wood roof trusses, and the selection and designation of truss connecting plates deemed necessary for the proper support of said trusses.

II. *It is ordered,* That respondent, directly or indirectly through any corporate or other device, in connection with the sale, lease or license of truss fabricating equipment, truss connecting plates and/or engineering services in the United States shall, within thirty (30) days after entry of this Order, cease and desist from:

1. Offering, entering into or enforcing any agreement or provision of any agreement, express or implied, which in any way requires or obligates any purchaser, lessee or licensee of respondent's truss fabricating equipment, as a condition to the execution or continuation of a purchase, lease or license agreement with respect to such equipment, to purchase or agree to purchase all or any part of such purchaser's, lessee's or licensee's requirements of truss connecting plates and/or engineering services from respondent or from any source designated by respondent.

2. Offering, allowing or granting a price discount, rental or royalty reduction, rebate, or other valuable consideration on or with respect to the sale, lease or license of respondent's truss fabricating equipment which is in any way based upon purchases of truss connecting plates and/or engineering services from respondent or from any source designated by respondent.

3. Requiring any of its purchasers, lessees or licensees of truss fabricating equipment to purchase truss connecting plates and any other products from respondent or from any source designated by respondent.

III. *It is further ordered,* That respondent shall:

1. Within thirty (30) days after entry of this Order, mail a letter on its stationery, signed by the officers of the respondent and enclosing a copy of this Order, to all of its purchasers, lessees, and/or licensees of truss fabricating equipment who have purchased truss connecting plates from it during the twenty-four (24) months preceding entry of this Order which informs each such purchaser, lessee or licensee of the prohibitive terms of this Order.

2. Notify, during the five (5) year period after entry of this Order, each new prospective purchaser, lessee or licensee of its truss fabricating equipment (excluding replacement parts) of the prohibitive terms of this Order on its first written proposal to each such new prospective purchaser, lessee or licensee.

3. Within ten (10) days after entry of this Order, provide a copy of this Order to each of its salesmen, sales agents and salen representatives.

4. Within thirty (30) days after entry of this Order, and continuing thereafter, make available its manuals concerning its standard wood roof truss designs, including updated standard wood roof truss designs, to any truss fabricator desiring such manuals; nothing contained in this Order shall prohibit respondent from charging a reasonable fee for such manuals.

5. Within sixty (60) days after entry of this Order, file with the Commission a report in writing setting forth in detail the manner and form in which it has complied with this Order.

6. Notify the Commission at least thirty (30) days prior to any proposed corporate change such as dissolution, assignment or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries or any other change in the corporation which may affect compliance obligations arising out of the Order.

The Decision and Order was issued by the Commission February 14, 1975.

VIRGINIA M. HARDING,
Acting Secretary.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interprets or applies sec. 5, 38 Stat. 719, as amended; 15 U.S.C. 45)

In the Matter of Duofold, Inc., a Corporation.

Consent order requiring a Mohawk, N.Y., manufacturer and distributor of 2-layer underwear, regular or quilted underwear, sportswear, pajamas, parkas, and related items, among other things

V 40 68
APR 8 75

to cease establishing or enforcing resale prices; threatening to terminate dealers who fail to observe suggested resale prices; suggesting resale prices to dealers not lawfully under respondent's control; and publishing price lists, etc., which indicate resale prices without stating on each page that such prices are suggested or approximate.

The order to cease and desist, including further order requiring report of compliance therewith, is as follows: [1]

I. It is order, That respondent Duofold, Inc., a corporation, its subsidiaries, successors and assigns, and its officers and directors, and respondent's agents, representatives and employees, individually or in concert, directly or through any corporation, subsidiary, division, or other device, in connection with the manufacture, distribution, offering for sale or sale of 2-layer underwear, regular or quilted underwear, sportswear, pajamas, parkas, tenniswear, golf shirts, turtlenecks and related items or any other products (hereinafter referred to in this order as "said products") in commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from:

A. Establishing, maintaining or enforcing with any dealer any contract, agreement, understanding or arrangement fixing, establishing, maintaining, controlling, influencing or enforcing in any way or to any extent, directly or indirectly, the price at which any of said products is advertised, sold or offered for sale at retail.

B. Requiring any dealer or prospective dealer to enter into an oral or written agreement or understanding that such dealer or prospective dealer will maintain any resale price for any of said products as a condition of buying any of said products.

C. Requesting or requiring any dealer or prospective dealer, either directly or indirectly, to report any dealer, person or firm who does not adhere to any resale price for any of said products, or acting on reports so obtained by refusing or threatening to refuse sales to any dealer, person or firm so reported.

D. Directing or requiring respondent's salesmen, or any other agent, representative or employee, directly or indirectly, to report any dealer who does not adhere to any resale price for any of said products, or to act on such reports by refusing or threatening to refuse sales to any dealer so reported.

E. Threatening to terminate and terminating, either directly or indirectly, dealers who fail to observe, maintain or advertise the respondent's suggested resale prices.

F. Suggesting, for three (3) years from the date on which this order becomes final, to any reseller whose resale prices are not or cannot lawfully be controlled by respondent in the manner prescribed by law and this order any resale price whatsoever to be charged by such reseller for said products, by price list, discount schedule, invoicing procedure, repricing of commodities or their containers, or by any other means.

G. Requiring from any dealer charged with price cutting or failure to adhere to any suggested resale price, a promise or assurance to adhere to any resale price for any of said products as a condition precedent to any future sales to said dealer.

H. Publishing, disseminating or circulating any price list, price book, price tag, advertising or promotional material, or other document indicating any resale price without stating on each page of such price list, price book, price tag, advertising or promotional material, or other document that the price is suggested or approximate.

I. Requiring or inducing by any means any dealer or prospective dealer to refrain, or to agree to refrain from reselling any of said products to any other dealer or distributor.

Provided, however, nothing hereinabove shall be construed to waive, limit or otherwise affect the right of respondent to enter into, establish, maintain and enforce in any lawful manner any price maintenance agreement excepted from the provisions of section 5 of the Federal Trade Commission Act by virtue of the McGuire Act amendments to said Act.

II. *It is further ordered,* That the respondent herein shall within sixty (60) days after service upon it of this order, mail a copy of this order to each of its dealers in the States of Alabama, Alaska, Hawaii, Kansas, Mississippi, Missouri, Montana, Nebraska, Nevada, Rhode Island, Texas, Utah, Vermont, Wyoming, and the Commonwealth of Puerto Rico, and the District of Columbia, and, during the five (5) year period of time following the date of service of this order, to all future dealers in these jurisdictions at the time said dealers are opened as accounts, under cover of the letter annexed hereto as Exhibit A, and furnish the Commission proof of the mailing thereof.

III. *It is further ordered,* That the respondent herein shall forthwith distribute a copy of this order to each of its operating divisions and to all of its sales personnel and shall instruct each salesperson employed by it now or in the future to read this order and to be familiar with its provisions.

IV. *It is further ordered,* That respondent notify the Commission at least thirty (30) days prior to any proposed change in the corporate respondent such as dissolution, assignment or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries or any other change in the corporation which may affect compliance obligations arising out of the order.

V. *It is further ordered,* That the respondent herein for a period of five (5) years from the date of this signing establish and maintain a file of all records referring or relating to respondent's refusal to sell said products to any dealer, which file shall contain a record of a communication to each such dealer explaining respondent's refusal to sell, and which file will be made available for Commission inspection on reasonable notice; and, annually, for a period of five (5) years from the date hereof, submit a report to the Commission's Boston Regional Office listing the names of all dealers with whom respondent has refused to deal over the preceding year, a description of the reason for the refusal and the date of the refusal.

VI. *It is further ordered,* That the respondent herein shall within sixty (60) days after service upon it of this order, file with the Commission a report, in writing, setting forth in detail the manner and form in which it has complied with this order.

EXHIBIT A

(LETTERHEAD OF DUOFOLD, INC.)

DEAR DEALER: Duofold, Inc. has entered into an agreement with the Federal Trade Commission relating to the distributional activities and pricing policy of Duofold, Inc. A copy of the consent order entered into pursuant to that agreement is enclosed herewith.

Duofold, Inc. has entered into this agreement solely for the purpose of settling a dispute with the Commission and the agreement and consent order is not to be construed as an admission by Duofold, Inc. that it has violated any of the laws administered by the Commission, or that any of the allegations in the complaint are true and correct. Instead, the order merely relates to the activities of Duofold, Inc. in the future.

In order that you may readily understand the terms of the consent order, we have set forth the essentials of the agreement with the Commission, although you must realize that the consent order itself is controlling rather than the following explanation of its provisions:

(1) Our dealers in your area are free to set their own retail or resale prices for said products.

(2) Duofold, Inc. will not solicit, invite or encourage dealers, or any other persons to report any dealer in your area not following any retail or resale price for any of said products, and, furthermore, will not act on any such reports sent to it.

(3) Duofold, Inc. will not require or induce its dealers in your area to refrain from advertising said products at any price or from selling or offering said products at any price to any person.

Sincerely yours,

THOMPSON H. BILLINGTON,
President.

The Decision and Order was issued by the Commission February 10, 1975.

VIRGINIA M. HARDING,
Acting Secretary.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interprets or applies sec. 5, 38 Stat. 719, as amended; 15 U.S.C. 45)

In the Matter of General Motors Corporation, Campbell-Ewald Co., and McCann-Erickson, Inc., Corporations

Consent order requiring a Detroit, Mich., automobile manufacturer, among other things to cease making unsubstantiated comparative claims as to the handling characteristics of automobiles. Further, the order dismisses the allegations of the complaint relating to the "Lubed-for-life chassis" claim for the Opel automobile. The complaint is dismissed as to respondent McCann-Erickson, Inc., G.M.'s New-York-City-based advertising agent.

Consent order requiring a Detroit, Mich., advertising agency, among other things to cease making unsubstantiated comparative claims as to the handling characteristics of automobiles.

The order to cease and desist as to General Motors Corporation, including further order requiring report of compliance therewith, is as follows: [1]

I. *It is ordered,* That respondent General Motors Corporation, a corporation, its successors and assigns, and its officers, agents, representatives, and employees, directly or through any corporation, subsidiary, division or other device, in connection with the advertising, offering for sale, sale or distribution of any automobile, in commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from:

1. Representing directly or by implication, in any manner, including the use of any endorsement, testimonial or statement made by any individual, group or organization, that any automobile is superior in handling to any other automobile or all other automobiles, unless at the time that any such representation is first disseminated:

(a) Respondent has a reasonable basis for such representation, which shall consist of a competent scientific test or tests that substantiate such representation; and

(b) Respondent's agents, employees or representatives who are responsible for engineering approval of any advertisement containing such representation rely on such test or tests in approving such advertisement and provide to respondent's agents, employees or representatives who are responsible for approval of such advertisement a written statement that such test or tests exist which substantiate the representation.

2. Failing to maintain and produce accurate records which may be inspected by Commission staff members upon reasonable notice:

(a) Which consist of the documentation constituting the reasonable basis required by Paragraph I.1 of this Order and which demonstrate that respondent's representatives relied on such reasonable basis as required in Paragraph I.1(b) of this Order; and

(b) Which shall be maintained by respondent for a period of three (3) years from the date on which any advertisement containing any such representation was last disseminated.

II. *It is further ordered,* That for the purposes of Paragraph I of this Order:

1. The word "handling" shall be defined in terms of the response of the vehicle:

(a) Under conditions where rapid steering inputs in evasive or emergency maneuvers are necessary;

(b) Under cornering conditions at speeds in excess of 30 miles per hour in which levels of lateral acceleration in excess of .2g are attained; and

(c) In gusty crosswinds, on rough roads and under severe steering-braking conditions.

2. A statement as to the handling characteristics of an automobile implies that the automobile is superior in handling to any other automobile or all other automobiles if the statement is phrased in the comparative or superlative degree, or if any advertising containing such statement conveys a net impression of comparative handling superiority; *Provided, however,* That any statement or statements in such advertising phrased in the comparative or superlative degree regarding any characteristic or characteristics other than handling will not, for that reason alone and without a statistically valid consumer survey, render any statement in such advertising which does relate to the handling characteristics of an automobile and which is phrased in the positive degree to be deemed a representation that the automobile is superior in handling to any other automobile or all other automobiles.

3. "Scientific test" shall be defined and construed in accordance with the Federal Trade Commission's Order as stated in Firestone Tire & Rubber Co., Docket No. 8818.

In our view a scientific test is one in which persons with skill and expertise in the field conduct the test and evaluate its results in a disinterested manner using testing procedures generally accepted in the profession which best insure accurate results. This is not to say that respondent always must conduct laboratory tests. The appropriate test depends on the nature of the claim made. Thus a road or user test may be an adequate scientific test to substantiate one performance claim, whereas a laboratory test may be the proper test to substantiate another claim. Respondent's obligation is to assure that any claim it makes is adequately substantiated by the results of whatever constitutes a scientific test in those circumstances.

III. It is further ordered, That the allegations of the complaint relating to the "lubed-for-life chassis" claim for the Opel automobile be, and hereby are, dismissed and that the complaint be, and hereby is, dismissed as to respondent McCann-Erickson Inc. Further, all information submitted to the Commission supporting the aforementioned claim shall be placed on the public record.

IV. It is further ordered, That respondent General Motors Corporation shall forthwith distribute a copy of this Order to each of its officers, agents, representatives or employees who are engaged in the creation or approval of advertisements.

V. *It is further ordered,* That respondent General Motors Corporation notify the Commission at least thirty (30) days prior to any proposed change in said corporate respondent such as dissolution, assignment or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries or any other change in the corporation which may affect compliance obligations arising out of this Order.

VI. It is further ordered, That respondent General Motors Corporation shall within sixty (60) days after service upon it of the Order, file with the Commission a report, in writing, setting forth in detail the manner and form in which it has complied with this Order.

The order to cease and desist as to Campbell-Ewald Co., including further order requiring report of compliance therewith, is as follows:

I. It is ordered, That respondent Campbell-Ewald Co., a corporation, its successors and assigns, and its officers, agents, representatives, and employees, directly or through any corporation, subsidiary, division or other device, in connection with the advertising, offering for sale, sale or distribution of any automobile, in commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from:

1. Representing directly or by implication, in any manner, including the use of any endorsement, testimonial or statement made by any individual, group or organization, that any automobile is superior in handling to any other automobile or all other automobiles, unless

[1] Copies of the Complaint, Decision and Order as to General Motors Corporation and McCann-Erickson, Inc., and Decision and Order as to Campbell-Ewald Co., filed with the original document. Attached to the Complaint are orders amending the Complaint.

V 4 0 1 6 8
APR 8 75
XUM

at the time that any such representation is first disseminated:

(a) Respondent or its client has a reasonable basis for such representation which shall consist of a competent scientific test or tests that substantiate such representation; or

(b) Respondent has a reasonable basis for such representation which shall consist of an opinion in writing signed by a person qualified by education and experience to render such an opinion (who, if qualified by education and experience, may be a person retained or employed by respondent's client) that a competent scientific test or tests exist to substantiate such representation, *provided*, That any such opinion also discloses the nature of such test or tests and *provided further*, That respondent neither knows nor has reason to know that such test or tests do not in fact substantiate such representation or that any such opinion does not constitute a reasonable basis for such representation.

2. Failing to maintain and produce accurate records which may be inspected by Commission staff members upon reasonable notice:

(a) Which consist of the documentation constituting the reasonable basis required by Paragraph I.1 of this Order or, if respondent's compliance with Paragraph I.1 is based on its client's reasonable basis, which consist of a memorandum so indicating; and

(b) Which shall be maintained by respondent for a period of three (3) years from the date on which any advertisement containing any such representation was last disseminated by respondent.

II. *It is further ordered*, That for the purposes of Paragraph I of this Order:

1. The word "handling" shall be defined in terms of the response of the vehicle:

(a) Under conditions where rapid steering inputs in evasive or emergency maneuvers are necessary;

(b) Under cornering conditions at speeds in excess of 30 miles per hour in which levels of lateral acceleration in excess of .2g are attained; and

(c) In gusty crosswinds, on rough roads and under severe steering-braking conditions.

2. A statement as to the handling characteristics of an automobile implies that the automobile is superior in handling to any other automobile or all other automobiles if the statement is phrased in the comparative or superlative degree, or if any advertising containing such statement conveys a net impression of comparative handling superiority; *provided, however*, That any statement or statements in such advertising phrased in the comparative or superlative degree regarding any characteristic or characteristics other than handling will not, for that reason alone and without a statistically valid consumer survey, render any statement in such advertising which does relate to the handling characteristics of an automobile and which is phrased in the positive degree to be deemed a representation that the automobile is superior in handling to any other automobile or all other automobiles.

3. "Scientific test" shall be defined and construed in accordance with the Federal Trade Commission's Order as stated in Firestone Tire & Rubber Co., Docket No. 8818.

In our view a scientific test is one in which persons with skill and expertise in the field conduct the test and evaluate its results in a disinterested manner using testing procedures generally accepted in the profession which best insure accurate results. This is not to say that respondent always must conduct laboratory tests. The appropriate test depends on the nature of the claim made. Thus a road or user test may be an adequate scientific test to substantiate one performance claim, whereas a laboratory test may be the proper test to substantiate another claim. Respondent's obligation is to assure that any claim it makes is adequately substantiated by the results of whatever constitutes a scientific test in those circumstances.

III. *It is further ordered*, That respondent shall forthwith distribute a copy of this Order to each of its officers, agents, representatives or employees who are engaged in the creation or approval of advertisements.

IV. *It is further ordered*, That respondent notify the Commission at least thirty (30) days prior to any proposed change in said corporate respondent, such as dissolution, assignment or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries or any other change in the corporation which may affect compliance obligations arising out of this Order.

V. *It is further ordered*, That respondent shall within sixty (60) days after service upon it of this Order, file with the Commission a report, in writing, setting forth in detail the manner and form in which it has complied with this Order.

The Decisions and Orders were issued by the Commission January 10, 1975.

VIRGINIA M. HARDING,
Acting Secretary.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interprets or applies sec. 5, 38 Stat. 719, as amended; 15 U.S.C. 45)

In the Matter of Weaver Airline Personnel School, Inc., a Corporation, and General Educational Services Corporation, a Corporation

Consent order requiring a Kansas City, Mo., airline school and its parent corporation located in Los Angeles, Calif., among other things to cease misrepresenting the degree of industry demand for its graduates, its selectivity in accepting enrollees, the availability of jobs, and the nature and effectiveness of its placement service. Further, the order requires pro-rata refunds be paid to recent eligible enrollees.

The order to cease and desist, including further order requiring report of compliance therewith, is as follows: [1]

It is ordered, That respondent Weaver Airline Personnel School, Inc., a corporation, and respondent General Educational Services Corporation, a corporation, their successors and assigns, and their officers, and respondents' agents, representatives, and employees, directly or through any corporation, subsidiary, division, or other device, in connection with advertising, offering for sale, sale or distribution of courses of study, training, or instruction in the field of airline training, do forthwith cease and desist from:

1. Representing, orally, in writing, or in any other manner, directly or by implication, that:

(a) That airline industry has employed or will employ enrollees or graduates of any such course(s), without furnishing the information specified in Paragraph 5(b)(3) of this Order.

(b) The airline industry needs men and/or women, without furnishing the information specified in Paragraph 5(b)(3) of this Order.

[1] Copies of the Complaint, Decision and Order, filed with the original document.

(c) Respondents are selective or limit the number of prospective purchasers whom they will enroll in any such course(s).

(d) Representatives of the airline industry come to respondents' place of business, or any other place, to hire graduates of any such course(s) of instruction, without furnishing the information specified in Paragraph 5(b)(3) of this Order.

(e) Any placement service has or will assist enrollees or graduates of any such course(s) in any manner, without furnishing the information specified in Paragraph 5(b)(3) of this Order.

(f) Persons who enroll in any such course(s) of instruction offered by respondents can obtain employment in or near any geographic location.

2. Failing to disclose, clearly and conspicuously, in advertisements for any such course(s) that inquirers will be visited by sales representatives, unless consent to such visits is first obtained by mail or telephone.

3. Using, orally, in writing, or in any other manner, at any time, statistical data or numerical estimates, derived from any source whatsoever, respecting present or future occupational demand or the growth of employment in the airline industry, without furnishing the information specified in Paragraph 5(b)(1), (2), (3) of this Order.

4. Failing to keep adequate records which may be inspected by the Commission staff members upon reasonable notice:

(a) Which disclose the facts upon which any placement statistics or claims or other representations of the type described in Paragraph 5(b)(1), (2), (3) of this Order are based, and

(b) From which the validity of any placement statistics described in Paragraph 5(b)(3) of this Order can be determined, for so long as such statistics, claims or other representations are disseminated, made or authorized by respondents, or are required to be disclosed hereunder and for a further period of three (3) years after respondents' termination of dissemination, use, authorization or disclosure of such statistics, claims or representations, (whichever period is the longer).

5. Failing to send by certified mail, return receipt requested, to each person that shall contract for the sale of any such course of instruction, a notice, in a form approved by the Commission which shall disclose the following information and none other:

(a) The title "IMPORTANT INFORMATION" printed in bold face type across the top of the form.

(b) A paragraph reciting the following affirmative disclosures:

(1) A statement disclosing the total number of students who have enrolled in each such course of instruction offered by respondents for each of the three preceding calendar years.

(2) A statement disclosing the total number of students who have graduated from each such course of instruction offered by respondents for each of the three preceding calendar years.

(3) A statement disclosing the total number of students who have obtained employment through respondents' placement service each year for the three preceding calendar years in the airline industry.

(4) A statement which shall read as follows:

Most airlines train those persons whom they employ and the training offered by proprietary vocational training schools, which are not affiliated with the airlines, is not necessary to obtain entry level employment with such airlines. Where other factors are equal, airlines may give preference in employment to persons having such training.

(5) An explanation of the cancellation procedure provided in this Order, namely, that any contract or other agreement may be cancelled within three (3) days after receipt by the customer, via the U.S. mails, of this notice.

(6) Said notice shall contain a detachable form which the person may use as a notice of cancellation, which indicates the proper address for accomplishing any such cancellation.

(7) The said notice shall be sent by respondents no sooner than the next day after the person shall have executed a contract for the sale of any such course of instruction.

6. Contracting for any sale of any such course of instruction in the form of a sales contract or other agreement which shall become binding prior to the end of the third day after the day of receipt by the customer of the form of notice provided in Paragraph 5 of this Order.

7. *It is further ordered*, That respondents, in connection with the sale or offering for sale of any such course, training, or instruction:

(a) Inform orally all prospective purchasers to whom solicitations are made, and provide, in writing, in all applications and contracts, in at least ten-point bold type, that the application or contract may be cancelled for any reason by notification to respondents, in writing, within three (3) days from the date of receipt of the form of notice provided in Paragraph 5 of this Order.

(b) Refund immediately all monies to all purchasers who have requested cancellation of the application or contract within three (3) days from the date of receipt of the form of notice provided in Paragraph 5 of this Order.

8. *It is further ordered*, That:

(a) Respondents herein deliver a copy of the Decision and Order in this matter to each of their present and future employees, salesmen, agents, solicitors, independent contractors, or to any other person, who promotes, offers for sale, sells or distributes any course of instruction included in this Order.

(b) Respondents herein provide each person so described in Paragraph 8(a) above with a form, returnable to the respondents, clearly stating his intention to be bound by and to conform his business practices to the requirements of this Order; retain said statement during the period said person is so engaged; and make said statement available to the Commission's staff for inspection and copying purposes upon request.

(c) Respondents herein inform each person so described in Paragraph 8(a) above that the respondents will not use or engage or will terminate the use or engagement of any such party, unless such party agrees to and does file notice with the respondents that he will be bound by provisions contained in this Order.

(d) If such party as described in Paragraph 8(a) above will not agree to so file the notice set forth in Paragraph 8(b) above with the respondents and be bound by the provisions of the Order, the respondents will not use or engage or continue the use or engagement of such party to promote, offer for sale, sell or distribute any course of instruction included in this Order.

(e) Respondents herein inform the persons described in Paragraph 8(a) above that the respondents are obligated by this Order to discontinue dealing with, or to terminate the use or engagement of persons who continue on their own the deceptive acts or practices prohibited by this Order.

(f) Respondents herein institute a program of continuing surveillance adequate to reveal whether the business practices of each said person described in Paragraph 8(a) above conform to the requirements of this Order.

(g) Respondents herein discontinue dealing with or terminate the use or engagement of any person described in Paragraph 8(a) above, as revealed by the aforesaid program of surveillance, who continues on his own any act or practice prohibited by this Order.

9. *It is further ordered*, That respondents shall forthwith distribute a copy of this Order to each of their operating divisions or subsidiaries in the field of airline training or any other field.

10. *It is further ordered*, That respondents shall notify the Commission at least thirty (30) days prior to any proposed change in their corporate status, such as dissolution, assignment, or sale, resulting in the emergence of successor corporation(s), the creation or dissolution of which may affect compliance obligations arising out of this Order.

11. It is further ordered, That respondent Weaver Airline Personnel School, Inc. shall notify in writing, at the last known address, within thirty (30) days after the date of this Order becomes final, all students who enrolled in any of the courses offered by respondent Weaver Airline Personnel School, Inc. on or after January 1, 1972, and who paid in full for such course on or before the date this order becomes final, by certified mail, return receipt requested of their right to present claims for restitution according to the following terms and conditions:

Students shall be informed that in order to be entitled to restitution they must submit to respondent Weaver Airline Personnel School, Inc. a notarized

V 40168
APR 8 75

affidavit containing details of the following affirmations:

(a) That the student enrolled in any course(s) of instruction offered by respondent Weaver Airline Personnel School, Inc. on or after January 1, 1972.

(b) That the student paid the full amount required by respondents for tuition for any course(s) of instruction offered by respondent Weaver Airline Personnel School, Inc. on or after January 1, 1972.

(c) That the student attempted to procure employment in the field for which he or she took training from respondent Weaver Airline Personnel School, Inc. and was unsuccessful in obtaining employment within six months after completion or termination by the student of his or her course(s).

(d) That the student agrees that in consideration of this receipt of a pro rata share of cash restitution as provided for in this Order such student releases respondents from any and all further claims such student might have, whether known or unknown, with respect to or arising out of his or her agreement with or course of study at Weaver Airline Personnel School, Inc.

Failure to seek or obtain restitution pursuant to this Order shall not preclude any student from pursuing any other remedy under law.

Provided, however, That no such notice need be sent to any such students with respect to whom respondent Weaver Airline Personnel School, Inc. certifies to the staff of the Commission that it placed in employment in the airline or travel-related field together with such details of such placements as the staff may reasonable require.

Respondent Weaver Airline Personnel School, Inc. shall make restitution to any student submitting a sworn affidavit complying with the provisions of sections (a)–(d) of this paragraph, pursuant to the following procedure:

(1) Students seeking restitution must submit proper affidavits within seventeen (17) months after receiving proper notice as to their right to such restitution.

(2) Respondent Weaver Airline Personnel School, Inc. shall make pro rata payments, in amounts to each student no greater than that student's total tuition payment, to each student seeking and qualifying for restitution under the terms of this Order. *Provided, however,* That the total sum to be paid in restitution under Paragraph 11 of this Order shall not be greater than Two hundred and forty-nine thousand dollars ($249,000). Said payments shall be made no later than thirty (30) days after the final date established for submission of student requests for restitution.

Provided, further, that in the event the amount required to be paid in restitution to those students who enrolled on or after January 1, 1972 is less than two hundred and forty-nine thousand dollars ($249,000), respondent Weaver Airline Personnel School, Inc. shall notify all students who enrolled on or after January 1, 1971, but not later than December 31, 1971, and who paid in full, of their right to restitution, in the same manner as provided in this paragraph for those students who enrolled on or after January 1, 1972, except that such notice shall be sent within thirty (30) days after the final date upon which the initial restitution payments shall be due. Said students seeking restitution must then submit affidavits, as provided in sections (a)–(d) of this paragraph (modified as to date of enrollment in subparagraph (a)) within ninety (90) days after receipt of said notice. Weaver Airline Personnel School, Inc. shall then make pro rata refunds, in the same manner as provided in section (2) of this Paragraph. *Provided, however,* That the total sum to be paid under this paragraph shall not exceed Two hundred and forty-nine thousand dollars ($249,000) when combined with the total restitution paid to those students who enrolled on or after January 1, 1972. In the event the amount required to be paid still does not exceed Two hundred and forty-nine thousand dollars ($249,000) then the same procedure set forth in this paragraph shall be followed with respect to all students who enrolled on or after January 1, 1970 but not later than December 31, 1970 and who paid in full.

12. *It is further ordered,* That all sums collected or received by Weaver Airline Personnel School, Inc. on or after May 20, 1974 on obligations of students shall be distributed as follows:

1. The first Three hundred thousand dollars ($300,000) so collected or received shall be the property of respondent Weaver Airline Personnel School, Inc.

2. All sums so collected in excess of Three hundred thousand dollars ($300,000) shall be kept in a special escrow account (said excess sums are hereinafter referred to as the "Escrow Funds"). Respondent Weaver Airline Personnel School, Inc. shall notify in writing, at the last known address, twelve (12) months after the date this Order becomes final, all students who enrolled in any of the courses offered by respondent Weaver Airline Personnel School, Inc. and whose accounts receivable are outstanding, in whole or in part, as of the date this Order becomes final, by ordinary mail, of their right to present claims for restitution according to the following terms and conditions:

(a) Respondent Weaver Airline Personnel School, Inc. shall make restitution to any student submitting a notarized affidavit containing details of the following affirmations:

(1) That the student enrolled in any course(s) of instruction offered by respondent Weaver Airline Personnel School, Inc.

(2) That the student paid the full amount required by respondents for tuition for any course(s) of instruction offered by respondent Weaver Airline Personnel School, Inc. on or after the date this Order becomes final. (Respondents shall, in the notice to said students of their right to restitution, set forth the date this Order becomes final.)

(3) That the student attempted to procure employment in the field for which he or she took training from respondent Weaver Airline Personnel School, Inc. and was unsuccessful in obtaining employment within six (6) months after completion or termination by the student of his or her course(s), or as of the date the student files his or her affidavit requesting restitution pursuant to this Order, whichever date is earlier.

(4) That the student agrees that in consideration of his receipt of a pro rata share of cash restitution as provided for in this Order such student releases respondents from any and all further claims such student might have, whether known or unknown, with respect to or arising out of his agreement with or course of study at Weaver Airline Personnel School, Inc.

(b) Students seeking restitution must submit proper affidavits within six (6) months after receiving proper notice as to their right to such restitution.

(c) Respondent Weaver Airline Personnel School, Inc. shall then make pro rata payments, in amounts to each student no greater than that student's total tuition payment, to each student seeking and qualifying for restitution under the terms of this Order. *Provided, however,* That the total sum to be paid in restitution under Paragraph 12 of this Order shall not be greater than the principal amount of the Escrow Funds as of the final date by which such students are required to submit requests for restitution under this Paragraph. Said payments shall be made no later than thirty (30) days after the final date established for submission of student requests for restitution under this Paragraph.

(d) Sums collected after the final date established for submission of student requests for restitution under this Paragraph, and any interest earned on the Escrow Funds, shall be the property of respondent Weaver Airline Personnel School, Inc.

Provided, however, That nothing in this Order shall be deemed as abrogating any defense any student may have with respect to any claim by respondents for all or part of any unpaid tuition fees allegedly due or owing from any student enrolled in any course(s) of instruction offered by respondent Weaver Airline Personnel School, Inc.

Provided, however, That in the event respondents negotiate or otherwise transfer to any third party, during the period ending with the last date by which students may seek restitution under this Paragraph of this Order, any of the accounts receivable representing tuition payments allegedly due and owing from enrollees in any course(s) of instruction offered by respondent Weaver Airline Personnel School, Inc., its successors or assigns, said transfer or negotiation shall be accompanied by an explicit written agreement that the transferee or purchaser of said account receivable shall be subject to the terms and conditions of Paragraph 12 of this Order.

13. *It is further ordered,* That the obligation of respondent Weaver Airline Personnel School, Inc. to make restitution as set forth in this Order shall be and hereby is guaranteed by respondent General Educational Services Corporation.

14. *It is further ordered,* That the respondents herein shall, within sixty (60) days after service upon them of this Order, file with the Commission a report in writing setting forth in detail the manner and form in which they have complied with the Order.

The Decision and Order was issued by the Commission, February 13, 1975.

VIRGINIA M. HARDING,
Acting Secretary.

Title 29—Labor

CHAPTER V—WAGE AND HOUR DIVISION, DEPARTMENT OF LABOR

PART 694—MINIMUM WAGE RATES IN INDUSTRIES IN THE VIRGIN ISLANDS

Wage Order

Pursuant to sections 5, 6, and 8 of the Fair Labor Standards Act of 1938 (52 Stat. 1062, 1064) as amended (29 U.S.C. 205, 206, 208), including the Fair Labor Standards Amendments of 1974 (Pub. L. 93–259; 84 Stat. 35), and Reorganization Plan No. 6 of 1950 (3 CFR 1949–53 Comp., p. 1004), and by means of Administrative Order No. 636 (40 FR 5830), the Secretary of Labor appointed and convened Industry Committee No. 16 for Various Industries in the Virgin Islands, referred to the Committee the question of the minimum rate or rates of wages to be paid under sections 6(a), (b) and (c) of the Act to such employees, and gave notice of a hearing to be held by the Committee.

Subsequent to an investigation and a hearing conducted pursuant to the notice, the Committee has filed with the Administrator of the Wage and Hour Division of the Department of Labor a report containing its findings of fact and recommendations with respect to the matters referred to it.

Accordingly, as authorized and required by section 8 of the Fair Labor Standards Act of 1938, Reorganization Plan No. 6 of 1950, and 29 CFR 511.18, the recommendations of Industry Committee No. 16 are hereby published revising § 694.1 of Title 29, Code of Federal Regulations. The increase in future wage rates prescribed by sections 6 (a), (b), (c) (2) (B) and (c) (5) of the 1974 Fair Labor Standards Amendments are set forth in this wage order.

As revised § 694.1 reads as follows:

§ 694.1 Wage rates.

Every employer shall pay to each of his employees in the Virgin Islands, who in any workweek is engaged in commerce or in the production of goods for commerce or is employed in any enterprise engaged in commerce or in the production of goods for commerce or is employed in domestic service, as these terms are defined in section 3 of the Fair Labor Standards Act of 1938, wages at a rate not less than the minimum rate or rates of wages prescribed in this section for the classification in which such employee is engaged. However, the provisions of this wage order shall not apply with respect to the minimum wage rate of any employee employed in the Virgin Islands by the United States or by the government of the Virgin Islands, by an establishment which is a hotel, motel, or restaurant, or by any retail or service establishment which employed such employee primarily in connection with the preparation or offering of food and beverages for human consumption, either on the premises, or by such services as catering, banquet, box lunch, or curb or counter service, to the public, to employees, or to members or guest of members of clubs. The minimum wage rate of such an employee shall be determined under the Fair Labor Standards Act of 1938 in the same manner as the minimum wage rate for employees employed in the 50 States is determined.

(a) *Pre-1966 coverage classifications.* The classifications for pre-1966 coverage apply to all activities of employees in the Virgin Islands which were within the purview of section 6 of the Fair Labor Standards Act of 1938 prior to the effective date of the Fair Labor Standards Amendments of 1966.

(1) *Watch assembly classification.* (i) The minimum wage rate for this classification is $1.75 an hour. Unless otherwise provided, the wage rates in this section are increased by $.15 an hour on May 1, 1975, and on May 1 of each subsequent year until the mainland rate is reached pursuant to section 6(c) (2) of the Act.

(ii) This classification is defined as the assembly of watches and watch movements.

(2) *Milk processing classification.* (i) The minimum wage rate for this classification is $1.75 an hour. Unless otherwise provided, the wage rates in this section are increased by $.15 an hour on May 1, 1975, and on May 1 of each subsequent year until the mainland rate is reached pursuant to section 6(c) (2) of the Act.

(ii) This classification is defined as the processing or recombining of fluid milk and cream for wholesale or retail distribution.

(3) *Retailing, wholesaling and warehousing classification.* (i) The minimum wage rate for this classification is $1.75 an hour. Unless otherwise provided, the wage rates in this section are increased by $.15 an hour on May 1, 1975, and on May 1 of each subsequent year until the mainland rate is reached pursuant to section 6(c) (2) of the Act.

(ii) This classification is defined as all activities in connection with the selling of goods or services at retail, including the operation of retail stores and other retail establishments, the wholesaling and warehousing, and other distribution of commodities: *Provided, however,* That this classification shall not include retailing and or wholesaling activities included within other wage order classifications in the Virgin Islands: *Provided, further,* That this classification shall not include food service activities in retail establishments.

(4) *Construction classification.* (i) The minimum wage rate for this classification is $1.85 an hour. Unless otherwise provided, the wage rates in this section are increased by $.15 an hour on May 1, 1975, and on May 1 of each subsequent year until the mainland rate is reached pursuant to section 6(c) (2) of the Act.

(ii) This classification is defined as all construction, reconstruction, structural renovation and demolition, on public or private account, of buildings, housing, highways or streets, catchments, dams and any other structures.

(5) *Shipping and seamen classification.* (i) The minimum wage rate for this classification is $1.85 an hour. Unless otherwise provided, the wage rates in this section are increased by $.15 an hour on May 1, 1975, and on May 1 of each subsequent year until the mainland rate is reached pursuant to section 6(c) (2) of the Act.

(ii) This classification is defined as the transportation of passengers and cargo by water and all activities in connection therewith, including storage and lighterage operations, and the activities of seamen on United States vessels.

(6) *Miscellaneous manufacturing activities classification.* (i) The minimum wage rate for this classification is $1.85 an hour. Unless otherwise provided, the wage rates in this section are increased by $.15 an hour on May 1, 1975, and on May 1 of each subsequent year until the mainland rate is reached pursuant to section 6(c) (2) of the Act.

(ii) This classification is defined as all manufacturing activities in the Virgin Islands covered by the Fair Labor Standards Act prior to the Fair Labor Standards Amendments of 1966, with the exception of the assembly of watches and watch movements, milk processing, the manufacture of petroleum products, pharmaceuticals and toiletries, textiles and textile products, alcoholic beverages, and the processing of bauxite to extract alumina and the further processing related to the production of aluminum.

(7) *Other products and activities classification.* (i) The minimum wage rate for this classification is $2.10 an hour for the period ending December 31, 1975. Since the mainland rate has been attained, the rate specified in section 6(a) (1) now applies, namely $2.30 an hour after December 31, 1975.

(ii) This classification is defined as the manufacture of petroleum products, pharmaceuticals and toiletries, textiles and textile products, alcoholic beverages, and the processing of bauxite to extract alumina and the further processing related to the production of aluminum and all other non-manufacturing activities of employees in the Virgin Islands covered by the Fair Labor Standards Act other than those activities included in any other pre-1966 coverage classifications.

(b) *1966 coverage classifications.* The classification for 1966 coverage include

V 40168 APR 8 75

only those activities of employees in the Virgin Islands which were brought within the purview of section 6 of the Fair Labor Standards Act of 1938 by the Fair Labor Standards Amendments of 1966 or by section 906 of the Education Amendments of 1972.

(1) *Agriculture classification.* (i) The minimum wage rate for this classification is $1.42 an hour. Unless otherwise provided, the wage rates in this section are increased by $.15 an hour on May 1, 1975, and on May 1 of each subsequent year until the mainland rate is reached pursuant to section 6(c)(2) of the Act.

(ii) This classification is defined as farming in all its branches, including the cultivation and tillage of the soil, dairying, the production, cultivation, growing and harvesting of any agricultural or horticultural commodities, the raising of livestock, bees, fur-bearing animals, or poultry, and any practices (including any forestry or lumbering operations) performed by a farmer or on a farm as an incident to or in conjunction with such farming operations, including the preparation for market, delivery to storage or to market or to the carriers for transportation to market; processing, handling, packing, storing, compressing, pasteurizing, drying, preparing in their raw or natural state, or canning of agricultural or horticultural commodities for market, or making cheese or butter or other dairy products; the operation of a country elevator, including such an establishment which sells products and services used in the operation of a farm; the ginning of cotton for market; and the transportation and preparation for transportation of fruits and vegetables, whether or not performed by a farmer, from the farm to a place of first processing or first marketing.

(2) *Retailing, wholesaling and warehousing classification.* (i) the minimum wage rate for this classification is $1.75 an hour. Unless otherwise provided, the wage rates in this section are increased by $.15 an hour on May 1, 1975, and on May 1 of each subsequent year until the mainland rate is reached pursuant to section 6(c)(2) of the Act.

(ii) This classification is defined as all activities in connection with the selling of goods or services at retail, including the operation of retail stores and other retail establishments, the wholesaling and warehousing and other distribution of commodities: *Provided, however*, That this classification shall not include retailing and or wholesaling activities included within other wage order classifications in the Virgin Islands: *Provided, further*, That this classification shall not include food service activities in retail establishments.

(3) *Construction classification.* (i) The minimum wage rate for this classification is $1.75 an hour. Unless otherwise provided, the wage rates in this section are increased by $.15 an hour on May 1, 1975, and on May 1 of each subsequent year until the mainland rate is reached pursuant to section 6(c)(2) of the Act.

(ii) This classification is defined as all construction, reconstruction, structural renovation and demolition, on public or private account, of buildings, housing, highways or streets, catchments, dams and any other structures.

(4) *Laundry and cleaning classification.* (i) The minimum wage rate for this classification is $1.75 an hour. Unless otherwise provided, the wage rates in this section are increased by $.15 an hour on May 1, 1975, and on May 1 of each subsequent year until the mainland rate is reached pursuant to section 6(c)(2) of the Act.

(ii) This classification is defined as the laundering, dry cleaning, and incidental work such as repair of clothing and fabrics on which such work is done and the work done in family and commercial power laundries, linen supply and industrial laundries, diaper services, self-service laundries, hand laundries, cleaning and dyeing plants and rug cleaning and repairing plants.

(5) *Manufacturing activities classification.* (i) The minimum wage rate for this classification is $1.75 an hour. Unless otherwise provided, the wage rates in this section are increased by $.15 an hour on May 1, 1975, and on May 1 of each subsequent year until the mainland rate is reached pursuant to section 6(c)(2) of the Act.

(ii) This classification is defined as all manufacturing activities in the Virgin Islands covered by the Fair Labor Standards Act solely by reason of the Fair Labor Standards Amendments of 1966.

(6) *Other activities classification.* (i) The minimum wage rate for this classification is $2.00 an hour for the period ending December 31, 1975. Since the mainland rate has been attained, the rates specified in section 6(b) now apply, namely $2.20 during the year beginning January 1, 1976 and $2.30 an hour after December 31, 1976.

(ii) This classification is defined as all activities of employees in the Virgin Islands, including the activities of those pre-school employees which were brought within the purview of section 6 of the Fair Labor Standards Act by Section 906 of the Education Amendments of 1972, other than those activities included in any other 1966 coverage classification.

(c) *1974 coverage classifications.* The classifications for 1974 coverage include only those activities of employees in the Virgin Islands which were brought within the purview of section 6 of the Fair Labor Standards Act of 1938 by the Fair Labor Standards Amendments of 1974.

(1) *Domestic service classification.* (i) The minimum wage rate for this classification is $1.20 an hour. Unless otherwise provided, the wage rates in this section are increased by $.12 an hour on May 1, 1975 and May 1, 1976 and by $.15 an hour on May 1 of each subsequent year until the mainland rate is reached pursuant to section 6(c)(2) of the Act.

(ii) This classification is defined as service of a household nature performed by an employee in or about the private home of the person by whom he or she is employed. A private home is a fixed place of abode of an individual or family. A separate and distinct dwelling maintained by an individual or a family in an apartment house or hotel may constitute a private home. However, a dwelling primarily used as a boarding or lodging house for the purpose of supplying such services to the public as a business enterprise is not a private home. Domestic service in and about a private home includes, but is not limited to, services performed by persons employed as cooks, butlers, valets, maids, housekeepers, governesses, janitors, laundresses, caretakers, handymen, gardeners, footmen, grooms and chauffeurs.

(2) *Motion picture theater classification.* (i) The minimum wage rate for this classification is $1.80 an hour. Unless otherwise provided, the wage rates in this section are increased by $.15 an hour on May 1, 1975, and on May 1 of each subsequent year until the mainland rate is reached pursuant to section 6(c)(2) of the Act.

(ii) This classification is defined as the activities of employees of motion picture theaters.

(3) *Retail and service employees classification.* (i) The minimum wage rate for this classification is $1.75 an hour. Unless otherwise provided, the wage rates in this section are increased by $.15 an hour on May 1, 1975, and on May 1 of each subsequent year until the mainland rate is reached pursuant to section 6(c)(2) of the Act.

(ii) This classification is defined as the activities of employees employed in retail and service establishments that are parts of covered enterprises and that have an annual volume of sales that is less than $250,000, but not less than $225,000 after January 1, 1975, and is not less than $200,000 after January 1, 1976, and in any amount after January 1, 1977. (Retail and service establishments with $250,000 or more in an annual sales volume are covered under the pre-1974 provisions of the Fair Labor Standards Act of 1938).

(Secs. 5, 6, 7, 8, 52 Stat. 1062, 1064; (29 U.S.C. 205, 206, 207, 208.))

Effective date. This revision shall become effective April 23, 1975.

Signed at Washington, D.C., this 2nd day of April, 1975.

WARREN D. LANDIS,
Acting Administrator, Wage and Hour Division, U.S. Department of Labor.

[FR Doc.75-9241 Filed 4-7-75;8:45 am]

CHAPTER XVII—OCCUPATIONAL SAFETY AND HEALTH ADMINISTRATION, DEPARTMENT OF LABOR

PART 1913—DISCLOSURE OF INFORMATION

Revocation

The Freedom of Information Act (FOIA), 5 U.S.C. 552, was amended by

Pub. L. 93-502, 88 Stat. 1561, effective February 19, 1975, to clarify and liberalize the requirements for, and to expedite, the disclosure of information. The amended FOIA necessitated a revision of 29 CFR Part 70, which contains the regulations of the Secretary of Labor providing for access to public information (40 FR 7266).

Part 1913 of Title 29 of the Code of Federal Regulations had been promulgated as a supplement to the general disclosure regulations of the Secretary of Labor published in Part 70 of Title 29. The policy and procedures of the Occupational Safety and Health Administration (OSHA) and the Bureau of Labor Statistics (BLS) contained in Part 1913 concerning the availability of records within their possession were similar to those enunciated in Part 70 with a few exceptions. For example, Part 1913 provided for greater disclosure of records contained in files compiled for investigatory purposes than had been provided for in 29 CFR Part 70. However, as a result of the recent revision of Part 70 to bring it into conformity with the amendments made by Pub. L. 93-502, the disclosure policies in Part 1913 and Part 70 are essentially the same. Revised Part 70 makes Part 1913 largely duplicative and not supplemental and the differences in wording of the two sections may lead to confusion. It is thought that one source of interpretive regulations, 29 CFR Part 70, rather than two, would best serve the interests of the agencies involved and the general public. One set of regulations will also promote efficiency and uniformity in disclosures made to the public and thus better carry out the purposes of the FOIA. Specific information concerning OSHA and BLS disclosure officers and related matters are contained in Subpart C of Part 70, and in directives to OSHA staff which will be made available to the public.

Part 1913 [Revoked]

Accordingly, Part 1913 of Title 29 of the Code of Federal Regulations is hereby revoked.

As this revocation concerns only interpretative rules, general statements of policy and rules of agency procedures and practice, neither notice of proposed rulemaking, opportunity for public participation therein, nor delayed effective date is required by 5 U.S.C. 553.

This revocation is made pursuant to authority in 5 U.S.C. 301, 5 U.S.C. 552 and 29 CFR 70.71, and is effective April 8, 1975.

Signed at Washington, D.C. this 27th day of March 1975.

JOHN STENDER,
Assistant Secretary of Labor.

Signed at Washington, D.C. this 31st day of March 1975.

JULIUS SHISKIN,
Commissioner, Bureau of Labor Statistics.

[FR Doc.75-9083 Filed 4-7-75;8:45 am]

Title 36—Parks, Forests, and Public Property

CHAPTER VI—AMERICAN REVOLUTION BICENTENNIAL ADMINISTRATION

PART 603—FREEDOM OF INFORMATION FEES

Schedule of Fees

On February 3, 1975, a notice of proposed rulemaking was published in the FEDERAL REGISTER (40 FR 23) stating that the American Revolution Bicentennial Administration (ARBA) was considering publishing in Title 36, Chapter VI of the Code of Federal Regulations regulations concerning the schedule of fees and methods of payment for services rendered under the Freedom of Information Act, as amended (5 USC 552).

Interested persons were afforded an opportunity to participate in the rulemaking through the submission of comments. The only comment received was from The Department of the Treasury, suggesting that § 603.105(e) which read "Remittances shall be made payable to the Treasurer of the United States" be revised to read "Remittances shall be made payable to the Treasury of the United States." The suggestion has been accepted by ARBA.

Effective Date: April 8, 1975.

JOHN W. WARNER,
Administrator.

APRIL 3, 1975.

Section 603.105 is added to read as follows:

§ 603.105 Schedule of fees and method of payment for services rendered.

(a) Fee schedule for the search and reproduction of information available under the Freedom of Information Act (5 U.S.C. 552), as amended.

(1) Search for records—$5.00 per hour when the search is conducted by a clerical employee. $8.00 per hour when the search is conducted by a professional employee. No charge for searches of less than one hour.

(2) Duplication of records—Records will be duplicated at a rate of $0.25 per page for all copying of four pages or more. There is no charge for duplicating three or less pages.

(3) Other—When no specific fee has been established for a service, or the request for a service does not fall under one of the above categories due to the amount or type thereof, the Deputy Administrator is authorized to establish an appropriate fee based on "direct costs" as provided in the Freedom of Information Act and in accordance with Office of Management and Budget Circular No. A-25. Examples of services covered by this provision include searches involving computer time or special travel, transportation, or communications costs.

(b) If records requested under this part are stored elsewhere than the headquarters of the ARBA at Washington, D.C., the special costs of returning such records to the headquarters for review will be added to the search costs. Search costs are due and payable even if the record which was requested cannot be located after all reasonable efforts have been made, or if the ARBA determines that a record which has been requested, but which is exempt from disclosure under this part, is to be withheld.

(c) Where it is anticipated that the fees chargeable under this section will amount to more than $25., and the requester has not indicated in advance his willingness to pay fees as high as are anticipated, the requester shall be promptly notified of the amount of the anticipated fee or such portion thereof as can readily be estimated. In instances where the estimated fees will greatly exceed $25., an advance deposit may be required. The notice or request for an advance deposit shall extend an offer to the requester to consult with knowledgeable ARBA personnel in an attempt to reformulate the request in a manner which will reduce the fees and meet the needs of the requester. Dispatch of such a notice or request shall suspend the running of the period for response by the ARBA until a reply is received from the requester.

(d) Fees must be paid in full prior to issuance of requested copies. In the event the requester is in arrears for previous requests for which the ARBA was unable to find or provide the requested information (see b. above), copies of records will not be provided for any subsequent request until the arrears have been paid in full.

(e) Remittances shall be in the form either of a personal check or bank draft drawn on a bank in the United States, or a postal money order. Remittances shall be made payable to the order of the Treasury of the United States and mailed to the Deputy Administrator, American Revolution Bicentennial Administration, 2401 E Street, NW., Washington, D.C. 20276.

(f) A receipt for fees paid will be given only upon request. Refund of fees paid for services actually rendered will not be made.

(g) The Deputy Administrator, or an officer designated by the Deputy Administrator may in accordance with the Freedom of Information Act, as amended, waive all or part of any fee provided for in this section when the Deputy Administrator or the designated officer deems it to be in either the ARBA's interest or in the general public's interest.

[FR Doc.75-9090 Filed 4-7-75;8:45 am]

PART 604—APPLICATION PROCEDURES FOR OFFICIAL RECOGNITION OF BICENTENNIAL PROJECTS

The American Revolution Bicentennial Board has established policies and procedures with respect to projects which may be accorded official recognition by the American Revolution Bicentennial Administration (ARBA). These regulations and procedures will be effective on

V 40168 APR 8 75 XUM

publication, since the Administrator of the ARBA has determined, and hereby publishes, that the public interest would best be served thereby.

Although these regulations and procedures are to be effective upon publication, written comments are invited from interested parties and will be accepted on or before May 8, 1975. All comments received will be available for public inspection at the ARBA, 2401 E Street NW., Room 7240, Washington, D.C. 20276, during regular business hours. All materials will be considered and where appropriate amendments made to these regulations and procedures as the ARB Board may determine.

Part 604 is hereby added as follows:

Sec.
604.100 Congressional intent.
604.101 Statutory responsibility of ARBA.
604.102 ARBA functions.
604.103 Procedures for applying for official recognition.
604.104 Use of the official bicentennial symbol.
604.105 Letters of encouragement.
604.106 Withdrawal of official recognition.
604.107 Classes of projects to which official recognition shall not be accorded.
604.108 Exceptions to non-eligible projects.

AUTHORITY: Sec. 4(b)(2), Pub. L. 93–179, 87 Stat. 700.

§ 604.100 Congressional intent.

In enacting Pub. L. 93–179 which established the American Revolution Bicentennial Administration, the Congress expressed its intentions as follows:

That as this Nation approaches the Bicentennial of its birth and the historic events preceding and associated with the American Revolution which are of such major significance in the development of our national heritage of individual liberty, representative government, and the attainment of equal and inalienable rights and which also had so profound an influence throughout the world, it is appropriate and desirable to provide for the observance and commemoration of this anniversary and for those activities of local, State, national, and international significance to be coordinated, scheduled, and facilitated by a government unit, drawing on the resources of public, private, civic, and other organizations for planning and implementation to insure that the appropriate observances take place.

§ 604.101 Statutory responsibility of ARBA.

The "governmental unit" referred to above is the American Revolution Bicentennial Administration (ARBA) which was given the statutory responsibility "to coordinate, to facilitate, and to aid in the scheduling of events, activities, and projects of local, State, national, and international significance sponsored by both governmental and nongovernmental entities in commemoration of the American Revolution Bicentennial."

§ 604.102 ARBA functions.

(a) A primary function of the ARBA is to prepare a master calendar of events of local, State, national, and international significance which will take place between March 1975 and December 31, 1976.

(b) The Act further provides that the ARBA Administrator shall—

provide recognition as deemed appropriate in connection with Bicentennial programs and projects.

Accordingly, the ARBA has initiated a program of according "Official Recognition" to Bicentennial projects of national significance which further the purposes and objectives of Public Law 93–179.[1]

§ 604.103 Procedures for applying for official recognition.

(a) To apply for ARBA "Official Recognition," sponsors of programs must complete the "Application for Official Recognition" and submit it together with all required accompanying materials, in duplicate, to:

ARBA
2401 E Street NW.
Washington, D.C. 20276

(b) Applications should contain a comprehensive description of the project, a narrative statement indicating how the project meets the criteria established by the ARB Board (See Section II of the Application Form), and as much supporting information as possible regarding the project. Approval of the appropriate State Bicentennial organization is required if the project is conducted within a single State.

(c) The Program Review and Evaluation staff of the ARBA shall evaluate requests for "Official Recognition" and prepare recommendations for action by the ARBA Administrator.

(d) Projects accorded "Official Recognition" as part of the National Bicentennial Program receive an ARBA *Certificate of Official Recognition* and a flag with the official Bicentennial symbol.

§ 604.104 Use of the official bicentennial symbol.

(a) Use of the official Bicentennial symbol in connection with State and designated Bicentennial Community officially recognized projects is authorized as provided in the ARBA Official Graphics Standards Manual with the legend "Recognized by Florida Bicentennial Commission" or "Recognized by Chicago Bicentennial Commission" respectively.

(1) Sponsors of recognized projects are authorized to use the official Bicentennial symbol in connection with the project with the legend "Recognized by the American Revolution Bicentennial Administration."

(b) All use of the symbol must conform with the Official Graphics Standards Manual (available to authorized users) and no commercial use of the symbol is authorized.

(c) Officially recognized projects will be included in the ARBA Master Calendar of Bicentennial projects and events.

§ 604.105 Letters of encouragement.

(a) Where in the judgment of the Administrator a project has not developed to the point where a determination can be made regarding official recognition, the Administrator may issue an "ARBA Letter of Encouragement" to the project which indicates tentative ARBA support to the project.

(b) It is the practice of ARBA to issue a "Letter of Encouragement" when a project demonstrates outstanding merit but has not reached that stage of development or obtained that level of support which would provide reasonable assurance of implementation; this letter, however, does not authorize use of the official Bicentennial symbol.

§ 604.106 Withdrawal of official recognition.

The ARBA reserves the right to withdraw authorization of "Official Recognition" when, in the judgment of the Administrator, the officially recognized program or project no longer meets the criteria for recognition.

§ 604.107 Classes of projects to which official recognition shall not be accorded.

Official recognition shall not be accorded to the following class of programs and projects.

(1) Publications
(2) Commissionings
(3) Battle reenactments
(4) Contests
(5) Petitions
(6) Public solicitations of funds
(7) Awards (if primary purpose)
(8) Individual works of arts
(9) Educational courses or other curricula programs
(10) Commercial products (contact ARBA for Licensing Procedures) [2]

§ 604.108 Exceptions to non-eligible projects.

In individual cases and in his sole discretion, the Administrator may waive any exceptions herein when he determines that official recognition of a program or project whose primary purpose is one or more of the above is in the public interest and in furtherance of the purposes of P.L. 93–179.

For further information or application forms, please contact Mrs. Margie Baker, ARBA, 2401 E Street NW., Washington, D.C. 20276, 202/634–1771.

JOHN W. WARNER,
Administrator.

APRIL 3, 1975.

[FR Doc.75–9091 Filed 4–7–75;8:45 am]

[1] Bicentennial organizations of each State, the District of Columbia, the Commonwealth of Puerto Rico, and the Territories also accord official State recognition to Bicentennial projects at the State level; and ARBA designated Bicentennial Communities accord official community recognition to Bicentennial projects at the community level.

A "Designated Bicentennial Community" is one which has established a Bicentennial Committee representative of the Community; developed a commemorative program embracing one or more of the themes of Heritage '76, Festival USA, or Horizons '76, one of which is of lasting value to the Community; and has submitted its program through its State Commission to the ARBA for official designation.

[2] ARBA has initiated a commemorative symbol licensing program under which appropriate commercial products of a commemorative or educational nature may be granted a non-exclusive license for use of the official symbol with the words "Officially Recognized Commemorative of the American Revolution Bicentennial Administration."

Title 40—Protection of Environment

[FRL 331–3]

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

SUBCHAPTER C—AIR PROGRAMS

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Iowa: Approval of Plan Revisions

On July 11, 1974 (39 FR 25502), the Agency gave notice that the state of Iowa proposed to revise its implementation plan by making a number of amendments to the State Rules and Regulations Relating to Air Pollution Control. These amendments were subjected to public hearings on April 25, 1973, and on September 12, 1973, in the Memorial Union, Iowa State University, Ames, Iowa, in compliance with the provisions of 40 CFR 51.4, and were formally adopted by the state on December 11, 1973. The significant changes are discussed below:

The basis for evaluation of a new or modified direct source will be its impact on the attainment and maintenance of the National Ambient Air Quality Standards instead of its effect on life and property.

The regulations have been revised to provide for public availability of emission data and to require the maintenance of emission records by the source.

The subsection entitled "Emission Reduction Program," has been amended to clarify the increments of progress necessary for an approvable emission reduction program. The five increments of progress now required are the same as those specified at 40 CFR 51.1(q).

A chapter has been added to specify the requirements necessary to obtain qualification in visual determination of the opacity of emissions. These requirements are as stringent as those specified by EPA in Method 9, 40 CFR Part 60, Appendix A.

The New Source Performance Standards published December 23, 1971 (40 CFR Part 60), have been included as part of the state rules and regulations.

The emission standards for nitrogen oxides from the use of fuels and manufacture of nitric acid have been deleted. This change is consistent with the reclassification of certain Air Quality Control Regions (AQCR) in the state of Iowa due to modifications in the methods for ambient air monitoring of nitrogen dioxide. On May 8, 1974 (39 FR 16344), EPA reclassified the Omaha-Council Bluffs Interstate AQCR to Priority III for nitrogen dioxide. Therefore, the entire state is classified as Priority III for nitrogen dioxide.

The emission standard for sulfur dioxide from sulfuric acid plants has been changed from 6.5 pounds per ton of 100 percent acid produced to 30 pounds per ton 100 percent acid produced. The original standard was based on air monitoring data measured in East Peoria, Illinois. Atmospheric dispersion modeling conducted by the Iowa Department of Environmental Quality (DEQ) has indicated the less stringent sulfur dioxide emission standard will not prevent the maintenance of ambient air quality standards for sulfur dioxide in any AQCR in Iowa.

The interim emission standard effective January 1, 1974, for sulfur dioxide emitted by fuel-burning sources has been deleted. The sulfur dioxide emission standard effective January 1, 1975, for fuel-burning sources remains in effect. Provisions for submission of compliance schedules for sources equal to or greater than 250 million BTU per hour heat input have been included pursuant to Part 51 of this chapter.

The DEQ in implementing the EPA Clean Fuels Policy has determined that the sulfur dioxide emission standard may be relaxed even more. The DEQ has proposed another amendment to the sulfur dioxide emission standard for fuel-burning sources and held a public hearing on this amendment on September 11, 1974. Therefore, the Administrator is hereby delaying action on the current amendment to the sulfur dioxide emission standard for fuel-burning sources.

No comments were received in response to the notice of July 11, 1974, which solicited public comment on the proposed revisions. Therefore, after careful review of all the changes contained in the proposed revisions, the Administrator has determined that the revisions meet the requirements of section 110(a)(2)(A)–(H) of the Clean Air Act and 40 CFR Part 51. Accordingly, with the exception of the proposed sulfur dioxide regulations for fuel-burning sources, these SIP revisions are hereby approved and made a part of the SIP. This action is effective May 8, 1975. (42 U.S.C. 1857c–5)

Dated: April 1, 1975.

JOHN QUARLES,
Acting Administrator.

Part 52 of Chapter I, Title 40 of the Code of Federal Regulations, Subpart Q—Iowa is amended as follows:

1. Section 52.820 is amended by revising paragraph (c) to read as follows:

§ 52.820 Identification of plan.

* * * * *

(c) Supplemental information was submitted on:

(1) February 2 and March 2, 1972, by the Iowa Department of Health, and

(2) May 4, 1972, and

(3) April 24, 1974, by the Iowa Department of Environmental Quality. (No approval or disapproval action is being taken on Rule 4.3(3)a. dealing with sulfur oxides emissions from the use of fuels.)

§ 52.825 [Amended]

§ 52.823 [Revoked]

2. Section 52.823 is revoked.

3. Section 52.825 is amended by revoking paragraph (a).

§ 52.826 [Revoked]

4. Section 52.826 is revoked.

[FR Doc.75–9077 Filed 4–7–75;8:45 am]

[FRL 331–4]

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Kansas: Approval of Plan Revisions

On July 11, 1974 (39 FR 25503), the Agency gave notice that the state of Kansas proposed to revise its implementation plan by amending the State Air Pollution Emission Control Regulations. These amendments have been subjected to a public hearing on September 6, 1973, in Topeka, Kansas, in compliance with the provisions of 40 CFR 51.4 and became effective January 1, 1974. The changes are discussed below.

The regulations have been amended to provide for regulatory control of small-sized incinerators (i.e., less than 200 pound per hour capacity), which were previously exempted.

The provision in the compliance schedule regulations that a source can request permission to operate in non-conformance with an applicable emission standard has been deleted. Sources which are in violation of an applicable emission standard and cannot come into compliance within the appropriate time period must request a variance.

All open-burning operations other than those specifically exempted by Regulation 28–19–47 titled "Exemptions—Open-Burning" must cease operation immediately. A section has been added to Regulation 28–19–47 to authorize certain types of open-burning operations associated with land clearing and crop and game management practices.

It was incorrectly noted in the notice of proposed rulemaking dated July 11, 1974, that revisions to the new source review, sulfur dioxide emissions from sulfuric acid plants, and nitrogen oxide emissions from nitric acid plants regulations were being added or deleted. These revisions were included in a previous plan revision which was approved November 8, 1973 (38 FR 30876).

No comments were received in response to the notice of July 11, 1974, which solicited public comment on the proposed revisions. Therefore, after careful review of all the changes contained in the proposed revision, the Administrator has determined that the revision meets the requirements of section 110(a)(2)(A)–(H) of the Clean Air Act and 40 CFR Part 51. Accordingly, this SIP revision is hereby approved and made a part of

V 40168 APR 8 75 XUM

the SIP. This action is effective May 8, 1975.

(42 U.S.C. 1857c-5)

Dated: April 1, 1975.

JOHN QUARLES,
Acting Administrator.

Part 52 of Chapter I, Title 40 of the Code of Federal Regulations, Subpart R—Kansas, § 52.870, paragraph (d) is revised to read as follows:

§ 52.870 Identification of plan.

* * * * *

(d) Plan revisions were submitted on April 17, 1974, and February 17, 1974.

[FR Doc.75-9076 Filed 4-7-75;8:45 am]

SUBCHAPTER E—PESTICIDE PROGRAMS

PART 180—TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

Benomyl

Correction

In FR Doc. 75-7896 on page 13499 in the issue of Thursday, March 27, 1975, the last word in the second line in the second paragraph should be "received" instead of "reviewed".

Title 41—Public Contracts and Property Management

CHAPTER 1—FEDERAL PROCUREMENT REGULATIONS

[FPR Amdt. 143]

PART 1-3—PROCUREMENT BY NEGOTIATION

Cost Accounting Standards

This amendment of the Federal Procurement Regulations amends § 1-3.1210 (mainly in paragraph (c)) pertaining to information to be included in the annual report to the Cost Accounting Standards Board (CASB), beginning with the report to be made for calendar year 1975. Generally the changes will provide the CASB with a report containing more historical and factual data about contractors' noncompliances with disclosed cost accounting practices and Cost Accounting Standards.

Subpart 1-3.12—Cost Accounting Standards

Section 1-3.1210 is amended to read as follows:

§ 1-3.1210 Cost Accounting Standards Board report.

* * * * *

(b) Each civilian executive agency shall implement this regulation to ensure that (1) its cognizant contracting officers (if any) collect and report to a designated office for consolidation all of the information required by paragraph (c) of this § 1-3.1210 and (2) its cognizant contract auditors (if any) and its purchasing activities also provide information to the designated office with respect to subparagraph (c)(8) of this § 1-3.1210. If an agency has neither cognizant contracting officers nor cognizant contract auditors, its annual consolidated report to CASB would generally be limited to information from its purchasing activities with respect to subparagraph (c)(8) of this § 1-3.1210.

(c) Information to be included in the report to CASB:

(1) * * *

(2) *Noncompliance with disclosed practices and standards.*

Number of noncompliance determinations issued during the year:

Preaward	_____
Performance	_____
Total	_____

Noncompliances reported will include only those cases where the prime or subcontractor has been formally notified by the contracting officer. Each formal determination of noncompliance will be counted only once irrespective of the number of disclosed practices or Standards involved. If a formal determination of noncompliance involves one or more contracts or proposals, the determination shall be reported only once. A determination which involves both proposals and performance on existing contracts or disclosed practices and performance on existing contracts shall be reported as a performance determination only.

(3) *Number of disclosed practices and Cost Accounting Standards involved in the noncompliance determinations issued during the year.*

Disclosed practices	Preaward	Performance
Item No.		
Item No. (continue as required)		
Total number of disclosed practices involved		
Less: Number also involving standards		
Total number involving disclosed practices only		
Cost accounting standards:		
4 CFR 401		
4 CFR 402		
4 CFR 403		
4 CFR 404		
4 CFR 405		
4 CFR 406		
4 CFR 407		
4 CFR 408		
(Other standards when issued)		
Total number of cost accounting standards involved		

This part of the report will give a numeric count of the disclosed practices and Cost Accounting Standards by Disclosure Statement item number and Standard, respectively, involved in the noncompliance determinations issued during the year. Each Disclosure Statement item number and each Standard for each issue cited in the noncompliance determination will be identified and counted. The following two exampes illustrate how the noncompliance determination should be counted.

EXAMPLE 1—A contracting officer receives an audit report on a proposal indicating a noncompliance with Standard 402 and Item 3.2.3. of the contractor's Disclosure Statement. The contracting officer makes a determination of noncompliance. The contracting officer should record a noncompliance with Item 3.2.3. of disclosed practices under the preaward column. He should also include the noncompliance in the Totals under "Less: Number Also Involving Standards." In addition, he should record a noncompliance with Standard 402 in the preaward column.

EXAMPLE 2—A contracting officer receives an audit report on a contract containing the CAS clause indicating two instances of noncompliance with Standard 401 in the accounting practices of the contractor with regard to travel expenses and freight expenses. The contracting officer makes a determination of noncompliance on both issues. The contracting officer should record the noncompliances by indicating "2" in the count of the noncompliances with Standard 401.

(4) *Disposition on noncompliance determinations during the year.*

	Preaward	Performance
Total noncompliance determinations issued during the year		
Plus: Total noncompliance determinations open—beginning of year		
Minus: Total noncompliance determinations closed during the year:		
Through resolution		
Through nonacceptance of proposal		
Equals: Total noncompliance determinations open—end of year		

This part of the report will account for the disposition of noncompliance determinations. Noncompliance determinations which did not result in the award of a CAS covered contract will be reported as closed during the year through nonacceptance of the proposal. Noncompliance determinations involving more than one Disclosure Statement item or Standard will be reported as closed only when all such issues have been resolved.

(5) *Increased costs recovered through noncompliance determinations closed during the year.*

Type	Number	Increased costs recovered
Preaward		
Performance		
Total		

This part of the report is to show the increased costs recovered through the resolution of noncompliance determinations for the year. The total number shown above should agree with the total noncompliance determinations closed during the year through resolution as reported in this § 1-3.1210(c)(4). For proposal noncompliance, increased costs recovered means the difference between an original proposal and a revised one submited to correct the noncompliance. It shall also include any amounts recovered as indicated in the record of price negotiation prepared by the contracting officer pursuant to § 1-3.811.

(6) *Substance of determinations of noncompliance with CASB Standards.*

This part of the report will consist of a summary of the noncompliances with CASB Standards cited in the contracting officer's determinations. Determinations which cite substantially the same manner of noncompliance will be reported only once. Each entry should state the substance of the noncompliance being reported and should be grouped with other noncompliances relating to the same Standard; e.g.,

4 CFR 401

(i) (State substance of first noncompliance)

(ii) (Continue for each additional noncompliance)

Only those noncompliances cited by contracting officers in determinations which have been furnished to contractors in writing shall be included in the report. Contract administration activities will furnish the data required by § 1-3.1210 (c) (2) through (c) (6) for this report.

(7) *Equitable adjustments.* This part of the report is to show for each Federal agency the number and value of equitable adjustments completed during the reporting period covering new standards which resulted in cost increases and the number and value of equitable adjustments which resulted in cost decreases. A separate report shall be prepared for each standard. In addition, when the equitable adjustments involve more than one standard, an additional consolidated report shall be prepared citing the standards involved. The final result of each negotiated agreement shall be shown as a net increase or net decrease for each agency affected.

STANDARD (*cite standard or standards involved*)

Federal agency	Cost increase		Cost decrease	
	Number of negotiated agreements	Total dollars	Number of negotiated agreements	Total dollars
DOD				
NASA				
ERDA				
GSA				
(Etc.)				

The following two examples indicate how the reports from cognizant contracting officers relating to equitable adjustments shall be consolidated by the cognizant agency and reported to CASB pursuant to paragraph (b) of this § 1-3.1210:

EXAMPLE 1. One cognizant contracting officer reports a negotiated agreement with a contractor to recognize Standard 4 CFR 403. Numerous contracts of DOD and NASA are involved. Some NASA contracts are increased, others are decreased for a net decrease to NASA of $100,000. In the case of DOD there is a net increase of $85,000. A second cognizant contracting officer reports a negotiated agreement involving 4 CFR 403 in which there is a net increase to NASA of $90,000 and a net decrease to DOD of $90,000. In a third negotiated agreement a cognizant contracting officer reports a decrease to NASA of $10,000 and an increase to DOD of $10,000. No other negotiated agreements involving only 4 CFR 403 are reported.

Using the above format, Standard 4 CFR 403 would be cited. For DOD, under the head "Cost increase," the figure "2" and the dollar figure "$95,000" ($85,000 plus $10,000) would be inserted. Under "Cost decrease" the figure "1" and the dollar figure "$90,000" would be inserted. For NASA the figure "1" and "$90,000" would be shown under "Cost increase" and under "Cost decrease" the figure "2" and "$110,000" would be shown.

EXAMPLE 2. One cognizant contracting officer reports a negotiated agreement involving Standards 4 CFR 403 and 4 CFR 404. There is a net increase to DOD of $25,000, a decrease to NASA of $15,000, and a decrease to ERDA of $5,000. A second cognizant contracting officer reports a negotiated agreement involving 4 CFR 404 and 4 CFR 405. There is a net decrease to DOD of $20,000 and a decrease to NASA of $10,000. A third cognizant contracting officer reports a negotiated agreement involving 4 CFR 403 and 4 CFR 405. There is a net decrease to DOD of $10,000 and an increase to ERDA of $15,000.

Using the above format, Standards 4 CFR 403, 404, and 405 would be cited. For DOD the figure under "Cost increase" would be "1" and "$25,000," respectively. The figures under "Cost decrease" would be "2" and "$30,000." For NASA the figure "0" would be inserted for both the numbers and dollars under "Cost increase." The "Cost decrease" figures would be "2" and "$25,000." For ERDA under "Cost increase" the figures would be "1" and "$15,000." The figures under "Cost decrease" would be "1" and "$5,000."

(8) *Comments on CASB promulgations.* (i) Comment on the effect of the Disclosure Statement requirement and standards issued with respect to:

(A) Contractors' proposals;
(B) Cost estimation;
(C) Contract negotiation;
(D) Contract administration;
(E) Audit of contract proposals; and
(F) Audits of incurred costs.

Comments shall deal with the effect of CASB publications both individually and in total. For example, there may be improvements noted in contractors' proposals, or there may be information required that is not useful or necessary. Comments of any other type may be furnished. Cognizant contracting officers and purchasing activities shall provide comments for items (A) through (D). Cognizant contract auditors shall provide comments for items (E) and (F).

(ii) Suggestions and recommendations for revising CASB standards, rules, or regulations to:

(A) Improve their effectiveness;
(B) Facilitate the conduct of negotiations;
(C) Facilitate the effectiveness of the procurement function; and
(D) Facilitate the effectiveness of the audit function.

All information required under this § 1-3.1210(c)(8) involves personal opinion and judgment. However, to the extent possible each comment or recommendation should be substantiated through use of examples and actual data to support the logic of the suggestions and recommendations. Cognizant contracting officers and purchasing activities shall provide comments for items (A) through (D).

(9) *Docket numbers of dispute cases involving Cost Accounting Standards Board promulgations.*

Board of contract Appeals (BCA) Docket Nos. of all open cases	New cases	Old cases	Taken to Court of Claims

In the first column list the docket numbers of all appeals cases that are before the BCA. For those cases that were assigned docket numbers in the period covered by the report, place an (X) in the column under New cases. Mark with an (X) under Old cases other cases carried over from previous periods. When a contractor has taken an appeal to the Court of Claims, an "X" will be placed in that column.

(Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c))

Effective date. This amendment is effective June 1, 1975, but may be observed earlier.

Dated: March 31, 1975.

ARTHUR F. SAMPSON,
Administrator of General Services.

[FR Doc.75-9100 Filed 4-7-75;8:45 am]

Title 47—Telecommunication

CHAPTER I—FEDERAL COMMUNICATIONS COMMISSION

[FCC 75-339]

PART 15—RADIO FREQUENCY DEVICES

Comparable Television Tuning Rules; Waiver

In the matter of waiver of § 15.68(d)(3) comparable television tuning rules.

1. On March 11, 1975, the Commission granted a waiver of the comparable tuning rules to Quasar Electronics Corp. The waiver permits the use of 70-position UHF detent tuners accurate to ±3 MHz after July 1, 1975. Section 15.68(d)(3) of the rules imposes an accuracy standard of ±2 MHz on receivers manufactured on or after July 1, 1975.

2. The waiver is based on the current economic decline and, in particular, on the severe decline in television receiver sales. Tuner orders are placed well in advance of their delivery and use in receivers. Orders are based on sales projections at the time of order, and the number of receivers being produced is far below those projections. Consequently, there are substantial numbers of ±3 MHz tuners which cannot be used in receivers manufactured prior to July 1, 1975. In the circumstances, we concluded that a waiver was warranted to prevent severe economic hardship.

3. We have reason to believe that the remainder of the television receiver industry finds itself in the same situation as Quasar. We are therefore extending the waiver granted to Quasar to all other firms in the industry.

4. The ±2 MHz requirement will remain in effect. However, any firm which has over-ordered ±3 MHz UHF detent tuners, which has tuners in inventory or

V 40168
APR 8 75
XUM

on order which cannot be used in receivers manufactured prior to July 1, 1975, and which cannot cancel outstanding orders without cancellation charges, may use those tuners in receivers produced after July 1, 1975. These tuners shall be used before those meeting the ±2 MHz standard and may be used until the supply is exhausted. New orders for ±3 MHz tuners shall not be placed.

5. If applications for certification of receivers involving use of ±3 MHz tuners are filed with the Commission, they should include a reference to this Order and a statement concerning its applicability.

6. Firms which take advantage of this waiver shall notify the Commission's Chief Engineer concerning the number of receiver models and the number of units of each model which are affected and the date the ±3 MHz tuners to be used were ordered.

7. The provisions of § 15.63(d)(3) are hereby waived.

8. It is so ordered.

Adopted: March 25, 1975.

Released: March 31, 1975.

FEDERAL COMMUNICATIONS COMMISSION,[2]
[SEAL] VINCENT J. MULLINS,
Secretary.

[FR Doc.75-9129 Filed 4-7-75;8:45 am]

[Docket No. 20190 RM-2303; FCC 75-355; 30790]

PART 73—RADIO BROADCAST SERVICES

FM Broadcast Stations, Fuquay-Varina, North Carolina

1. On September 13, 1974, in response to a petition filed by Wake County Broadcasting Co., Inc. (Wake), the Commission adopted a notice of proposed rule making (39 FR 34071) in the above-entitled matter which proposed to assign FM Channel 280A to Fuquay-Varina, North Carolina. A brief supporting comment was filed by petitioner. No oppositions were received.

2. Fuquay-Varina, North Carolina with 3,576 residents[1] is located in the southeastern section of Wake County (pop. 228,453) in the eastern part of North Carolina. The only AM station assigned to the community is WAKS, a daytime-only service, licensed to Wake. At the present time there is no FM channel assigned to Fuquay-Varina.

3. In the notice we set forth economic and other information about Fuquay-Varina, not repeated here, which appears to support the assignment of the proposed channel to that community. Not only would such an assignment bring a first local aural nighttime transmission service to Fuquay-Varina, but it would also provide the potential for a nighttime outlet for local expression for a cluster of nearby smaller towns with a population of more than 8,000 persons. Petitioner has indicated that it will immediately prepare and file an application for use of the channel and that, if granted, it will construct and operate a station. In view of the foregoing, we find it in the public interest to assign Channel 280A to Fuquay-Varina.[2]

4. Authority for the action taken herein is contained in sections 4(i), 303 and 307(b) of the Communications Act of 1934, as amended.

5. Accordingly, *it is ordered*, That effective May 9, 1975, the FM Table of Assignments, § 73.202(b) of the Commission's rules is amended, insofar as the city listed below is concerned, to read as follows:

City:	*Channel No.*
Fuquay-Varina, N.C.	280A

6. *It is further ordered*, That this proceeding is terminated.

(Secs. 4, 303, 307, 48 Stat., as amended, 1066, 1082, 1083; 47 U.S.C. 154, 303, 307)

Adopted: March 25, 1975.

Released: April 1, 1975.

FEDERAL COMMUNICATIONS COMMISSION,[3]
[SEAL] VINCENT J. MULLINS,
Secretary.

[FR Doc.75-9118 Filed 4-7-75;8:45 am]

[Docket No. 19999, RM-2142; FCC 75-367]

PART 73—RADIO BROADCAST SERVICES

FM Broadcast Stations, Hollidaysburg, Altoona, Philipsburg and Bellwood, Pennsylvania

1. The Commission here considers its notice of proposed rule making in Docket No. 19999, adopted April 3, 1974 (39 FR 13557), which alternatively proposed to assign Channel 285A to either Hollidaysburg or Altoona, Pennsylvania.

2. The notice in this proceeding was issued in response to a petition from Cove Broadcasting Co., Inc. (Cove), licensee of daytime-only Station WKMC, Roaring Spring, Pennsylvania, proposing that the Commission assign Channel 285A to Hollidaysburg (pop. 6,262).[1] Hollidaysburg has no local aural service. It is located approximately five miles south of Altoona, Pennsylvania (pop. 62,900) which has three full-time AM stations (WFBG, WVAM and WRTA), and two FM stations (WFBG–FM and WVAM–FM). Noting the proximity of these two cities and that under our population guidelines Altoona qualifies for a third FM assignment, the notice proposed alternative assignments of Channel 285A to either Hollidaysburg or Altoona. If this channel is assigned to Altoona, it may be licensed at Hollidaysburg in accordance with § 73.203(b) of our rules. If it is assigned to Hollidaysburg it cannot be licensed to Altoona.

3. In comments, Altoona Trans-Audio Corporation (ATAC), licensee of Class IV AM Station WRTA, Altoona, expresses its support of the proposed Altoona assignment and its intent to apply for authority to construct an FM station in Altoona if that assignment is made. ATAC attempts to demonstrate that the needs and activities of the two cities are intertwined with Altoona being the dominant city. In addition it contends "that while Hollidaysburg itself generates little in the way of significant news, * * * the news that does emanate from Hollidaysburg is carried by Altoona stations * * *." Cove argues that Hollidaysburg is in need of its own assignment and that Altoona stations do not adequately serve its needs. In support of this contention Cove submits a letter written by Claire Haller, Secretary of Save our Schools Association. Haller pointing out that in 1967 the Pennsylvania Department of Highways (PennDot) announced that Route 22 would be relocated and would cut through Hollidaysburg, states:

> An aroused citizenry organized * * * but received little publicity from the Altoona news media. Petitions were circulated and over 3,500 protests were recorded and forwarded to the Federal Bureau of Public Roads * * * Despite the fact that all local governing agencies within the Hollidaysburg area * * * are on record in opposition to the Rt. 22 relocation plan, the radio, television and press media in Blair County [in which both cities are located] have presented, consistently, the Altoona Chamber of Commerce and PennDot opinions concerning the "economic" necessity of new highways, maintaining that a few must suffer that the "majority" might prosper * * * Hollidaysburg needs, and deserves, its own radio station. Its citizens have learned a bitter lesson from the recent, and continuing highway controversy (which is now in the United States Federal District Court, Pittsburgh, for adjudication) that a self-sufficient community requires the recognition which can only be accorded by an audio medium capable of presenting local news with objectivity, an objectivity that has not been forthcoming from the Altoona news media.

4. In view of the foregoing, it is the Commission's opinion that the better assignment would be to Altoona. This will afford the Commission the opportunity, in the context of a section 307(b) adjudicatory hearing,[2] to consider evidence and hear testimony regarding whether Altoona stations serve Hollidaysburg's needs and other matters.[3] Cove seeks to avoid a comparative hearing arguing that this would involve unnecessary expense and delay. However, there is no assurance (and there can be none) that a Channel 285A assignment to Hollidaysburg would not bring in other applicants and thereby involve the same expense and delay as an Altoona assignment. Thus, we shall adopt the more flexible Altoona proposal. The Canadian Government has consented to an assignment of Channnel 285A to either Altoona or Hollidaysburg, Pennsylvania.

5. In comments, John R. Powley, licensee of FM Station WHGM, Bellwood, Pennsylvania, supports the Hollidaysburg proposal and also requests that the FM Table of Assignments be amended to list his channel of operation, Channel 280A, as assigned to Altoona. Channel 280A is currently assigned to Philipsburg, Pennsylvania. Under a predecessor section of § 73.203(b) of the rules that allowed applications from unlisted communities within 25 miles (currently 10 miles) of cities with listed and unoccupied assignments, Powley applied for licensing of Channel 280A at Bellwood. This application was granted. On December 3, 1968, Powley requested a waiver of § 73.287 (currently § 73.1201) of the rules to permit on-the-air station identification as "Bellwood-Altoona". This request was accompanied by a required showing that Altoona was within WHGM's principal city service contour (3.16 mV/m). The waiver was granted on the understanding that WHGM's primary obligation to the community to which it is assigned (i.e., Bellwood) will remain unchanged. We believe that WHGM should remain a Bellwood station and we shall therefore deny the Powley counterproposal. We shall, however, amend the FM Table of Assignments to reflect Channel 280A's location at Bellwood if Canadian concurrence is obtained. This amendment would not alter or modify our prior waiver of § 73.287 of the rules.

6. Accordingly, pursuant to the authority contained in sections 4(i), 303(g) and (r) and 307(b) of the Communications Act of 1934, as amended, *it is ordered*, that effective May 9, 1975, the FM Table of Assignments, § 73.202(b) of the rules, is amended to read as follows for the city listed below:

City:	*Channel No.*
Altoona, Pa.	251, 261A, 285A.

7. At such time as a Canadian response is received to the proposed reassignment of Channel 280A from Philipsburg to Bellwood we shall issue an appropriate order in this docket.

(Secs. 4, 303, 307, 48 Stat., as amended, 1066, 1082, 1083; 47 U.S.C. 154, 303, 307)

Adopted: March 26, 1975.

Released: April 1, 1975.

FEDERAL COMMUNICATIONS COMMISSION,[4]
[SEAL] VINCENT J. MULLINS,
Secretary.

[FR Doc.75-9120 Filed 4-7-75;8:45 am]

[FCC 75-351]

PART 1—PRACTICE AND PROCEDURE
PART 73—RADIO BROADCAST SERVICES

Re-regulation of Radio and Television Broadcasting

1. As a result of its continuing study concerning the re-regulation of radio and television, the Commission has under consideration the matter of amending certain provisions in Parts 1 and 73 of its rules and regulations. These amendments will up-date certain rules, delete parts of others which are no longer applicable, and eliminate various requirements which are no longer necessary.

2. The following rule changes are made for the reasons indicated:

(a) The rules regarding auxiliary and alternative main transmitters contain an apparent inconsistency. Licensees can install and operate a new transmitter without authority of the FCC, having only to notify the Commission and the Engineer in Charge of the radio district in which the station is located within 3 days after installation, but if the licensee retains his old transmitter, using it as an auxiliary or alternate main transmitter, and thereby backstopping his new transmitter, he must file an application for it on Form 302 showing a need for an auxiliary or alternate main transmitter. The licensee must also attach a filing fee with his application. This filing seems superfluous and burdensome. It becomes a penalty to a licensee who is trying to safeguard his continuous service to the public by retaining this additional transmitter and adding to his service reliability. It adds to the administrative load of the FCC staff. Accordingly, where these circumstances prevail the AM, FM, noncommercial educational FM and TV rules are changed to delete the requirement to file a formal application and make a showing. Supplanting this present procedure will be notification to the FCC and EIC within three days after the former main transmitter is properly coupled to the main antenna system and is ready for use as an auxiliary or alternate main transmitter.

(b) Effective October 1973, the Commission deleted in its entirety the provisions of Subpart H, Part 74 of the rules (Docket 19756). This subpart dealt with Television Broadcast Booster stations, a service unused since it was established in May, 1960. References to application for authority to construct or make changes or apply for license for this type station still exist in Part 1 of the rules. They are found in § 1.533(a)(7) "FCC Form 343 Application for Authority to Construct or Make Changes in a Television Broadcast Booster Station"; and in § 1.536(b)(6)—"FCC Form 344 Application for Television Broadcast Booster Station License." Correcting deletions are made in this Order.

(c) In the Report and Order in Docket 18930, adopted June 1, 1972, concerning operator requirements for AM and FM broadcast stations, the rules were amended to specify that contracts for part-time service of a first class operator were to be filed with the Engineer in Charge of the radio district rather than with the Commission.

In the re-regulation order adopted by the Commission on December 20, 1972, the requirement to forward a copy of such signed agreement to the Engineer-in-Charge of the radio district in which the station is located, was deleted. The licensee is required to keep "signed contracts . . . in the files of the station and such contracts shall be made available for inspection upon request by an authorized representative of the Commission."

In view of these deletions from Part 73 (§§ 73.93(c); 73.265(c); and 73.565(c)) a conforming change will be made in § 1.613(c)(2)—Filing of Contracts. In this sub-paragraph the rules state certain contracts "need not be filed", including "contracts with chief engineers or other engineering personnel except those contracts required to be filed under the provisions of §§ 73.93(c), 73.265(c), and 73.565(c) of this Chapter". In conforming the rule, exceptions "under the provisions of §§ 73.93(c), 73.265(c) and 73.565(c) of this Chapter" will be deleted.

Requirements that contracts with chief operators and other engineering personnel be kept at the station and made available for inspection by Commission personnel will be re-located in sub-paragraph (d) of § 1.613. Also, the term chief engineer will be changed to chief operator to be consistent with this designation in other rule parts.

(d) § 73.112(a)(4)(i) requires "an entry of the time that each required station identification announcement is made (call letters and licensed location; see § 73.117)". The reference to "see § 73.117" is no longer correct since the Station Identification Rules for the AM, FM and TV services, have been moved to Subpart H of Part 73. Change is made in § 73.112(a)(4)(i) deleting "see § 73.117", and stating "see § 73.1201". The FM and TV rules correctly state the § 73.1201 reference.

(e) In the remote control operation rule for TV (§ 73.676), there are three NOTES which may now be deleted since the effective dates stipulated in the NOTES have passed. The NOTES are found following these paragraphs:

§ 73.676(f)(5), (g) and (h).

(f) In the event the antenna (phase) monitor of an AM station becomes defective, the station may be operated without the monitor, pending its repair or replacement, for a period of time up to 60 days without further authority from the Commission.

The rule is silent regarding what action the licensee must take if the monitor is out of service for more than 60 days.

The rule (§ 73.69) is amended and clarified to correct this lack of direction to licensees. In so doing, it will conform to other of our rules pertaining to extensions of authority to operate without certain defective instruments.

4. We conclude that, for the reasons set forth above, adoption of these amendments will serve the public interest. Prior notice of rulemaking, effective date provisions, and public procedure thereon are unnecessary, pursuant to the Administrative Procedure and Judicial Review Act provisions of 5 U.S.C. (b)(3)(B), inasmuch as these amendments impose no additional burdens and raise no issue

---

[1] Commissioner Hooks absent.

[2] Population figures are from the 1970 U.S. Census.

[1] As mentioned in the notice, the transmitter site for use of the channel must be located 7 miles southwest of the community.

[2] Commissioner Hooks absent.

[3] All population figures are from the 1970 U.S. Census.

[1] Assuming, of course, that both of the present parties, or others, apply for licensing on this channel.

[2] See Melbourne and Satellite Beach, Florida, 47 F.C.C. 2d 717 (1974); Castalia and Sandusky, Ohio, 40 F.C.C. 2d 977 (1973).

upon which comments would serve any useful purpose.

5. Therefore, it is *ordered*, That pursuant to sections 4(i) and 303(j) of the Communications Act of 1934, as amended, Parts 1 and 73 of the Commission's rules and regulations as amended as set forth below, effective May 9, 1975.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Adopted: March 25, 1975.

Released: April 3, 1975.

FEDERAL COMMUNICATIONS COMMISSION,[1]

[SEAL] VINCENT J. MULLINS, *Secretary.*

PART 1—[AMENDED]

§ 1.533 [Amended]

1. In § 1.533, paragraph (a)(7) is deleted and paragraphs (a)(8), (9) and (10) are redesignated paragraphs (a)(7), (8) and (9).

§ 1.536 [Amended]

2. In § 1.536, paragraph (b)(6) is deleted and paragraphs (b)(7), (8) and (9) are redesignated paragraphs (b)(6), (7) and (8).

3. In § 1.613, paragraphs (c)(2) and (d) are amended to read as follows:

§ 1.613 Filing of contracts.

* * * * * * *

(c) * * *

(2) The following contracts, agreements, or understandings need not be filed: Agreements with persons regularly employed as general or station managers or salesmen; contracts with program managers or program personnel; contracts with attorneys, accountants or consulting radio engineers; contracts with performers; contracts with station representatives; contracts with labor unions; or any similar agreements.

(d) The following contracts, agreements, or understandings need not be filed, but shall be kept at the station and made available for inspection upon request: contracts relating to the sale of broadcast time to "time brokers" for resale; subchannel leasing agreements for Subsidiary Communications Authorization operation; time sales contracts with the same sponsor for 4 or more hours per day, except where the length of the events such as athletic contests, musical programs, and special events) broadcast pursuant to the contract is not under control of the station; and contracts with chief operators and other engineering personnel.

PART 73—[AMENDED]

4. § 73.63 is revised to read as follows:

§ 73.63 Auxiliary transmitter.

(a) Upon approval of an application therefor (Form 301), an auxiliary transmitter may be licensed for use either at the same location as the main transmitter or at another location, subject to the following conditions:

(1) A licensed operator shall be in control whenever an auxiliary transmitter is placed in operation.

(2) The auxiliary transmitter shall be maintained so that it may be placed in operation at any time for any one of the following purposes:

(i) The transmission of the regular programs upon the failure of the main transmitter.

(ii) The transmission of the regular programs during maintenance or modification work on the main transmitter necessitating discontinuance of its operation.

(iii) Emergency Broadcast System operation, provided the auxiliary transmitter is used in connection with an Emergency Broadcast System Authorization.

(iv) Upon request of a duly authorized representative of the Commission.

(v) An auxiliary transmitter may be used for the regular transmission of programs during periods of operation included in a Presunrise Service Authority (PSA).

(3) The auxiliary transmitter may be used only if it is in proper operating condition and adjusted to the licensed frequency. If testing is necessary to assure proper operation, it may be done any time. A dummy load or any authorized antenna may be used. Notations as to the time and results of such testing must be made in the maintenance log.

(4) The auxiliary transmitter shall be equipped with satisfactory control equipment which will enable the maintenance of the frequency emitted by the station within the limits prescribed by the regulations in this subpart.

(5) An auxiliary transmitter which is licensed at a geographical location different from that of the main transmitter shall be equipped with a frequency control which will automatically hold the frequency within the limits prescribed by the regulation in this part without any manual adjustment during operation or when it is being put into operation.

(6) The carrier frequency of the auxiliary transmitter shall be measured as often as is necessary to ensure that it is maintained within the prescribed tolerance. If the transmitter is used daily for a period of more than 40 days, the measurement shall be made at least once each calendar month with not more than 40 days expiring between successive measurements.

(7) The authorized antenna input power of an auxiliary transmitter may be less, but not more, than that of the regular transmitter. If it is less, the actual operating power is not limited to 105 percent of the authorized antenna input power of the auxiliary transmitter but shall in no event exceed the authorized antenna input power produced by the regular transmitter.

(8) All regulations as to safety requirements and spurious emissions applying to broadcast transmitting equipment shall apply also to an auxiliary transmitter.

(b) A licensee may, without further authority, utilize a replaced main transmitter as the auxiliary transmitter provided it remains installed at the same location as the main transmitter, and is coupled to the main antenna system and no changes in technical characteristics are involved. The Commission and the Engineer in Charge of the radio district in which the station is located must be notified within three days after it is ready for use as an auxiliary transmitter.

5. § 73.64 is revised to read as follows:

§ 73.64 Alternate main transmitters.

(a) Upon approval of an application therefor (Form 301), an alternate main transmitter may be licensed for use, subject to the following conditions:

(1) Both transmitters are located at the same place.

(2) The transmitters have the same power rating except at stations operating with different daytime and nighttime power, when it shall be permissible to employ transmitters of power ratings appropriate to either the licensed daytime or nighttime power.

(3) The external effects from both transmitters are substantially the same as to frequency stability, reliability of operation, radio harmonics and other spurious emissions, audio frequency range and audio harmonic generation in the transmitter.

(b) A licensee may, without further authority, utilize a replaced main transmitter as an alternate main transmitter upon compliance with the requirements of paragraphs (a)(1)(2)(3) of this section and provided the transmitter is coupled to the main antenna system and no changes in technical characteristics are involved. The Commission and the Engineer in Charge of the radio district in which the station is located must be notified within three days after it is ready for use as an alternate main transmitter.

6. In § 73.69 new paragraph (c) is added and present paragraphs (c)(1), (2), (3), (4) and (5) are changed to (d)(1), (2), (3), (4), and (5). New paragraph (c) reads as follows:

§ 73.69 Antenna (phase) monitors.

* * * * * * *

(c) If conditions beyond the control of the licensee prevent the restoration of the monitor to service within the allowed period, informal request in accordance with § 1.549 of the Commission's rules must be filed with the Engineer in Charge of the radio district in which the station is located for such additional time as may be required to complete repairs of the defective instrument.

* * * * * * *

7. In § 73.112, paragraph (a)(4)(i) is amended to read as follows:

§ 73.112 Program log.

(a) * * *

(4) *For other announcements.* (i) an entry of the time that each required station identification announcement is made (call letters and licensed location; see § 73.1201).

* * * * * * *

8. § 73.255 is revised to read as follows:

§ 73.255 Auxiliary transmitter.

(a) Upon approval of an application therefor (Form 301), an auxiliary transmitter may be licensed for use either at the same location as the main transmitter or at another location, subject to the following conditions:

(1) A licensed operator shall be in control whenever an auxiliary transmitter is placed in operation.

(2) The auxiliary transmitter shall be maintained so that it may be put into immediate operation at any time for the following purposes:

(i) The transmission of the regular programs upon the failure of the main transmitter.

(ii) The transmission of regular programs during maintenance or modification work on the main transmitter, necessitating discontinuance of its operation.

(iii) Emergency Broadcast System operation, provided the auxiliary transmitter is used in connection with an Emergency Broadcast System Authorization.

(iv) Upon request of a duly authorized representative of the Commission.

(3) The auxiliary transmitter may be used only if it is in proper operating condition and adjusted to the licensed frequency. If testing is necessary to assure proper operation, it may be done any time. A dummy load or any authorized antenna may be used. Notations as to the time and results of such testing must be made in the maintenance log.

(4) The auxiliary transmitter shall be equipped with satisfactory control equipment which will enable the maintenance of the frequency emitted by the station within the limits prescribed by the regulations in this subpart.

(5) The carrier frequency of the auxiliary transmitter shall be measured as often as is necessary to ensure that it is maintained within the prescribed tolerance. If the transmitter is used daily for a period of more than 40 days, the measurement shall be made at least once each calendar month with not more than 40 days expiring between successive measurements.

(6) The authorized operating power of an auxiliary transmitter may be less but not more than that of the regular transmitter. If it is less, the actual operating power is not limited to 105 percent of the authorized operating power of the auxiliary transmitter, but shall in no event exceed the authorized operating power of the regular transmitter.

(b) A licensee may, without further authority, utilize a replaced main transmitter as the auxiliary transmitter provided it remains installed at the same location as the main transmitter, and is coupled to the main antenna system and no changes in technical characteristics are involved. The Commission and the Engineer in Charge of the radio district in which the station is located must be notified within three days after it is ready for use as an auxiliary transmitter.

9. § 73.256 is revised to read as follows:

§ 73.256 Alternate main transmitters.

(a) Upon approval of an application therefor (Form 301), an alternate main transmitter may be licensed for use, subject to the following conditions:

(1) Both transmitters are located at the same place.

(2) Both transmitters have the same power rating.

(3) Both transmitters meet the construction, installation, operation, and performance requirements of § 73.317.

(b) A licensee may, without further authority, utilize a replaced main transmitter as an alternate main transmitter upon compliance with the requirements of paragraphs (a)(1)(2)(3) of this section and provided the transmitter is coupled to the main antenna system and no changes in technical characteristics are involved. The Commission and the Engineer in Charge of the radio district in which the station is located must be notified within three days after it is ready for use as an alternate main transmitter.

10. § 73.555 is revised to read as follows:

§ 73.555 Auxiliary transmitter.

(a) Upon approval of an application therefor (Form 301), an auxiliary transmitter may be licensed for use either at the same location as the main transmitter or at another location, subject to the following conditions:

(1) A licensed operator shall be in control whenever an auxiliary transmitter is placed in operation.

(2) The auxiliary transmitter shall be maintained so that it may be placed into immediate operation at any time for the following purposes:

(i) The transmission of the regular programs upon the failure of the main transmitter.

(ii) The transmission of regular programs during maintenance or modification work on the main transmitter, necessitating discontinuance of its operation.

(iii) Emergency Broadcast System operation, provided the auxiliary transmitter is used in connection with an Emergency Broadcast System Authorization.

(iv) Upon request of a duly authorized representative of the Commission.

(3) The auxiliary transmitter may be used only if it is in proper operating condition and adjusted to the licensed frequency. If testing is necessary to assure proper operation, it may be done any time. A dummy load or any authorized antenna may be used. Notations as to the time and results of such testing must be made in the maintenance log.

(4) The auxiliary transmitter shall be equipped with satisfactory control equipment which will enable the maintenance of the frequency emitted by the station within the limits prescribed by the regulations in this part.

(5) The carrier frequency of the auxiliary transmitter shall be measured as often as is necessary to ensure that it is maintained within the prescribed tolerance. If the transmitter is used daily for a period of more than 40 days, the measurement shall be made at least once each calendar month with not more than 40 days expiring between successive measurements.

(6) The authorized operating power of an auxiliary transmitter may be less, but not more, than that of the regular transmitter. If it is less, the actual operating power is not limited to 105 percent of the authorized operating power of the auxiliary transmitter, but shall in no event exceed the authorized operating power of the regular transmitter.

(b) A licensee may, without further authority, utilize a replaced main transmitter as the auxiliary transmitter provided it remains installed at the same location as the main transmitter, and is coupled to the main antenna system and no changes in technical characteristics are involved. The Commission and the Engineer in Charge of the radio district in which the station is located must be notified within three days after it is ready for use as an auxiliary transmitter.

11. § 73.556 is revised to read as follows:

§ 73.556 Alternate main transmitters.

(a) Upon approval of an application therefor (Form 301), an alternate main transmitter may be licensed for use, subject to the following conditions:

(1) Both transmitters are located at the same place.

(2) Both transmitters shall have the same power rating.

(3) Both transmitters shall meet the requirements of § 73.554.

(b) A licensee may, without further authority, utilize a replaced main transmitter as an alternate main transmitter upon compliance with the requirements of paragraphs (a)(1)(2)(3) of this section and provided the transmitter is coupled to the main antenna system and no changes in technical characteristics are involved. The Commission and the Engineer in Charge of the radio district in which the station is located must be notified within three days after it is ready for use as an alternate main transmitter.

12. § 73.637 is revised to read as follows:

§ 73.637 Alternate main transmitters.

(a) Upon approval of an application therefor (Form 301), an alternate main transmitter may be licensed for use, subject to the following conditions:

(1) Both transmitter shall be located at the same place.

(2) Both transmitter shall have the same power rating.

(3) Both transmitter shall meet the construction, installation, operation and performance requirements of this subpart.

(b) A licensee may, without further authority, utilize a replaced main transmitter as an alternate main transmitter

[1] Commissioner Hooks absent.

V 40168 APR 8 75 XUM

upon compliance with the requirements of paragraphs (a) (1) (2) (3) of this section and provided the transmitter is coupled to the main antenna system and no changes in technical characteristics are involved. The Commission and the Engineer in Charge of the radio district in which the station is located must be notified within three days after it is ready for use as an alternate main transmitter.

13. § 73.638 is revised to read as follows:

§ 73.638 Auxiliary transmitters.

(a) Upon approval of an application therefor (Form 301), an auxiliary transmitter may be licensed for use either at the same location as the main transmitter or at another location, subject to the following conditions:

(1) A licensed operator shall be in control whenever auxiliary transmitters are placed in operation.

(2) The auxiliary transmitters shall be maintained so that they may be put into immediate operation at any time for the following purposes:

(i) The transmission of the regular programs upon the failure of the main transmitters.

(ii) Transmission of regular programs during maintenance or modification work on the main transmitters, necessitating discontinuance of their operation.

NOTE: This includes the equipment changes which may be made without authority as set forth elsewhere in the rules and regulations or as authorized by the Commission by letter or by construction permit. Where such operation is required for periods in excess of 5 days, request therefor shall be in accordance with § 1.542 of the Commission's rules and regulations.

(iii) Emergency Broadcast System operation, provided the auxiliary transmitter is used in connection with an Emergency Broadcast System Authorization.

(iv) Upon request of a duly authorized representative of the Commission.

(3) The auxiliary transmitter may be used only if it is in proper operating condition and adjusted to the licensed frequency. If testing is necessary to assure proper operation, it may be done any time. A dummy load or any authorized antenna may be used. Notations as to the time and results of such testing must be made in the maintenance log.

(4) The auxiliary transmitters shall be equipped with satisfactory control equipment which will enable the maintenance of the frequency emitted by the station within the limits prescribed by the regulations in this subpart.

(5) The operating power of an auxiliary transmitter may be less than the authorized power of the main transmitters, but in no event shall it be greater than such power.

(b) A licensee may, without further authority, utilize a replaced main transmitter as the auxiliary transmitter provided it remains installed at the same location as the main transmitter, and is coupled to the main antenna system and no changes in technical characteristics are involved. The Commission and the Engineer in Charge of the radio district in which the station is located must be notified within three days after it is ready for use as an auxiliary transmitter.

[FR Doc. 75-9113 Filed 4-7-75; 8:45 am]

[Docket Nos. 20071, RM-2179; FCC 75-348]

PART 73—RADIO BROADCAST SERVICES

FM Broadcast Stations; Table of Assignments; Maine

In the matter of amendment of section 73.202(b), Table of Assignments, FM Broadcast Stations. (Portland, Maine).

1. The Comission has under consideration its Notice of Proposed Rule Making adopted June 4, 1974, 39 Fed. Reg. 20608, inviting comments on a proposal to assign Class B FM Channel 226 to Portland, Maine. This proceeding was instituted on the basis of a petition filed by Aurovideo, Inc. (petitioner), licensee of full-time AM Station WLOB, Portland, Maine. Supporting comments were filed by petitioner. No oppositions were filed.

2. Portland, a city of 65,116 population,[1] is the seat of Cumberland County (population 192,528) and the largest city in Maine. It has one daytime-only and three full-time AM stations and three Class B FM stations (Channels 250, 270 and 275). Channel 226 could be assigned to Portland in conformity with the Commission's minimum mileage separation rule.

3. In supporting comments petitioner states that the population of the 13 cities and towns that comprise greater Portland is 157,321 and the greater Portland Chamber of Commerce projects the population of greater Portland to increase to 170,687 by 1975 and 177,673 by 1980. Petitioner points out that during the last ten years more than forty industries have been established or expanded in the area. It adds that the industrial payroll generates $91,645,318 annually; the port generates $34,000,000 of annual incomes; wholesaling and distribution yield $569,000,000 of income and retailing another $469,477,000 annually. Petitioner states that Portland has a manager/council form of government; excellent medical facilities; a public school system consisting of 7 elementary, 4 junior high and 2 high schools; and 40 churches and synagogues. Petitioner adds that he will file an application for a construction permit for the use of the channel if it is assigned.

4. The proposed assignment would foreclose assignment only on Channel 226 in the immediate area of Portland. There would be no preclusion on any of the six pertinent adjacent channels. In our Notice we requested petitioner to submit information as to whether the proposed operation would provide any area and population with a first or second aural service and a first and second FM service. In an engineering statement submitted with its supporting comments petitioner stated that a study of the coverage from the existing Portland stations to the service area (1 mV/m) of an assumed operation on Channel 226 with a transmitter site in the area meeting all mileage separation requirements reveals that each of these stations would provide 1 mV/m service contour over all the 1 mV/m service contour of the proposed Channel 226 operation. Therefore, although the proposed operation would provide the fourth commercial FM service to the city of Portland, there would be no first or second service provided by the proposed station.

5. The Canadian Government has no objection to the assignment of Channel 226 to Portland, Maine.

6. We have given careful consideration to the proposal in this proceeding and believe that Channel 226 should be assigned to Portland, Maine. Since the preclusionary effect of the proposed assignment is limited to Channel 226 and the use of the channel is confined to a small area around Portland, this assignment would thus result in the efficient use of FM frequencies. Under our population criteria Portland has a population the size of which would warrant the assignment of a fourth FM channel.

7. In view of the foregoing and pursuant to authority contained in sections 4(i), 303 (g) and (r) and 307(b) of the Communications Act of 1934, as amended, *It is ordered*, that effective May 9, 1975, the FM Table of Assignments, § 73.202(b) of the rules is amended to read as follows for the city listed below:

City:	Channel No.
Portland, Maine	226, 250, 270, 275

8. *It is further ordered*, That this proceeding is terminated.

(Secs. 4, 303, 307, 48 Stat., as amended, 1066, 1082, 1083; 47 U.S.C. 154, 303, 307).

Adopted: March 25, 1975.

Released: April 1, 1975.

FEDERAL COMMUNICATIONS COMMISSION,[2]

[SEAL] VINCENT J. MULLINS, *Secretary.*

[FR Doc.75-9116 Filed 4-7-75; 8:45 am]

[Docket No. 20138; RM-2289; FCC 75-350]

PART 73—RADIO BROADCAST SERVICES

FM Broadcast Stations; Patterson and Turlock, California

In the matter of amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations (Turlock and Patterson, California).

1. On August 13, 1974, in response to a petition filed by Mr. John M. Hall, principal stockholder of the licensee of standard broadcast Station KCY at Turlock, California, the Commission adopted a notice of proposed rule making (39 FR 30167) in the above-entitled matter which proposed: (a) To assign FM Channel 252A to Turlock, California and (b), on our own motion, to reassign FM Channel 226 from Turlock to Patterson, California, where it is presently used, under the 15-mile rule, by Station KOSO. A brief comment was filed by petitioner supporting the assignment of FM Channel 252A to Turlock. No other comments or reply comments were received.

2. Turlock, California (population 13,992[1]) is located in Stanislaus County (population 194,506), approximately 38 miles southeast of Stockton, California. There is one AM service licensed in the community, KCEY, petitioner's station. Channel 226, the only FM channel presently assigned to Turlock, is used by Station KOSO at Patterson, as previously mentioned. Patterson (pop. 3,147) is also located in Stanislaus County. It has no local AM station. KOSO has operated there on Channel 226 since November 17, 1965.

3. We are of the view that Channel 226 should be assigned to Patterson and that Channel 252A should be assigned to Turlock as requested. The former assignment would reflect actual usage of the channel for nearly ten years at Patterson, and the latter would conform to our population criteria for channel assignments. Petitioner has furnished economic and other information about the community that buttresses the making of such an assignment. He has also indicated his intent to apply for use of Channel 252A if it is assigned to Turlock.

4. Authority for the action taken herein is contained in sections 4(i), 303 and 307(b) of the Communications Act of 1934, as amended.

5. It being in the public interest, *It is ordered*, That effective May 9, 1975, the FM Table of Assignments, § 73.202(b) of the Commission's rules, is amended, insofar as the cities listed below are concerned, to read as follows:

City:	Channel No.
Patterson, Calif.	226
Turlock, Calif.	252A.

6. *It is further ordered*, That this proceeding is terminated.

(Secs. 4, 303, 307, 48 Stat., as amended, 1066, 1082, 1083; 47 U.S.C. 154, 303, 307.)

Adopted: March 25, 1975.

Released: April 1, 1975.

FEDERAL COMMUNICATIONS COMMISSION,[2]

[Docket No. 20083; RM-2175; FCC 75-354]

PART 73—RADIO BROADCAST SERVICES

FM Broadcast Stations; Valdosta, Georgia; Perry, Florida

In the matter of amendment of § 73.202 (b), Table of Assignments, FM Broadcast Stations (Valdosta, Georgia and Perry, Florida).

1. The Commission has under consideration its notice of proposed rule making adopted June 13, 1974, 39 FR 22280, inviting comments on a proposal to assign Channel 240A to Valdosta, Georgia, and substitute Channel 288A for Channel 240A which is unoccupied at Perry, Florida. This proceeding was instituted on the basis of a petition filed by EV–CO Broadcasters, Inc. (EV–CO), licensee of Class IV standard broadcast Station WVLD at Valdosta. There were no oppositions to the proposal. Supporting comments were filed by the petitioner.

2. Valdosta has a population of 32,303,[1] is located 74 miles northeast of Tallahassee, Florida, and about 14 miles north of the Florida–Georgia border, and is the seat of Lowndes County (population 55,112). There are four standard broadcast stations licensed to Valdosta: WGOV, WVLD (licensed to petitioner), WGAF and WJEM. The only station limited to daytime-only broadcasting is WJEM. At present there are two commercial FM assignments to the community, Channels 225 and 266. The former is licensed to WGOV, Inc. as WGOV–FM, while the latter is licensed to Christian Radio Fellowship, Inc., as WAFT. There is also a noncommercial educational FM station there. The assignment of Channel 240A to Valdosta and the substitution of Channel 288A for Channel 240A at Perry, Florida, complies with the minimum mileage separation rule.

3. Petitioner states that Valdosta is the ninth largest city in Georgia and points out that Valdosta and Lowndes County respectively have had a 5.2 percent gain and a 12.2 percent gain in population between 1960 and 1970. It adds that this area consisting of eight Georgia and two Florida counties serves as a marketing and employment center. Petitioner states that, although the original economy of the Valdosta area was based primarily on agriculture and forest products, the community's economy today contains a substantial sector of manufacturing and that, since 1967, nineteen industries, employing 775 people and representing an annual payroll of $6,200,000, have located in Valdosta. Petitioner informs us that, to continue the rapid development of Valdosta, the Valdosta-Lowndes County Industrial Authority has thus far, at a cost of $590,000, constructed seven new industrial buildings for lease which are currently occupied and, in addition, industrial parks or zones are being developed (in the area surrounding Valdosta) on lines of three different railroads.

4. Petitioner contends that its station, WVLD, is a Class IV standard broadcast station operating on 1450 kHz with nondirectional power of 1,000 watts day and 250 watts at night; however, during nighttime hours, WVLD's signal is limited to the area within six miles of its transmitter site. It states that, in contrast to this limited service area, WVLD's competitors operate facilities on the AM band with 5,000 watts power full-time (WGAF), and 5 kW day—1 kW night (WGOV), and on the FM band with 100 kW (WGOV–FM) and 30 kW (WAFT–FM), while the daytime-only AM station, WJEM, provides service to a substantially larger area than that served by WVLD. Petitioner states that it will be better able to compete with an FM station operating with a maximum facility on Channel 240A if it is assigned to Valdosta; that such a facility would have a far superior coverage, from a technical point of view, to WVLD in nighttime hours; and that such a maximum facility Class A FM service would have substantially more coverage area than the average such facility because of the flat terrain in and around Valdosta. Petitioner reiterates its intention to file the appropriate application for a construction permit for the channel, and if authorized, to build the station promptly.

5. In our Notice we requested that comments be submitted on (1) the proposed assignment of a third FM facility to Valdosta for a community with population of under 50,000 which exceeds the presently established criteria; (2) intermixture of classes of channels and (3) preclusionary effect of assigning Channel 240A to Valdosta. In supporting comments petitioner states that under the Commission's criteria, a community the size of Valdosta (population under 50,000) is not normally assigned more than two channels, whereas this proposal would assign a third. It contends that the Commission has denied requests for a third channel to communities with populations of less than 50,000 persons, but notes that the cases therein involve a question of need for channels in other communities located within the precluded area. Cape Coral, Key West and Punta Gorda, 45 F.C.C. 2d 192, 29 R.R. 819 (1974). It adds that the instant proposal would preclude assignment of Channel 240A to Willacoochee (pop. 1,120); Pearson (1,700); Nicholls (1,150); and Lakeland (2,569) while assigning it to Valdosta (pop. 32,303) almost 14 times the size of the largest precluded town which is located a distance of only 18 miles northeast of Valdosta. In addition, petitioner states that there is little possibility of demand for an FM facility in these small communities which are economically and socially dependent on Valdosta and that the most efficient use of the FM frequency spectrum would be utilized by the instant proposal especially in view of the population and economic growth of Valdosta.

6. Petitioner states that the proposed assignment would result in intermixture of a Class A channel with two Class C channels but points out that an identical intermixture situation was proposed and accepted by the Commission in Key West, Florida, supra.

7. We note that the proposed channel would preclude future assignment of Channel 240A to the communities mentioned in paragraph 5 and it appears that there are no alternative channels available for assignment to these communities. However, the communities are quite

[1] Population figures are from the 1970 U.S. Census.

[2] Commissioner Hooks absent.

V 40168 APR 8 75 XUM

small and no interest in having a channel assigned to them has been shown. We also note that the proposed assignment would intermix a Class A channel with two Class C channels. However, we have on other occasions made such an assignment, and the petitioner is aware of the coverage limitation of a Class A assignment and appears willing to take the competitive risk of operating such a station. Since it has been shown that Valdosta is a rapidly growing area both economically and in size; that there is a demand in the community for the channel; and that there is another channel available for Perry, Florida, as a replacement channel, the public interest would be served by the assignment.

8. Authority for the adoption of the amendments contained herein appears in sections 4(i), 303, and 307(b) of the Communications Act of 1934, as amended.

9. In view of the foregoing, *it is ordered*, That effective May 9, 1975, § 73.202 (b) of the Commission's rules and regulations, the FM Table of Assignments is amended to read as follows:

City:	Channel No.
Valdosta, Ga	225, 240A, 266
Perry, Fla	288A

10. *It is further ordered*, That this proceeding is terminated.

(Secs. 4, 303, 307, 48 Stat., as amended, 1066, 1082, 1083; 47 U.S.C. 154, 303, 307.)

Adopted: March 25, 1975.

Released: April 1, 1975.

FEDERAL COMMUNICATIONS COMMISSION,[1]

[SEAL] VINCENT J. MULLINS, *Secretary.*

[FR Doc. 75-9119. Filed 4-7-75; 8:45 am]

[Docket Nos. 19961; RM-2155, 2377, 2378; FCC-362]

PART 73—RADIO BROADCAST SERVICES

FM Broadcast Stations; Table of Assignments; South Carolina

In the Matter of Amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations (St. George and Charleston, South Carolina).

1. The Commission here considers the notice of proposed rule making in Docket No. 19961, adopted March 22, 1974 (39 FR 11933), and counterproposals submitted by William G. Dudley III ("Dudley", RM-2377) and Trident Broadcasting Co. ("Trident", RM-2378.[1]

2. The notice proposed the assignment of Class C Channel 298 to St. George, South Carolina (pop. 1,806),[2] and the deletion of Channel 240A from there. Soundamerica Corp. (formerly WQIZ, Inc.), the proponent of this proposal, is the licensee of daytime-only Station WQIZ-AM and Class A Station WPWR(FM) licensed on Channel 240A, both in St. George. St. George is the seat of Dorchester County (pop. 32,276). Soundamerica's FM station is the only full-time station in the county.

3. Two counterproposals were received in response to the Notice, both proposing that Class C Channel 300 be assigned to Charleston, South Carolina (pop. 66,945). The counterproposals and the Soundamerica proposal are mutually exclusive because a 65 mile separation is required in order to make both assignments, and Charleston and St. George are only 48 miles apart. Charleston is the seat of Charleston County (pop. 247,650). It is served locally by four full-time AM (and one daytime-only) stations and three Class C FM stations. Trident, one of the proponents of the Charleston assignment, indicates that Charleston has a mayor and city council form of government. We are told that the Port of Charleston is enjoying a remarkable growth in the volume of tonnage recorded; that since World War II, the Port of Charleston has risen from 65th in the nation in value of foreign commerce to 14th in latest ranking and has enjoyed the greatest percentage increase in value of foreign trade in the nation. Additional political, social and economic information has been submitted by the proponents of the counterproposals to show that Charleston is a large and growing area in need of an additional Class C station.

4. Soundamerica and Trident each indicate that they intend to program their stations (if their proposals are granted and they receive construction permits) to serve their respective area's underserved Black population and ask that the Commission consider this intent in reaching its public interest determination. Soundamerica avers that 100% of the WQIZ, Inc. daytime staff is Black and that Orangeburg, South Carolina, the location of two Black colleges of major importance, will be one of the new cities served by its FM station operating with proposed facilities of 100 kW ERP with an antenna height of 300 feet AAT. Soundamerica states that its proposal would bring full-time Black oriented service to a substantial number of Blacks who are not now being adequately served by any full-time broadcast media. Trident indicates that approximately 30% of the population of the Charleston Standard Metropolitan Statistical Area is Black and that this population is presently served only by Station WPAL(AM), Charleston, a daytime-only station. It avers that this 30%, or approximately 110,000 Blacks, would be served by its proposed station, a full-time station programmed for the Black community.[3] However, we have consistently held that a rulemaking proceeding is an inappropriate proceeding for consideration of program format. Atlanta, Georgia, 49 F.C.C. 2d ——, Docket No. 19551, FCC 74-1379, adopted December 11, 1974, at paragraph 4. Therefore, we shall not consider the relative benefits of proposed program formats herein.

5. Soundamerica avers that its proposal would provide a first FM service to 3,351 people in a 40 square-mile area and a second FM service to 16,180 people in a 362 square-mile area. This service would be provided to two areas. One of these areas is located between 13 and 27 miles northeast of St. George and includes Holly Hill (pop. 1,178) and Eutawville (pop. 386), South Carolina. The other is located between 15 and 29 miles southwest of St. George and includes Lodge, South Carolina (pop. 168). Dudley avers that Station WDIX(FM) at Orangeburg, South Carolina, has applied for modification of its permit to allow an increase in its facilities and that it has received an FAA "No Hazard Determination" for erection of a tower which will provide 100 kW ERP operation with an antenna height of 550 feet AAT. A staff study indicates that the first FM service claimed for the St. George assignment would be reduced considerably by the proposed modification of the Orangeburg FM station facilities.[4] However, in that event, the reductions in the first service figures are added to the second service figures yielding a favorable increase in the second service population. In addition, Dudley claims that the unserved and underserved areas are mainly rural and are served by station signals with field strengths ranging between 150 uV/m and 1 mV/m. He relies on section 73.315 of the Commission's rules to indicate that such service is sufficient in rural areas. This is not the case. Section 73.315 states that:

"Inasmuch as service may be provided by signals of 1 mV/m or greater field strengths in metropolitan areas, and inasmuch as signals as low as 50 uV/m may provide service in rural areas, considerable latitude in the geographical location of the transmitter is permitted".

As can be seen, this section does not presume that all rural areas are served by a signal as low as 50 uV/m, only that they may be. Dudley has not supported his contention here by a showing that these services are interference free. Roanoke Rapids and Goldsboro, N.C., 9 F.C.C. 2d 672 (1967). In any event, it should be noted that FM assignments are based upon spacing requirements and not interference. In this respect we have consistently held that we will consider only service of 1 mV/m or greater as adequate. (See F.C.C. Rules and Regulations § 73.311.)

6. The strongest argument made by the proponents of the counter-proposal against the Soundamerica proposal is that St. George is not the type of community that is generally assigned a Class C channel and that Charleston is. Generally, high-power Class C assignments are assigned to large urban centers and low-power Class A channels are assigned to small communities. Revision of FM Broadcast Rules, 40 F.C.C. 747 (1963) at paragraph 25. However, this argument alone cannot stand against our priorities of providing a first and second FM service to as much of the population of the United States as possible. Even if the Orangeburg modification is made and if it removes the entire first service area, Soundamerica will still provide at least a second service to approximately 19,531 persons.

7. As set out in the notice, Soundamerica's preclusion study shows that assignment of Channel 298 to St. George would preclude future assignments on Channels 296A, 297, 298, 299 and 300. Twenty-one communities with populations greater than 2,500 persons are within this area. Soundamerica avers that 12 of these communities are located near larger communities with FM assignments, that 8 of the communities have FM assignments, and that Channel 252A can be assigned to Andrews, South Carolina (pop. 2,879) a community somewhat removed from large communities with assignments. It indicates that Channel 240A, if deleted from St. George, as proposed, would be available for assignment to any of the eight communities without assignments that are adjacent to Charleston. Dudley avers that the Charleston proposal would preclude essentially the same areas from future assignments on Channels 297, 298, 299 and 300 as the Soundamerica proposal would. In addition it would preclude the use of Channel 300 at St. Simon, Georgia (pop. 5,436). St. Simon is located approximately 12 miles from Brunswick, Georgia, and Dudley states that it receives service from two Class C stations licensed there. The only other substantive difference in the preclusionary impact of the proposals occurs on Channel 296A. The St. George proposal would preclude the use of Channel 296A in a narrow coastal area in South Carolina extending approximately 81 miles from Beaufort to McClellanville. Dudley notes that adoption of the Charleston proposal would permit the use of Channel 296A in this area. As an example, he states that Channel 296A could be assigned simultaneously to McClellanville (pop. 304) and Beaufort (pop. 9,434).

8. Dudley indicates that the Charleston proposal will provide an additional service to 320,988[5] persons while the St. George proposal will provide additional service to only 69,823 persons. However, Soundamerica argues that the Charleston proposal will only provide a 5th FM choice[6] to those persons within its predicted 1 mV/m contour while the St. George proposal would result in a first and second service to 3,351 persons and 16,180 persons, respectively. The Soundamerica argument is persuasive. Pertinent Commission priorities clearly require that we make an assignment that would provide a first and second FM service over one that would provide a 4th FM assignment to a community with no first or second FM service benefits, Anamosa and Iowa City, Iowa, 46 F.C.C. 2d 520 (1974) at paragraph 14.

9. Accordingly, pursuant to the authority contained in sections 4(i), 303 (r), and 307(b) of the Communications Act of 1934, as amended, *It is ordered*, That effective May 9, 1975, the FM Table of assignments, § 73.202(b) of the Commission's rules and regulations, is amended as follows for the city listed below:

City:	Channel No.
St. George, S.C	298

10. *It is further ordered*, That effective May 9, 1975, and pursuant to section 316 of the Communications Act of 1934, as amended, the outstanding license of Soundamerica Corporation for Station WPWR(FM), St. George, South Carolina, *Is modified* to specify operation on Channel 298, in lieu of Channel 240A subject to the following conditions:

(a) The licensee shall inform the Commission in writing by no later than May 9, 1975 of its acceptance of this modification.

(b) The licensee shall submit to the Commission by June 9, 1975 all necessary information complying with the applicable technical rules for modification of authorization to cover the operation of Station WPWR(FM) on Channel 298 at St. George, South Carolina.

(c) The licensee may continue to operate on Channel 240A under its outstanding authorization for one year from the effective date of this order, or effect the change sooner should it so desire. Ten days prior to commencing operation on Channel 298 the licensee shall submit the same measurement data normally required in an application for an FM broadcast station license.

(d) The licensee shall not commence operation on Channel 298 until the Commission specifically authorizes it to do so.

11. *It is further ordered*, That this proceeding is terminated.

(Secs. 4, 303, 307, 48 Stat., as amended, 1066, 1082, 1083; 47 U.S.C. 154, 303, 307)

Adopted: March 25, 1975.

Released: April 2, 1975.

FEDERAL COMMUNICATIONS COMMISSION,[7]

[SEAL] VINCENT J. MULLINS, *Secretary.*

[FR Doc.75-9115 Filed 4-7-75;8:45 am]

[Docket No. 20140 RM-2341; FCC 75-353]

PART 73—RADIO BROADCAST SERVICES

FM Broadcast Stations, Midland, Monahans, Brownfield, and Seminole, Texas

1. The Commission has before it for consideration the notice of proposed rule making, adopted August 21, 1974 (39 FR 31535), proposing that the FM Table of Assignments (§ 73.202(b) of the Commission's rules and regulations) be amended by exchanging Channel 271, Midland, Texas, and Channel 277, Monahans, Texas, and by exchanging Channel 292A, Brownfield, Texas, and Channel 280A, Seminole, Texas. The proposal was made by petitioner, Midland Broadcasting Co., in order to eliminate short-spacing between presently assigned channels. The petitioner is the only commenting party.

2. The petitioner had originally filed an application for a construction permit to construct a station on Channel 271 presently assigned to Midland, Texas. However, it was discovered that an IF interference problem existed between Channel 271 and educational Channel 217 licensed to Odessa College, Station KOCV-FM in Odessa, Texas. Section 73.207 of the Commission's rules requires a separation of 30 miles for Class C FM frequencies 53 or 54 channels apart. The distance between the site of the transmitter of Station KOCV-FM and the proposed site for a Midland FM facility is 16.5 miles. Although petitioner attempted to arrange a solution by changing the operation of Station KOCV from Channel 217 to Channel 215, the FM agreement of 1973 between Mexico and the United States failed to accommodate this substitution of channels. Thus, petitioner resorted to the proposed double exchange of channels in order to remove the short-spacing that presently exists. The exchange of Class A stations proposed here was necessitated by the short-spacing result of the exchange of Class C channels. No other changes are required.

3. It appears that the proposed exchange of channels will cause no technical problems. All four channels are presently unoccupied and no applications

---

[1] Commissioner Hooks absent.

[2] Other than petitions for extensions of time for filing, filings received by the Commission subsequent to adoption of the Notice include Comments of WQIZ, Inc.; Comments of Brothers Broadcasting Corp.; Counterproposal and Comments of Trident Broadcasting Co. Comments in Opposition to Notice of Proposed Rule Making and Petition for Rule Making of William G. Dudley III; Supplement to Counterproposal and Comments of Trident Broadcasting Co.; Reply Comments of Trident Broadcasting Co.; Reply Comments of Soundamerica Corp.; Reply Comments of Radio Station WWMC, Moncks Corner, South Carolina; Response of Trident Broadcasting Company and Motion to Strike WWMC Reply Comments; and Statement of Trident Broadcasting Company for the Record.

[3] All population figures are from the 1970 U.S. Census.

[4] A staff study was conducted because the Dudley showing was based upon an incorrect service map originally introduced by Soundamerica and later revised.

[5] This showing assumes 100 kW operation with an antenna height of 300 feet AAT.

[6] Soundamerica includes FM Station WKTM located in adjacent North Charleston.

[7] Commissioner Hooks absent.

V 40168

XUM

are outstanding (except petitioner's application for the present Midland channel). We are informed that the Mexican Government has no technical objections to the proposed changes. There would be no change in potential service offered to the affected areas and the new assignments can be made in compliance with our minimum mileage separation requirements. Petitioner has reaffirmed its intention to apply for the proposed Channel 277 at Midland, if assigned, by amending its pending application for Channel 271 and to promptly construct a station if authorized.

4. Accordingly, in view of the foregoing, and pursuant to authority contained in sections 4(i), 303(g) and (r) and 307(b) of the Communications Act of 1934, as amended, *it is ordered*, That effective May 9, 1975, the FM Table of Assignments, §73.202(b) of the Commission's rules and regulations is amended, as concerns Midland, Monahans, Brownfield and Seminole, Texas, to read as follows:

City:	Channel No.
Midland, Tex.	222, 227, 277
Monahans, Tex.	260, 271
Brownfield, Tex.	280A
Seminole, Tex.	292A

5. *It is further ordered*, That this proceeding is terminated.

Adopted: March 25, 1975.

Released: April 1, 1975.

(Secs. 4, 303, 307, 48 Stat., as amended, 1066, 1082, 1083; 47 U.S.C. 154, 303, 307)

FEDERAL COMMUNICATIONS COMMISSION,[1]

Title 7—Agriculture

CHAPTER I—AGRICULTURAL MARKETING SERVICE (STANDARDS, INSPECTIONS, MARKETING PRACTICES)

PART 52—PROCESSED FRUITS AND VEGETABLES, PROCESSED PRODUCTS THEREOF, AND CERTAIN OTHER PROCESSED FOOD PRODUCTS

Subpart—United States Standards for Grades of Frozen Broccoli

A notice of proposed rulemaking to revise the United States Standards for Grades of Frozen Broccoli was published in the FEDERAL REGISTER of June 25, 1974 (39 FR 22959) and corrections thereto subsequently published in the FEDERAL REGISTER of July 16, 1974 (39 FR 26021) and July 26, 1974 (39 FR 27331). Interested persons were given until November 30, 1974 to study the proposal and offer data, comments, or views relative thereto.

This revised grade standard is issued under authority of the Agricultural Marketing Act of 1946 (sec. 205, 60 Stat. 1090, as amended, 7 U.S.C. 1624), which provides for the issuance of official U.S. grades to designate different levels of quality for the voluntary use of producers, buyers, and consumers. Official grading services are also provided under this Act upon request and upon payment of a fee to cover the cost of such services.

NOTE: Compliance with the provisions of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act or with applicable State laws and regulations.

Statement of consideration leading to the revision. Interested persons were given until November 30, 1974 to submit data, comments, or views pertaining to the proposed rulemaking to revise the United States Standards for Frozen Broccoli.

Comments were received from the U.S. Army Natick Laboratories, Department of the Army, from one member of the broccoli freezing industry, and from the American Frozen Food Institute.

(1) The comment from the U.S. Army Natick Laboratories suggested concurrence with the notice of proposed rulemaking as published.

(2) Comments from the member of the broccoli freezing industry were as follows:

(a) "The ten day study conducted by the USDA at this plant was not conclusive. The product quality during the first five days was excellent and thus did not provide any comparison. During the second five day period, product was variable and lots that averaged 92 score points at present USDA standards failed the new method."

The study referred to above of a preliminary draft of the proposed frozen broccoli standard was conducted in the later part of 1973 for ten days in four separate plants in various broccoli producing areas of California. Analysis of the data from those four plants indicated that the Acceptable Quality Levels (AQL's) in the proposed attributes standard were at approximately the correct level, and the defect classification appeared to be appropriate.

(b) "On lot inspection, 50 sample units would not only be time consuming, but wasteful as under the new system, 11 retail packages could be needed for one sample unit alone and on the 2½ pound carton, at least 3 packages would be graded and discarded."

Sampling plans are included in the revised standards that require a sample unit size of 50 spears or short spears along with alternate sampling plans that require 18 spears or short spears. Both are set to the same AQL's and give approximately the same degree of reliability.

(3) Comments from the American Frozen Food Institute, which represents the majority of the frozen broccoli industry indicated concurrence with the proposed revision provided the following changes were made.

(a) In § 52.633(a)—change to read as follows:

(a) *General.* For the purposes of determining compliance with the requirements for the various style classifications, the following are considered as minor or major defects, as specified and shall not exceed the acceptance number in Table I, II, or III, as applicable for the style.

(1) "Spears" or "Stalks"—each unit longer than 6⅛ inches, or shorter than 3⅝ inches=1 minor.

(2) "Short spears" or "florets"—each unit longer than 3⅝ inches or shorter than ⅞ inch=1 minor.

(3) "Cut"—(i) Units less than ½ inch in the longest dimension—Each 0.5 ounce (14.18 grams) or fraction thereof in increments of at least 0.2 ounce (5.67 grams)=1 minor.

(ii) Each unit (individual piece) more than 2 inches in the longest dimension=1 major.

(4) • • •

(5) • • •

(b) In § 52.633—Table II

Change the AQL from 10.0 for all defects to 15.0 for minor and 6.5 for major defects, and adjust the statistical sampling plans accordingly. This change in the proposal is not substantive since it effects only a small adjustment to fit good industry packing practices, the original intent of the proposal.

As proposed, the tolerance for style compliance for cuts specified in Table II would create a hardship on frozen broccoli packers since these proposed requirements are based on count of units less than ½ inch. The current requirements are based on weight of such units.

(c) In § 52.634 (c) Blemished—change to read as follows:

A unit of broccoli that is blemished by pathological injury, hollow stems, pithy stems, insect injury, or discolored by other means, such as, but not limited to, small orange or yellowish-orange buds to the extent that the appearance or eating quality is adversely affected: • • •

(d) In § 52.634 (c) (2) and (3) • • • color—delete the phrase:

or small orange or yellowish-orange buds.

It is felt that this type of defect can more realistically be classified as to severity as a blemish factor rather than its effect on color.

(e) In § 52.634(p)—Leaf material—change to read as follows:

Leaf material in the styles of cuts, chopped, and pieces means any portion of a leaf not attached to a portion of a spear.

It is our understanding that the requirements for leaf material in the styles of cuts and chopped were originally meant to control the arbitrary addition of coarse leaf material normally discarded in the packing operation and not leaf material attached to broccoli stalks resulting from an overflow of the spears and short spears pack.

The above mentioned changes are editorial in nature and provide more definition, both for the sake of clarity and constitute no substantive changes.

The Department concurs that these suggested changes provide more clarity and will bring the revised standards more in line with current packing practices.

The revised grade standards for frozen broccoli incorporate the attributes approach which makes the following changes from previous standards:

(1) Any deviation from a specific requirement for any of the quality factors is a defect;

(2) Each defect is classified as to its relative severity as minor, major, severe, or critical;

(3) A standard sample unit size is provided for the various styles regardless of the container size;

(4) Allowances for the various defect classifications are set to specific Acceptable Quality Levels (AQL's) based on this sample unit size;

(5) Allowances are cumulative for the sample instead of on an individual sample unit basis;

(6) Defects are counted and tallied according to class, thereby eliminating the need for calculating percentages;

(7) The scoring system is eliminated. Acceptance or rejection would be on a "go" or "no go" basis for each grade classification; and

(8) Specific requirements for compliance with a particular style are provided.

After consideration of all relevant matters presented, including the notice of proposed rulemaking, the United States Standards for Grades of Frozen Broccoli are hereby revised as published in the FEDERAL REGISTER of June 25, 1974 (39 FR 22959) except for changes as suggested herein to become effective July 1, 1975 and thereupon will supersede the standards which have been in effect since April 14, 1962.

The revision is as follows:

Subpart—United States Standards for Grades of Frozen Broccoli

PRODUCT DESCRIPTION, STYLES, AND STYLE COMPLIANCE

PRODUCT DESCRIPTION, STYLES, AND STYLE COMPLIANCE

§ 52.631 Product description.

"Frozen broccoli" is the product prepared from the fresh, clean, sound stalks or shoots of the broccoli plant (Brassica oleracea [Italica group]) by trimming, washing, blanching, sorting, and properly draining. The product is frozen in accordance with good commercial practice and maintained at temperatures necessary for preservation of the product.

§ 52.632 Styles of frozen broccoli.

(a) "Spears" or "stalks" consist of the head and adjoining portions of the stem, with or without attached leaves, ranging from not less than 3½ inches (8.9 cm) to not more than 6 inches (15.2 cm) in length. Such spears or stalks may be cut longitudinally.

(b) "Short spears" or "florets" consist of the head and adjoining portions of the stem, with or without attached leaves, ranging in length from not less than 1 inch (2.5 cm) to less than 3½ inches (8.9 cm) and weigh more than 0.2 ounce (6 gr). Such short spears or florets may be cut longitudinally.

(c) "Cut" consist of spears or stalks cut into portions ranging from ¾ inch (1.9 cm) or more but not more than 2 inches (5.1 cm) in length. This style contains not less than 25 percent, by weight, of head material and not more than 25 percent, by weight, of leaf material.

(d) "Chopped" consists of spears or stalks cut into portions predominantly less than ¾ inch (1.9 cm) in length. This style contains not less than 25 percent, by weight, of head material and not more than 25 percent, by weight, of leaf material.

(e) "Pieces" consist of cut or chopped portions or spears or stalks which do not meet the requirements for "cuts" or "chopped" style.

§ 52.633 Style classification compliance.

(a) *General.* For the purpose of determining compliance with the requirements for the various styles the following are considered as minor or major defects, as specified, and shall not exceed the acceptance number in Table I, (or I Alternate), II, or III, as applicable for the style.

(1) "Spears" or "stalks"—each unit longer than 6⅛ inches (15.6 cm) or shorter than 3⅜ inches (8.6 cm)=1 minor.

(2) "Short spears" or "florets"—each unit longer than 3⅝ inches (9.2 cm), or unit shorter than ⅞ inch (2.2 cm)=1 minor.

(3) "Cuts"—(i) Units less than ½ inch (1.3 cm) in the longest dimension—Each 0.5 ounce (14.0 grams) or fraction thereof in increments of at least 0.2 ounce (6 grams)=1 minor.

(ii) Each unit (individual piece) more than 2 inches (5.1 cm) in the longest dimension=1 major.

(4) "Chopped"—units more than ¾ inch (1.9 cm) in the longest dimension=1 minor.

(b) For the styles of cuts and chopped, pieces of leaves are not considered as length defects.

TABLE I.—*Spears; short spears, tolerances for style compliance*

[Sample unit size=50 spears or short spears]

Number of sample units	Number of units	Maximum number defects permitted [1]

[2] Based on an estimated count of 20 per ounce of product exclusive of chaff.

DEFINITIONS OF TERMS

§ 52.634 Definition of terms.

(a) **Absolute limit (AL).** Limit for maximum number of defects permitted in a sample unit.

(b) **Acceptable Quality Level (AQL).** Acceptable Quality Level (AQL) is the maximum percent defective, or the maximum number of defects per hundred units, that, for purposes of sampling inspection, can be considered satisfactory as a process average.

(c) **Blemished.** A unit of broccoli that is blemished by pathological injury, hollow stems, pithy stems, insect injury, or discolored by other means such as, but not limited to, small orange or yellowish-orange buds, to the extent that the appearance or eating quality is adversely affected:

(1) Not more than slightly;
(2) Materially; or
(3) Seriously.

(d) **Broken** in the styles of spears or short spears means any broken or detached portions, other than loose leaves or portions thereof, which weigh more than 0.2 ounce (6 grams) and are definitely not intact units.

(e) **Color.** (1) *Good color*—the outside of the stalk is a bright, distinct green. The top of the head is a bright, distinct green and may show a slight purplish cast. Such color may also include lighter colored areas on the outside of the head typical of young and tender broccoli.

(2) *Reasonably good color*—the outside of the stalk may be dull and may possess a slight brownish, yellowish, or grayish cast. The head may be dull and possess a slight brownish, grayish, or yellowish cast and/or yellow buds due to flowering that do not seriously affect the color appearance.

(3) *Poor color*—the presence of yellow buds due to flowering any brownish, grayish, or yellowish casts that seriously affect the color appearance of the broccoli unit.

(f) **Damage.** A spear or short spear on which the head is damaged by mechanical injury, other than "broken," to the extent that the appearance or eating quality is materially affected.

(g) **Defect.** Any specifically defined variation from a particular requirement. "Defects" are classified as "minor", "major", "severe", or "critical".

(h) **Detached fragments.** In the styles of spears and short spears a detached fragment is any small piece or detached portion other than loose leaves or portions thereof, which weigh 0.2 ounce (6 grams) or less.

(i) **Development.**

(1) *Well developed.* (i) *Spears and short spears:* (*a*) The spreading of the branching bud clusters which comprise the head of the unit does not materially affect the appearance of the unit; and

(*b*) The broccoli is in the early stage of maturity such that the individual buds and the immediate stems supporting the individual buds form a compact bud cluster.

(2) *Reasonably well developed.* (i) *Spears and short spears:* (*a*) The spreading of the branching bud clusters which comprise the head of the unit does not seriously affect the appearance of the unit; and

(*b*) The broccoli is in the intermediate stage of maturity such that the individual buds and the immediate stems supporting the individual buds form a reasonably compact bud cluster.

(ii) *All styles:* The individual buds are not more than moderately enlarged and practically none of the individual buds are in the flowered stage.

(3) *Poorly developed.* (i) *Spears and short spears:* (*a*) The branching bud clusters which comprise the head of the unit may be spread to the extent that the appearance of the unit is seriously affected; and

(*b*) The broccoli is in the advanced stage of maturity such that the individual buds and the immediate stems supporting the individual buds form a loosely structured bud cluster.

(ii) *All styles:* The individual buds are in the flowered stage or are more than moderately enlarged with or without reaching the flowered stage.

(j) **Deviant.** As applied to these standards, "deviant means a sample unit which fails the requirements for one or more of the prerequisite quality factors specified in § 52.636 by not more than one grade below the intended grade.

(k) **Diameter.** The diameter of a spear is the greatest dimension at approximate right angles to the longitudinal axis of the spear approximately 1 inch (2.5 cm) from the base end.

(l) **Extraneous vegetable material.** (1) *Class 1.* Tender, green blades of grass or weeds or leaves which are harmless.

(2) *Class 2.* Coarse blades of grass or weeds or leaves which may or may not be tender or green and which are harmless.

(m) **Fiber.** Fiber that is developed near the outside portion of the broccoli stem that is tough and/or woody.

(n) **Flavor and odor.** (1) *Good flavor and odor*—The product has a good characteristic flavor and odor and is free from objectionable flavors or objectionable odors of any kind.

(2) *Fairly good flavor and odor*—The product may be lacking in good flavor and odor but is free from objectionable flavors or objectionable odors of any kind.

(o) **Head material.** "Head material" in the styles of cuts and chopped consists of buds or bud clusters whether or not attached to a portion of a spear and includes the fine stem material to which buds or bud clusters are attached to the main stem.

(p) **Leaf material.** "Leaf material" in the styles of cuts, chopped, and pieces means any portion of a leaf not attached to a portion of a spear.

(q) **Loose leaves or pieces of leaves.** Broccoli leaves or pieces of leaves in the styles of spears and short spears not attached to a unit.

(r) **Sample.** The number of sample units to be used for inspection.

(s) **Sample unit.** The amount of product specified to be used for inspection. It may be:

(1) The entire contents of a container; or

(2) A portion of the contents of a container; or

(3) A combination of the entire or partial contents of two or more containers; or

(4) A portion of unpacked product.

(t) **Trim.** (1) "Well trimmed" (spears; short spears only) means that the appearance of the unit is not materially affected by the presence of attached leaves or pieces of leaves and not more than slightly affected by ragged or partial removal of leaves or small side shoots, or by poor cutting of the stem.

(2) "Reasonably well trimmed" (spears; short spears only) means that the appearance of the unit is not seriously affected by the presence of attached leaves or pieces of leaves and not materially affected by ragged or partial removal of leaves or small side shoots or by poor cutting of the stem.

(3) "Poorly trimmed" (spears; short spears only) means that the appearance of the unit is seriously affected by the presence of attached leaves or pieces of leaves, by ragged or partial removal of leaves or small side shoots, or by poor cutting of the stem.

(u) **Unit.** Any individual portion of broccoli other than loose leaves or individual buds.

SAMPLE UNIT SIZES

§ 52.635 Sample unit sizes.

(a) For head material and leaf material.

(1) Cuts—10 ounces (283 grams) of product.

(2) Chopped—1¾ ounces (50 grams) of product.

(b) For style (other than head material and leaf material), and quality factors.

(1) Spears; short spears—50 units; alternate—18 units.

(2) Cuts; chopped; pieces—10 ounces (283 grams) of product.

Broken, crushed, or similarly damaged portions of units of product in the styles of spears and short spears are reassembled and included in the count as whole units.

Head and leaf material in the styles of cut and chopped, loose leaves or pieces in the styles of spears and short spears, and extraneous material in all product styles are part of the standard sample unit size. They are not included in the count of spears and short spears but are included in the weight of cut and chopped broccoli. Such pieces and other extraneous material are considered part of the sample unit:

(i) When they are in a container whose entire contents are included in the sample unit;

(ii) When they are in the last of several containers included in the sample unit and 50 percent or more of the contents are required for the sample unit. None of the pieces and HEM in the last of several containers is considered part of the sample unit when less than 50 percent of its contents are required for the sample unit; and

(iii) When they are commingled with all of the product required for the sample unit and such product is taken from but is not the entire contents of a single container.

GRADES, FACTORS OF QUALITY, AND GRADE COMPLIANCE

§ 52.636 Grades.

(a) **U.S. Grade A (or U.S. Fancy)** is the quality of frozen broccoli that:

(1) Meets the following prerequisites (with deviants as specified in § 52.641 (a));

(i) Has similar varietal characteristics;

(ii) Has a good flavor and odor;

(iii) Is practically free from grit or silt;

(iv) Has a good, bright, overall color appearance;

(v) With respect to the styles of cuts, chopped, and pieces; has individual buds that are at least reasonably well developed; and

(2) Meets the requirements for the various quality factors in Table V (or V Alternate), VII, VIII as applicable for the style.

(b) **U.S. Grade B or (U.S. Extra Standard)** is the quality of frozen broccoli that:

(1) Meets the following prerequisites (with deviants as specified in § 52.641 (a));

(i) Has similar varietal characteristics;

(ii) Has at least a fairly good flavor and odor;

(iii) Has no more than a trace of grit or silt;

(iv) Has at least a reasonably good overall color appearance which may be slightly dull;

(v) With respect to the styles of cuts, chopped, or pieces; may have poorly developed buds that do not materially affect the appearance of the product; and

(2) Meets requirements for the various quality factors in Table V (or V Alternate), VI, or VII as applicable for the style.

(c) **Substandard** is the quality of frozen broccoli that fails to meet the requirements for U.S. Grade B.

§ 52.637 Factors of quality and grade compliance.

(a) The grade of a lot of frozen broccoli is based on compliance with the prerequisites specified in § 52.636 and with requirements for the following quality factors:

(1) Color;
(2) Uniformity of size;
(3) Detached fragments;
(4) Loose leaves or pieces of leaves;
(5) Damaged; broken; blemished;
(6) Trimming, with respect to the styles of spears and short spears;
(7) Development;
(8) Fiber; and
(9) Harmless extraneous material.

TABLE IV
CLASSIFICATION OF DEFECTS

Quality factor	Defect	Classification			
		Minor	Major	Severe	Critical
Color	Spears and short spears:				
	Reasonably good (in grade A only)		×		
	Poor			×	
Uniformity of size	Spears:				
	Length variation—greater than ¾ inch (1.9 cm)		×		
	Spears:				
	Diameter variation—greater than ¾ inch (1.0 cm)	×			
	Short spears:				
	Weight variation—largest unit is four times or more greater than smallest unit	×			
Detached fragments	Spears and short spears:				
	Each 1 ounce (28 gr) or fraction thereof in increments of at least 0.5 ounce (14 gr)		×		
Loose leaves and pieces of leaves.	Spears and short spears:				
	Each 0.5 ounce (14 gr) or fraction thereof in increments of at least 0.2 ounce (6 gr)	×			
Broken	Spears and short spears	×			
Damage	Mechanical or other means	×			
Blemished	Units adversely affected:				
	More than slightly	×			
	Materially		×		
	Seriously			×	
Trim	Spears and short spears:				
	Reasonably well (in grade A only)	×			
	Poorly:				
	In grade A		×		
	In grade B	×			
Development	Spears and Short Spears:				
	Reasonably well (in grade A only)	×			
	Poorly		×		
Fiber	All styles:				
	Not woody		×		
	Woody			×	
Harmless extraneous material.	Spears and short spears:				
	Class 1—(each piece)			×	
	Class 2—(each piece)				×
	Cuts, chopped, pieces				
	Class 1—each 1 inch (2.5 cm) or fraction thereof			×	
	Class 2—each 1 inch (2.5 cm) or fraction thereof				×

SAMPLE SIZES, METHOD OF ANALYSIS, AND LOT COMPLIANCE

§ 52.638 Sample size.

(a) *General.* The sample size to determine compliance with requirements of these standards shall be specified in the sampling plans and procedures in the "Regulations Governing Inspection of Processed Fruits and Vegetables and Related Products (§ 52.83), for Lot Inspection or On-Line-Inspection, as applicable.

(b) *Deviants.* The acceptance numbers for deviants specified in the sampling plans cited in paragraph (a) of this section apply only to the prerequisite factors specified for the grade in § 52.636. They do not apply to the quality factors covered by the sampling plans in § 52.637.

§ 52.639 Determining proportions of head material and leaf material.

(a) *Method.* The percent, by weight, of head material and leaf material in cut and chopped broccoli may be determined as follows:

(1) *Equipment needed.*

(i) 250 ml beaker.

(ii) Gram scale, or other suitable graduated to 0.1 ounce.

(iii) Laboratory tweezers, scalpel, or other instrument suitable for separating the stem material, leaf material, and head material.

(iv) Flat grading tray.

(2) *Procedure.*

(i) Thoroughly mix sample unit to be tested if sample unit is not the entire contents of the container.

(ii) Weigh approximately 50 grams (1¾ ounces) in the case of chopped product in a previously tarred 250 ml beaker.

(iii) In the case of cut style weigh 283 grams (10 ounces) of product in a suitable previously tarred container.

(iv) Spread the weighed product out on a flat grading tray.

(v) Separate the stem material from the head and leaf material; weigh the stem material, and record.

(vi) Separate the leaf material from the head material; weigh each separately and record.

(vii) The weight of the head material divided by the sum of the weights of the stem, head, and leaf materials multiplied by 100 is the percent, by weight, of head material.

(viii) The weight of leaf material divided by the sum of the weights of the stem, head, and leaf materials multiplied by 100 is the percent, by weight, of leaf material.

§ 52.640 Lot acceptance for style.

(a) Spears; short spears. A lot of frozen broccoli is considered as meeting the style requirements for spears or short spears as applicable, if the defects permitted and the AL value specified in Table I or Table I Alternate are not exceeded.

(b) Cuts; chopped.

(1) *Head material; Leaf material*—A lot of frozen broccoli is considered as meeting the style requirements for cuts or chopped for head material and leaf material; *Provided*, That:

(i) The average of all the sample units in the sample does not exceed 25 percent, by weight, of leaf material; and

(ii) The average of all the sample units in the sample is not less than 25 percent, by weight, of head material; and

(iii) No single sample unit contains less than 15 percent by weight, of head material, or more than 35 percent, by weight, of leaf material.

(2) *Length*—The AL values and/or the cumulative acceptance numbers for the defects permitted, specified in Table II or III as applicable, are not exceeded.

V 40168
APR 8 75

§ 52.641 Lot acceptance for quality.

A lot of frozen broccoli is considered as meeting the requirements for quality if:

(a) The number of deviants for the prerequisites specified for the applicable grade in § 52.636 does not exceed the acceptance number specified in the sampling plans in the "Regulations Governing Inspection of Processed Fruits and Vegetables and Related Products" (§§ 52.1–52.83); and

(b) The AL values and/or the cumulative acceptance numbers for the defects permitted for the applicable defect classifications specified in Tables V (or V Alternate), VI, and VII are not exceeded.

PART 52—PROCESSED FRUITS AND VEGETABLES, PROCESSED PRODUCTS THEREOF, AND CERTAIN OTHER PROCESSED FOOD PRODUCTS

Subpart—United States Standards for Grades of Canned Grapefruit and Orange for Salad

A notice of proposed rulemaking to revise the United States Standards for Grades of Canned Grapefruit and Orange for Salad was published in the FEDERAL REGISTER of December 16, 1974 (39 FR 43551). Interested persons were given until December 31, 1974 to study the proposal and offer data, comments or views regarding to the proposal. Corrections relative to the proposal and an extension of time for study and comment until March 1, 1975 were published in the FEDERAL REGISTER of January 20, 1975 (40 FR 3217).

This revised grade standard is issued under the authority of the Agricultural Marketing Act of 1946 (sec. 205, 60 Stat. 1090, as amended, 7 U.S.C. 1624), which provides for the issuance of official U.S. grades to designate different levels of quality for the voluntary use of producers, buyers, and consumers. Official grading services are also provided under this Act upon request and upon payment of a fee to cover the cost of such services.

NOTE: Compliance with the provisions of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act, or with applicable State laws and regulations.

Statement of consideration leading to the revision. A notice of proposed rulemaking was published in the FEDERAL REGISTER of December 16, 1974 at the request of the Florida Canners Association (FCA), representing all of the processors of canned grapefruit and orange for salad. FCA requested the Department to revise the current U.S. Standards for Grades of Canned Grapefruit and Orange for Salad to conform, as nearly as practicable, to the U.S. Standards for Grades of Canned Grapefruit.

The U.S. Standards for Grades of Canned Grapefruit were revised effective October 25, 1973, to overcome problems associated with mechanized segmenting and filing operations. Based upon the applicability of the revised canned grapefruit standards, and the similarity of canned grapefruit to canned grapefruit and orange for salad, a revision would bring the U.S. Standards for Grades of Canned Grapefruit and Orange for salad in line with current industry problems and operations.

Interested persons were given until December 31, 1974 to offer data, comments, or views pertaining to the proposed rulemaking to revise the U.S. Standards for Grades of Canned Grapefruit and Orange for Salad. It was determined that due to the heavy flow of mail during the month of December, 1974, many consumers may have experienced difficulty in receiving notice of the proposed rulemaking. Therefore, the comment period was extended to March 1, 1975.

The revision of the U.S. Standards for Grades of Canned Grapefruit and Orange for Salad made the following changes:

(1) Eliminated drained weight as a scoring factor of quality.

(2) Lowered the recommended minimum drained weight from 56.25 percent of the water capacity of the container to 53 percent.

(3) Lowered the minimum percent of practically whole segments in grade A from 75 percent to 65 percent.

(4) Changed the criteria for the factor of character to eliminate the restriction on loose floating cells.

(5) Provided for the addition of orange juice as a liquid packing medium.

Other changes made in the revision and consistent with current practice in the U.S. standards are as follows:

(1) Brix determination may be forced by comminuting as an alternative to waiting 15 days or more after packing the fruit.

(2) Score points are realigned to 25 points for each scorable factor.

(3) "Allowances for Defects" are tabulated.

The Department received thirteen comments in response to the proposed rulemaking. The Florida Canners Association (FCA) urged the Department to adopt the proposed rulemaking in its entirety. FCA further requested that final rulemaking be made effective upon publication in the FEDERAL REGISTER. Thus the revised standards could be used for the 1975 pack.

Comments from four consumers basically supported the revision. The comments outlined that only a slight change was being made in the standards, the revision might help stabilize consumer prices for the product and still meet minimum mandatory food requirements.

One comment indicated a desire for mandatory grade labeling. One consumer revealed the frustration of not being able to clearly determine the contents of a container from its pictorial label content and could neither be interpreted as opposing or supporting the revision.

One comment from the Office of the Governor of the State of Illinois requested that the Department clarify the changes that are being made in the revision and allow additional time for the comment period. The comment period was subsequently extended to March 1, 1975.

Four consumer comments indicated that drained weight and the percentage of whole fruit segments should not be changed.

One comment from Consumers Union expressed dismay that the proposed standards for grade A would permit less fruit, and fewer "almost whole" segments of fruit. Its argument is that a segment of the industry that chooses to pack at the present quality level of grade A could not competitively do so because there would be no U.S. grade terminology to solely reflect this higher level. In the opinion of the Department, the Florida Canners Association represents all of the processors of this item. The Association states that it is no longer economically feasible to pack at the present quality level reflected in grade A due to reasons cited above. If a reasonable proportion of their pack cannot be graded A, then producers may choose to use their raw product for juice rather than canned citrus salad resulting in less citrus salad available to consumers and a probable price increase. The purpose of U.S. standards for grades of food products is to facilitate their orderly marketing. Therefore, it is incumbent on the Department to have its grade standards truly reflect the actual quality levels moving in the marketplace, and not attempt to promulgate a quality level that the industry cannot use.

"U.S. Grade A" and "U.S. Grade B" as defined in the revised standards for canned citrus salad, exceed the minimum Food and Drug Administration's Standards of Quality and Fill of Container for Canned Grapefruit. Canned citrus salad is a product similar to canned grapefruit. However, FDA has not promulgated standards for canned citrus salad.

It is hereby found that it is unnecessary and contrary to the public interest to postpone the effective date beyond the date of publication hereof in the FEDERAL REGISTER (5 U.S.C. 1000–1011) in that:

(1) The revision does not require any changes in equipment or packing procedures;

(2) It is in the interest of the public and the industry to make the revised standards effective at the earliest possible date to facilitate their use during the 1975 packing season. The 1975 packing season is now underway in Florida; and

(3) One season's use of the revised U.S. Standards for Grades of Canned Grapefruit indicated the revision is acceptable and practicable. The revised U.S. Standards for Grades of Canned Grapefruit and Orange for Salad are supported by the acceptability of the U.S. Standards for Grades of Canned Grapefruit.

After consideration of all relevant matters, including the notice of proposed rulemaking the United States Standards for Grades of Canned Grapefruit and Orange for Salad are hereby revised as published in the FEDERAL REGISTER of December 16, 1974 (39 FR 43551), except for editorial changes to provide greater clarity, to become effective April 8, 1975, and thereupon will supersede the standards which have been in effect since January 21, 1960.

The revision is as follows:

Subpart—United States Standards for Grades of Canned Grapefruit and Orange for Salad

Sec.
52.1251 Product description.
52.1252 Grades.

52.1263 Determining the grade of a lot.
52.1264 Score sheet for canned grapefruit and orange for salad.

AUTHORITY: Agricultural Marketing Act of 1946, sec. 205, 60 Stat. 1090, as amended; (7 U.S.C. 1624)

§ 52.1251 Product description.

Canned grapefruit and orange for salad, commonly known as canned citrus salad, is prepared from sound, mature grapefruit (Citrus paradisi Macfadyen) and sound, mature oranges of the orange group (Citrus sinensis). The fruit ingredients have been properly washed, segmented, and cored; and seeds and major portions of membrane have been removed. The product is packed with a suitable packing media which may be water, fruit juice, orange juice, nutritive carbohydrate sweeteners, artificial sweeteners, or any other safe and suitable ingredients permissible under the Federal Food, Drug, and Cosmetic Act. The product is sufficiently processed by heat to assure preservation in hermetically sealed containers.

§ 52.1252 Grades.

(a) "U.S. Grade A" (or "U.S. Fancy") is the quality of canned grapefruit and orange for salad that:

(1) Has a drained weight of orange fruit that is not less than 37½ percent nor more than 60 percent of the drained weight of the product;

(2) Has an average drained weight of not less than 53 percent of the water capacity of the container, of which not less than 65 percent by weight of each fruit ingredient consists of practically whole segments;

(3) Has a good color;

(4) Is practically free from defects;

(5) Has a good character;

(6) Has a good flavor and odor; and

(7) Scores not less than 90 points when scored in accordance with the scoring system outlined in this subpart.

(b) "U.S. Grade B" (or "U.S. Choice") is the quality of canned grapefruit and orange for salad that:

(1) Has a drained weight of orange fruit that is not less than 32½ percent nor more than 60 percent of the drained weight of the product;

(2) Has an average drained weight of not less than 53 percent of the water capacity of the container, of which not less than 50 percent by weight of each fruit ingredient consists of practically whole segments;

(3) Has a reasonably good color;

(4) Is reasonably free from defects;

(5) Has a reasonably good character;

(6) Has a reasonably good flavor and odor; and

V 40168
APR 8 75

(7) Scores not less than 80 points when scored in accordance with the scoring system outlined in this subpart.

(c) "U.S. Broken" is the quality of canned grapefruit and orange for salad that:

(1) Has a drained weight of orange fruit that is not less than 32½ percent nor more than 60 percent of the drained weight of the product;

(2) Has an average drained weight of not less than 53 percent of the water capacity of the container, of which less than 50 percent of the drained weight of either fruit ingredient consists of practically whole segments;

(3) Has a reasonably good color;

(4) Is reasonably free from defects;

(5) Has a reasonably good character;

(6) Has a reasonably good flavor and odor; and

(7) Scores not less than 70 points when scored in accordance with the scoring system outlined in this subpart.

(d) "Substandard" is the quality of canned grapefruit and orange for salad that fails to meet the requirements of U.S. Grade B and U.S. Broken.

§ 52.1253 Liquid media and Brix measurements.

(a) Brix requirements for liquid media in canned grapefruit and orange for salad are not incorporated in the grades of the finished product since sirup or any other liquid medium, as such, is not a factor of quality for the purposes of these grades. It is recommended that the product, when packed in sirup, meet the following Brix measurements, as applicable, for the respective designation:

Designations:	Brix measurement
"Heavy sirup"	18° or more.
"Light sirup"	16° or more, but less than 18°.
"Slightly sweetened water"	12° or more, but less than 16°.

(b) These recommendations are not applicable to the canned product packed in water, orange juice, fruit juice, or with artificial sweeteners.

(c) The densities of the packing media, as listed in this section, are measured on the refractometer, expressed as percent by weight sucrose (degrees Brix) with correction for temperature to the equivalent at 20° C. (68° F.), but without correction for invert sugars or other substances. The degrees Brix of the packing media may be determined by any other method which gives equivalent results.

(d) Brix determination is made on the packing media 15 days or more after the grapefruit and orange for salad is canned or the blended homogenized slurry of the comminuted entire contents of the container if canned for less than 15 days.

§ 52.1254 Fill of container.

The recommended fill of container is not incorporated in the grades of the finished product since fill of container, as such, is not a factor of quality for the purposes of these grades. It is recommended that each container be filled as full as practicable with grapefruit and orange for salad without impairment of quality and that the product and packing media occupy not less than 90 percent of the total capacity of the container.

Total capacity of the container means the maximum weight of distilled water, at 20 degrees C. (68 degrees F.) which the sealed container will hold.

§ 52.1255 Minimum drained weights.

(a) *General.* The minimum drained weight requirements for the various container sizes are listed in Table I. The drained weight of the grapefruit and orange for salad is not less than 53 percent of the water capacity of the container.

(b) *Definitions.*

(1) Sample average—the average of all the drained weights of the sample containers representing a lot.

(2) $\bar{X}_d$—a specified minimum sample average drained weight.

(3) *LL*—lower limit for individual container drained weights.

(c) *Method for determining drained weight.* The drained weight of canned grapefruit and orange for salad is determined by emptying the contents of the container upon a U.S. Standard No. 8 circular sieve of proper diameter containing 8 meshes to the inch (square openings 0.0937 inch (2.38 mm) ±3 percent) so as to distribute the product evenly over the sieve. Without shifting the product, incline the sieve at an angle of approximately 17° to 20° to facilitate drainage and allow to drain for 2 minutes. The weight of drained grapefruit and orange for salad is the weight of the sieve and product less the weight of the dry sieve. A sieve 8 inches in diameter is used if the contents of the container is less than 3 pounds and a sieve 12 inches in diameter is used if the contents of the container is 3 pounds or more.

(d) *Compliance with drained weight requirements.* A lot of canned grapefruit and orange for salad is considered as meeting the minimum drained weight requirements when the following criteria are met:

(1) The sample average meets the specified minimum sample average drained weight (designated as "$\bar{X}_d$" in Table I); and

(2) The number of containers which fail to meet the minimum drained weight for individual containers (designated as "*LL*" in Table I) does not exceed the applicable acceptance number specified in Table II.

TABLE I.—*Minimum drained weights*

Container designation	$\bar{X}_d$	LL
	Ounces	*Ounces*
8Z (211 x 304)	4.60	4.25
No. 303 (303 x 406)	8.96	8.50
No. 3 cylinder (404 x 700)	27.40	26.30

TABLE II.—*Single sampling plans and acceptance numbers*

Sample size (Number of sample containers)	3	6	13	21	29	38	48	60
Acceptance numbers	0	1	2	3	4	5	6	7

§ 52.1256 Sample unit size.

Compliance with requirements for factors of quality is based on a sample unit comprised of the entire contents of one container, irrespective of container size.

§ 52.1257 Determining the grade of a sample unit.

(a) *General.* The grade of a sample unit of canned grapefruit and orange for salad is determined by considering the factor of flavor and odor which is not scored; the ratings for the factors of wholeness, color, defects, and character which are scored; the total score; and the limiting rules which may be applicable.

(b) *Factors rated by score points.* The relative importance of each factor which is scored is expressed numerically on the scale of 100. The maximum number of points that may be given each factor are:

Factors:	*Points*
Wholeness	25
Color	25
Defects	25
Character	25
Total	100

(c) *Definitions.*

(1) "Percentage of orange fruit" means the drained weight of the orange ingredient multiplied by 100 and divided by the drained weight of the total fruit ingredients. Compliance with this requirement shall be based on the sample average (average of all sample units representing a lot): Provided, that the weight of drained orange fruit in no single container is less than 25 percent or more than 75 percent of the drained fruit in such container. It is recommended that the number of orange units be not less than the number of grapefruit units.

(2) "Good flavor and odor" means that the product has a distinct and normal flavor and odor typical of canned grapefruit and orange for salad and is free from objectionable flavors and objectionable odors of any kind.

(3) "Reasonably good flavor and odor" means that the product may be lacking in good flavor and odor but is free from objectionable flavors and objectionable odors of any kind.

§ 52.1258 Determining the rating for the factors which are scored.

The essential variations within each factor which is scored are so described that the value may be determined for each factor and expressed numerically. The numerical range within each factor which is scored is inclusive (for example, "23 to 25 points" means 23, 24, or 25 points).

§ 52.1259 Wholeness.

(a) *General.* A "practically whole segment" means:

(1) A fruit segment that is substantially intact and retains its apparent original conformation; or

(2) A portion of a segment that is not less than 75 percent of its apparent original size.

(b) *"A" classification.* Sample units of canned grapefruit and orange for salad that consists of not less than 65 percent by weight of each drained fruit ingredient in practically whole segments may be given a score of 21 to 25 points.

(c) *"B" classification.* Sample units of canned grapefruit and orange for salad that consist of less than 65 percent but not less than 40 percent by weight of either or both of the drained fruit ingredients in practically whole segments may be given a score of 17 to 20 points. In addition the sample average (average of all sample units representing a lot) shall not be less than 50 percent by weight in practically whole segments. Sample units of canned grapefruit and orange for salad that fall into this classification shall not be graded above U.S. Grade B, regardless of the total score for the product. (This is a limiting rule.)

(d) *"Broken" classification.* Sample units of canned grapefruit and orange for salad that individually consist of less than 40 percent by weight of either or both of the drained fruit ingredients in practically whole segments, or average (average of all sample units) less than 50 percent by weight of either or both of the drained fruit ingredients in practically whole segments may be given a score of 0 to 16 points. Sample units of canned grapefruit and orange for salad that fall into this classification shall not be graded above U.S. Broken, regardless of the total score for the product. This is a limiting rule.)

§ 52.1260 Color.

(a) *"A" classification.* Canned grapefruit and orange for salad that has a good color may be given a score of 23 to 25 points. "Good color" means that:

(1) With respect to the grapefruit, a practically uniform, bright, typical color free from any noticeable tinge of amber; and

(2) With respect to the orange fruit, a practically uniform, bright, typical orange color.

(b) *"B" classification.* Canned grapefruit and orange for salad that has a reasonably good color may be given a score of 21 or 22 points. Canned grapefruit and orange for salad that falls into this classification shall not be graded above U.S. Grade B, regardless of the total score for the product. (This is a limiting rule.) "Reasonably good color" means that:

(1) With respect to the grapefruit, at least a fairly bright color which may be variable but is not off-color for any reason; and

(2) With respect to the orange fruit, at least a fairly bright, typical orange color which may be variable.

(c) *"SStd." classification.* Canned grapefruit and orange for salad that fails to meet the requirements of paragraph (b) of this section may be given a score of 0 to 20 points and shall not be graded above Substandard, regardless of the total score for the product. (This is a limiting rule.)

§ 52.1261 Defects.

(a) *General.* The factor of defects refers to the degree of freedom from extraneous vegetable material, from seeds, from portions of albedo, from portions of tough membrane, from damaged units, and from other similar defects.

(1) "Extraneous vegetable material" means, portions of leaves, small pieces of peel, and other similar material that is harmless.

(2) "Seed" means any seed or any portion thereof, whether or not fully developed, that measures more than 3/16 inch in any dimension.

(3) "Large seed" means any seed or any portion thereof, whether or not fully developed, that measures more than ⅜ inch in any dimension.

(4) "Damaged unit" means any grapefruit or orange segment or portion thereof that is damaged by lye peeling, by discoloration, or by similar injury or that is otherwise damaged to such an extent that the appearance or eating quality of the unit is materially affected.

(b) *"A" classification.* Canned grapefruit and orange for salad that is practically free from defects may be given a score of 23 to 25 points. "Practically free from defects" means that:

(1) All defects present, whether or not specifically defined or listed in this section, do not more than slightly affect the appearance or edibility of the product; and

(2) The defects that may be present in a sample unit and in the entire sample do not exceed the allowances specified in Table III.

(c) *"B" classification.* Canned grapefruit and orange for salad that is reasonably free from defects may be given a score of 21 or 22 points. Canned grapefruit and orange for salad that falls into this classification shall not be graded above U.S. Grade B, regardless of the total score for the product. (This is a limiting rule.) "Reasonably free from defects" means that:

(1) All defects present, whether or not specifically defined or listed in this section, may materially, but not seriously, affect the appearance or edibility of the product; and

(2) The defects that may be present in a sample unit and in the entire sample do not exceed the allowanees specified in Table IV.

(d) *"SStd." classification.* Canned grapefruit and orange for salad that fails to meet the requirements of paragraph (c) of this section may be given a score of 0 to 20 points and shall not be graded above Substandard, regardless of the total score for the product. (This is a limiting rule.)

TABLE III.—*Allowances for defects in canned grapefruit and orange for salad, U.S. grade A (maximum)*

Defects—extraneous vegetable material	8Z (211×304)		No. 303 (303×406)		No. 3 CYL. (404×700)	
	Sample unit—1 piece	Sample average—0.25 piece	Sample unit—1 piece	Sample average—0.50 piece	Sample unit—1 piece	Sample average—0.75 piece
Seeds and large seeds	Total of 3 seeds including not more than 1 large seed.	1.6 seeds including not more than 0.4 large seed.	Total of 4 seeds including not more than 2 large seeds.	3.2 seeds including not more than 0.8 large seed.	Total of 10 seeds including not more than 3 large seeds.	
Albedo and tough membrane	1 in²	½ in²	2 in²	1 in²	5 in²	4 in².
Damaged units	¼ oz.		¼ oz.		1¼ oz.	
Total all defects specified above and/or any other defects that may be present.	Cumulative effect—does not more than slightly affect the appearance or eating quality of the product.					

TABLE IV.—*Allowances for defects in canned grapefruit and orange for salad—U.S. grade B* (maximum)

Defects—extraneous vegetable material	8Z (211 × 304)		No. 303 (303 × 406)		No. 3 CYL. (404 × 700)	
	Sample unit—2 pieces	Sample average—0.50 piece	Sample unit—2 pieces	Sample average—0.75 piece	Sample unit—2 pieces	Sample average—1 piece
Seeds and large seeds	Total of 6 seeds including not more than 2 large seeds.	4.8 seeds including not more than 1.2 large seeds.	Total of 12 seeds including not more than 3 large seeds.	9.6 seeds including not more than 2.4 large seeds.	Total of 20 seeds including not more than 5 large seeds.	
Albedo and tough membrane	1½ in²	¾ in²	3 in²	2 in²	7½ in²	6in².
Damaged units	¾ oz.		1½ oz.		4 oz.	
Total—All defects specified above and/or any other defects that may be present.	Cumulative effect—may materially, but not seriously, affect the appearance or eating quality of the product.					

V 40168
APR 8 75

§ 52.1262 Character.

(a) *General.* The factor of character refers to the structure and condition of the cells of the grapefruit and orange and reflects the maturity of the fruits.

(b) *"A" classification.* Canned grapefruit and orange for salad that has a good character may be given a score of 23 to 25 points. "Good character" means that the grapefruit and orange segments are moderately firm and fleshy; that the segments or portions thereof have a juicy, cellular structure free from dry cells, or "ricey" cells, or fibrous cells that materially affects the appearance or eating quality of the product.

(c) *"B" classification.* Canned grapefruit and orange for salad that has a reasonably good character may be given a score of 21 or 22 points. Canned grapefruit and orange for salad that falls into this classification shall not be graded above U.S. Grade B, regardless of the total score for the product. (This is a limiting rule.) "Reasonably good character" means that the grapefruit and orange segments may be affected, but not seriously so, by dry cells, "ricey" cells or fibrous cells that detract from the appearance or eating quality of the product.

(d) *"SStd." classification.* Canned grapefruit and orange for salad that fails to meet the requirements of paragraph (c) of this section may be given a score of 0 to 20 points and shall not be graded above Substandard, regardless of the total score for the product. (This is a limiting rule.)

§ 52.1263 Determining the grade of a lot.

The grade of a lot of canned grapefruit and orange for salad covered by these standards is determined by the procedures set forth in the Regulations Governing Inspection and Certification of Processed Fruits and Vegetables, Processed Products Thereof, and Certain Other Processed Food Products (52.1 through 52.83).

PART 52—PROCESSED FRUITS AND VEGETABLES, PROCESSED PRODUCTS THEREOF, AND CERTAIN OTHER PROCESSED FOOD PRODUCTS

Subpart—United States Standards for Grades of Frozen Green Beans and Frozen Wax Beans

A notice of proposed rulemaking to revise the United States Standards for Grades of Frozen Green Beans and Frozen Wax Beans was published in the Federal Register of October 3, 1974 (39 FR 35670). Interested persons were given until December 31, 1974 to study the proposal and offer data, comments, or views relative thereto.

This revised grade standard is issued under authority of the Agricultural Marketing Act of 1946 (sec. 205, 60 Stat. 1090, as amended) 7 U.S.C. 1624), which provides for the issuance of official U.S. grades to designate different levels of quality for the voluntary use of producers, buyers, and consumers. Official grading services are also provided under this Act upon request and upon payment of a fee to cover the cost of such services.

Note: Compliance with the provisions of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act or with applicable State laws and regulations.

Statement of consideration leading to the revision. Comments were received from the U.S. Army Natick Laboratories Department of the Army, and the American Frozen Foods Institute.

The comments from the U.S. Army Natick Laboratories were of an editorial nature.

The comments from the American Frozen Foods Institute, which represents the majority of the frozen green bean and frozen wax bean packers, indicated concurrence with the proposal as published.

The revised standards for frozen green and frozen wax beans incorporate the attributes approach which makes the following changes from previous standards.

(1) Any deviation from a specific requirement for any of the quality factors is a defect;

(2) Each defect is classified as to its relative severity as minor, major, severe, or critical;

(3) A standard sample unit size is provided for the various styles regardless of container size;

(4) Allowances for the various defect classifications are set to specific Acceptable Quality Levels (AQL's) based on this sample unit size;

(5) Allowances are cumulative for all sample units providing a more accurate means of determining compliance of the process with requirements for the intended grade level;

(6) Defects are counted and tallied according to class, thereby eliminating the need for calculating percentages;

(7) The scoring system is eliminated. Acceptance or rejection would be on a "go" or "no go" basis for each grade classification; and

(8) Specific requirements for compliance with the styles are provided.

After consideration of all relevant matters presented, including the notice of proposed rulemaking the United States Standards for Grades of Frozen Green Beans and Frozen Wax Beans are hereby revised as published in the Federal Register of October 3, 1974 (39 FR 35670) except for certain editorial changes to become effective May 8, 1975, and thereupon will supersede the standards which have been in effect since August 25, 1954.

The revision is as follows:

Subpart—United States Standards for Grades of Frozen Green Beans and Frozen Wax Beans

PRODUCT DESCRIPTION, STYLES, STYLE COMPLIANCE, AND TYPES

AUTHORITY: Agricultural Marketing Act of 1946, sec. 205, 60 Stat. 1090, as amended (7 U.S.C. 1624))

PRODUCT DESCRIPTION, STYLES, STYLE COMPLIANCE, AND TYPES

§ 52.2321 Product description.

"Frozen green beans" and "frozen wax beans," hereinafter called "frozen beans," means the frozen product prepared from the clean, sound, succulent pods of the bean plant by stemming, washing, blanching, sorting, and properly draining and is then frozen in accordance with good commercial practice and maintained at temperatures necessary for the preservation of the product.

§ 52.2322 Styles of frozen beans.

(a) "Whole" means frozen beans consisting of whole pods, including whole pods which are less than 2¾ inches in length.

(b) "Sliced Lengthwise," "French Style," "Julienne," or "Shoestring" means frozen beans consisting of pods that are sliced lengthwise.

(c) "Cut" means frozen beans consisting of pods that are cut transversely into pieces less than 2¾ inches but not less than ¾ inch in length.

(d) "Short cut" means frozen beans consisting of pods that are cut transversely into pieces less than ¾ inch in length.

(e) "Mixed" means a mixture of two or more of the following styles of frozen beans: Whole, cut, or short cut.

§ 52.2323 Style classification compliance.

(a) *General.* For the purpose of determining compliance with the styles of "cut" and "short cut" any pieces that are of the lengths specified in Table I are considered defects. Such defects are classified as Minor or Major in Table I. Each "X" represents one defect.

(b) *Compliance.* Tolerances for compliance with style are contained in Tables II and III as applicable for the style.

TABLE I

Style	Defect	Classification: Minor	Major
Cut	Pieces shorter than ¼ in. in length.	X	
	Pieces longer than 2¾ in.		X
Short cut	Pieces ¾ in. or longer but not longer than 1¼ in.	X	
	Pieces longer than 1¼ in.		X

TABLE II.—*Cut style—tolerances for style compliance*

Acceptable quality level (AQL)	20.0	3.0
	Maximum defects permitted	
In any sample unit absolute limit (AL)	59	13

Number of sample units	Number of units	Total [1]	Major
1	200	49	10
2	400	93	18
3	600	136	25
4	800	179	32
5	1,000	221	39
6	1,200	263	46
7	1,400	305	53
8	1,600	346	59
9	1,800	388	66
10	2,000	430	72
11	2,200	471	79
12	2,400	512	86
13	2,600	554	92
14	2,800	595	99
15	3,000	636	105
16	3,200	677	112
17	3,400	718	118
18	3,600	759	125
19	3,800	801	131
20	4,000	842	138
21	4,200	883	144

[1] Total=minor plus major.

TABLE III.—*Short cut—tolerances for style compliance*

Acceptable quality level (AQL)	22.5	0.65
	Maximum defects permitted	
In any sample unit absolute limit (AL)	65	5

Number of sample units	Number of Units	Total [1]	Major [2]
1	200	57	3
2	400	108	5
3	600	158	7
4	800	208	9
5	1,000	257	11
6	1,200	306	12
7	1,400	355	14
8	1,600	404	16
9	1,800	453	17
10	2,000	501	19
11	2,200	550	21
12	2,400	598	22
13	2,600	647	24
14	2,800	695	25
15	3,000	743	27
16	3,200	791	28
17	3,400	840	30
18	3,600	888	31
19	3,800	936	33
20	4,000	984	34
21	4,200	1,032	36

[1] Total = minor plus major.
[2] In the total sample.

§ 52.2324 Types of frozen beans.

(a) The type of frozen beans is not incorporated in the grades of the finished product, since type of frozen beans is not a factor of quality for the purpose of these grades. The type of frozen beans is described as "round type" or "flat type".

(b) "Round type" means frozen beans having a width not greater than 1½ times the thickness of the bean.

(c) "Flat type" means frozen beans having a width greater than 1½ times the thickness of the bean.

DEFINITIONS OF TERMS

§ 52.2325 Definitions of terms.

(a) *Absolute limit (AL).* The maximum number of defects permitted in a sample unit.

(b) *Acceptable quality level (AQL).* Acceptable quality level (AQL) is the maximum percent defective, or the maximum number of defects per hundred units, that, for purposes of sampling inspection, can be considered satisfactory as a process average.

(c) *Blemished.* Any unit which is affected or damaged by discoloration or any other means to the extent that the appearance or eating quality is adversely affected.

(d) *Color.* (1) Green beans. (i) *Well colored.* The individual units have a distinct green color that may range from a light shade of green color to a moderately dark shade of green characteristic of the variety.

(ii) *Fairly well colored.* The individual units are lacking in a distinct green color such that they are a pale shade of green that materially affects the color appearance of the unit.

(iii) *Poorly colored.* The individual units are lacking in green color development such that the color appearance is seriously affected by a very pale green to whitish color.

(2) Wax beans. (i) *Well colored.* The individual units have a color ranging from a distinct green color to a distinct yellow color with intermediate stages of greenish-yellow to yellowish-green.

(ii) *Fairly well colored.* The individual units have a pale yellow color that materially affects the color appearance of the unit.

(iii) *Poorly colored.* The individual units have a whitish yellow to yellowish white color that seriously affects the color appearance of the unit.

(e) *Character.* (1) Round type. (i) *Good character.* The pods are full fleshed and tender and the seeds are not mealy.

(ii) *Reasonably good character.* The pods are reasonably fleshy and reasonably tender and the seeds are not mealy.

(iii) *Fairly good character.* The pods have not entirely lost their fleshy structure, are fairly tender, and the seeds may be slightly mealy.

(iv) *Poor character.* The seeds may be hard and more than slightly mealy and the pods have no flesh.

(2) Flat type. (i) *Good character.* The pods have a good, green color, are tender, and have a definite seed pocket. The seeds may be slightly enlarged for the type but are not mealy.

(ii) *Reasonably good character.* The pods have a green color which may have a slight yellowish cast, are reasonably tender and may not have a definite seed pocket. The seeds may be no more than moderately enlarged for the type and may be slightly mealy.

(iii) *Fairly good character.* The pods may have a yellowish green color; are fairly tender and lacking a seed pocket. The seeds may be enlarged and may be mealy and moderately hard.

(iv) *Poor character.* The pods may have a greenish yellow color; may be not tender and lacking a seed pocket. The seeds may be enlarged, hard and mealy.

(f) *Decay.* The bacterial or fungus deterioration of a unit to the extent that the appearance or eating quality is seriously affected or to a degree that the unit is offensive.

V 40168
APR 8 75

(g) *Defect.* Any nonconformance with a specified requirement. Defects are classified as "Minor," "Major," "Severe," or "Critical."

(h) *Detached stem.* The stem or portion of stem that attaches the bean pods to the vine stem, but has become separated from the pod.

(i) *Deviant.* As applied to these standards, "deviant" means a sample unit which fails the requirements for the prerequisite factors of flavor and odor, overall color appearance, character with respect to sliced lengthwise style, and sloughing; *Provided:* That such sample unit is not more than one grade below the intended or indicated grade.

(j) *Extraneous vegetable material.* (1) Class 1—Tender, green, edible vegetable material similar in color and texture to that of beans, including but not limited to:

(i) Leaves or portions of leaves or grass.

(ii) Material from plants other than the bean plant.

(2) Class 2—Any material that is not tender, may be slightly tough or fibrous to hard, brittle, or woody, may not be green, and includes but is not limited to:

(i) Discolored leaves or grass or portions thereof;

(ii) Bean stalk or vine material, including vine stems, regardless of color, length, or diameter; or

(iii) Material from plants other than the bean plant.

(k) *Fiber.* (1) Edible. Fiber developed in the wall tissue of the bean pod that is noticeable upon chewing but may be consumed with the rest of the bean material without objection.

(2) Tough. Fiber developed in the wall tissue of the bean pod that is objectionable upon chewing and tends to separate from the rest of the bean.

(l) *Flavor.*

(1) Good flavor. The product, after cooking, has a good characteristic, normal flavor and odor and is free from objectionable flavors and objectionable odors of any kind.

(2) Fairly good flavor. The product, after cooking, may be lacking in good flavor and odor but is free from objectionable flavors and objectionable odors of any kind.

(m) *Mechanical damage.* Any unit that is broken or split into two parts or that has very ragged edges, or is crushed or is damaged by other mechanical means to such an extent that the appearance is seriously affected.

(n) *Sample.* The number of sample units to be used for inspection of a lot.

(o) *Sample unit.* The amount of product specified to be used for inspection. It may be:

(1) The entire contents of a container; or

(2) A portion of the contents of a container; or

(3) A combination of the contents of two or more containers; or

(4) A portion of unpacked product.

(p) *Small piece.* In sliced lengthwise style only means a piece of pod less than ¾ inch in the longest dimension and loose seeds or pieces of seeds.

(q) *Tough strings.* Strings or pieces of strings removed from the cooked frozen bean which will support a ½ pound weight for not less than five seconds.

(r) *Unit.* Any individual portion of a bean pod.

(s) *Unsnipped unit.* A unit without an attached stem but with stem collar that is hard and/or tough and would be objectionable upon eating.

(t) *Unstemmed unit.* A unit with attached stem or portion thereof that attaches the pod to the vine stem.

Sample Unit Sizes

§ 52.2326 Sample unit sizes.

(a) Compliance with requirements for the style of "cut" and "short cut" and for factors of quality is based on the following sample unit sizes:

(1) For style: 200 units

(2) Factors of quality: Whole style—100 units. Sliced lengthwise style—9 ounces. All other styles—200 units.

In the styles of whole and cut, a mechanically damaged unit that is broken into separate parts will be reassembled and counted as one unit in the standard sample unit size.

(b) Detached stems and harmless extraneous material that are considered part of the sample unit are not included in the count or weight of the standard sample unit size. Such stems and other extraneous material are considered part of the sample unit:

(1) when they are in a container whose entire contents are included in the sample unit;

(2) when they are in the last of several containers included in the sample unit and 50 percent or more of the contents are required for the sample unit. None of the stems and HEM in the last of several containers is considered part of the sample unit when less than 50 percent of its contents are required for the sample unit; and

(3) when they are commingled with all of the product required for the sample unit and such product is taken from, but is not the entire contents of a single container.

Grades, Factors of Quality, and Grade Compliance

§ 52.2327 Grades.

(a) "U.S. Grade A" (or "U.S. Fancy") is the quality of frozen beans that:

(1) Meets the following prerequisites (with deviants as specified in § 52.2331 (a));

(i) Has similar varietal characteristics;

(ii) Has a good flavor and odor;

(iii) Has a good, bright, overall color appearance;

(iv) With respect to the style of "sliced lengthwise", is of at least reasonably good character and the amount of small pieces that may be present does not exceed one ounce;

(v) The appearance or eating quality is not materially affected by sloughing; and

(2) Is within the limits for defects as classified in Table IV and specified in Table V, VI, or VII, as applicable for the style.

(b) "U.S. Grade B" (or "U.S. Extra Standard") is the quality of frozen beans that:

(1) Meets the following prerequisites (with deviants as specified in § 52.2331 (a));

(i) Has similar varietal characteristics;

(ii) Has a good flavor and odor;

(iii) Has at least a reasonably good overall color appearance which may be slightly dull;

(iv) With respect to the style of "sliced lengthwise" is of at least reasonably good character, and the amount of small pieces that may be present does not exceed two ounces;

(v) The appearance or eating quality is not seriously affected by sloughing; and

(2) Is within the limits for defects as classified in Table IV and specified in Table V, VI, or VII, as applicable for the style.

(c) "U.S. Grade C" (or "U.S. Standard") is the quality of frozen beans that:

(1) Meets the following prerequisites (with deviants as specified in § 52.2331 (a));

(i) Has similar varietal characteristics;

(ii) Has a fairly good flavor and odor;

(iii) Has at least a fairly good overall color appearance which may be dull but is not off color;

(iv) With respect to the style of "sliced lengthwise" is of at least a fairly good character, and the amount of small pieces that may be present does not exceed 3.5 ounces; and

(2) Is within the limits for defects as classified in Table IV and specified in Table V, VI, or VII, as applicable for the style.

(d) "Substandard" is the quality of frozen beans that fail to meet the requirements for U.S. Grade C.

§ 52.2328 Factors of quality and grade compliance.

(a) The grade of a lot of frozen beans is based on compliance with the prerequisites specified in § 52.2327 and with requirements for the following quality factors:

(1) Color;
(2) Blemished;
(3) Mechanical damage;
(4) Decay;
(5) Workmanship;
(6) Character;
(7) Fiber;
(8) Tough Strings; and
(9) Extraneous material.

(b) Defects are classified as minor, major, severe, or critical. Each "X" mark in Table IV represents "one defect."

Table IV.—*Classification of defects*

Quality factors	Defects	Classification			
		Minor	Major	Severe	Critical
Color	Individual unit adversely affected:				
	Materially		×		
	Seriously			×	
Blemished	Slightly	×			
	Materially		×		
	Seriously			×	
Decay					×
Mechanical damage		×			
Workmanship	Unstemmed unit			×	
	Detached stem			×	
	Unsnipped unit		×		
Fiber	Edible		×		
	Tough			×	
Tough strings			×		
Character	Reasonably good: In grade A only	×			
	Fairly good:				
	In grade A		×		
	In grade B	×			
	Poor:				
	In grades A and B			×	
	In grade C	×			
Extraneous material	Class 1			×	
	Class 2				×

LOT COMPLIANCE

§ 52.2329 Sample size.

(a) *General.* The sample size to determine compliance with requirements for style and for prerequisites specified in § 52.2327 and other quality factors, shall be as specified in the sampling plans and procedures in the "Regulations Governing Inspection of Processed Fruits and Vegetables and Related Products" (§ 52.38) for Lot Inspection or on-line Inspection, as applicable.

(b) *Deviants.* The acceptance numbers for deviants specified in the sampling plans cited in paragraph (a) of this section apply only to the prerequisite factors specified for the grade in § 52.2327. They do not apply to the quality factors covered by the sampling plans in § 52.2328.

§ 52.2330 Lot acceptance for style.

A lot of frozen beans is considered as meeting the style requirements for cuts or short cuts, as applicable, if the defects permitted and the AL values for the applicable defect classifications specified in Tables II and III, as applicable, are not exceeded.

§ 52.2331 Lot acceptance for quality.

A lot of frozen beans is considered as meeting the requirements for quality if:

(a) The number of deviants for the prerequisites specified for the applicable grade in § 52.2327 does not exceed the acceptance number specified in the sampling plans in the "Regulations Governing Inspection of Processed Fruits and Vegetables and Related Products" (§ 52.38).

(b) The defects permitted and the AL values for the applicable defect classifications specified in Tables V, VI, and VII are not exceeded.

Hearing on Proposed Order

Correction

In FR Doc. 75-7690 appearing at page 13513 in the issue for Thursday, March 27, 1975, make the following changes:

1. In the table of contents, change the first word in the heading for § 1251.322 from "Alternative" to "Alternate".

2. In § 1251.316(c) at page 13514, 3d column, change the second full word in the second line from "this" to "his".

Animal and Plant Health Inspection Service

[9 CFR Parts 303 and 381]

MEAT AND POULTRY PREPACKAGED INSPECTED PRODUCTS

Sales by Exempt Retail Stores in Designated States

Notice is hereby given, in accordance with the administrative procedure provisions in 5 U.S.C. 553, that the Animal and Plant Health Inspection Service is considering amending § 303.1 of the meat inspection regulations (9 CFR 303.1) and § 381.10 of the poultry products inspection regulations (9 CFR 381.10), pursuant to the authority in the Federal Meat Inspection Act, as amended (21 U.S.C. 601 *et seq.*), and the Poultry Products Inspection Act, as amended (21 U.S.C. 451 *et seq.*), to permit retail stores exempted from Federal inspection in designated States to sell in intrastate commerce certain prepackaged inspected meat and poultry products in normal retail quantities to nonhousehold consumers without affecting percentage and annual dollar sales limitations provided in the regulations.

Statement of Considerations. The Federal Meat Inspection Act (FMIA) and the Poultry Products Inspection Act (PPIA), with certain exceptions, require Federal inspection of the preparation of meat and poultry products at establishments preparing such products for "commerce" or otherwise subject to their provisions. Each Act provides, in part, that "the provisions of this Act requiring inspection * * * shall not apply to operations of types traditionally and usually conducted at retail stores and restaurants, when conducted at any retail store or restaurant or similar retail-type establishment for sale in normal retail quantities or service of such articles to consumers at such establishments * * *." These exemptions apply only to intrastate activities. The meat inspection regulations and poultry products inspection regulations currently define a retail store for purposes of the exemptions in such a way as to limit the exempted retail store sales of such products to nonhousehold consumers to a maximum of $18,000 and 25 percent of total sales of such products per year, and do not allow sales of such products to be made by such stores to nonconsumers. The Department has received suggestions that when prepackaged inspected meat and poultry products are not further processed or repackaged by a retail store and, in effect, are merely passing through, sales of such products should not, for purposes of the exemptions, be included in the percentage of sales or dollar limitation on sales to nonhousehold consumers, so long as they are sold to consumers in normal retail quantities, as defined in the regulations (e.g., not in excess of 300 pounds in the case of cattle).

The Department has been informed that the present restrictions imposed on exempted retail stores preparing and selling products to consumers have resulted in extreme hardships to many small rural retailers and their communities. Many such retailers and many individuals in their communities have requested the Department to afford them relief. Therefore, the Department proposes to permit intrastate sales at exempted retail stores of federally or State inspected consumer packaged meat and poultry products in normal retail quantities to nonhousehold consumers without affecting the annual dollar or percentage limitations. Such sales of State inspected product would be permitted to be made to any consumer within the State of inspection only as provided in §§ 331.4 and 381.223 of the regulations as amended and set forth below:

1. Section 303.1(d)(2)(iii) of the meat inspection regulations (9 CFR 303.1(d)(2)(iii)) would be amended by adding "(*a*)" immediately after "(iii)"; by inserting the words "except as provided in subdivision (iii)(*b*)," immediately after the first semicolon; and by adding the following as a new subdivision (*b*):

§ 303.1 Exemptions.

* * * * * *

(d) * * *
(2) * * *
(iii) * * *

(*b*) Sales of meat and meat food products which have been inspected, consumer packaged, and labeled under Federal inspection or, as provided in § 331.4, under State or local agency inspection, prior to entry into the retail store, shall not be included in the total sales for the purpose of calculating the percentage of sales to household consumers and shall not be included in the total dollar value of sales for the purpose of calculating the dollar value of sales to consumers other than household consumers, so long as the sales are made to consumers in normal retail quantities, and the product is sold by the retail store without being further prepared, packaged, or labeled, and the retail store handles such products in such a manner as not to cause them to be adulterated or misbranded.

* * * * * *

2. Section 381.10(d)(2)(iii) of the poultry products inspection regulations would be amended by adding "(A)" immediately after "(iii)"; by inserting the words "except as provided in subdivision (iii)(B)" immediately after the first semicolon; and by adding the following as a new subdivision (B):

§ 381.10 Exemptions for specified operations.

(d) * * *
(7) * * *
(iii) * * *

(B) Sales of poultry products which have been processed, consumer packaged, and labeled under Federal inspection or, as provided in section 381.223, under State or local agency inspection, prior to entry into the retail store, shall not be included in the total sales for the purpose of calculating the percentage of sales to household consumers, and shall not be included in the total dollar value of sales for the purpose of calculating the dollar value of sales to consumers other than household consumers, so long as the sales are made to consumers in normal retail quantities, and the product is sold by the retail store without being further processed, packaged, or labeled, and the retail store handles such products in such a manner as not to cause them to be adulterated or misbranded.

* * * * * *

Any person wishing to submit written data, views, or arguments concerning the proposed amendments may do so by filing them, in duplicate, with the Hearing Clerk, U.S. Department of Agriculture, Washington, D.C. 20250, or if the material is deemed to be confidential, with the Inspection Standards and Regulations Staff, Scientific and Technical Services, Meat and Poultry Inspection Program, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, Washington, D.C. 20250, by June 9, 1975. Any person desiring opportunity for oral presentation of views should address such request to the Staff identified in this paragraph, so that arrangements may be made for such views to be presented prior to the date specified in the preceding paragraph. A record will be made of all views orally presented.

All written submissions and records of oral views made pursuant to this notice will be made available for public inspection in the Office of the Hearing Clerk during regular hours of business, unless the person makes the submission to the Staff identified in the preceding paragraph and requests that it be held confidential. A determination will be made whether a proper showing in support of the request has been made on the grounds that its disclosure could adversely affect any person by disclosing information in the nature of trade secrets or commercial or financial information obtained from any person and privileged or confidential. If it is determined that a proper showing has been made in support of the request, the material will be held confidential; otherwise, notice will be given of denial of such request and an opportunity afforded for withdrawal of the submission. Requests for confidential treatment will be held confidential (7 CFR 1.27(c)).

Comments on the proposal should bear a reference to the date and page number of this issue of the FEDERAL REGISTER.

Done at Washington, D.C., on: April 1, 1975.

F. MULHERN,
Administrator, Animal and Plant Health Inspection Service.

Commodity Exchange Authority

[17 CFR Part 150]

[Hearing Docket CE-P 19]

LIVE SLAUGHTER CATTLE, LIVE HOGS AND FROZEN PORK BELLIES

Limits on Position and Daily Trading for Future Delivery; Cancellation of Hearing

On January 27, 1975, a notice of proposed rulemaking was published in the FEDERAL REGISTER (40 FR 4017) to add §§ 150.12, 150.13, and 150.14 to the Orders of the Commodity Exchange Commission under section 4a of the Commodity Exchange Act (7 U.S.C. 6a). These respective orders relate to limits on speculative positions and speculative daily trading in live slaughter cattle, live hogs, and frozen pork bellies for future delivery.

On March 28, 1975, a notice was published in the FEDERAL REGISTER (40 FR 14091) which announced that a hearing on this proposal would be held on April 10, 1975, in Washington, D.C. This hearing, which was scheduled for April 10, 1975, has been canceled. If a hearing is to be held on this matter of the proposed speculative limits for live slaughter cattle, live hogs, and frozen pork bellies, the time and place will be announced by the Commodity Futures Trading Commission established by the Commodity Futures Trading Commission Act of 1974.

Issued: April 3, 1975.

ALEX C. CALDWELL,
Administrator, Commodity Exchange Authority.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[14 CFR Part 71]

[Airspace Docket No. 75-SW-16]

MULESHOE, TEXAS

Designation of Transition Area

The Federal Aviation Administration is considering amending Part 71 of the Federal Aviation Regulations to designate a transition area at Muleshoe, Tex.

Interested persons may submit such written data, views or arguments as they may desire. Communications should be submitted in triplicate to Chief, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Texas 76101. All communications received on or before May 8, 1975, will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Administration officials may be made by contacting the Chief, Airspace and Procedures Branch. Any data, views or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

The official docket will be available for examination by interested persons at the Office of the Regional Counsel, Southwest Region, Federal Aviation Administration, Fort Worth, Texas. An informal docket will also be available for examination at the Office of the Chief, Airspace and Procedures Branch, Air Traffic Division.

It is proposed to amend Part 71 of the Federal Aviation Regulations as hereinafter set forth.

In § 71.181 (40 FR 441), the following transition area is added:

MULESHOE, TEX.

That airspace extending upward from 700 feet above the surface within a 9-statute-mile radius of the Warren County Airport (latitude 34°14'00" N., longitude 102°42'30" W.).

The proposed transition area will provide controlled airspace for aircraft executing approach/departure procedures proposed at the Warren County Airport.

Concurrently with this action, the Warren County Airport will be changed from VFR to IFR status.

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348), sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).)

Issued in Fort Worth, TX, on March 31, 1975.

ALBERT H. THURBURN,
Acting Director, Southwest Region.

Proposed Designation

Correction

In FR Doc 75-8504, appearing on page 14781, in the issue for Wednesday, April 2, 1975, in the middle column, the third paragraph, the tenth line, the date now reading "May 2, 2, 1975", should read, "May 2, 1975".

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Part 73]

[Docket No. 20314; RM-2287]

FM BROADCAST STATIONS, TABLE OF ASSIGNMENTS, CHEYENNE, WYOMING

Order Extending Time for Filing Reply Comments

In the matter of amendment of § 73.202(b).

1. On December 30, 1974, the Commission adopted a notice of proposed rule making in the above-entitled proceeding. Publication was given in the FEDERAL REGISTER on January 15, 1975, 40 FR 2713. The date for filing comments has expired and the date for filing reply comments is March 25, 1975.

2. KVWO, Inc., proponent in this proceeding, filed a request for extension of time to and including April 9, 1975, for filing of reply comments. KVWO states that the additional time is necessary because its president has been out of the country for an extended period of time and received copies of other parties late last week. It also states that its counsel did not receive copies of those comments until March 24. KVWO states that counsel for the only two other parties filing comments in this proceeding have consented to this request for extension.

2. In addition, the Commission has received a request from Mr. Robert Lee Chipman, licensee of Station KRAL-FM, Rawlins, Wyoming, to assign Channel 292 to Rawlins. Mr. Chipman states that he intends to file an application for Channel 292 at Rawlins if it is assigned there.

3. Mr. Chipman's request is timely filed and will be considered in this proceeding. Accordingly, it is ordered, That the time for filing reply comments is extended to and including April 9, 1975.

Adopted: March 26, 1975.

Released: March 28, 1975.

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 52]

[FRL 353-5]

APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Proposed Revision to Arizona Implementation Plan

The Environmental Protection Agency proposes to approve a revision to the Arizona implementation plan for the control of particulate matter in the Phoenix area. The revision would allow the Arizona Department of Health Services to issue variances to sources in the Phoenix area which are unable to comply with the particulate regulations by the deadline of May 31, 1975, but which can comply by December 31, 1975. The variances would require the sources to meet a schedule of compliance and to control particulate emissions to the maximum extent feasible during the variance period.

Interested persons may participate in this proposed rulemaking by submitting written comments to the Environmental Protection Agency, Region IX, Attn: Air Programs Branch, 100 California Street, San Francisco, California 94111. All comments received on or before May 8, 1975, will be considered.

(Sec. 110, Clean Air Act, as amended (42 U.S.C. 1857c-5).)

Dated: April 2, 1975.

JOHN C. WHITE,
Regional Administrator, Region IX.

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

[30 CFR Part 715]

PERMANENT PROGRAM PERFORMANCE STANDARDS

Surface Coal Mining and Reclamation Operations

Notice is hereby given that the Office of Surface Mining Reclamation and Enforcement proposes to amend Part 715 of Chapter VII, Subchapter B of Title 30 of the Code of Federal Regulations as set forth below.

Section 715.17 of the regulations sets forth the requirements for the protection of the hydrologic balance. Paragraph (b)(1) requires that surface coal mining and reclamation operations be conducted to minimize disturbances to the hydrologic balance within the permit and adjacent areas, to prevent material damage to the hydrologic balance outside the permit area, and to meet applicable Federal and State water quality laws and regulations and the effluent limitations for coal mining promulgated by the Environmental Protection Agency. Paragraph (b)(2) requires that the operator minimize the disturbance to the prevailing hydrologic balance by avoiding acid or other toxic mine drainage by, but not limited to, the following measures:

(i) Preventing or removing water from contact with toxic producing deposits;

(ii) Treating mine drainage to prevent toxic materials from entering surface waters;

(iii) Casing, sealing or otherwise managing boreholes, shafts and wells to keep acid or other toxic drainage from entering ground or surface waters.

Paragraph (b)(3) requires that the operator conduct surface coal mining and reclamation operations to minimize the disturbance to the prevailing hydrologic balance by conducting mining and reclamation practices to prevent material damage to the hydrologic balance outside the permit area and to the quantity and quality of water in surface and ground water systems that serve as present or reasonably foreseeable sources for domestic, agricultural, industrial, or other uses.

Paragraph (b)(4) requires that the operator minimize the disturbance to the prevailing hydrologic balance by constructing any siltation structures prior to commencement of surface coal mining operations, such that they are capable of preventing additional contributions of suspended solids to streamflow outside the permit area.

Paragraph (b)(5) requires that the operator minimize the disturbance to the prevailing hydrologic balance by cleaning out and removing temporary or permanent siltation structures after the disturbed area has been revegetated and stabilized and by removing the resulting material from the disturbed area.

Paragraph (b)(6) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the approximate premining recharge capacity through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(7) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining quantity and quality of recharge through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(8) requires that the operator minimize the disturbance to the prevailing hydrologic balance by avoiding channel deepening or enlargement in operations requiring the discharge of water from mines.

Paragraph (b)(9) requires that the operator minimize the disturbance to the prevailing hydrologic balance by preventing drainage from the mine workings into groundwater supplies.

Paragraph (b)(10) requires that the operator minimize the disturbance to the prevailing hydrologic balance by preventing the diversion of surface water into the mine workings.

Paragraph (b)(11) requires that the operator minimize the disturbance to the prevailing hydrologic balance by eliminating or treating mine drainage to prevent material damage outside the permit area.

Paragraph (b)(12) requires that the operator minimize the disturbance to the prevailing hydrologic balance by treating mine drainage to meet applicable Federal and State water quality laws and regulations and the effluent limitations for coal mining promulgated by the Environmental Protection Agency.

Paragraph (b)(13) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(14) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(15) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(16) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(17) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(18) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(19) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(20) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(21) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(22) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(23) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(24) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(25) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(26) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(27) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(28) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(29) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(30) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(31) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(32) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(33) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(34) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(35) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(36) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(37) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(38) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(39) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(40) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(41) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(42) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(43) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(44) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(45) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(46) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(47) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(48) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(49) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(50) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(51) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(52) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(53) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(54) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(55) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(56) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(57) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(58) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(59) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(60) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(61) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(62) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(63) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(64) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(65) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(66) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(67) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(68) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(69) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(70) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(71) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(72) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(73) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(74) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(75) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(76) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(77) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(78) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(79) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(80) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(81) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(82) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(83) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(84) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(85) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(86) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(87) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(88) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(89) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(90) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(91) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(92) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(93) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(94) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(95) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(96) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(97) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(98) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(99) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(100) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(101) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(102) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(103) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(104) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(105) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(106) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(107) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(108) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(109) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(110) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(111) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(112) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(113) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(114) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(115) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(116) requires that the operator minimize the disturbance to the prevailing hydrologic balance by restoring the premining rate of discharge of groundwater through reclamation procedures which allow the movement of water to the groundwater system.

Paragraph (b)(117) requires that the operator minimize the disturbance to the prevailing hydrologic bal

3. Pursuant to the provisions of recently revised § 1.46 of the rules, motions for extension of time are to be filed at least seven days prior to the filing date to afford the Commission sufficient time to act on the request and give timely notice of the action to interested parties. Late-filed requests, according to the revised rule, will be considered in cases of last-minute emergencies which could not have been anticipated by the party requesting the extension. The instant late-filed request is borderline. However, in view of the consent of counsel for the other parties we are granting the request.

4. We are of the view that the public interest would be served by extending the time in this proceeding. Accordingly, *it is ordered*, that the date for filing reply comments is extended to and including April 9, 1975.

5. This action is taken pursuant to authority found in sections 4(i), 5(d)(1), and 303(r) of the Communications Act of 1934, as amended, and §§ 0.281 and 1.46 of the Commission's rules and regulations.

Adopted: March 26, 1975.

Released: April 2, 1975.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

[FR Doc.75-9122 Filed 4-7-75;8:45 am]

[47 CFR Part 73]

[Docket No. 20404; RM-2411]

FM BROADCAST STATIONS

Table of Assignments, Columbia, South Carolina

1. *Petitioner, proposal and comments.* (a) Petition for rulemaking filed June 28, 1974, by Nuance Corporation, licensee of AM Station WOIC(AM), Columbia, South Carolina, proposing assignment of Channel 276A to Columbia, as its fifth FM assignment.

(b) This channel may be assigned without affecting any existing FM assignment. The transmitting antenna for a station operating on Channel 276A must be located northeast of the center of Columbia in order to meet the mileage separation requirements with respect to Station WZZW (Channel 276A in Augusta, Georgia).

2. *Demographic data.* (a) *Location.* Columbia, the state capital, is located in the approximate center of the state and in Richland County. Columbia is 100 miles northwest of Charleston and 190 miles east of Atlanta, Georgia.

(b) *Population 1970 Census.* Columbia—113,542; Richland County—233,868; Columbia Standard Metropolitan Statistical Area—322,880; Columbia Urbanized Area—241,781.

(c) *Present local broadcast service.* Local service is provided by 6 AM stations (five of which are unlimited time) and 4 FM stations (two of which are Class A).

(d) *Economic conditions.* Petitioner alleges that the additional assignment is necessary in order to provide the community's Black population with interference-free Black-oriented programming. Evidence is presented that this specialized community to which the proposed channel would bring "first service" is comprised of almost 40,000 persons.

3. *Preclusions.* Adoption of petitioner's proposal would cause preclusion on the co-channel. The adjacent channels are already precluded by current assignments. In the new preclusion area are the city of Columbia, its suburban communities, Eastover (pop. 817), and Elgin (pop. 374). The preclusionary impact of petitioner's proposal is, thus, de minimus.

4. In light of the above, the Commission proposes to amend the FM Table of Assignments, § 73.202(b) as follows:

City	Channel No.	
	Present	Proposed
Columbia, S.C.....	228A, 250, 261A, 284	228A, 250, 261A, 276A, 284

5. The Commission's authority to institute rule making proceedings; showings required, cut-off procedures, and filing requirements are shown below.

6. Interested parties may file comments on or before May 22, 1975, and reply comments on or before June 11, 1975.

Adopted: March 26, 1975.

Released: April 2, 1975.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

1. Pursuant to authority found in sections 4(i), 5(d)(1), 303(g) and (r), and 307(b) of the Communications Act of 1934, as amended, and § 0.281(b)(6) of the Commission's rules, it is proposed to amend the FM Table of Assignments, § 73.202(b) of the Commission's rules and regulations, as set forth in the notice of proposed rule making shown above.

2. *Showings required.* Comments are invited on the proposal discussed in the notice of proposed rule making above. In initial comments, proponent will be expected to answer whatever questions are presented in the notice. The proponent of the proposed assignment is expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build the station promptly. Failure to file may lead to denial of the request.

3. *Cut-off procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered, if advanced in reply comments. (See § 1.420(d) of Commission rules.)

(b) With respect to petitions for rule making which conflict with the proposal in this notice, they will be considered as comments in the proceeding, and public notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If filed later than that, they will not be considered in connection with the decision in this docket.

4. *Comments and reply comments; service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's rules and regulations, interested parties may file comments and reply comments on or before the dates set forth in the notice of proposed rule making to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420(a), (b) and (c) of the Commission rules.)

5. *Number of copies.* In accordance with the provisions of § 1.419 of the Commission's rules and regulations, an original and fourteen copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public inspection of filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C.

[Docket No. 20265]

AM STATION ASSIGNMENT STANDARDS

Order Extending Time for Filing Reply Comments

1. On November 27, 1974, the Commission adopted a notice of proposed rule making in the above-entitled proceeding. Publication was given in the FEDERAL REGISTER on December 9, 1974, 39 FR 42920. The date for filing comments has expired and the date for filing reply comments is April 3, 1975.

2. On March 21, 1975, A. Earl Cullum, Jr. and Associates (Cullum) requested a 30-day extension of time for filing reply comments. Cullum states that he communicated with the Commission's contractor on February 27, 1975, requesting a list of parties filing comments but the contractor advised him it would not be possible to supply this list until the week of March 17, 1975. Cullum adds that once the list of parties is obtained it will be necessary to contact each party, to obtain copies of the comments, to review the copies and to prepare reply comments.

3. We are of the view that the public interest would be served by extending the time in this proceeding. Accordingly, *it is ordered*, That the date for filing reply comments is extended to and including May 5, 1975.

4. This action is taken pursuant to authority found in sections 4(i), 5(d)(1), and 303(r) of the Communications Act of 1934, as amended, and § 0.281 of the Commission's rules.

Adopted: March 26, 1975.

Released: April 2, 1975.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

[Reg. F]

SECURITIES OF STATE MEMBER BANKS

Revised Deadline for Comments

Notice is hereby given that the Board of Governors of the Federal Reserve System, in response to a request for an extension of the April 28, 1975 deadline for the submission of comments invited in the notice of proposed rulemaking concerning revision of Regulation F (40 FR 10322), has decided to extend the deadline to May 27, 1975. Accordingly, all interested persons may submit their views in writing to be received by the Secretary of the Board no later than May 27, 1975. Written comments as they are received will be made available for inspection and copying in Room 1118 of the Board's building.

By order of the Board of Governors of the Federal Reserve System, effective March 31, 1975.

[SEAL] THEODORE E. ALLISON,
Secretary of the Board.

POSTAL SERVICE

[39 CFR Part 111]

SPECIAL MAIL SERVICES

Lockbox and Caller Service Rentals

Under the provisions of 39 CFR 111.3 the Postal Service proposes a complete revision of Part 169 of the Postal Service Manual, dealing with post office boxes. The primary purpose of the revision is to reorganize the existing postal box service into two distinct categories of service: lockbox service, and caller service. The first category is in turn divided into (1) lockbox service for customers for whom there is no carrier delivery, (2) lockbox service for customers who have carrier service available to them, and (3) lockbox service for customers of fourth class post offices.

Where carrier service is available, the lockbox service is a premium service provided for the extra convenience of the public and subject to the highest, or GROUP 1 rates, of the three revised groups of lockbox rental rates.

Customers who are not eligible for carrier delivery may pick up their mail by calling for it at the general delivery post office window. There is no charge for this service. Customers not eligible for carrier delivery may rent lockboxes at the lower GROUP 2 rates. The GROUP 2 rates evidence the fact that for these customers a lockbox is a premium means of delivery. GROUP 2 rates are lower than those for GROUP 1, recognizing the fact that General Delivery is not as satisfactory an alternative as carrier delivery.

The third group of lockbox rental rates is the fourth class post office group. The fourth class post office group rates are changed to $2.00 per year for all sizes of boxes. The effective date of all lockbox rental rates is JULY 1, 1975.

The second distinct category of service described by the regulations is caller service. This service, primarily intended for large volume recipients of mail, will use post office box numbers as the address medium but will not use a lockbox. Callers will receive their mail at caller windows. At present this kind of service, where it is available, is described by various terms such as phantom box service, holdout service, firm direct service, etc. These regulations, which put caller service on a formal, recognized basis, establish a basic semi-annual caller service fee of $35 for each separation or each box number used beginning on or after July 1, 1975.

Box rental rates, which have increased only twice in the last forty years, are being increased to cover costs of the Postal Service attributable to the service provided.

The regulations also replace the present quarterly payment system tied to the fiscal year with a semi-annual/annual period payment system running from the month in which the box is rented. The new semi-annual system proposed by these regulations is an improvement for the vast majority of our customers, who continue to rent the same box year after year. Billing and collection costs can also be reduced under a semi-annual payment system.

The new regulations make no substantial changes in the forms and procedures for applying for a post office box or in the procedures for denying service or closing a box. A provision is added, however, requiring boxholders or callers to file a revised application for a post office box whenever the information on the form changes or becomes obsolete.

Interested persons who wish to do so may submit written data, views or arguments concerning the proposed new regulations to the Director, Office of Mail Classification, Rates and Classification Department, U.S. Postal Service, Washington, D.C. 20260, on or before May 8, 1975.

After consideration of all comments received, the Postal Service will then promulgate the final regulations by publishing in the FEDERAL REGISTER an appropriate amendment to 39 CFR 111.3. Accordingly, complying voluntarily with the advance notice requirements of the Administrative Procedure Act (5 U.S.C. Sec. 553 (b), (c)) regarding proposed rule making, the Postal Service proposes to revise Part 169 of the Postal Service Manual to read as set forth below:

(39 U.S.C. 401, 404)

LOUIS A. COX,
General Counsel.

PART 169. POST OFFICE LOCKBOX AND CALLER SERVICE

169.1 PURPOSE AND DEFINITION OF SERVICE

.11 *General Purpose*

Post Office Lockbox and Caller Service are premium services provided for the convenience of the public. These two services, provided in addition to available carrier or general delivery, afford customers privacy and permit them to obtain their mail at their convenience during the hours the lobby is open. Both services make use of the traditional Post Office Box Number as the address.

.12 *Description of Services*

.121 Lockbox Service

a. Lockbox Service is provided only through the use of Post Office Lockboxes. The term Drawer is hereby abolished and all boxes previously referred to by that term are to be considered the same as Lockboxes for all purposes, including rental rates. The terms lockbox and box are to be considered the same for purposes of these regulations and the term boxholder is to be applied to those who use lockboxes.

b. Lockboxes are located only in Postal facilities. Customers receive their mail in these boxes and may open the boxes by means of a key or numerical combination. Numbers are assigned to the boxes and the customers must use their assigned Post Office Box Number in their addresses immediately above the city, state and Zip Code.

c. Five sizes of lockboxes are available for rent and customers are assigned a lockbox of a certain size in accordance with their needs as determined by the postmaster.

d. Boxes without doors for customer access, formerly identified as "Call Boxes", shall be used only in conjunction with General Delivery service, and no rent shall be charged for their use.

e. Lockbox Service Does Not Include "alternate means of delivery" established to replace, simplify or extend carrier delivery service. Examples are Vertical Improved Mail (VIM) units, neighborhood cluster box units, apartment house units, rural non-personnel units, etc. These "alternate means of delivery" shall not be administered or charged for under provisions of Part 169 of the Postal Service Manual.

.122 Caller Service

a. Caller Service is provided through the use of sacks, pouches, trays, bundles and other devices. Normally, mail is handed to the customer or his agent at a call window or from a loading dock. Caller Service users are termed Callers throughout these regulations.

b. Caller Service will be provided to customers under the following conditions:

(1) To boxholders who normally receive too much mail for their box when no larger box is available. (Do not consider parcels, catalogs or other bulky items in such a determination).

V 40168 APR 8 75

(2) To customers who wish to rent more than five (5) lockboxes in any one facility. Five lockboxes may be rented to one customer, but additional separation may be provided only through the use of Caller Service.

c. Caller Service may be provided to customers under the following conditions:

(1) To a new customer who will receive (or can be expected to receive) too much mail to be accommodated in the largest box available in the facility.

(2) To a customer who, at his option, desires a lockbox but none are available with the provision that such service does not adversely affect normal postal operations.

(3) To any customer who desires Caller Service in lieu of lockbox service even though boxes of adequate size may be available and the provision of such service does not adversely affect normal postal operations.

d. No Caller Service shall be provided from Fourth Class Post Offices.

e. A Post Office Box Number is assigned to the caller for each separation utilized and the caller must use his assigned number in the address immediately above the city, state and Zip Code.

f. A customer may obtain Caller Service for the purpose of receiving the mail of a client. A Caller Number issued to such a customer shall be considered to be held by the customer and not the client. All restrictions or regulations provided in 154.212 shall be applicable to the provision of Caller Service under this section.

g. No physical lockbox shall be used for purposes of obtaining a number for a caller.

h. If a caller is already using a number assigned to a lockbox, the caller may be issued a new caller number to replace it. However, this may be done only with the consent of the caller. (See 169.323 for rate to be charged when a caller holds a number assigned to a lockbox.)

i. Where possible, a post office lockbox presently used by a caller for purposes of obtaining a caller number may be renumbered, or an ALPHA prefix or suffix added to the number, and rerented to another party so long as the caller does not object.

j. Caller service may be restricted by postmasters with approval of the District Manager if local conditions justify such restrictions.

.13 *General Caller Service Information*

.131 Caller Service Terms

Services which may have been locally termed as Phantom Box Service, Holdout Service, Firm Direct Service, Firm Holdout Service, Sack Service and miscellaneous other services of similar nature which involved the customer use of a Post Office Box Number as an address and which required the customer pick-up of mail from a postal facility on a regular basis are replaced with Caller Service.

.132 Carrier Holdout Service and Other Exceptions

b. Caller Service Does Not Include General caller service provided to customers under provisions of 351 of the Postal Service Manual.

b. Caller Service Does Not Inculde General Delivery Service.

c. Caller Service Does Include any call service provided to customers who are not entitled to such service under provisions of 351 of the Postal Service Manual.

.133 Reservation of Caller Numbers

a. Callers of record may reserve caller numbers for future use. Postmasters shall determine which numbers may be reserved and may restrict this service in accordance with local conditions. The fee for this special service is detailed in 169.31.

b. If a caller has reserved a number and subsequently receives mail addressed to that number or otherwise notifies the Post Office that he intends to begin receiving mail addressed to that number, then the appropriate semi-annual rate for caller service will be charged and no return of the reservation fee or any part of the reservation fee will be made. If the customer continues to receive mail addressed to the number he will be charged the appropriate caller fee and for the next fiscal year no reservation fee will be charged.

.14 *How To Rent a Lockbox or Obtain Caller Service*

.141 Application for Post Office Box, Form 1093

Form 1093, obtainable from any postmaster, must be filled out completely and submitted to the postmaster at the post office where box or caller service is desired. The application will be approved or denied by the postmaster. Furnishing false information on the application is sufficient reason for denial. (See 169.8).

.142 Known Applicant

A known applicant shall be issued a box or provided caller service upon submission of Form 1093 and payment of the proper rent or fee.

.143 Unknown Applicant

a. Applicant must present his driver's license, military ID or other valid identification to postmaster upon submission of the application, Form 1093.

b. Postmasters will verify that the applicant resides or conducts business at the address shown. Verification procedures will be initiated immediately upon receipt of the application. Verification for local customers should be completed within three working days.

c. A box will be assigned or caller service provided immediately upon approval of the application and receipt of box rent or caller fee.

.144 Minors

Boxes may be rented or caller service extended to minors unless parents or guardians object in writing.

.15 *Conditions of Use*

.151 Individuals

An individual boxholder or caller may receive through his box or caller service mail addressed to himself, his family, relatives or other persons residing in his household whether permanently or temporarily if the mail is properly addressed to the box number.

.152 Firms, Corporations, Associations or Institutions

A firm, corporation, association, public or private institution may receive through its box or caller service mail addressed to its name, any of its officials, employees, inmates, students, teachers or other individuals associated with the organization if the mail is properly addressed to the box number.

.153 Mail Addressed to a Box Number

Mail addressed only to a box number may be delivered to the boxholder or caller as long as no improper or unlawful business is conducted.

.154 Updating Application Form

Whenever any information required on Form 1093, Application for Post Office Box, changes or becomes obsolete it shall be the duty of the boxholder or caller to file a revised box application reflecting such changes not later than 10 days after such changes occur.

.16 *Restriction on Use*

.161 Accumulation of Mail

Only matter which has passed through the mail, or official postal notices may be placed in a post office box. Boxholders shall remove mail promptly from their boxes. If mail is to be accumulated for more than 30 days, specific arrangements must be made in advance with the postmaster.

.162 Unlawful Activity

No post office boxes or caller service may be used for or in connection with a scheme or enterprise which:

a. Violates any Federal, State or local law;

b. Breaches an agreement with a Federal, State or local agency whereby the boxholder has agreed to discontinue a specified activity, or

c. Violates or attempts to evade any order of a court or administrative body.

.163 Forwarding

Boxes and Caller numbers may not be used when the sole purpose is, by subsequently filing change of address orders, to have mail forwarded or transferred to another address by the Postal Service free of charge. Submission of more than two forwarding orders in any one year shall be considered sufficient evidence to demonstrate this purpose and warrant closure of the box by the Postal Service.

169.2 LOCKBOX SERVICE RENTAL RATES AND FEES

.21 *Changes in Rates*

a. Revisions of lockbox rental rates and fees may be made effective at any time. If rates for the rental of a lockbox are changed by reason of a general rate change, discontinuance of a post office and reestablishment of same as a station or branch of another post office or the extension of carrier delivery service, no customer shall be made to pay at the newly established rate until the end of the current semi-annual period for which he has already paid. Box customers will receive specific notice when such a change is made. Customers shall pay the difference, if any, between the old rate and the new rate for any period paid in advance of their current period if rates are changed.

b. Rates listed are for a semi-annual or 6-month period and one or two periods may be paid at a time.

.22 *Key Fee*

Keys for key-type lockboxes shall be issued to customers upon receipt of payment of $1.00 for each key. This shall apply to all keys, including those initially issued to new customers. Account for payments for keys the same as box rents. However, issue Form 3544, Non-Postal Receipt. Other key information is in 169.4.

.23 *Rental Rate Groups*

.231 Three Groups for Establishment of Lockbox Rents

Three groups are established for the determination of lockbox rental rates. These groups are called Group 1, Group 2 and Fourth Class Post Office Group.

.232 New Groups as Related to Previously Established Groups

In general the new groups are related to the previously established groups in the following manner:

a. Group 1 is subdivided into five subgroups called Subgroup A, B, C, D or E. These subgroups correspond to previously established Groups A, B, C, D and E respectively.

b. Group 2, is subdivided into three subgroups called Subgroup F, G or H. These subgroups correspond to previously established Groups F, G and H respectively.

c. Fourth Class Post Office Group corresponds to previously established Group I.

.233 Assignment of Subgroups in Group 1

a. Facilities established prior to July 1, 1973 which were classified as Group A, B, C, D or E on or before July 1, 1973 shall use Subgroup A, B, C, D or E lockbox rental rates respectively.

b. All mail processing facilities not under the administration of a post office and new post offices providing city carrier service established after July 1, 1973 shall use Subgroup A lockbox rental rates.

c. Facilities established after July 1, 1973, which are under the administration of a post office providing city carrier delivery service, shall be subject to the same lockbox rental rates as those applicable to the main post office.

d. If a post office is discontinued and reestablished as a station or branch of another post office, then that facility will be subject to the same lockbox rental rates as those applicable to the main office.

e. Post offices at which city carrier service is initiated after July 1, 1975 shall be subject to Subgroup A rental rates.

.234 Assignment of Subgroups in Group 2

a. Facilities established prior to July 1, 1973 and which were classified as Group F, G or H on or before July 1, 1973 shall use Subgroup F, G or H lockbox rental rates respectively except as provided in 169.242c.

b. Facilities which were established as Group F, G, H or I on or before July 1, 1973, but which have experienced any of the changes listed in 169.233 shall be reclassified as indicated.

.24 *Rental Rate Group Application Rules for Customers*

.241 Group 1 Rates, General Rule

Group 1 rates are charged to customers for whom the rental of a lockbox constitutes a premium delivery service. If a customer has available to him or if he is otherwise eligible for delivery by carrier, then his lockbox is a premium means of delivery and he shall be charged at Group 1 rates.

.242 Group 1 Rates, Specific Application

a. In mail processing facilities not under the administration of a post office, all customers shall be charged at the appropriate Group 1, Subgroup A rates.

b. Post offices providing city carrier delivery shall normally charge all customers at the appropriate Group 1 rates in all of their facilities except that a customer eligible for Group 2 rates in that post office may rent one lockbox at Group 2, Subgroup F rates (See 169.244).

c. Post offices not providing city carrier delivery shall charge Group 1, Subgroup A rates to any customers who do any one of the following:

(1) Give as a permanent address of residence or business a different post office or city from that where the box is rented.

(2) Are located on or receive service from a rural carrier route.

(3) Rent more than one lockbox. (First box excepted.)

d. The qualification of a business, association, organization, church or other institution to rent a box at Group 1 or Group 2 rates shall be determined separately from the qualification of any associated person.

.243 Group 2 Rates, General Rule

Group 2 rates are charged customers who do not have available to them, or who are not eligible for, delivery by carrier. Thus, the basic delivery service available to them is more restricted than that available to those who are charged Group 1 rates. However, the use of a lockbox represents a premium service as compared with general delivery.

.244 Group 2 Rates, Specific Application

a. In mail processing facilities not under the administration of a post office, no customer shall be eligible for Group 2 box rental rates.

b. Post offices providing city carrier delivery service shall charge Group 2, Subgroup F rates to customers who:

(1) Are not eligible for and do not receive carrier delivery because of the provisions of Part 155 or Part 156 of the Postal Service Manual and are not served by another post office; or

(2) Are resident in or have a place of business in an area not served by carrier and where an agreement has been made between the postmaster and all customers in that area that delivery will not be provided by carrier but by post office box at a postal facility. Such customers may rent one lockbox at Group 2, Subgroup F rates. They may rent additional lockboxes at the appropriate Group 1 rates.

c. The qualification of a business, association, organization, church or other institution to rent a box at Group 1 or Group 2 rates shall be determined separately from the qualification of any associated person.

.245 Fourth Class Post Office Group

In fourth class post offices all customers shall be charged at the rates established for Fourth Class Post Office Group. Postmasters shall make every effort to reserve boxes in fourth class post offices for local customers.

.246 Customers Not Residents of the United States

A customer who is not a resident of the United States or its territories or possessions shall pay box rent at the appropriate Group 1 rate except at fourth class post offices. Such a customer shall not be entitled to rent boxes at Group 2 rates.

.25 *General Delivery*

Customers who are eligible to rent a post office box at Group 2 rates but who in fact do not rent a lockbox may be extended no more than one separation in General Delivery without time limit. Any caller separations utilized in addition to the one General Delivery separation by such customers shall be charged for at the full caller rate. Customers who are not eligible to rent a post office lockbox at Group 2 rates may not receive General Delivery for periods longer than 30 days except as provided in Part 113 of the Postal Service Manual.

.26 *Facilities Primarily Serving Academic Institutions*

.261 Boxes Owned by the Institution

The Postal Service shall not set or collect rent for boxes owned by an academic institution if the boxes are separate from designated Postal Service areas and serviced by employees or agents of the institution. The institution may set and collect rent for such boxes, but the revenues shall not be considered to be Postal Service funds. In all other cases rents shall be collected as otherwise provided in 169.2 and the Postal Service shall retain the revenues.

.262 Adjustment of Rental Rates to Meet Semester Schedules

In facilities primarily serving academic institutions or the students of such institutions, box rental rates may be adjusted to better fit the semester schedules as follows:

Period for Box Rental	*Adjusted rate*
95 days or less	½ semi-annual rate.
96 to 140 days	¾ semi-annual rate.
141 to 190 days	Full semi-annual rate.
191 to 230 days	1¼ semi-annual rate.
231 to 270 days	1½ semi-annual rate.
271 days to full year	Full annual rate.

Round off fractions to next highest ten cents. Make no refunds for discontinued service when box has been rented under these provisions.

.27 *Rental Rates for Lockboxes*

Cubic Inch Capacity Of Lockboxes	RATE OR FEE PER SEMI-ANNUAL PERIOD				
	To 315	316 to 600	601 to 900	901 to 1200	1201 & OVER
Box Size	1	2	3	4	5
GROUP 1:					
SUBGROUP A	12.50	15.00	20.00	25.00	30.00
SUBGROUP B	10.00	14.00	17.50	20.00	27.00
SUBGROUP C	8.00	10.00	12.50	17.50	22.50
SUBGROUP D	7.00	8.00	10.00	15.00	17.50
SUBGROUP E	5.50	6.50	7.50	12.50	15.00
GROUP 2:					
SUBGROUP F	2.50	3.00	4.00	6.00	7.50
SUBGROUP G	2.00	2.50	3.00	4.50	6.00
SUBGROUP H	1.50	2.00	2.50	3.50	4.00
FOURTH CLASS POST OFFICE GROUP	1.00	1.00	1.00	1.00	1.00

.28 *Effective Date of Lockbox Rental Rates*

The foregoing rates shall be effective July 1, 1975 for all periods of service beginning on or after July 1, 1975. Postmasters shall collect these rents and fees during the last 20 days of June 1975 as provided in these regulations.

169.3 CALLER SERVICE RATES AND FEES

.31 *Reserved Number Fee*

Each number reserved by a caller for future use shall be charged for at the rate of $10 per Postal fiscal year or any part of such a fiscal year as determined from October 1 to September 30. Account for these revenues in the same manner as box rent.

(NOTE: for the period July 1, 1975 to September 30, 1975 there shall be no charge for reserved numbers provided the customer pays the $10 fee for the forthcoming fiscal year as defined in this section.)

.32 *Caller Service Fees*

.321 When Rates are Effective

Revisions in caller service rates and fees may be made effective at any time. When rates are changed, customers shall pay at the newly established rate at the end of the current semi-annual period for which they have already paid. If customers have paid for an annual period, then at the end of their current semi-annual period they shall pay the difference, if any, between the new rate and that which they have already paid for the second semi-annual period. One or two periods may be paid at a time.

.322 Basic Caller Service Fee

a. General Rule. The basic fee for Caller Service for semi-annual periods beginning on or after July 1, 1975 to be applied to each Caller Number or Separation used shall be $35.00. Account for these revenues the same as box rent.

b. Exceptions. If a Caller utilizes many post office box numbers but receives only a bulk delivery of his mail, not separated to those numbers either because his mail is sorted to a unique five-digit ZIP Code held only by him or because sortation is made by caller name or other identification, then the Caller shall be charged the basic caller fee for each separation actually made. He shall be charged the reserved number fee

V 40 168 APR 8 75 XUM

for each of the post office box numbers to which mail received by the caller is addressed.

c. Local Agreements. No local agreements between postmasters and Caller Service or Lockbox Service customers shall be established which shall in any way contravene the provisions of these regulations with respect to the determination or collection of Caller Service fees.

.323 Caller Numbers Which Are Also Assigned to a Lockbox

If a caller presently uses as a Caller Number the number assigned to an existing physical lockbox in the same facility from which he receives service, then he must pay the appropriate rental fee for that lockbox in addition to the caller service fee.

169.4 Equipment: Keys, Locks and Boxes

.41 Keys

.411 Issuance of Keys

Customers utilizing key-type lockboxes will be supplied with keys according to their needs upon payment of the key fee for each key issued.

.412 Restriction on Source of Keys

Customers utilizing post office lockboxes are not permitted to obtain or use any keys except those issued through the Postal Service.

.413 How to get new or additional keys

Customers may obtain keys by submitting Form 1094, Application for Additional Keys to Post Office Box. Customers will pay the appropriate key charges at that time.

.414 Refund of Key Fee

This section shall be applicable only to boxholders renting a key-type box for the first time on or after July 1, 1975.

Upon termination of rental the Postal Service will refund to boxholders the purchase price for up to two keys if such keys are returned to the post office where the box was rented. Use Form 1096 as the receipt but account for funds returned the same way as for box rents or fees returned.

.415 Worn or Broken Keys

Worn or broken keys are replaced without charge if the keys are returned.

.416 Acceptance of Orders for Additional or New Keys

Postmasters shall not hold orders for new or additional keys for more than 24 hours. Key orders should not be consolidated except for general orders for keys for an entire unit of lockboxes. Process all orders for keys as rapidly as possible.

.417 Key Inventory Maintenance

At least three keys must be provided for each keylocking lockbox. Keep at least one key on hand at all times for issuance upon submission by boxholder of Form 1094. Upon issuance of the spare key, requisition a replacement. Withdraw keys in excess of reserve requirements, tag to indicate the key or lock number, file numerically and store in a safe place.

.42 Boxes

.421 Surrender of Keyless Boxes

When a keyless box is surrendered, change the combination before reassignment.

.422 Surrender of Key Boxes

When a customer surrenders his box and fails to return all keys, send Form 1099, Notice to return keys to the customer's new address.

.43 Locks

Do not rent boxes having broken locks. When the lock on a rented box is broken, replace the lock and issue the same number of keys to the customer as had been issued to him for the broken lock. Make no charge for these keys. Do not force customer to change boxes or box numbers due to the failure of postal equipment.

.44 Changing Locks

Always change the lock immediately when a key type box is surrendered.

169.5 INTERNAL CONTROLS, RECORD KEEPING AND RENT PAYMENT

.51 Record of Boxholders

Keep a record of boxes, boxholders and callers on Form 1091, Box Rent Register for Keylocking and Keyless Equipment in five files as follows:

a. Cards for vacant boxes in numerical sequence.

b. Cards for boxes rented for one semi-annual period, by month rent is due and in numeric sequence within the month.

c. Cards for boxes rented for two semi-annual periods, by month rent is due and in numeric sequence within the month.

d. Cards for callers paid for one semi-annual period, by month fee is due and in numeric sequence within the month.

e. Cards for callers paid for two semi-annual periods, by month payment is due and in numeric sequence within the month.

.52 Payment of Box Rent and Caller Fees

This section establishes semi-annual payment periods for customers that are not bound by the Postal Service fiscal year.

.521 Rent Paid in Advance

Box rent and caller fees must be paid in advance for no less than a semi-annual or no more than an annual period. Fees and rent may be paid by check to postmasters. However, checks sent by mail must be received by the postmaster by the due date.

.522 Receipt

A Forum 1538, Box Rent Receipt, will be given for each box rent or caller payment except that:

a. Boxholders or callers who hold more than one box or caller number may be issued one receipt for payment for all of their box and caller numbers.

b. Maintain a separate list of such multiple number customers showing numbers used, customer name, fee charged and normal due date for each, and mark receipt with the number (count) of boxes or caller numbers paid for at that time.

.523 Payment Periods

Payment may be made for any six or twelve consecutive months. The beginning of a payment period is established on the date of the approval of the application to rent a box.

.524 How a Customer May Change His Payment Period Date

Boxholders of record may change their payment period by submitting a new application to rent a box and noting on the application the month they wish to use as the start of their payment period. This date must be before the end of their current payment period and rents and fees already paid will not be refunded or applied to the new payment period, except that a remaining period of six (6) months or more will be applied to six (6) months of the new payment period.

.525 Boxholders and Callers of Record

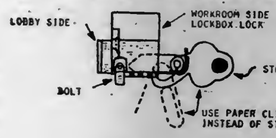
Boxholders and callers of record may, during the last month of their rental period, pay rent for their next semi-annual or annual payment period.

.526 Rented Before 15th of Month

If a lockbox is rented by a new boxholder on or before the 15th of any month the rental period shall be from the first day of that month. If rented after the 15th day of the month the rental period shall be computed from the first day of the following month.

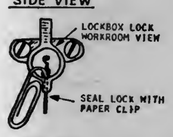
.53 Notices

.531 Notices of rent due, Notice 32, shall be placed in boxes or handed to callers 20 days before rent is due. If a boxholder or caller is temporarily out of town, and if he has filed a temporary forwarding order, the notice will be sent to him.



.532 Notices to government agencies paying rent and fees on an annual basis will be postmarked before release and will show the box number(s) and the amount due for one year.

.54 Past Due Box Rent or Caller Fee



.541 Boxes

a. Plug the Lock or Change the Combination if a Lockbox Customer Fails To Pay Rent by the Due Date and has not submitted a change of address order or otherwise indicated that he is terminating the service.

b. Prohibition of Access to a Key-Type Lock may be accomplished according to the following diagram. If key-stops are available, use them but if they are not available use a paper clip. Do Not Order any Key Stops. They Are a Discontinued Item but May Be Used Until Stock on Hand Is Exhausted.

SIDE VIEW

END VIEW

c. Continue to Distribute the Mail to the Box for up to 10 Days. If at the end of that time the customer has not paid the rent or left other instructions, remove the mail from the box and treat that mail and any subsequent mail addressed to the customer at that box as undeliverable mail unless it is possible to deliver it by carrier or general delivery.

d. At the End of 10 Days Close the Box if the customer has not paid his rent or submitted other instructions.

e. If the Customer Pays His Rent unplug the lock or notify him of his new combination.

.542 Callers

a. If a caller fails to pay his fee by the due date and does not submit a change of address order and does not attempt to obtain his mail, retain his mail for a period not exceeding 10 days, then treat his mail as undeliverable mail unless it may be readily delivered by carrier.

b. If a caller fails to pay his fee by the due date and does not submit a change of address order and attempts to obtain his mail within 10 days, explain to him or his agent that at the end of the tenth day after the due date, if payment or a change of address order is not received his mail will be delivered to his street address and that he will lose

the use of his post office or caller box number(s) and may not obtain his mail at the postal facility. Continue to give him his mail until the end of the ten day period, but do not provide him in excess of one separation (in case multiple separations had been provided) during that period.

.55 When a Box Is Surrendered

.551 Rerental of a Surrendered Box

If a customer surrenders a box before the end of the payment period, the box may be rented to another customer after 15 days. If the box has been closed by the Judicial Officer, the box may be rented to another customer after 20 days. (See Section 169.8.)

.552 Surrender of a Box Shall Consist of

A box shall be considered to have been surrendered if:

a. The boxholder submits a permanent change of address order.

b. The boxholder refuses or fails to pay appropriate rent or fees by the due date.

c. The boxholder submits in writing an order to discontinue service.

.553 Surrender of a Box Shall Not Consist of

A box shall not be considered to have been surrendered if:

a. The boxholder dies or disappears before the end of the period for which he has rented the box.

b. The boxholder submits a temporary change of address order.

c. There is a change of address order issued for mail going to the box by any person other than the boxholder.

.554 Refund of Box Rent and Caller Fees

When a lockbox is closed or surrendered or Caller Service discontinued, no portion of the rent or fees shall be refunded to a customer who has paid on a semi-annual basis. A customer who has paid on an annual basis and who discontinues service before the end of his annual period may apply for a refund of that portion of his payment that is applicable to a full, remaining semi-annual period.

169.6 Operations

.61 Placing in Boxes

Place mail addressed to post office boxes in proper boxes immediately after distribution. If the flow of the mail allows it and no lengthy delays will occur, attempt to place larger items such as newspapers, catalogs and magazines in boxes prior to placing smaller items such as letter mail and flats into the boxes.

.62 Withdrawal From Boxes

Mail may be delivered to authorized persons who have forgotten their key or cannot open their box. However, mail should not be handed out to persons properly supplied with keys who can open their boxes but who make it a practice of requesting that their mail be given to them.

.63 Delivery by Carrier

Do not remove mail from boxes of address for delivery by carrier except for the case of box service discontinued due to failure to pay rent.

.64 Multi-Pickup Callers

Callers who desire to call at a postal facility for their mail more than once in any 24 hour period as a regular practice shall make provisions with the postmaster for the establishment of a proper and reasonable schedule of pick-up. Postmasters shall determine the times and places most satisfactory to the post office.

.65 Standards

.651 Box Service

If the postmaster determines that safety and security provisions allow it and if he determines that there is sufficient public demand, then he may keep the box lobby open to the public 24 hours per day.

.652 Caller Service

Caller service shall be provided during normal hours of business. Caller service may be provided at all other hours during which mail is undergoing distribution within the facility if it is consistent with normal operations.

.66 Changes of Address Order

.661 Standard Procedure

a. When the number of Forms 3575, Change of Address Order, average five or more per month, maintain a change of address order book (supply item 0–391–M) in the box and caller section.

b. Use a separate address change sheet, Form 1564, for each letter of the alphabet separated by item 0–89(b), Index.

c. As Forms 3575 are received, post pertinent information chronologically on appropriate sheet. Make appropriate entries on Forms 1564 whenever a former boxholder fails to furnish a forwarding order at the time he surrenders a lockbox or when it is closed for nonpayment of rent.

d. Maintain one set of Forms 1564 at the main office and one set at the station or branch providing the service.

e. After entry to Forms 1564, file Forms 3575 chronologically by months or alphabetically, in a manner that will permit withdrawal at the end of the month after requests are 2 years old. See 158.2 for forwarding time limit.

f. If the number of requests on Form 3575 average les than 5 per month follow the same procedure except that Forms 3575 may be filed in alphabetical order and used for reference purpoees in lieu of a register.

.662 Flag Boxes

a. White labels identify lockboxes for which there are no entries on Forms 1564. Use a colored label or a colored dot or tab applied to a white label to identify all boxes for which there ARE entries on Form 1564 and for which mail may be received addressed to other than the current boxholder.

b. If a box has changed hands more than 3 times in the last year use any reasonable means in addition to colored labels or dots that will identify this box as one which will probably receive mail addressed to other than the current boxholder.

c. If desired, the dates on which colored labels should be replaced with white labels or dots or tabs removed from white labels may be shown on the labels. Except for these dates only information relating to the name of the current boxholder shall be shown on any label. No data pertaining to the forwarding address of the former boxholder shal be placed on labels either before or after rental of the box.

d. Case all mail addressed to color coded boxes, other than that addressed to or in care of the current boxholder, to a single separation for determination of forwarding address from Forms 1564. If no forwarding address is on record, distribute the mail to the boxes as addressed unless the boxholder of record advises that mail for the addressee shall not be placed in his box.

e. Mail rejected by the boxholder shall be treated as undeliverable mail unless it may be readily delivered by carrier.

f. Replace Colored Labels With White Labels or Remove Colored Dots or Tabs From White Labels Immediately Following Termination of a Forwarding or Change of Address Order or as Soon as it Is Apparent That a Need for the Color Coding No Longer Exists.

169.7 (Reserved)

169.8 Refusal To Provide Service.

.81 Refusal To Provide Service to a New Customer.

.811 Postmaster's Authority.

A postmaster may refuse to rent a post office box or extend caller service to any person if he has reason to believe that such person:

a. has falsified the application or has, within the previous 2 years, physically abused a box or violated any regulation or contractual provision relating to the care and use of a box or caller service; or

b. is likely to use a box or caller service in connection with a scheme or enterprise in violation of 169.162.

.812 Customer's Right of Appeal

Whenever the rental of a post office box or the extension of new (or additional) caller service is refused, the postmaster shall, upon written request made within 10 days, furnish the applicant with the reasons for such refusal in writing. Where the refusal to rent or extend is based in whole or in part upon the grounds specified in 169.811, an appeal may be taken in the same manner and subject to the same limitations as where a Notice of Intent To Close a Post Office Box (or to terminate caller service) has been issued. (See 39 C.F.R. 958).

.82 Refusal To Continue To Provide Service to a Current Customer

.821 Postmaster's Authority

Postmasters do not have authority to close a post office box or terminate caller service without referral to higher authority except in cases of failure to pay rent or where the boxholder has clearly and unequivocably given up the box or abandoned it under the conditions given in 169.552.

.822 Grounds for Closure or Refusal To Renew

A box may be closed or caller service terminated whenever the boxholder has falsified the application for the box or has violated, or is violating, any of the regulations or contractual terms or conditions relating to its care and use.

.823 Procedures

Postmasters or any other postal officials who have reason to believe that any regulation or contractual provision governing the rental or use of a post office box or caller service has been or is being violated shall send a report of the facts, with any supporting documents to the General Counsel.

.824 Notice of Intent To Close a Post Office Box

Whenever the General Counsel is in receipt of substantial evidence which he believes warrants the closing of a post office box or the termination of caller service, he may issue Notice of Intent To Close a Post Office Box (or to terminate caller service). Such notice shall state clearly the reasons for the contemplated action and inform the boxholder or caller of his right to appeal this determination to the Judicial Officer, United States Postal Service, Washington, D.C. 20260.

.825 Service of Notice

The Notice of Intent To Close a Post Office Box (or terminate caller service) may be

V 40 168
APR 8 75
XUM

served on the boxholder or caller by certified mail, with restricted delivery, addressed to his post office box or other address. Obtain a return receipt therefor and forward immediately to the General Counsel. If restricted delivery cannot be made, deposit the notice in the box or in the receptacle provided for the caller for delivery as ordinary mail and this shall constitute valid service. Complete a post office delivery receipt, Form 3849, and send to the General Counsel. Endorse both the Form 3849 and the return receipt for the certified mail to show that restricted delivery could not be made and that the notice was delivered as ordinary mail. An order of the Judicial Officer closing a post office box or terminating caller service or affirming the refusal to grant an original or renewal application for such box or caller service shall bar the granting of any similar application wherever made, by or on behalf of the person involved, until such order has been revoked, amended or modified by the Judicial Officer.

.826 Right of Appeal

a. No appeal may be taken from a Notice to Close a Post Office Box (or to terminate caller service) issued under 169.82 unless it is postmarked no later than 20 days after service of such notice.

b. If no appeal is taken within 20 days after service of the Notice of Intent to Close a Post Office Box (or to terminate caller service), the box may be closed or the caller service terminated by order of the General Counsel without further notice to the boxholder or caller.

.83 *Disposition of Mail*

When a box has been closed or caller service terminated pursuant to 169.81 or 169.82 or by the order of the Judicial Officer, notify the boxholder or caller and transfer mail addressed to the box or to the box number assigned to the caller to general delivery. Hold the current time limitation for forwarding orders. At the end of the applicable period, all mail addressed to the caller shall be handled as undeliverable. However, this shall not preclude compliance with sender's request in accordance with 122.32.

DEFENSE SCIENCE BOARD TASK FORCE ON EXPORT OF U.S. TECHNOLOGY: IMPLICATIONS TO U.S. DEFENSE

Task Force Meeting

A task force of the Defense Science Board on "Export of U.S. Technology: Implications to U.S. Defense" will meet in closed session on 1 May 1975 at the Pentagon, Washington, D.C.

The mission of the Defense Science Board is to advise the Secretary of Defense and the Director of Defense Research and Engineering on overall research and engineering and to provide long range guidance in these areas to the Department of Defense. The task force will provide an assessment of the implications to U.S. defense of current and impending exports of U.S. technology to serve as a basis for determination of Defense policy.

In accordance with section 10(d) of Appendix I, Title 5, United States Code, it has been determined that this Defense Science Board task force meeting concerns matters listed in section 552(d) of Title 5 of the United States Code, and specifically subparagraph (1) thereof, and that accordingly this meeting will be closed to the public.

MAURICE W. ROCHE,
Director, Correspondence and Directives, OASD (Comptroller).

DEFENSE SCIENCE BOARD TASK FORCE ON NAVAL SURFACE WARFARE

Advisory Committee Meeting

The Defense Science Board Task Force on "Naval Surface Warfare" will meet in closed session on 28-29 April 1975 at the Pentagon, Washington, D.C.

The mission of the Defense Science Board is to advise the Secretary of Defense and the Director of Defense Research and Engineering on overall research and engineering and to provide long range guidance in these areas to the Department of Defense.

The Task Force will undertake a review of the adequacy and directions of U.S. Navy programs in surface offensive operations in the face of continuing increases in Soviet capabilities in naval weapons, command and control, and out-of-area operations. The Task Force will concentrate first on U.S. programs in tactical surveillance, targeting, command and control, and weaponry for surface engagement to help assure that our R&D investments yield the greatest improvement in our total force capabilities, when deployed in quantities we can afford. Classified details of U.S. and Soviet systems will be reviewed.

In accordance with section 10(d) of Appendix I, Title 5, United States Code, it has been determined that this Task Force meeting concerns matters listed in section 552(b) of Title 5 of the United States Code, specifically subparagraph (1) thereof, and that accordingly this meeting will be closed to the public.

MAURICE W. ROCHE,
Director, Correspondence and Directives OASD (Comptroller).

DEFENSE SCIENCE BOARD TASK FORCE ON THEATER NUCLEAR FORCES R&D REQUIREMENTS

Advisory Committee Meeting

The Defense Science Board Task Force on Theater Nuclear Forces R&D Requirements will meet in closed session on 1 and 2 May 1975 in the Pentagon, Washington, D.C.

The mission of the Defense Science Board is to advise the Secretary of Defense and the Director of Defense Research and Engineering on overall research and engineering and to provide long range guidance in these areas to the Department of Defense.

The Task Force will provide an analysis of technology and systems applicable to theater nuclear forces and indicate promising solutions to the problem area for possible implementation within the Department of Defense.

In accordance with section 10(d) of Appendix I, Title 5, United States Code, it has been determined that this Task Force meeting concerns matters listed in section 552(b) of Title 5 of the United States Code, specifically Subparagraph (1) thereof, and that accordingly this meeting will be closed to the public.

Corps of Engineers

ENVIRONMENTAL ADVISORY BOARD

Notice of Meeting

In accordance with Pub. L. 92-463, notice is hereby given that the next meeting of the Environmental Advisory Board of the Chief of Engineers will be held on 20-21 May 1975 at Dellroy, Ohio and Deer Creek Reservoir, near Columbus, Ohio. All plenary sessions of the meeting are open to the public. Time, location, and subjects of each session follow:

20 MAY 1975, ATWOOD LAKE, DELLROY, OHIO

0930---- Opening remarks.
1015---- Civil works update.
1045---- Briefing on Huntington, W. Va., and Charleston, W. Va., urban studies.
1330---- Discussion with local participants in urban studies.
1430---- Public participation in the planning process.
1630---- Update on interagency mitigation efforts.

21 MAY 1975, ATWOOD LAKE, DELLROY, OHIO

0830---- Replying to misstatements concerning Corps of Engineers projects.
0900---- On-going Corps of Engineers Environmental research.
1000---- Field trip to land waste treatment facility, Deer Creek Reservoir, Ohio.

Persons desiring additional information should contact Colonel John F. Wall, Assistant Director of Civil Works for Environmental Programs, Office of the Chief of Engineers, telephone 202-693-7093. Persons desiring to attend the meeting should contact Mr. George Hartman at Huntington, West Virginia, telephone 304-529-2296, so that adequate seats can be provided.

DEPARTMENT OF JUSTICE

Law Enforcement Assistance Administration

NATIONAL ADVISORY COMMITTEE ON CRIMINAL JUSTICE STANDARDS AND GOALS

Meeting

This is to provide notice of meetings for the Civil Disorders and Terrorism, Private Security, and Juvenile Delinquency Task Forces to the National Advisory Committee on Criminal Justice Standards and Goals.

The Civil Disorder and Terrorism Task Force will meet on April 21 and 22, 1975. The April 21 meeting will be held in the conference room, 13th floor, Law Enforcement Assistance Administration (LEAA), U.S. Department of Justice, 633 Indiana Avenue NW., Washington, D.C. 20531. The April 22 meeting will be held in the conference room, 3rd floor, 633 Indiana Avenue NW., Washington, D.C.

The Private Security Task Force will meet on April 22 and 23, 1975, in the conference room, 13th floor, 633 Indiana Avenue, Washington, D.C.

The Juvenile Delinquency Task Force will meet on May 2 and 3, 1975, in the conference room, 13th floor, 633 Indiana Avenue NW., Washington, D.C.

All the above meetings will convene at 10 a.m. and will be open to the public.

This will be the first meeting of each of the Task Forces. Discussion will focus upon the functions and duties to be performed by the Task Forces as well as a discussion of the task force subject matter.

For further information, contact William T. Archey, Acting Director, Policy and Analysis Division, Office of Planning and Management, 633 Indiana Avenue NW., Washington, D.C. 20351.

GERALD H. YAMADA,
Attorney-Advisor,
Office of General Counsel.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[NM 25035, 25110, 25111]

NEW MEXICO

Applications

MARCH 31, 1975.

Notice is hereby given that, pursuant to section 28 of the Mineral Leasing Act of 1920 (30 U.S.C. 185), as amended by the Act of November 16, 1973 (87 Stat. 576), El Paso Natural Gas Company has applied for one dehydration site and four 4½ inch natural gas pipelines rights-of-way across the following lands:

NEW MEXICO PRINCIPAL MERIDIAN,
NEW MEXICO

T. 20 S., R. 28 E.,
Sec. 10, NE¼SE¼;
Sec. 11, N½SW¼;
Sec. 20, SE¼¼SW¼, S½SE¼;
Sec. 21, SW¼SW¼;
Sec. 28, N½NW¼, W½NE¼.
T. 22 S., R. 32 E.,
Sec. 2, SW¼NW¼.

The dehydration site will occupy 5.0 acres and the pipelines will convey natural gas across 1.984 miles of national resource lands in Lea and Eddy Counties, New Mexico.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the applications should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should promptly send their name and address to the District Manager, Bureau of Land Management, P.O. Box 1397, 1717 West Second Street, Roswell, NM 88201.

RAUL E. MARTINEZ,
Acting Chief, Branch of Lands and Minerals Operations.

Acting Chief, Branch of Lands and Minerals Operations.

[FR Doc.75-9029 Filed 4-7-75;8:45 am]

OUTER CONTINENTAL SHELF, OFFSHORE SOUTHERN CALIFORNIA

Public Hearing Regarding Proposed Oil and Gas Lease Sale

In accordance with 43 CFR 3301.4, a public hearing will be held beginning at 9 a.m., on May 6, 1975, in Room 217–A of the Los Angeles Convention and Exhibition Center, 1201 South Figueroa Street, Los Angeles, California 90015, for the purpose of receiving comments and suggestions on the draft environmental impact statement prepared pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969 for a proposed 1975 Outer Continental Shelf (OCS) oil and gas lease sale of lands offshore Southern California (site-specific DEIS). The hearing will extend through May 8, 1975, if necessary.

The hearing will benefit the Department by providing additional comments and views of Federal, State, and local agencies, and interested members of the public, concerning the discussion and analysis contained in the site-specific DEIS, which will be used in preparing an FEIS for the proposal.

In addition to providing the Secretary with these additional comments and views on the DEIS, itself, the hearing will provide additional information from both public and private sectors to help evaluate fully the potential effects of the proposed offering of 297 tracts on the total environment, aquatic resources, aesthetics, recreation, and other resources in the entire area during potential exploration, development, and production phases of lease operations.

While the principal purpose of the hearing is to receive comments and views on the discussion and analysis contained in the DEIS, and while comments relating to action on the proposal will be more appropriately submitted after the EIS has been put in final form, the Bureau of Land Management will accept and consider any comments submitted on the proposal during the public hearing and the comment period associated therewith.

After the site-specific EIS and the EIS for the proposed program to accelerate OCS oil and gas leasing nationwide (OCS programmatic EIS) have been completed in final form, State and local officials and interested members of the public will be able to use these two documents in making comments on what action the Department should take or what alternative course of action the Department should adopt. These comments will become appropriate after the comment period on the final EISs has expired.

The site-specific DEIS was made available to the public on February 21, 1975. Copies of this statement can be obtained at the Pacific Outer Continental Shelf Office, Bureau of Land Management, 7663 Federal Building, 300 North Los Angeles Street, Los Angeles, California 90012, and from the Office of Public Affairs, Bureau of Land Management (130), Washington, D.C. 20240.

Copies of the site-specific DEIS are also available for review in the main public libraries in various coastal cities in the sale area.

Interested individuals, representatives of organizations, and public officials wishing to testify at the hearing are requested to contact the Manager, Pacific OSC Office, at the above address by 4:00 p.m., p.d.t., May 2, 1975. Individuals, representatives of organizations, and public officials who wish to testify during the course of the 3-day hearing on the site-specific DEIS, and who also plan to attend any session of the State-wide hearings on the Preliminary Coastal Plan of the California Coastal Zone Conservation Commission during the period May 6–8, 1975, should notify the Manager, Pacific OCS Office, of their plans in this regard when submitting their respective requests to be heard. These persons should list their preferences as to the timing of their respective appearances. Every effort will be made to accommodate the schedules of potential speakers.

Time limitations make it necessary to place a general limit of 10 minutes on the length of oral presentations. However, individuals who desire to make oral presentations in excess of 10 minutes should specify in their request to be heard the length of time they will require to make their presentation. Every effort will be made to accommodate potential speakers by granting, to the extent possible, requests for additional time allotments. The Bureau of Land Management will grant priority, with respect to additional time allotments, to State and local officials and representatives of recognized citizens, and other organizations (such as the Sierra Club and Seashore Environmental Alliance). Oral statements may be supplemented, however, by more complete written statements, which may be submitted to the hearing officer at the time of presentation of the oral statements. Written statements presented in person at the hearing will be included in the hearing record.

To the extent that time is available after presentation of oral statements by those who have given advance notice, the hearing officer will give others present an opportunity to be heard.

Written comments from interested individuals, representatives of organizations, and public officials who are unable to attend the hearing on the proposed lease sale and site-specific DEIS also should be addressed to the Manager, Pacific OCS Office, at the above address. There will be two commenting periods during which the Department will accept written testimony and comments on the proposed lease sale and site-specific DEIS, which are as follows:

(1) *Site-specific DEIS hearing comment period.* The Department will accept written testimony and comments on the site-specific DEIS, and on the proposal, until May 23, 1975. This will allow time for those unable to testify at the hearing to make their views known and for the submission of supplemental materials by those presenting oral testimony.

(2) *OCS programmatic FEIS review and comment period.* The Department will also accept written comments on the site-specific DEIS, and on the proposal, during a review and commenting period of 60 days after an OCS programmatic FEIS has been submitted to the Council on Environmental Quality (CEQ) and made available to the public.

Interested individuals, representatives of organizations, and public officials submitting written comments during this period will have the opportunity to comment on those topics, issues, and aspects of the site-specific impact statement that may be interrelated with or affected by the discussion and analysis in the OCS programmatic FEIS.

The Secretary will make no decision during this 60 day review and commenting period regarding the OCS programmatic FEIS or the proposal covered by the site-specific DEIS. The public will retain the opportunity to review and comment on the site-specific FEIS, when prepared, for a period of 30 days after that statement has been submitted to CEQ and made available to the public. The Secretary will make no decision during this latter period regarding the proposal covered by the site-specific FEIS. It is possible that the commenting periods on the OCS programmatic FEIS and the site-specific DEIS and/or FEIS will to some extent overlap. But, in any event, the Secretary will make no decision regarding the southern California lease sale proposal until the periods for comments on both the programmatic and site-specific EIS have expired.

After all testimony and comments submitted during comment period no. (1) have been reviewed and evaluated, a site-specific FEIS will be prepared. Written comments submitted during comment period no. (2) may provide additional information and data appropriate for consideration in preparing the site-specific FEIS, or it may provide material appropriate for consideration in revising

COYOTE DAMAGE CONTROL

Report on Emergency Use of M-44 Devices

Notice is hereby given on the emergency use of M-44 devices by the Department of Interior's operational predator damage control program for the month of January. This use, including protection for cattle, is in compliance with the experimental use permit (No. 6704-EXP-6G) issued by the Environmental Protection Agency pursuant to Section 5 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended (7 U.S.C. 135-135k), and in accordance with 40 CFR 162.19, as promulgated in the FEDERAL REGISTER on January 31, 1974 (39 FR. 3939). This report is made pursuant to FEDERAL REGISTER notice of June 20, 1974 (39 FR 2216G).

Actual M-44 use for January 1975 is as follows:

M-44 Emergency use January 1975

State	Number of counties	Number of ranches	Number of cattle, sheep, and goats protected	Number of M-44's used
Arizona	3	16	1,495	223
California	1	4	2,268	310
Montana	21	37	22,705	910
New Mexico	9	18	10,438	560
Oklahoma	4	6	1,579	74
Oregon	4	21	2,690	189
Texas	30	159	95,355	1,492
Utah	5	7	3,355	104
Wyoming	8	40	28,170	746
Totals	86	308	175,166	4,330

One or more coyotes were taken with this device on 121 of the 308 emergency areas, but losses were not necessarily halted in each case. During this month, 295 coyotes were taken by this device. Other species taken with the device during this period include 78 foxes, 13 feral dogs, 5 raccoons, 9 skunks, 6 opossums, and 1 bobcat.

All of the above use of M-44 devices as a supplemental tool to attempt to resolve coyote depredation on cattle, sheep and goats was conducted by trained service personnel in accordance with the Procedure For Advance Identification and Approval of Areas For the Possible Emergency Use of Sodium Cyanide Delivered by the M-44 Device for the Control of Depredating Canids, as it appears in the

FEDERAL REGISTER, Volume 39, No. 120—Thursday, June 20, 1974.

HOWARD N. LARSEN,
Acting Director, U.S. Fish and Wildlife Service.

APRIL 2, 1975.

ENDANGERED SPECIES PERMIT; LEOPARD

Receipt of Application

Notice is hereby given that the following application for a permit is deemed to have been received under section 10 of the Endangered Species Act of 1973 (Pub. L. 93-205).

Applicant: Mr. Lucio Cristiani, 1024 Stoeber Avenue, Sarasota, Florida 33500.

50 CFR 17 ENDANGERED WILDLIFE

SUBPART C

17.23

(1) Spotted Leopard (Panthera pardus); three (3) animals as follows: female born 10/2/73 at Tucson Zoo, Tucson Ariz.; female born 5/2/72 at Oklahoma City Zoo; female born 5/2/72 at Oklahoma City Zoo.

(2) Not Applicable

(3) The three animals involved are performing animals which have been trained by the applicant. They perform as a group while restrained by leashes. The performance consists of various poses, leaps, and other movements which demonstrate the normal physical abilities of this species. The animals are tame and no whips, guns, or other devices are used to force their performance. The display is planned to demonstrate the beauty, grace, and physical attributes of this species. In the course of traveling with these animals the applicant frequently appears before groups in schools and hospitals, invariably without compensation, and such appearances are used in an educational manner to inform the viewers of the endangered status of this species and to urge cooperation with conservation movements.

Two of the three animals are now approaching the age at which breeding is advisable. The applicant intends to acquire a suitable male, preferably of the black color phase, when such an animal becomes legally available. The offspring will be retained for continuance of the applicant's breeding program, insofar as possible. Surplus animals will be made available to bona fide zoological parks.

(4) When not on tour the animals involved are housed at the applicant's home, 1024 Stoeber Ave., Sarasota, Florida. On tour, the animals are housed in a custom-built cage which measures approximately 6' x 3'6" x 4'6" and is designed to allow the animals to be housed together or in separate compartments, through the use of sliding partitions. This cage is carried in a semi-trailer van which has provisions for heating when needed. A freezer unit in this van holds a frozen meat supply adequate for three to four weeks.

(5) Not applicable; no importation planned.

(6) Not applicable. The animals for which the permit is requested all were born in zoological parks in the U.S. and no removal of animals from the wild is involved in the activity for which the permit is requested.

(7) Not applicable; no importation planned.

Additional information: The applicant has spent his entire life working with and around exotic animals of many species. He is of the fifth generation in his family to be so employed.

The applicant is willing to participate in a cooperative breeding program and to contribute data to a studbook.

Documents and other information submitted in connection with this application are available for public inspection during normal business hours at the Service's office in Suite 600, 1612 K Street NW., Washington, D.C.

Interested persons may comment on this application by submitting written data, views, or arguments, preferably in triplicate, to the Director (FWS/LE), U.S. Fish and Wildlife Service, Post Office Box 19183, Washington, D.C. 20036. All relevant comments received on or before May 8, 1975, will be considered.

Dated: April 1, 1975.

C. R. BAVIN,
Chief, Division of Law Enforcement, U.S. Fish and Wildlife Service.

STUDY PROPOSAL: THE NORTHERN ROCKY MOUNTAIN WOLF: STATUS, ECOLOGY AND FUTURE

I. INTRODUCTION

The Northern Rocky Mountain Wolf, *Canis lupus irremotus* (Goldman, 1937), has recently been placed on the Endangered Species list. Little is known about numbers that might exist in the U.S.A. but Stelfox (pers. comm. 1973) indicates that substantial numbers of wolves exist in the Rocky Mountains of Canada, and some on the plains of Alberta. Although within the range of *irremotus*, wolves observed recently in Montana and in Waterton Lakes National Park (Appendix I), may in fact be another subspecies. The most likely place for finding wolves, in any numbers, in the Western U.S.A. is in the very

V 40168
APR 8 75
XUM

northern end of the Rocky Mountains. Several reasons support this idea: 1.) The mountains here are continuous with the Canadian Rockies providing ready routes of travel. 2.) There are vast unroaded wilderness areas immediately south of the Canadian border. First is the Waterton-Glacier Parks area on the border, then the Middle Fork of the Flathead River, a large area presently being considered for formal Wilderness classification. Adjacent to this to the south is the million acre Bob Marshall Wilderness and to its southeast is the Lincoln-Scapegoat Wilderness. Thus, between the Canadian border and Highway 200 near Lincoln, Montana is a stretch of 150 miles separated only by U.S. Highway 2 immediately south of Glacier Park, and the summer-only road over Logan Pass in Glacier Park.

In this same general area there have also been a number of sightings reported and several kills have been verified within the past 10 years. These have been east and south of the Bob Marshall area and east and west of Glacier Park. If there is no breeding population in this area, there are undoubtedly fair numbers of wolves that travel down the foothills on either side of the Rockies, particularly in winter. There have also been reports of wolves in the Madison Range northwest of Yellowstone National Park which should be checked out.

II. OBJECTIVES

The major objectives of the proposed study are:

A. To determine the recent distribution and status of C.1. *irremotus* in the northern Rocky Mountains.

B. To determine if and where breeding populations exist and then to obtain more detailed information about their basic ecology (prey selection, pack size, pack range, denning sites, etc.) It would also be useful to know where the nearest breeding populations occur in Canada.

C. To assess areas that have a potential for supporting C.1. *irremotus*.

III. PROCEDURES

A.1. Make personal and mail contact with public land managers and wildlife personnel from various agencies to acquaint them with study and the need to collect and forward all information on wolves.

2. Conduct aerial and ground censusing of most promising areas. Areas with fairly numerous sightings should be checked out.

3. Follow up as many reports and leads as possible with personal on-the-ground contacts with the individuals involved.

B.1. Location of potential breeding populations will be derived in part from A.1. to A.3. above. Potential packs should then be monitored intensively to determine consistency of use of an area, by airplane and ground checking where feasible.

2. If pack is found as in B.1.; trapping and radio tagging a member of each pack would be very useful in following movements, locating prey killed, etc. Even if a lone individual is consistently using an area much useful data could be gained by radio tracking that individual.

C.1. There are a number of potential sites where C.1. *irremotus* might be supported if dispersers from other areas were to arrive, so it would be useful to determine where these might be. Factors to consider in such an evaluation are: availability of prey, competition from other predators, and distance from livestock raising areas. The vast amount of federal land in the area proposed for study would lend itself well to such an investigation. There are several areas supporting big game winter range and at fairly great distance from livestock areas where wolves might someday return and remain unmolested.

IV. RESPONSIBILITIES AND WORK SCHEDULE

The project would be supervised by Dr. Robert R. Ream, School of Forestry, University of Montana. Field work would be initiated in January 1974, and it appears most feasible to hire two assistants, one to cover each side of the Rockies to carry out procedures A.1. to A.3. initially. January through March should be the best time for locating wolves and/or their tracks both on the ground and aerially. If it appears feasible we could swing into action on procedures listed under Objective B. in April or May. If radios are then utilized, tracking should be continued on a minimum of once per week through the remainder of the year. It would be desirable to continue such a study into the future.

Dr. Ream would also spend considerable time in the field during the summer months checking out reports, tracking, or checking for sign and howling in the more promising areas. He and his Wife, Dr. Catherine H. Ream, spent three years working on ecological studies in the Boundary Waters Canoe Area of the Superior National Forest in N.W. Minnesota. During the last year there, they spent a considerable amount of time working with Dr. L. David Mech when he was initiating his current study. They are experienced at howling for wolves, checking for sign, working with radio tagging and tracking techniques, and checking out wolf kills.

Documents and other information submitted in connection with this application are available for public inspection during normal business hours at the Service's office in Suite 600, 1612 K Street NW., Washington, D.C.

Interested persons may comment on this application by submitting written data, views, or arguments, preferably in triplicate, to the Director (FWS/LE), U.S. Fish and Wildlife Service, Post Office Box 19183, Washington, D.C. 20036. All relevant comments received on or before May 8, 1975 will be considered.

Dated: April 1, 1975.

C. R. BAVIN,
Chief, Division of Law Enforcement, U.S. Fish and Wildlife Service.

National Park Service

OGLALA SIOUX CEDAR PASS CONCESSION ENTERPRISE

Intention To Extend Concession Contract

Pursuant to the provisions of section 5 of the Act of October 9, 1965 (79 Stat. 969; 16 U.S.C. 20), public notice is hereby given that on May 8, 1975 the Department of the Interior, through the Director of the National Park Service, proposes to extend the concession contract with Oglala Sioux Cedar Pass Concession Enterprise, authorizing it to provide concession facilities and services for the public at Badlands National Monument for a period of one year from January 1, 1975, through December 31, 1975.

The foregoing concessioner has performed its obligations under the expiring contract to the satisfaction of the National Park Service, and therefore, pursuant to the Act cited above is entitled to be given preference in the renewal of the contract and in the negotiation of a new contract. However, under the Act cited above, the Secretary is also required to consider and evaluate all proposals received as a result of this notice. Any proposal to be considered and evaluated must be submitted on or before May 8, 1975.

Interested parties should contact the Assistant Director, Concessions Management, National Park Service, Washington, D.C. 20240, for information as to the requirements of the proposed contract.

Dated: March 31, 1975.

JOHN E. COOK,
Associate Director, Park System Management.

[FR Doc.75-9019 Filed 4-7-75;8:45 am]

GLEN CANYON NATIONAL RECREATION AREA, ARIZONA, UTAH

Master Plan Preliminary Environmental Assessment; Public Meeting and Wilderness Study Alternatives; Public Hearings

Notice is hereby given that public meetings for the purpose of receiving comments and suggestions on a preliminary environmental assessment for planning and implementation of management and development policies for Glen Canyon National Recreation Area, and public hearings to receive comments and suggestions on alternatives for the proposed establishment of wilderness within Glen Canyon National Recreation Area in accordance with section 9 of the Act of October 27, 1972 (86 Stat. 1313; 16 U.S.C. 460dd–8) and in accordance with Departmental procedures as identified in 43 CFR 19.5, will be held on May 14, 1975, in the Carl Hayden Visitor Center, Glen Canyon Dam, Page, Arizona; and on May 15, 1975, in the courtroom of the Kane County Courthouse, 1 block north of U.S. Highway 89, in Kanab, Utah; and on May 17, 1975, in Room 106 of the State Office Building, State Capitol, Salt Lake City, Utah; and on May 19, 1975, in the auditorium of the First Federal Savings Building, 3003 North Central, Phoenix, Arizona.

The public meetings at Page, Arizona; Kanob, Utah; and Salt Lake City, Utah, will convene at 9 a.m. to consider the preliminary environmental assessment on the Master Plan, and the public hearings at 2 p.m. to hear comments and suggestions on the preliminary assessment of wilderness alternatives. The public meeting at Phoenix, Arizona, will convene at 2 p.m. to consider the preliminary environmental assessment on the Master Plan, and the public hearing at 7 p.m. to hear comments and suggestions on the preliminary assessment of wilderness alternatives.

A packet will be available on April 14, 1975, containing a chart showing management objectives and supporting actions, a chart and maps showing land zoning alternatives, maps of development alternatives, a map showing boundary adjustment alternatives, a map showing potential development sites along the Navajo Reservation Shoreline, descriptions and maps showing wilderness proposal alternatives and a list of impact topics for the Master Plan and wilderness alternatives. The packet may be obtained from the Superintendent, Glen Canyon National Recreation Area, P.O. Box 1507, Page, Arizona 86040; from the Assistant to the Regional Director, State of Utah, National Park Service, Room 2208, 125 South State Street, Salt Lake City, Utah 84138; or the Regional Director, Rocky Mountain Region, National Park Service, P.O. Box 25287, 655 Parfet Street, Denver, Colorado 80225.

A description of the preliminary boundaries and a map of the wilderness alternatives will also be available for review in the above offices and in Room 1210 of the Department of the Interior Building at 18th and C Streets NW., Washington, D.C.

Interested individuals, representatives of organizations and public officials are invited to express their views in person at the above mentioned Master Plan public meetings and wilderness public hearings provided they notify the following officials.

Those wishing to express their views, in person, concerning wilderness alternatives should notify the Hearing Officer, in care of the Superintendent, Glen Canyon National Recreation Area, P.O. Box 1507, Page, Arizona 86040, by May 12, 1975, of their desire to appear. Those not wishing to appear in person, may submit written statements to the Hearing Officer at that address for inclusion in the official record which will be held open until June 19, 1975. Written statements presented in person at the hearing will be considered for inclusion in the transcribed hearing record. However, all materials so presented at the hearing shall be subject to determinations that they are appropriate for inclusion in the transcribed hearing record.

Time limitations may make it necessary to limit the length of oral presentations at the wilderness hearings and to restrict to one person the presentation made in behalf of an organization. An oral statement may, however, be supplemented by a more complete written statement, which may be submitted to the Hearing Officer at the time of presentation of the oral statement for inclusion in the official record. To the extent that time is available after presentation of oral statements by those who have given the required advance notice, the Hearing Officer will give others present an opportunity to be heard.

After an explanation of the packet materials by a representative of the National Park Service, the Hearing Officer, insofar as possible, will adhere to the following order in calling for the presentation of oral statements:

(1) Governor of the State or his representative.
(2) Members of Congress.
(3) Members of the State Legislature.
(4) Official representative of the counties in which the proposed wilderness is located.
(5) Officials of other Federal agencies or public bodies.
(6) Organizations in alphabetical order.
(7) Individuals in alphabetical order.
(8) Others not giving advance notice, to the extent there is remaining time.

Those wishing to express their views, in person, concerning Master Plan alternatives should notify the Superintendent, Glen Canyon National Recreation Area, P.O. Box 1597, Page, Arizona 86040, by May 12, 1975, of their desire to appear. Those not wishing to appear in person, may submit written statements to the Superintendent at the above address by June 19, 1975.

While the public meetings concerning Master Plan alternatives are not formal hearings, they will be conducted in a similar manner. Again, time limitations may make it necessary to limit the length of oral presentations and restrict to one person the presentation made in behalf of an organization. More complete written statements may also be submitted when making an oral presentation. Persons who wish to address both the Master Plan and the wilderness alternatives must separate their comments and appear at or make written comments for both the Master Plan public meeting and the wilderness public hearing.

Dated: April 2, 1975.

RICHARD C. CURRY,
Associate Director, National Park Service.

[FR Doc.75-8965 Filed 4-7-75;8:45 am]

VOYAGEURS NATIONAL PARK, MINNESOTA

Notice of Establishment

Whereas, more than 34,000 acres of land, including all land required to be donated by the State of Minnesota, are now under the ownership of the United States and under the administrative jurisdiction of the National Park Service within the boundaries of Voyageurs National Park, as the boundaries are set forth in section 102 of the act of January 8, 1971 (84 Stat. 1971), and the acreage so acquired, in my opinion, is efficiently administrable to carry out the purposes of such act.

Now, therefore, I, Rogers C. B. Morton, Secretary of the Interior, hereby give notice of the establishment of Voyageurs National Park, such establishment to become effective on April 8, 1975.

The boundaries of the National Park, which encompass an area generally identical to that described in section 102 of the act of January 8, 1971, supra, are located in St. Louis and Koochiching Counties, Minnesota, and are more particularly described as follows:

VOYAGEURS NATIONAL PARK

ST. LOUIS COUNTY

4th Principal Meridian

T. 67 N., R. 17 W.,
Sec. 1, Government lots 2, 3, 4, 7, and 8, SW¼NW¼ and the W½SW¼;
Sec. 2, Government lots 1, 2, 3, 4, 5, 6, 8, and 9, S½NE¼, SE¼NW¼, N½SE¼ and the SE¼SE¼;
Sec. 3, Government lots 1, 2, 3, 4, 5, 6, 7, and 9, S½NW¼ and the SW¼;
Sec. 11, Government lot 1;
Sec. 12, Government lots 2, 3, 4, and 5.
T. 68 N., R. 17 W.,
All of secs. 1 through 12 inclusive and secs. 14 through 35 inclusive;
Sec. 36, Government lots 1, 2, 3, 4, 5, 6, 7, and 10 and the W½SW¼.
T. 69 N., R. 17 W.,
All of said township lying within the continental United States.
T. 68 N., R. 18 W.,
All of secs. 1 through 13 inclusive;

FEDERAL METAL AND NONMETAL MINE SAFETY ADVISORY COMMITTEE

Public Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), notice is hereby given that the Federal Metal and Nonmetal Mine Safety Advisory Committee, authorized to be established under the Federal Metal and Nonmetallic Mine Safety Act (Pub. L. 89-577), will meet on Wednesday, May 7, Thursday, May 8, and Friday, May 9, 1975, starting at 9 a.m. on Wednesday and at 8:30 a.m. on the following days until the Advisory Committee concludes its business, at the Bourbon Orleans Ramada, 717 Orleans Street, New Orleans, LA 70116—Telephone Number: Area Code 504–523–5251.

The matters to be discussed at this meeting include suggested revisions and revocations of certain standards concerning electricity and gassy mines which are carried over from the January 29–31, 1975, meeting of the Advisory Committee held in Tucson, Arizona. In addition the agenda will consist of suggested revocation, new, and revised safety standards and definitions relating to ground control; ventilation; loading, hauling, dumping; electricity; use of equipment; and, man hoisting. Copies of the agenda and suggested standards are available for the public and may be obtained from or may be examined in the office of the Executive Secretary.

The meeting of the Advisory Committee is open to the public. Public attendance will be limited to seating available in the meeting room of the Bourbon Orleans Ramada. Persons desiring to attend this meeting are requested to notify the Executive Secretary in writing of their intention to attend the meeting by Wednesday, April 30, 1975.

Written data, views or arguments concerning the subjects to be considered may be filed with the Executive Secretary by Wednesday, April 30, 1975. Any such submission, timely received, will be provided to the members of the Advisory Committee and will be included in the record of the meeting. Persons wishing to orally address the Committee at the meeting should submit a written request to be heard to the Executive Secretary no later than Wednesday, April 30, 1975. The request must contain a short summary of the intended presentation and an estimate of the amount of time that will be needed. At the meeting the Chairman will announce whether oral presentations will be allowed and, if so, under what conditions. All written notices and requests to the Executive Secretary should be addressed as follows:

Mr. Robin A. Van Meter
Executive Secretary
Federal Metal and Nonmetal Mine Safety Advisory Committee
Room 2517
U.S. Department of the Interior
Washington, D.C. 20240
Telephone Number: Area Code 202–343–4405
After April 12, 1975, use:
Room 706
Ballston Tower No. 3
4015 Wilson Boulevard
Arlington, VA 22203
Telephone Number: Area Code 703–235–8460

Dated: April 2, 1975.

JACK W. CARLSON,
Assistant Secretary of the Interior.

FLUE-CURED TOBACCO ADVISORY COMMITTEE

Meeting

The Flue-Cured Tobacco Advisory Committee will meet in the Board Room of the Flue-Cured Tobacco Cooperative Stabilization Corporation, 522 Fayetteville Street, Raleigh, North Carolina 27602, at 1 p.m., on Thursday, April 24, 1975.

The purpose of the meeting is to discuss flue-cured tobacco selling schedules recommended by the Committee after the first designation period March 3–April 4, 1975. Also, matters, as specified in 7 CFR Part 29, Subpart G, § 29.9404 will be discussed.

The meeting is open to the public but space and facilities are limited. Public participation will be limited to written statements submitted before or at the meeting unless their participation is otherwise requested by the Committee Chairman. Persons, other than members, who wish to address the Committee at the meeting should contact Mr. J. W. York, Director, Tobacco Division, Agricultural Marketing Service, 300 12th Street SW., United States Department of Agriculture, Washington, D.C. 20250, (202) 447–2567.

Dated: April 2, 1975.

E. L. PETERSON,
Administrator.

SHIPPERS ADVISORY COMMITTEE MEETING

Public Meeting

Pursuant to the provisions of section 10(a)(2) of the Federal Advisory Committee Act (86 Stat. 770), notice is hereby given of a meeting of the Shippers Advisory Committee established under Marketing Order No. 905 (7 CFR Part 905). This order regulates the handling of oranges, grapefruit, tangerines, and tangelos grown in Florida and is effective pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The committee will meet in the Waldo Room of the Driftwood Inn, 3150 Ocean Drive, Vero Beach, Florida, at 10:30 a.m., on May 1, 1975.

The meeting will be open to the public and a brief period will be set aside for public comments and questions. The agenda of the committee includes analysis of current information concerning market supply and demand factors, and consideration of recommendations for regulation of shipments of the named fruits.

The names of committee members, agenda, and other information pertaining to the meeting may be obtained from Frank D. Trovillion, Manager, Growers Administrative Committee, P.O. Box R, Lakeland, Florida 33802; telephone 813–682–3103.

Dated: April 2, 1975.

JOHN C. BLUM,
Associate Administrator.

DISTRIBUTORS' ADVISORY COMMITTEE MEETING

Public Meeting

Pursuant to the provisions of section 10(a)(2) of the Federal Advisory Committee Act (86 Stat. 770), notice is hereby given of a meeting of the Distributors' Advisory Committee established under Marketing Order No. 918 (7 CFR Part 918). This order regulates the handling of fresh peaches grown in Georgia and is effective pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The committee will meet in the Dempsey Motor Hotel, Macon, Georgia, at 1:30 p.m., local time, on April 24, 1975.

The meeting will be open to the public and a brief period will be set aside for public comments and questions. The agenda of the committee includes analysis of current information concerning market supply and demand factors, and consideration of recommendations for regulation of shipments of fresh Georgia peaches by grade, size, or maturity.

The names of committee members, agenda, summary of the meeting, and other information pertaining to the meeting may be obtained from J. T. Scruggs, Manager, Industry Committee, P.O. Box 6704, Orlando, Florida 32803; telephone 305–894–9512.

Dated: April 4, 1975.

1975 FINAL ADDENDUM TO 1974 GYPSY MOTH FINAL ENVIRONMENTAL STATEMENT

Availability of Final Addendum

Pursuant to section 101(2)(C) of the National Environmental Policy Act of 1969, the Forest Service, and Animal and Plant Health Inspection Service, Department of Agriculture, have prepared for 1975 activities, a Final Addendum to USDA 1974 Gypsy Moth Suppression and Regulatory Program, USDA–FS–APHIS (Adm) 74–58.

The Final Addendum concerns a cooperative suppression program with the States of Pennsylvania, New York, New Jersey, and Rhode Island to treat approximately 54,920 acres of high value forest land. Three different insecticides will be used. Some acres will be treated with carbaryl, trichlorfon or *Bacillus thuringiensis* to protect forest resources from damage by the gypsy moth. The cooperative regulatory program is to prevent artificial long-distance spread and to eradicate remote infestations in the United States.

This Final Addendum was filed with CEQ on March 28, 1975.

Copies are available for inspection during regular working hours at the following locations:

V 40168
APR 8 75
XUM

USDA, Forest Service
So. Agriculture Bldg., Room 2230
12th St., & Independence Ave. SW.,

FEED GRAIN

Donations for the Nambe, Tesuque, Santa Clara, Picuris and San Ildefonso Indian Lands in New Mexico, and the Pyramid Lake Indian Lands in Nevada

Pursuant to the authority set forth in section 407 of the Agricultural Act of 1949, as amended (7 U.S.C. 1427), and Executive Order 11336, I have determined that:

1. The chonic economic distress of the needy members of the Nambe, Tesuque, Santa Clara, Picuris and San Ildefonso Indian Lands in New Mexico, and Pyramid Lake Indian Lands in Nevada has been materially increased and become acute because of severe and prolonged drought creating a serious shortage of livestock feeds. These lands are reservations or other lands designated for Indian use and are utilized by members of the Indian tribes for grazing purposes.

2. The use of feed grain or products thereof made available by the Commodity Credit Corporation for livestock feed for such needy members of the tribes will not displace or interfere with normal marketing of agricultural commodities.

Based on the above determinations, I hereby declare the reservations and grazing lands of these tribes to be acute distress areas and authorize the donation of feed grain owned by the Commodity Credit Corporation to livestockmen who are determined by the Bureau of Indian Affairs, Department of the Interior, to be needy members of the tribe utilizing such lands. These donations by the Commodity Credit Corporation may commence upon signature of this notice and shall be made available through the duration of the existing emergency or to such other time as may be stated in a notice issued by the Department of Agriculture.

Signed at Washington, D.C. on April 2, 1975.

EARL L. BUTZ,
Secretary.

Rural Electrification Administration

POWELL TELEPHONE CO.; TENNESSEE

Proposed Loan Guarantee

Under the authority of Pub. L. 93-32 (87 Stat. 65) and in conformance with applicable agency policies and procedures as set forth in REA Bulletin 320-22, "Guarantee of Loans for Telephone Facilities," dated February 4, 1975, published in proposed form in the FEDERAL REGISTER, September 16, 1974, (39 FR 33228-33229) notice is hereby given that the Administrator of REA will consider providing a guarantee supported by the full faith and credit of the United States of America for a loan in the approximate amount of $2,100,000 to Powell Telephone Company, Powell, Tennessee. The loan funds will be used to finance the construction of facilities to extend telephone service to new subscribes, and improve telephone service for existing subscribers.

Legally organized lending agencies capable of making, holding and servicing the loan proposed to be guaranteed may obtain information and details of the proposed project from Mr. K. B. Scarbro, President, Powell Telephone Company, P.O. Box 69, Powell, Tennessee 37849.

To assure consideration, proposals must be submitted on or before May 8, 1975 to Mr. Scarbro. The right is reserved to give such consideration and make such evaluation or other disposition of all proposals received, as the Powell Telephone Company and REA deem appropriate. Prospective lenders are advised that financing for this project is available from the Federal Financing Bank under a standing loan commitment agreement with the Rural Electrification Administration.

Copies of REA Bulletin 320-22 are available from the Director, Information Services Division, Rural Electrification Administration, U.S. Department of Agriculture, Washington, D.C. 20250.

Dated at Washington, D.C., this 2d day of April, 1975.

DAVID A. HAMIL,
Administrator,
Rural Electrification Administration.

DEPARTMENT OF COMMERCE

Maritime Administration

[Docket No. S-444]

LYKES BROS. STEAMSHIP CO., INC.

Application

Notice is hereby given that Lykes Bros. Steamship Co., Inc. (Lykes) has applied to amend its present Operating-Differential Subsidy Agreement, Contract No. FMB-50, which expires December 31, 1977, to establish, prior to the opening of the 1975 Great Lakes navigational season, a subsidized service utilizing up to four (4) of its presently subsidized break-bulk vessels of the C3-S-37c, C3-S-37d and C5-S-37e design, to make up to a maximum of ten sailings during the Great Lakes navigation season on essential Trade Area No. 4 between U.S. ports on the Great Lakes and St. Lawrence River, intermediate Canadian Great Lakes ports and other Canadian ports along the general track and ports in Portugal, Spain (south of Portugal), Atlantic Morocco, and the Mediterranean Sea (including the Adriatic Sea, Aegean Sea, Black Sea, and other seas which are arms of the Mediterranean), Southwest Asia from Suez to Burma, inclusive, and Africa on the Red Sea and Gulf of Aden.

Any person, firm or corporation having any interest in such application and desiring a hearing on issues pertinent to section 605(c) of the Merchant Marine Act, 1936, as amended (46 U.S.C. 1175), should by the close of business on April 17, 1975 notify the Secretary, Maritime Subsidy Board in writing, in triplicate, and file petition for leave to intervene in accordance with the Rules of Practice and Procedure of the Maritime Subsidy Board.

In the event a section 605(c) hearing is ordered to be held, the purpose thereof will be to receive evidence relevant to (1) whether the application is one with respect to a vessel to be operated in an essential service, served by citizens of the United States which would be in addition to the existing service, or services, and if so, whether the service already provided by vessels of United States registry in such essential service is inadequate, and (2) whether in the accomplishment of the purposes and policy of the Act additional vessels should be operated thereon.

If no request for hearing and petition for leave to intervene is received within the specified time, or if the Maritime Subsidy Board determines that petitions for leave to intervene filed within the specified time do not demonstrate sufficient interest to warrant a hearing, the Maritime Subsidy Board will take such action as may be deemed appropriate.

(Catalog of Federal Domestic Assistance Program No. 11.504 Operating-Differential Subsidies (ODS).)

By Order of the Maritime Subsidy Board.

Dated: April 3, 1975.

JAMES S. DAWSON, Jr.,
Secretary.

Correction

In the FEDERAL REGISTER of Wednesday, April 2, 1975, at page 14767 there appeared at the top of the 3d column a document correcting one which appeared in the issue of Monday, March 17, 1975. In paragraph 4 the last line should read, "$1 \leq n \leq 16$, is the block".

National Oceanic and Atmospheric Administration

ALASKA

Notice of Receipt of Application for Scientific Research Permit

Notice is hereby given that the following applicant has applied in due form for a permit to take marine mammals for scientific research as authorized by the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361-1407) and the Regulations Governing the Taking and Importing of Marine Mammals.

State of Alaska, Department of Fish and Game, Subport Building, Juneau, Alaska 99301, to take, by killing, forty (40) belukha whales (*Delphinapterus leucas*), in the Bristol Bay area of Alaska.

This project is a continuation of research to determine the feasibility and efficacy of using underwater transmissions of killer whale (*Orcinus orca*) sounds for extended periods of time to prevent the movement of belukha whales up the major river systems in Bristol Bay, and to determine if the food habits of those whales which are allowed to forage in the rivers are significantly different from those of whales which are prevented from entering the rivers. The purpose of this project is to determine the impact of belukha whales on sockeye salmon smolts.

The research will be conducted in conjunction with a project currently being conducted by the Applicant, as authorized by a previously issued Permit, on the effects of killer whale sounds on belukha whales in the Bristol Bay area. The requested animals will be taken with harpoons and killed by shooting, in the vicinity of the Kvichak and Nushagak Rivers, during the period from May 15, 1975, through July 1, 1975. A portion of the requested animals will be taken from among those animals which are prevented from ascending the rivers. The remainder of the requested animals will be allowed to ascend the rivers and forage in a normal manner, prior to being taken. Stomach contents from those two groups will be compared to determine if there are any differences in food habit.

Specimen materials not utilized by the Department of Fish and Game will be made available to other researchers. Skeletal materials will be placed in a curated biological collection, such as that of the University of Alaska. Usable remains will be given, where feasible, to coastal residents for food.

Documents submitted in connection with this application are available in the Office of the Director, National Marine Fisheries Service, Washington, D.C. 20235, and the Office of the Regional Director, National Marine Fisheries Service, Alaska Region, P.O. Box 1668, Juneau, Alaska 99801.

Concurrent with the publication of this notice in the FEDERAL REGISTER, the Secretary of Commerce is sending a copy of the application to the Marine Mammal Commission and the Committee of Scientific Advisors.

Written data or views, or requests for a public hearing on this application should be submitted to the Director, National Marine Fisheries Service, Washington, D.C. 20235 on or before May 8, 1975. The holding of such a hearing is at the discretion of the Director.

All statements and opinions contained in this notice in support of this application are summaries of those of the Applicant and do not necessarily reflect the views of the National Marine Fisheries Service.

WALTER KIRKNESS,
Acting Associate Director for Resource Management, National Marine Fisheries Service.

APRIL 1, 1975.

ALBERT W. ERICKSON

Notice of Receipt of Application for a Scientific Research Permit

Notice is hereby given that the following applicant has applied in due form for a permit to take marine mammals for scientific research as authorized by the Marine Mammal Protection Act of 1972 and the Regulations Governing the Taking and Importing of Marine Mammals.

Dr. Albert W. Erickson, Wildlife Research Professor, College of Fisheries, University of Washington, Seattle, Washington 98195 to conduct scientific research on killer whales (*Orcinus orca*) over a two-year period, involving the tagging or marking of ten (10) killer whales, two of which will be held in captivity for up to two months.

The killer whales will be taken in connection with collecting operations conducted under the provisions of a valid public display permit, in inside waters of the State of Washington, off British Columbia, and in waters off the State of Alaska.

The principal objective of this research is to obtain information on the migration, distribution and trends in abundance of killer whales in the areas under consideration. The proposed research will involve the following activities:

1. Development of a reliable radio-tag, involving the use of killer whales now in captivity, and two wild animals held for up to two months;

2. Radio-tagging, releasing and monitoring up to ten killer whales;

3. Development of other marking techniques, such as cryogenic branding and tattooing, involving two killer whales to be held in captivity for a maximum of two months;

4. Vitally mark captive and wild killer whales, by means of injecting lead acetate, lead versenate, tetra-cycline or alizarine, which will become deposited in bone thus providing a detectable mark, in order to assess changes in body size and other factors; and

5. Collect blood samples from captive and wild killer whales for analysis of reproductive hormones, and biochemical and karyological studies on the genetics of killer whale population stocks.

The two killer whales to be held in captivity for up to two months will be maintained in an open-water net enclosure, measuring 300 feet long by 300 feet wide.

Documents submitted in connection with the above application are available for review at the following locations:

Office of the Director, National Marine Fisheries Service, Department of Commerce, Washington, D.C. 20235;

Regional Director, National Marine Fisheries Service, Northwest Region, 1700 Westlake Avenue North, Seattle, Washington 98109.

Concurrent with the publication of this notice in the FEDERAL REGISTER, the Secretary of Commerce is forwarding copies of this application to the Marine Mammal Commission and the Committee of Scientific Advisors.

Written data or views, or requests for a public hearing on this application should be submitted to the Director, National Marine Fisheries Service, Washington, D.C. 20235 on or before May 8, 1975. The holding of such a hearing is at the discretion of the Director.

All statements and opinions contained in this notice in support of this application are summaries based on information supplied by the Applicant and therefore, do not necessarily reflect the views on the National Marine Fisheries Service.

ROBERT F. HUTTON,
Associate Director for Resource Management, National Marine Fisheries Service.

APRIL 2, 1975.

DOUGLAS WARTZOK AND G. CARLETON RAY

Notice of Receipt of Application for a Scientific Research Permit

Notice is hereby given that the following applicants have applied in due form for a permit to take marine mammals for scientific research as authorized by the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361-1407) and the Regulations Governing the Taking and Importing of Marine Mammals.

Douglas Wartzok and G. Carleton Ray, Department of Pathobiology, The Johns Hopkins University, 615 North Wolfe Street, Baltimore, Maryland 21205, to take, by tagging, fifty (50) bowhead whales (*Balaena mysticetus*) for the purpose of scientific research.

The whales will be tagged by the Applicants, by means of implantable radio transmitters, and tracked from ships, airplanes and fixed ground stations. The proposed research will be conducted, over a three-year period, in the areas of the Bering, Chukchi and Beaufort Seas.

The radio tags will be implantable projectiles which can be attached to the animals from distances of up to 50 meters. The transmitter and battery

V 40168 APR 8 75

pack will be about 1.5 by 20 centimeters, and will be buried in the blubber of the whales with a flexible antenna projecting outwards about 45 centimeters. The radio tags will be fired into the whales, by means of a gun, either from an airplane or a boat.

The proposed research is directed towards a determination of the distribution, abundance and movements of bowhead whales in the areas under consideration, and the influence of sea ice on these factors.

The applicants have submitted a separate application for a permit, to conduct the proposed research, under the Endangered Species Act of 1973.

Documents submitted in connection with the above application are available for review at the following locations: Office of the Director, National Marine Fisheries Service, Washington, D.C. 20235, and the Offices of the Regional Director, Northeast Region, National Marine Fisheries Service, Federal Building, 14 Elm Street, Gloucester, Massachusetts 01930 and the Regional Director, National Marine Fisheries Service, Alaska Region, P.O. Box 1668, Juneau, Alaska 99801.

Concurrent with the publication of this notice in the FEDERAL REGISTER, the Secretary of Commerce is forwarding copies of this application to the Marine Mammal Commission and the Committee of Scientific Advisors.

Written data or views, or requests for a public hearing on this application should be submitted to the Director, National Marine Fisheries Service, Washington, D.C. 20235 on or before May 8, 1975. The holding of such a hearing is at the discretion of the Director.

All statements and opinions contained in this notice in support of this application are summaries of those of the applicants and do not necessarily reflect the views of the National Marine Fisheries Service.

WALTER KIRKNESS,
Acting Associate Director for Resource Management, National Marine Fisheries Service.

APRIL 1, 1975.

G. E. FOLK

Issuance of a Permit for Marine Mammals

On February 12, 1975, notice was published in the FEDERAL REGISTER (40 FR 6522) that an application had been filed with the National Marine Fisheries Service by Dr. G. Edgar Folk, Department of Physiology and Biophysics, The University of Iowa, Iowa City, Iowa 52242 to take four (4) Ringed seals (*Pusa hispida*) for the purpose of scientific research.

Notice is hereby given that on March 31, 1975, and as authorized by the provisions of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407), the National Marine Fisheries Service issued a Permit to G. Edgar Folk, subject to certain conditions set forth therein. The Permit is available for review by interested persons in the Office of the Director, National Marine Fisheries Service, Washington, D.C. 20235, and in the Office of the Regional Director, National Marine Fisheries Service, Alaska Region, P.O. Box 1668, Juneau, Alaska 99801.

W. KIRKNESS,
Acting Director,
National Marine Fisheries Service.

GULF EXHIBITION CORP.

Notice of Receipt of Application for Public Display Permit

Notice is hereby given that the following applicant has applied in due form for a permit to take marine mammals for public display as authorized by the Marine Mammal Protection Act of 1972 and the Regulations Governing the Taking and Importing of Marine Mammals.

Gulf Exhibition Corporation, Gulfarium, Fort Walton Beach, Florida 32548 to take three (3) bottlenosed dolphins (*Tursiops truncatus*), three (3) California sea lions (*Zalophus californianus*) and two (2) pilot whales (*Globicephala macrorhyncha*) for the purpose of public display.

The bottlenosed dolphins will be collected in one of the shallow bayous that branch off Choctawhatchee Bay near Destin, Florida by a professional collector and the staff of the applicant by means of a seine net.

The California sea lions will be taken by a professional collector from the California Channel Islands.

The pilot whales will be taken between the months of August and February from the San Pedro Channel between Santa Catalina Island and the mainland, by means of standard hoop nets of nylon mesh construction. The animals will be captured by a professional collector and under the supervision of members of the applicant's staff.

The dolphins will be maintained and displayed in several pools, which have the following dimensions:

1. Two holding pools, 35 feet long by 20 feet wide by 8 feet deep, connected by a passageway;
2. Training tank, 40 feet long by 20 feet wide by 8 feet deep;
3. Performing tank, 70 feet in diameter and averaging 16 feet in depth.

Two of the requested dolphins will be displayed and maintained each summer for five months in the facility at Marinelife, Rapid City, South Dakota. The animals will be held in one performing tank, 65 feet long by 28 feet wide by 10 feet deep.

The sea lions will be maintained and displayed in three pools which have the following dimensions:

1. Training pool, 60 feet long by 22 feet wide by 5 feet deep;
2. Holding tank, 60 feet long by 10 feet wide by 6 feet deep;
3. Performing pool, 40 feet long by 20 feet wide by 8 feet deep.

The pilot whales will perform in a pool, 70 feet in diameter and 16 feet deep.

Gulfarium and Marinelife of South Dakota are profit organizations. Over 125,000 people visit Gulfarium and some 150,000 people visit Marinelife each year. School and organized groups regularly visit the facilities, Gulfarium assists many students and scientists in their projects and studies.

The staff at Gulfarium has had considerable experience in aquarium maintenance techniques and animal handling and has contributed significantly to further development of such techniques.

The arrangements and facilities for transporting and maintaining the marine mammals requested in the above application have been inspected by a licensed veterinarian, who has certified that such arrangements and facilities are adequate to provide for the well-being of the marine mammals involved.

Documents submitted with the above application are available for review at the following locations:

Office of the Director, National Marine Fisheries Service, Department of Commerce, Washington, D.C. 20235; the Office of the Regional Director, National Marine Fisheries Service, Southeast Region, Duval Building, 9450 Gandy Boulevard, St. Petersburg, Florida 33702 and the Office of the Regional Director, National Marine Fisheries Service, Southwest Region, 300 South Ferry Street, Terminal Island, California 90731.

Concurrent with publication of this notice in the FEDERAL REGISTER, the Secretary of Commerce is forwarding copies of this application to the Marine Mammal Commission and the Committee of Scientific Advisers.

Written views or data, or requests for a public hearing on this application should be submitted to the Director, National Marine Fisheries Service, Department of Commerce, Washington, D.C. 20235 on or before May 8, 1975. The holding of such hearing is at the discretion of the Director.

All statements and opinions contained in this Notice in support of this application are summaries based upon information supplied by the Applicant and, therefore, do not necessarily reflect the views of the National Marine Fisheries Service.

WALTER KIRKNESS,
Acting Associate Director for Resource Management, National Marine Fisheries Service.

MARCH 31, 1975.

NATIONAL FISHERIES PLAN SUBCOMMITTEE OF THE MARINE FISHERIES ADVISORY COMMITTEE

Notice of Public Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C. Appendix I (Supp. II, 1972), notice is hereby given of meetings of the Marine Fisheries Advisory Committee subcommittee on the National Fisheries Plan.

The subcommittee will meet on Thursday and Friday, May 8 and 9, 1975, in the Penthouse Conference Room in Page Building No. 1, 2001 Wisconsin Avenue NW., Washington, D.C.

The subcommittee meeting will commence at 9 a.m., on May 8 and again at 9 a.m., on May 9. The May 8 session will adjourn for the day at about 4:30 p.m., and the May 9 session will adjourn at about 12 noon.

Items for discussion at the subcommittee meeting will include the following:

MAY 8, 1975

9 a.m.—Review by Director, NMFS, of preliminary selections of options for inclusion in the National Fisheries Plan.
10:30 a.m.—Discussion and review of the Director's selections of options. Formulate subcommittee recommendations.
4:30 p.m.—Adjourn for the day.

MAY 9, 1975

9 a.m.—Director, NMFS receives and discusses subcommittee recommendations.
12 noon—Adjourn meeting.

The above meetings will be open to the public throughout. Members of the public requiring additional information should contact:

The Director, National Fisheries Plan, National Marine Fisheries Service, National Oceanic and Atmospheric Administration, Washington, D.C. 20235. Telephone: Area Code 202-634-7328

ROBERT M. WHITE,
Administrator, National Oceanic and Atmospheric Administration.

TOLEDO ZOOLOGICAL GARDENS

Notice of Receipt of Application for a Public Display Permit

Notice is hereby given that the following applicant has applied in due form for a permit to take marine mammals for the purpose of public display, as authorized by the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407), and the Regulations Governing the Taking and Importing of Marine Mammals.

Toledo Zoological Gardens, 2700 Broadway, Toledo, Ohio 43609 to take five (5) California sea lions (*Zalophus californianus*) for the purpose of public display.

The sea lions are to be held in a J shaped pool with a 27,373 gallon capacity and a depth of 5 feet. The pool has adjacent concrete haul-out and shade areas. The water is heated throughout the cold weather seasons.

The sea lions will be taken by a professional collector from the California Channel Islands during the period from November to April.

The Toledo Zoo is a non-profit organization owned by the City of Toledo. The Zoo is visited by some 850,000 people a year and it is estimated that some 50,000 school children a year are conducted through the Zoo. A course in Animal Care Studies is offered in cooperation with the local school board.

The Curator of Mammals has 21 years of experience at the zoo and the staff veterinarian has been with the zoo for 9 years and has published on zoo technology in several professional publications.

The arrangements and facilities for transporting and maintaining the marine mammals requested in the above described application, have been inspected by a licensed veterinarian who has certified that such arrangements and facilities are adequate to provide for the well-being of the marine mammals involved.

Documents submitted in connection with this application are available in the Office of the Director, National Marine Fisheries Service, Department of Commerce, Washington, D.C. 20235, the Office of the Regional Director, National Marine Fisheries Service, Southwest Region, 300 South Ferry Street, Terminal Island, California 90731 and the Office of the Regional Director, National Marine Fisheries Service, Northeast Region, Federal Building, 14 Elm Street, Gloucester, Massachusetts 01930.

Concurrent with the publication of this notice in the FEDERAL REGISTER, the Secretary of Commerce is sending copies of the application to the Marine Mammal Commission and the Committee of Scientific Advisors.

Written views or data, or requests for a public hearing on this application should be submitted to the Director, National Marine Fisheries Service, Department of Commerce, Washington, D.C. 20235 on or before May 8, 1975. The holding of such hearing is at the discretion of the Director.

All statements and opinions contained in this Notice in support of this application are summaries based upon information supplied by the Applicant and, therefore, do not necessarily reflect the views of the National Marine Fisheries Service.

WALTER KIRKNESS,
Acting Associate Director for Resource Management, National Marine Fisheries Service.

TONY J. PETERLE

Issuance of a Permit To Import Marine Mammals

On February 26, 1975 notice was published in the FEDERAL REGISTER (40 FR 8239) that an application had been filed with the National Marine Fisheries Service by Dr. Tony J. Peterle, Department of Zoology, The Ohio State University, 1735 Neil Avenue, Columbus, Ohio 43210, for a Scientific Research Permit to import cetacean specimen materials.

Notice is hereby given that on March 31, 1975, and as authorized by the provisions of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407) the National Marine Fisheries Service issued a permit authorizing the above mentioned importation to Tony J. Peterle, subject to certain conditions set forth therein.

The permit is available for review by interested persons in the Office of the Director, National Marine Fisheries Service, Washington, D.C. 20235, and in the Office of the Regional Director, National Marine Fisheries Service, Northeast Region, Federal Building, 14 Elm Street, Gloucester, Massachusetts 01930.

WALTER KIRKNESS,
Acting Director, National Marine Fisheries Service.

DUPLIN RIVER, GEORGIA

Public Hearing

Notice is hereby given that the Office of Coastal Zone Management, National Oceanic and Atmospheric Administration (NOAA), U.S. Department of Commerce, will hold a public hearing for the purpose of receiving comments on the draft environmental impact statement pertaining to the establishment of an estuarine sanctuary in the Duplin River, McIntosh County, Georgia, which has been submitted to the Secretary of Commerce for approval under the Coastal Zone Management Act of 1972, as amended. A hearing will be held at the McIntosh County Courthouse, Darien, Georgia, at 7:30 p.m., on May 8, 1975. The views of members of the public and interested organizations are invited. Both written and oral statements will be accepted. Presentations will be scheduled on a first-come, first-served basis; but priority will be given to those who have prepared statements. Time will be allotted at the end of the meeting for those without statements who wish to be heard. In order that the maximum opportunity be afforded all those who wish to be heard, presentations may be limited to a maximum of ten minutes or as otherwise appropriate. No audio-visual equipment will be available. Office of Coastal Zone Management staff may wish to question speakers.

Persons or organizations wishing to be heard on this matter should contact the Office of Coastal Zone Management as soon as possible in order that an appearance schedule may be drawn up and definite times established for presentations. The address is: Office of Coastal Zone Management, National Oceanic and Atmospheric Administration, Rockville, Maryland 20852, 202/634-4241.

Written comments may also be submitted by mail to the Office of Coastal Zone Management. Such written comments must be received before May 19, 1975, in order to be considered for inclusion in the final environmental impact statement.

Copies of the draft environmental impact statement may be obtained from the

V 40 68
APR 8 75
XUM

Office of Coastal Zone Management, and copies of the statement as well as of the Georgia estuarine sanctuary proposal, with supporting documents, are also available for inspection by the public at the following locations:

McIntosh County Courthouse
Darien, Georgia
Office of Planning & Budget
270 Washington Street SW.
Room 613
Atlanta, Georgia 30334
Office of Coastal Zone Management
3300 Whitehaven Street NW.
Page 1 Building
Room 301
Washington, D.C. 20235

Comments should address the adequacy of the draft environmental impact statement as well as the desirability of the proposed program.

No verbatim transcript of the hearing will be maintained, but staff present will record the general thrust of remarks.

Following consideration of the comments received at this hearing, as well as written comments submitted to the Office of Coastal Zone Management, the Office of Coastal Zone Management will prepare the final environmental impact statement pursuant to the National Environmental Policy Act of 1969 and implementing guidelines.

R. L. CARNAHAN,
Acting Assistant Administrator for Administration.

ACTIVITIES OF ADVISORY COMMITTEES

Availability of Report on Closed Meetings

Pursuant to the provisions of the Federal Advisory Committee Act (5 U.S.C. App. I, Supp. III, 1973) and Office of Management and Budget Circular No. A-63 of March 27, 1974, those advisory committees of the Department which held meetings in 1974 that were closed to the public have prepared reports on the activities of these meetings. Copies of the reports have been filed and are available for public inspection at two locations:

Library of Congress, Rare Book Reading Room
Room 256, Main Building
10 First Street SE.,
Washington, D.C. 20540
Department of Commerce
Central Reference and Records Inspection Facility
Room 7043, Main Commerce Building
14th Street between Constitution Avenue, and E Street NW.,
Washington, D.C. 20230

The reports cover the partially closed meetings of nine committees and nine subcommittees, the names of which are listed below. There were no advisory committee meetings closed to the public in their entirety.

Committee (—subcommittee)

Computer Peripherals, Components, and Related Test Equipment Technical Advisory Committee
—Computer Related Test Equipment Subcommittee
—Input/Output Equipment Subcommittee and Memory Equipment Subcommittee
Computer Systems Technical Advisory Committee

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Secretary

[Docket No. N-75-275]

MORTGAGE LOANS DEFAULT

Public Hearing

The Department of Housing and Urban Development (HUD) is concerned about the increasing number of defaults in repayment of mortgage loans on HUD subsidized multifamily projects and the impact of such defaults on low and moderate income tenants, the community at large and HUD's mortgage insurance funds. The Department has announced a temporary suspension of further referrals to the Department of Justice of additional foreclosures of subsidized multifamily projects owned by nonprofit and limited dividend mortgagors except in the case of abandonment or similar circumstances.

Notice is hereby given that HUD will hold a public hearing for the purpose of obtaining views from all interested public and private sources regarding policies with respect to defaults under all types of HUD-insured, subsidized multifamily mortgages before and after assignment of mortgages to HUD. Of particular concern are forbearance policies and foreclosure policies including operation and disposition of acquired projects.

The public hearing of record on these matters will be held on May 5 and 6, 1975, at 9:30 a.m. to end no later than 3 p.m. at the Department of Commerce Auditorium, Washington, D.C. (Use main entrance on 14th Street between Constitution and Pennsylvania Avenues).

Requests to appear should be submitted together with a brief outline of the topics to be presented, no later than April 23, 1975, to the Rules Docket Clerk, Office of the General Counsel, Room 10245, 451 Seventh Street, SW., Washington, D.C. 20410, Attention: Multifamily Default Hearing.

Written views from parties not wishing to appear at the hearing should be submitted to the same address, preferably prior to the date of the public hearing and in any event no later than May 9, 1975. All comments and information submitted will be available to the public for examination during business hours at the above address.

Issued at Washington, D.C., April 3, 1975.

CARLA A. HILLS,
Secretary.

National Highway Traffic Safety Administration

[Docket No. EX 75-2; Notice 2]

EXECUTIVE INDUSTRIES, INC.

Petition for Temporary Exemption from Federal Motor Vehicle Safety Standards

The National Highway Traffic Safety Administration has decided to grant Executive Industries Inc. of Anaheim, California, a temporary exemption from compliance with the corner impact requirements of Motor Vehicle Safety Standard No. 215, Exterior Protection, and from Standard No. 216, Roof Crush Resistance, (49 CFR 571.215, 571.216) on grounds of substantial economic hardship.

Notice of the petition was published in the FEDERAL REGISTER on February 6, 1975 (40 FR 5555), and an opportunity afforded for comment.

Executive is a manufacturer of motor homes, producing 1183 such vehicles in its fiscal 1974 (October 1, 1973—September 30, 1974). Anticipating the energy crisis and a decline in demand for recreational vehicles, Executive began in July 1973 to develop a two-passenger sports car. Although the company planned to conform to all applicable Federal motor vehicle safety standards, an outside review of its compliance status in October 1974 disclosed two areas of concern: the corner impact requirements of Standard No. 215 and the roof crush resistance test of Standard No. 216.

With respect to Standard No. 215, Executive's vehicle will meet all requirements of the current standards other

V 40168 APR 8 75 XUM

than corner impact protection. To immediately redesign and retool the body structure and panels of its prototype would add an estimated $850 to the target retail price of $6,900 and delay its initial production by 6 months. It requested a 3-year exemption during which it would design a bumper system meeting the additional corner impact requirements effective September 1, 1975, and any "no damage" bumper standard issued under the Motor Vehicle Information and Cost Savings Act.

Although its designs indicate that the production vehicle will meet Standard No. 216, Executive prefers the security of an exemption until it can produce a prototype and test it. If the tests indicate a failure, it believes that the redesign of the vehicle would add $1,300 to manufacturing costs alone. The vehicle utilizes a rollbar and has a center of gravity behind the occupants which, in the event of a rollover, would in its manufacturer's opinion provide protection equivalent to that provided by windshield pillars strong enough to meet Standard No. 216.

In support of its petition, the company states that "the commitment of another quarter million dollars to product development before preliminary market testing is completed is not economically viable." With the costs of EPA certification and "Validation of FMVSS compliance," start up costs for initial vehicle production are estimated at $500,000. The company's net income for fiscal 1974 was $1,103,976, representing almost a 50 per cent drop from 1973's $2,088,831. Denial of the application would force the company "to abandon this vehicle project, at a monetary loss of more than $315,000 and with a concomitant loss of employment opportunities for its work force." The company believes that an exemption would serve the public interest by allowing it to develop a lightweight bumper system, contributing to better fuel mileage and energy savings over the life of the vehicle, as well as marketing a handcrafted low-volume vehicle of a type usually manufactured abroad. This, if successful, might lessen dollar outflow and would create job opportunities in the United States.

One comment was received supporting the petition. No comments were submitted opposing it. Petitioner is a manufacturer of motor homes whose sales have apparently declined because of the impact of the energy crisis on the sale of vehicles with low fuel economy. It seeks to diversify its product line and apply its knowhow as a manufacturer in the related field of passenger car production. It appears in good faith to have attempted to meet all the Federal standards applicable to passenger cars, discovering two possible areas of non-compliance after its prototype was complete. While the financial impact of a denial on the company does not appear significant in terms of money already invested in the project, a denial would foreclose a legitimate avenue of exploration in the company's attempts to remain viable during the current economic uncertainty. The NHTSA encourages the development of new types of motor vehicles, especially those that have good fuel economy characteristics.

Because the NHTSA has proposed bumper requirements for 1977 and 1978 differing from those that were in effect at the time the petition was submitted, (40 FR 10 and 39 FR 11598) and final rules have not yet been adopted, good cause is considered shown for an exemption until January 1, 1978.

For the reasons discussed above the Administrator finds that a temporary exemption is consistent with the public interest and the objectives of the National Traffic and Motor Vehicle Safety Act. Accordingly, Executive Industries, Inc. is hereby granted NHTSA Temporary Exemption No. 75-2 from Motor Vehicle Safety Standard Nos. 215 (the portion requiring that the protection criteria of section 5.3.1 through section 5.3.7 be met when tested according to sections 7.2) and 216 (49 CFR 571.215, 571.216). The exemptions expire January 1, 1978.

(Sec. 3, Pub. L. 92-548, 86 Stat. 1159 (15 U.S.C. 1410); delegation of authority at 49 CFR 1.51)

Issued on April 3, 1975.

JAMES B. GREGORY,
Administrator.

MERCURY CAPRI WINDSHIELD WIPER ARM, SHAFT, AND MOTOR FAILURES

Public Proceeding

Pursuant to section 152 of the National Traffic and Motor Vehicle Safety Act of 1966, as amended (Pub. L. 93-492, 88 Stat. 1470: October 27, 1974) 15 U.S.C. § 1412, the Associate Administrator, Motor Vehicle Programs, has made an initial determination that a defect relating to motor vehicle safety exists with respect to failures of windshield wiper arms, shafts, and motors in 1971-1973 Mercury Capri automobiles imported by the Ford Motor Company, in that such failures can result in immediate impairment of driver visibility in adverse weather, creating an unreasonable risk of accidents.

A public proceeding will be held at 10:00 a.m., May 6, 1975, in Room 5332, Department of Transportation Headquarters, 400 Seventh Street SW., Washington, D.C. 20590, at which Ford Motor Company will be afforded an opportunity to present data, views, and arguments to establish that the alleged defect does not exist or does not relate to motor vehicle safety.

Interested persons are invited to participate through written or oral presentations. Persons wishing to make oral presentations are requested to notify Mrs. Nancy Martus, Office of Defects Investigation, National Highway Traffic Safety Administration, Washington, D.C. 20590, Tel. (202) 426-2850, before the close of business (4:15 p.m.) on May 2, 1975. A transcript will be kept and exhibits may be accepted. There will be no cross examination of witnesses.

The agency's investigative file regarding this matter is available for public inspection during regular working hours (7:15 a.m.-4:15 p.m.) in the Technical Reference Division, Room 5108, 400 Seventh Street, SW, Washington, D.C. 20590.

(Sec. 152, Pub. L. 93-492, 88 Stat. 1470 (15 U.S.C. 1412); delegations of authority to 49 CFR 1.51 and 49 CFR 501.8.)

Issued on April 2, 1975.

ROBERT L. CARTER,
Associate Administrator, Motor Vehicle Programs.

Secretary.

[FR Doc.75-9111 Filed 4-7-75;8:45 am]

[Docket 25280; Agreement C.A.B. 25029, R-1 through R-6; Order 75-4-14]

INTERNATIONAL AIR TRANSPORT ASSOCIATION

Specific Commodity Rates; Order

APRIL 2, 1975.

An agreement has been filed with the Board pursuant to section 412(a) of the Federal Aviation Act of 1958 (the Act) and Part 261 of the Board's Economic Regulations between various air carriers, foreign air carriers, and other carriers embodied in the resolutions of the Joint Traffic Conferences of the International Air Transport Association (IATA), and adopted pursuant to the provisions of

Resolution 590 dealing with specific commodity rates.

The agreement, adopted pursuant to unprotested notices to the carriers and promulgated in an IATA letter dated March 21, 1975, names additional commodity rates, which reflect reductions from the otherwise applicable general cargo rate, under existing commodity descriptions as outlined in the attachment hereto.

Pursuant to authority duly delegated by the Board in the Board's regulations, 14 CFR 385.14, it is not found that the subject agreement is adverse to the public interest or in violation of the Act, provided that approval is subject to the conditions hereinafter ordered.

Accordingly, it is ordered that: Agreement C.A.B. 25029, R-1 through R-6,[1] be and hereby is approved, provided that approval shall not constitute approval of the specific commodity descriptions contained therein for purposes of tariff publications; provided further that tariff filings shall be marked to become effective on not less than 30 days' notice from the date of filing.

Persons entitled to petition the Board for review of this order, pursuant to the Board's regulations, 14 CFR 385.50, may file such petitions within ten days after the date of service of this order.

This order shall be effective and become the action of the Civil Aeronautics Board upon expiration of the above period, unless within such a period a petition for review thereof is filed or the Board gives notice that it will review this order on its own motion.

This order will be published in the FEDERAL REGISTER.

[SEAL] EDWIN Z. HOLLAND,
Secretary.

[FR Doc.75-9112 Filed 4-7-75;8:45 am]

COMMISSION ON REVISION OF THE FEDERAL COURT APPELLATE SYSTEM

NOTICE OF HEARINGS

APRIL 1, 1975.

The Commission on Revision of the Federal Court Appellate System has announced six days of hearings on creation of a National Court of Appeals and on other recommendations for change in the structure and internal procedures of the Federal courts of appeal system.

The hearings will be held in Washington, D.C. on April 15 and 16, 1975, in St. Louis on April 21 and 22, and again in Washington on April 28 and 29.

The hearings will focus on the Commission's preliminary report entitled "Structure and Internal Procedures: Recommendations for Change", dated April, 1975. That report describes the need for a new national appellate court and makes specific recommendations with respect to its jurisdiction and structure.

In addition, the report details proposals concerning oral argument, opinion writing, and the role of the bar in designing local court rules in the various circuits. Other proposals concern eligibility of judges for senior status and the filling of judicial vacancies.

Copies of the preliminary report are available from the Commission offices:

209 Court of Claims Building
717 Madison Place, NW.
Washington, D.C. 20005
Telephone: (202) 382-2943

In St. Louis the hearings will be held in Courtroom No. 1, U.S. Court of Appeals, 5th Floor, U.S. Court and Custom House, 1114 Market Street, St. Louis, Missouri. For more specific information about the location of the Washington hearings, contact the Commission offices. All hearings are scheduled to begin at 10 a.m. and to continue through the afternoon.

Interested persons who desire to testify at any of the hearings are asked to communicate with the Executive Director of the Commission at the address listed above as soon as possible. The Commission also invites the submission of written statements on subjects covered by its preliminary report.

A. LEO LEVIN,
Executive Director.

COMMITTEE FOR PURCHASE FROM THE BLIND AND OTHER SEVERELY HANDICAPPED

PROCUREMENT LIST 1975

Addition

Notice of proposed additions to Procurement List 1975, November 12, 1974 (39 FR 39964) were published in the FEDERAL REGISTER on May 15, 1974 (39 FR 17346), and December 24, 1974 (39 FR 44485).

Pursuant to the above notices the following commodity and service are added to the Procurement List.

LIGHT, MARKER, DISTRESS (RF)

	Price (each)
6230-00-938-1778	$15.20

JANITORIAL/CUSTODIAL (JO)

	Price (per sq. ft.)
Non-Commissioned Officers Club, Homestead Air Force Base, Miami, Fla	$0.086

By the Committee.

C. W. FLETCHER,
Executive Director.

ENVIRONMENTAL PROTECTION AGENCY

[FRL 355-6; OPP-32000/222 & 223]

RECEIPT OF APPLICATIONS FOR PESTICIDE REGISTRATION

Data To Be Considered in Support of Applications

On November 19, 1973, the Environmental Protection Agency (EPA) published in the FEDERAL REGISTER (38 FR

[1] Agreement filed as part of the original document.

V 40168 APR 8 75 XUM

31862) its interim policy with respect to the administration of section 3(c)(1)(D) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended. This policy provides that EPA will, upon receipt of every application for registration, publish in the FEDERAL REGISTER a notice containing the information shown below. The labeling furnished by the applicant will be available for examination at the Environmental Protection Agency, Room EB–31, East Tower, 401 M Street SW., Washington D.C. 20460.

On or before June 9, 1975, any person who (a) is or has been an applicant, (b) believes that data he developed and submitted to EPA on or after October 21, 1972, is being used to support an application described in this notice, (c) desires to assert a claim for compensation under section 3(c)(1)(D) for such use of his data, and (d) wishes to preserve his right to have the Administrator determine the amount of reasonable compensation to which he is entitled for such use of the data, must notify the Administrator and the applicant named in the notice in the FEDERAL REGISTER of his claim by certified mail. Notification to the Administrator should be addressed to the Information Coordination Section, Technical Services Division (WH–569), Office of Pesticide Programs, 401 M Street SW., Washington D.C. 20460. Every such claimant must include, at a minimum, the information listed in the interim policy of November 19, 1973.

Applications submitted under 2(a) or 2(b) of the interim policy will be processed to completion in accordance with existing procedures. Applications submitted under 2(c) of the interim policy cannot be made final until the 60 day period has expired. If no claims are received within the 60 day period, the 2(c) application will be processed according to normal procedure. However, if claims are received within the 60 day period, the applicants against whom the claims are asserted will be advised of the alternatives available under the Act. No claims will be accepted for possible EPA adjudication which are received after June 9, 1975.

Dated: March 28, 1975.

JOHN B. RITCH, Jr.,
Director,
Registration Division.

RECEIPT OF APPLICATIONS FOR PESTICIDE REGISTRATION

Data To Be Considered in Support of Applications

No November 19, 1973, the Environmental Protection Agency (EPA) published in the FEDERAL REGISTER (38 FR 31862) its interim policy with respect to the administration of section 3(c)(1)(D) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended. This policy provides that EPA will, upon receipt of every application for registration, publish in the FEDERAL REGISTER a notice containing the information shown below. The labeling furnished by the applicant will be available for examination at the Environmental Protection Agency, Room EB–31, East Tower, 401 M Street, SW., Washington, D.C. 20460.

On or before June 9, 1975, any person who (a) is or has been an applicant, (b) believes that data he developed and submitted to EPA on or after October 21, 1972, is being used to support an application described in this notice, (c) desires to assert a claim for compensation under section 3(c)(1)(D) for such use of his data, and (d) wishes to preserve his right to have the Administrator determine the amount of reasonable compensation to which he is entitled for such use of the data, must notify the Administrator and the applicant named in the notice in the FEDERAL REGISTER of his claim by certified mail. Notification to the Administrator should be addressed to the Information Coordination Section, Technical Services Division (WH–569), Office of Pesticide Programs, 401 M Street SW., Washington, D.C. 20460. Every such claimant must include, at a minimum, the information listed in the interim policy of November 19, 1973.

Applications submitted under 2(a) or 2(b) of the interim policy will be processed to completion in accordance with existing procedures. Applications submitted under 2(c) of the interim policy cannot be made final until the 60 day period has expired. If no claims are received within the 60 day period, the 2(c) application will be processed according to normal procedure. However, if claims are received within the 60 day period, the applicants against whom the claims are asserted will be advised of the alternatives available under the Act. No claims will be accepted for possible EPA adjudication which are received after June 9, 1975.

Dated: March 28, 1975.

JOHN B. RITCH, Jr.,
Director,
Registration Division.

APPLICATIONS RECEIVED (OPP–32000/224)

[FRL 356-2]

STATE OF LOUISIANA REQUEST FOR EMERGENCY USE OF DDT ON COTTON

Statement of Reasons for Denial

Statement of Reasons for the Order and Determination of the Administrator that Reconsideration of the Agency's Prior Order of Cancellation of DDT for Use on Cotton is Not Warranted.

On January 24, 1975, the State of Louisiana applied to the Environmental Protection Agency (EPA) for a specific exemption under section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act, as amended (FIFRA) for the application of 2.25 million pounds of DDT (1,1,1-trichlorophenyl ethane) to control the tobacco budworm (*Heliothis virescens F.*) on approximately 450,000 acres of cotton. On February 10, 1975, EPA published notice in the FEDERAL REGISTER (40 FR 6229) of the filing of this application and notice (40 FR 6228) of informal public hearings with respect to the application to be held in Baton Rouge, Louisiana, on February 27–28, 1975 and in Washington, D.C., on March 3–5, 1975. On March 14, 1975, I issued a brief Order and Determination denying the Louisiana request and stated that a more detailed statement would follow on March 17, 1975. This Statement of Reasons provides a more detailed explanation of the basis for my Order.

I. *The Application.* The application filed by Louisiana states that the requested 2.25 million pounds of DDT is necessary because:

1. Average cotton yields have declined significantly in 1973–4 compared with the average cotton yield for the previous ten (10) years when DDT was available;

2. In 1974, Louisiana experienced its worst tobacco budworm infestation in history and the budworm is anticipated to be a major problem in 1975;

3. Tobacco budworm populations exhibit resistance to most of the alternative registered pesticides which are either ineffective, phytotoxic or unavailable in sufficient quantities and no other alternative means of control are available;

4. Serious economic injuries will result to cotton farmers and supportive industries from the tobacco budworm if DDT is not made available; and

5. Restrictions on the method and timing of application will prevent adverse environmental effects.

II. *Background.* The background of the Louisiana application and the use of DDT on cotton has been set forth in detail in the preamble to the regulations promulgated by EPA on March 12, 1975, establishing a new Subpart D of the Rules of Practice for Applications Under sections 3 and 18 to Modify Previous Cancellation or Suspension Orders. However, because of the importance to this case of the background information set forth in that document, I feel compelled to refer to that information in this Statement.

The purpose of the February 27–28 and March 3–5 informal public hearings on the Louisiana application was to provide all interested parties with an opportunity informally to present their views and to provide EPA with information necessary in order to reach a determination as soon as practicable. As these informal hearings progressed it became apparent that the questions raised by the Louisiana application directly related to the prior final order of the Administrator cancelling virtually all registered uses of DDT, including use on cotton, following extensive adjudicatory hearings and judicial review.[1] Because of these prior administrative and judicial proceedings, concern developed within EPA shortly after the announcement of the informal hearings that revised procedures may be required in order to satisfy the requirements of the FIFRA, the Administrative Procedure Act (APA) and due process. Following an analysis of the question, EPA concluded that the law and the public interest required that such revised procedures be instituted for the Louisiana application and for similar cases in the future, in order to provide required notice and opportunity for formal public hearings to all affected parties where substantial new evidence is presented which may materially affect a prior final order.

The registration of DDT for pests on cotton, including the tobacco budworm, constituted approximately 86 percent[2] of the almost 12 million pounds of DDT used in the U.S. prior to the cancellation order of the Administrator of June 14, 1972 (37 FR 13369) (hereinafter the "1972 Order"). At that time DDT use on cotton amounted to approximately 10.3 million pounds annually. The Louisiana application seeks the use of 2.25 million pounds in Louisiana this year, which amounts to approximately 19 percent of the total annual quantity of DDT used in the U.S. prior to cancellation and approximately 22 percent of the total annual quantity of DDT used on cotton in the U.S. prior to cancellation. Accordingly, the Louisiana application squarely presents the question of whether the final cancellation order should be reconsidered.

EPA has determined that any application under section 3 or section 18 of FIFRA for the use of a pesticide at a site and on a pest for which registration has been finally cancelled or suspended by the Administrator is in substance a petition for reconsideration of such order. Certainly, the Louisiana application, which requests relatively large quantities of DDT for a use which was the primary use prior to cancellation, is in substance a request for such reconsideration. Because of the extensive notice and hearing opportunities mandated by FIFRA and the APA before a final cancellation or suspension order may be issued, EPA has determined that such orders may not be reversed or modified without affording interested parties—who may in fact have participated in lengthy cancellation proceedings—similar notice and hearing opportunities where substantial new evidence exists which warrants such reconsideration.

Section 6 of FIFRA permits the Administrator to issue notice of intent to cancel a pesticide registration upon a finding by him that the pesticide "generally causes unreasonable adverse effects on the environment." Such notice is required to be sent to the registrant and made public. The registrant, or other person adversely affected, may then request a hearing. The final decision of the Administrator is required to be made after the conclusion of the hearing. The United States Court of Appeals for the District of Columbia has characterized the cancellation procedures as providing "extensive safeguards" and "elaborate procedural protection" to pesticide registrants and others and, as a result, "a substantial time, likely to exceed one year, may lapse between issuance of notice of cancellation and final order of cancellation. * * *" *Environmental Defense Fund, Inc.* v. *Environmental Protection Agency*, 328 F. 2d 528, 533 (1972).

[1] Use of DDT by public health officials in disease control programs and by other civilian and military officials for health quarantine were not cancelled.

[2] The National Cotton Council of America contended that DDT use on cotton accounted for 99 percent of the total use immediately prior to the 1972 Order because of the prior cancellation of certain minor uses.

The application filed by Louisiana involves the requested use of DDT on cotton. The extensive administrative and judicial proceedings leading up to final cancellation of DDT registrations not only relate directly to the Louisiana petition but also demonstrate the exhaustive proceedings which precede final EPA actions in contested cancellation or suspension proceedings.

A. Proceedings Leading to the Final Cancellation of DDT.

(1) The EDF Petition of October 1969. On October 31, 1969, the Environmental Defense Fund, The National Audubon Society, the Sierra Club and the West Michigan Environmental Action Counsel (EDF) filed a petition with the Secretary of Agriculture (USDA), requesting him (1) to issue notices of cancellation for all pesticide products containing DDT, and (2) to suspend the registrations during the cancellation proceedings. EDF's petition precipitated, as the Administrator's 1972 Order noted, "approximately 3 years of intensive administrative inquiry into the uses of DDT." 1972 Order, 37 FR at 13369.

(2) The Secretary of Agriculture's Response. In response to EDF's petition, three things occurred. First, USDA cancelled four uses of DDT (on shade trees, tobacco, around the home and in aquatic areas); second, USDA requested comments on other DDT products; and third, USDA took no action on the request for suspension.

On November 25, 1969, USDA published a notice which stated (34 FR 18827):

> The department is considering cancellation of any other uses of DDT unless it can be shown that certain uses are essential in the protection of human health and welfare and only those uses for which there are no effective and safe substitutes for the intended use will be continued.

On December 11, 1969, a reply to the petition was sent to EDF by the Director of Science and Education for USDA, stating that the department had been "concerned for some time over the potential hazards that may result from the presence of DDT and other persistent pesticides in the environment," and listing several actions, including the above cancellations, that had been taken. No specific mention was made of EDF's request for suspension.

(3) *Environmental Defense Fund, Inc.* v. *Hardin (DDT I).* On December 29, 1969, EDF filed a petition in the Court of Appeals for the District of Columbia seeking review of USDA's failure to comply fully with their requests.

On May 28, 1970, in *Environmental Defense Fund, Inc.* v. *Hardin*, 428 F. 2d 1093 (1970), the Court held that EDF had standing to challenge the Secretary's determinations under FIFRA, that a refusal to suspend was reviewable, and that the inaction on the suspension request was ripe for review. This Court noted that:

> Numerous scientific studies and several reports to government agencies have concluded that DDT has a wide spectrum of harmful effects on nontarget plant and animal species; it increases the incidence in animals of cancer and reproductive defects; and its residues persist in the environment and in the human body long enough to be found far in time and space from the original application. 428 F. 2d at 1096–97.

The Court remanded to the Secretary:

> either for a fresh determination on the question of suspension, or for a statement of reasons for his silent but effective refusal to suspend the registration of DDT. If he persists in denying suspension in the face of the impressive evidence presented by petitioners, then the basis for that decision should appear clearly on the record, not in conclusory terms but in sufficient detail to permit prompt and effective review. 428 F. 2d at 1100.

In addition, the Court ordered USDA to decide "on the record" whether to issue the remaining requested cancellation notices or to explain the reasons for deferring the decision still further. Ibid.

(4) The "Statement of Reasons" of the Secretary and Additional Cancellations. On June 29, 1970, the Secretary filed a "Statement of Reasons Underlying the Decisions on Behalf of the Secretary with Respect to the Registrations of Products Containing DDT." At the outset he adhered to "the prior determination that no DDT registrations should be suspended at this time, and that further action with respect to cancellations should await completion of [USDA's intra-agency] use-by-use evaluations presently in progress." Statement of Reasons at 1. He went on to make the following findings:

(1) that there are reports of carcinogenicity resulting from the administration of large doses of DDT in test animals (p. 1);

(2) DDT is persistent and accumulates in animal tissues (p. 3);

(3) DDT is present in most forms of animal life (ibid.);

(4) there is information which suggests that DDT is interfering with the reproduction of certain raptorial birds and may be a contributor, among other factors, to the decline of some of these species (ibid.);

(5) DDT is moderately toxic to honey bees (ibid.);

(6) DDT in lakes and streams has been a factor in fish mortality and reproductive failures (ibid.); and

(7) When DDT accumulates in detritus food some harm may be done to detritus feeders (pp. 3–4).

He concluded (p. 8) that:

(1) DDT is not an imminent hazard to human health;

(2) there are some adverse effects upon certain species of fish and wildlife;

(3) DDT has indisputably important and beneficial uses in connection with human health and agriculture, and there are not yet available substitutes for all essential uses;

(4) DDT use should be reduced to "uses which are essential to the public health and welfare"; and

(5) there would be continuation of the review of the possible effects (both beneficial and deleterious) of DDT.

In addition to issuing the Secretary's statement of reasons, USDA took other action subsequent to the filing of EDF's initial petition. Specifically, on February 26, May 6 and August 18, 1970, in order to protect man and the environment from the hazardous use of DDT, notices of cancellation were issued covering registrations for a number of vegetable, grain, fruit, forestry, livestock, nursery and lawn uses of products containing DDT.

(5) *Environmental Defense Fund* v. *Ruckelshaus (DDT II).* On January 7, 1971, after reviewing USDA's Statement of Reasons, the Court remanded the case a second time, this time to the Administrator of the newly-created Environmental Protection Agency, who had just been given authority for administration of FIFRA. *Environmental Defense Fund* v. *Ruckelshaus*, 439 F. 2d 584 (1971).

The Court determined that the Secretary's refusal to suspend or cancel all registrations of DDT had been predicated on an "incorrect interpretation of the controlling statute." 439 F. 2d at 588. Noting in particular that the Secretary had found that DDT at large dosages caused cancer in experimental animals and that DDT was toxic to certain birds, bees, and fish, the Court stated that it was "plain that he found a substantial question concerning the safety of DDT." 439 F. 2d at 594–95. When such a question exists, the Court held, the administrative procedure must be "triggered." Although benefits may be balanced against risks, the Court held that such balancing must occur "in the full light of a public hearing * * * [and] greater weight should be accorded the value of a pesticide for the control of disease, and less weight should be accorded its value for the protection of a commercial crop." 439 F. 2d at 594 (emphasis added). Accordingly, the DDT case was remanded to the Administrator with instructions to issue notices of cancellation with respect to the remaining uses of DDT.

(6) The Administrator's Issuance of Notices of Cancellation. In compliance with the Court's order in *DDT II*, on January 15, 1971, the Administrator issued notices of cancellation with respect to all remaining registrations of DDT products.

More than 50 registrants filed objections and a request for a public hearing. Two registrants, Montrose Chemical Company and Crop King sought advisory committee consideration. In addition to EDF, several other parties intervened in the hearing, namely: USDA, The National Agricultural Chemicals Association (NACA), H. P. Cannon & Son (a Delaware food processor, only as to use of DDT on sweet peppers) and Eli Lilly & Company, a former registrant of one DDT product. Montrose and Crop King were not parties to the public hearing.

(7) The Administrator's March 18, 1971 Refusal to Suspend. In response to Court Order in *DDT II* that he reconsider the question of suspension, the Administrator issued a statement of "Reasons Underlying the Registration Decisions Concerning Products Containing DDT, 2,4,5–T, Aldrin and Dieldrin" on March 18, 1971. It set forth the reasons why the Administrator deemed suspension of DDT

V 40168
APR 8 75
XUM

products unnecessary in view of the administrative proceeding then underway, and articulated general standards relating to pesticide cancellation and suspension matters. The Administrator noted that:

> This determination is supported by the nature of the present effects of DDT. DDT is a hazard by virtue of its potential toxicity at prolonged low levels of exposure. This hazard is made acute by the persistence, mobility, and biomagnification of DDT in the environment. Recognizing these characteristics, the four government committees which have studied the DDT problem in depth between 1963 and 1969 have all recommended that its use be phased out over a period of time. [Footnote omitted] None have recommended an immediate ban. However, the time has come for resolution of the DDT issue in light of the standards set out in the FIFRA. This is now being done through the orderly administrative forum provided by the statute in the cancellation proceedings.

(8) Advisory Committee Report. The advisory committee requested by Crop King and Montrose, and composed of experts nominated by the National Academy of Sciences, began deliberations on DDT in May, 1971. On September 9, 1971, the committee issued its report and recommendations. After a lengthy discussion of the scientific evidence of the hazards of DDT use, the committee found that DDT posed an imminent hazard to the environmental and recommended that all DDT uses be rapidly phased out. Previously, four Presidential and other scientific commissions recognized the inherent hazards of DDT. "Use of Pesticides," A Report of the President's Science Advisory Committee (May, 1963); "Restoring the Quality of Our Environment," Report of the Environmental Pollution Panel, President's Science Advisory Committee (November, 1965); Report of the Committee on Persistent Pesticides, Division of Biology and Agriculture, National Research Council, to U.S. Department of Agriculture (May, 1969); the Report of the (H.E.W.) Secretary's Commission on Pesticides and Their Relationship to Environmental Health (Mrak Commission) (December, 1969).

(9) *EDF* v. *Ruckelshaus* (*DDT III*). EDF returned to Court a third time to challenge the Administrator's refusal to suspend DDT registrations. Since the advisory committee report was issued just prior to oral argument, the case was remanded to EPA for further consideration of the suspension issue in light of the advisory committee findings.

(10) The Administrator's November 1, 1971 Statement. In a statement filed with the Court on November 1, 1971, the Administrator again determined not to suspend DDT registrations. In reaching that decision he noted that the advisory committee had found:

> DDT spreads from its site of application and is carried "throughout the global biosphere" (Conclusion 2, page 39); and DDT and its metabolites persist for years in the environment and become concentrated in certain species of fish and wildlife, which suffer either present or potential danger therefrom (Conclusion 3, page 39).

However, the Administrator concluded, as the advisory committee had similarly concluded,

> • • • there will be no appreciable difference in hazard to the public whether the registration of DDT is immediately suspended or whether it is cancelled in the near future, if warranted. Therefore, the harm to the public from DDT cannot be lessened by immediate suspension as opposed to appropriate cancellations upon the orderly completion of the cancellation procedures.

(11) *EDF* v. *Ruckelshaus* (*DDT IV*). With the administrative proceedings in process, the Court on December 9, 1971, denied EDF's suspension petition, while at the same time granting EDF the right to renew its petition if the administrative proceedings were not completed by April 15, 1972.

(12) Formal Public Hearings. Formal public hearings commenced on August 17, 1971, before a hearing examiner and concluded on March 16, 1972. During those eight months, 123 witnesses[3] testified, and 363 exhibits were introduced into evidence. The DDT industry presented 17 witnesses and introduced 58 exhibits USDA, in a dual role as registrant (of two agricultural pest quarantine products) and intervenor, presented 40 witnesses and 94 exhibits; EDF presented 13 witnesses and introduced 66 exhibits; and the EPA staff presented 47 witnesses and introduced 132 exhibits. The remaining witnesses and exhibits were introduced by H. P. Cannon and Eli Lilly. The transcript of the evidentiary hearing contains more than 9,300 pages.

(13) The Examiner's Recommended Decision. The Hearing Examiner's recommended decision was issued on April 25, 1972. Stating that in order to cancel DDT, he would either have to find that DDT directly causes cancer in man or makes the "earth uninhabitable," the Examiner concluded that the "DDT products in issue were not misbranded under the FIFRA (7 U.S.C. 135b(2), (z)(2)(c), (d) and (g))"; that, as a matter of law, DDT use is not a carcinogenic, mutagenic or teratogenic hazard to man, and that DDT did not have a deleterious effect on fish or wildlife. Recommended Decision at 92–94.

(14) Oral Argument Before the Administrator. After receiving extensive written briefs, on May 16, 1972, the Administrator personally heard over three hours of oral argument on the exceptions raised by the various parties.

(15) The Administrator's Cancellation Order of June 14, 1972. On June 14, 1972, the Administrator issued an order cancelling all DDT registrations except those for public health and agricultural pest quarantine use. The order established December 31, 1972, as the effective date of the cancellations.

[3] 38 of the witnesses were wildlife biologists, 32 were entomologists, 9 were toxicologists or pharmacologists, 5 were cancer experts, 6 were chemists, 5 were medical doctors, 2 were economists, and 6 were businessmen. The remaining witnesses represented other miscellaneous disciplines and fields.

At the outset, he stated that he was "persuaded . . . that the long-range risks of continued use of DDT for use on cotton and most other crops is unacceptable and outweighs any benefits." 1972 Order, 37 FR 13369.

The Administrator found that "once dispersed, DDT is an uncontrollable, durable chemical that persists in the aquatic and terrestrial environments." 1972 Order, 37 FR 13370. He concluded that DDT was "highly volatile" (37 FR 13370 n. 16) and "can vaporize from crops and soils" (37 FR at 13375); that it "can be transported by drift during aerial application" (Id. at II, A, 3(a)); and that it "can be attached to eroding soil particles" (Id. at II, A, 3(c)). The Administrator also found that DDT "can persist in the soils for years and even decades" (Id. at II, A, 1); that it "can persist in aquatic ecosystems" (Id. at II, A, 2); and that "it is occasionally found in remote areas or in ocean species, such as whales, far from any known area of application" (37 FR at 13370–71). As a result of its persistence and mobility, the Administrator found that DDT is "concentrated in organisms and transferred through food webs" (37 FR at 13375); that DDT "accumulation in the food chain and crop residues results in human exposure" (Id. at III, A, 2); and that "human beings store DDT" in their tissues (Id. at III, A, 3).

With respect to human health, the Administrator found that "DDT causes tumors in laboratory animals" (Id. at IV, A, 9(a)); that "there is some indication of metastasis" of such tumors (Id. at IV, A, 9(b)); that "tumor induction in mice is a valid warning of possible carcinogenic properties" (Id. at IV, A, 9(c)); that there are "no adequate negative experimental studies in other mammalian species" and "no adequate human epidemiological data" (Id. at IV, A, 9(d–e)); and that "not all chemicals show the same [laboratory] tumorigenic properties" (Id. at IV, A, 9(f)). Accordingly, the Administrator found that DDT poses a cancer risk to man. (Id. at IV, A, 9; IV, B).

The Administrator also found that DDT poses hazards to birds, fish and other animal life:

1. DDT affects phytoplankton species' composition and the natural balance in aquatic ecosystems.
2. DDT is lethal to many beneficial agricultural insects.
3. DDT can have lethal and sublethal effects on useful aquatic freshwater invertebrates, including arthropods and mollusks.
4. DDT is toxic to fish.
5. DDT can affect the reproductive success of fish.
6. DDT can have a variety of sublethal physiological and behavioral affects on fish.
7. Birds can mobilize lethal amounts of DDT residues.
8. DDT can cause thinnings of bird eggshells and thus impair reproductive success. (Id. at IV, A, 1–8).

Concerning DDT's benefits, the Administrator found that "DDT is useful for the control of certain cotton insect pests" (Id. at V,A, 1); that "cotton pests are becomming resistant to DDT" (Id at V,A, 2); and that "by using methyl parathion or other means of pest control cotton producers can generally produce satisfactory yields at acceptable cost" (Id. at V,A,4). With respect to alternative chemical pesticides, the Administrator found that "methyl parathion and other organophosphate chemicals are effective for the control of cotton pests"; that they are "less toxic to aquatic life than DDT"; that they "appear to be less 'persistent' and do not build up in the food chain"; and that "methyl parathion is acutely toxic by dermal, respiratory exposure and oral inhalation" (Id at V,A, 3). The Administrator concluded that "the use of DDT was not necessary for the production" of cotton and other specified crops. (Id. at V,B).

(16) *EDF* v. *EPA* (*DDT V*). Coahoma Chemical Company, EDF and other parties sought review of the Administrator's final cancellation order in the Court of Appeals. Observing that the order was issued "after a lengthy administrative review" and on the basis of "an extraordinarily voluminous record" the Court found that the 1972 Order was supported by substantial evidence and affirmed. *Environmental Defense Fund, Inc.* v. *Environmental Protection Agency*, 489 F. 2d 1247, 1249, 1251, 1254 (D.C. Cir. 1973). In so doing the Court rejected industry argument that:

> • • • the Administrator's findings are insufficient in that they are based to a large extent on data which does not directly and specifically relate to the use of DDT to combat the boll weevil and the bollworm in the cotton growing areas of the Southeast.

The court went on to find that:

> It is true that much of the evidence in the record concerning dangers of DDT does not specifically relate to this one area or to the use on cotton crops. However, it is not necessary to have evidence on such a specific use or area in order to be able to conclude on the basis of substantial evidence that the use of DDT in general is hazardous. The Administrator has pointed to evidence in the record showing that use of DDT except in minuscule amounts in highly controlled circumstances should be curtailed because of unreasonable risks to health and the environment. Reliance on general data, consideration of laboratory experiments on animals, etc., provide a sufficient basis to support the Administrator's findings, even with regard to each special use of DDT. 489 F. 2d at 1253–54 (footnotes omitted).

B. The Required Procedures. In cancellation and suspension cases where EPA has finally determined to cancel or suspend a pesticide registration after exhaustive notice and opportunities for hearing as mandated by FIFRA and the APA, fairness requires that such final orders not be modified or reversed lightly.[4] Such prior orders should not be modified or reversed without notice and opportunity for formal public hearings. The formal on-the-record decision making process imposed by FIFRA and the APA as a necessary prerequisite to final cancellation or suspension would be rendered meaningless if the Administrator were to modify or reverse such orders without notice to the public, without an opportunity for formal hearings and without limiting his consideration to a formal hearing record. Such an informal process could greatly prejudice the interests of parties to the original proceedings. In the original proceedings they had the opportunity to be represented by counsel, to present witnesses and to cross-examine witnesses of other parties. They had the opportunity to argue their cases before an independent hearing examiner and before the Administrator. An informal process which modified or reversed a final order would not provide such opportunities, would not protect the procedural rights of affected persons and would undercut the statutory scheme required by FIFRA. As the Court concluded in DDT II, "when Congress creates a procedure that gives the public a role in deciding important questions of public policy, that procedure may not lightly be sidestepped by administrators." 439 F. 2d at 594.

Formal reconsideration of prior orders should only be granted, however, where there is substantial new evidence which may materially affect the order. The provisions of FIFRA relating to notice and to the opportunity of adversely affected parties to join in formal hearings are broadly drafted to permit maximum participation in the cancellation proceedings by other Federal agencies, the States, industry, environmental groups, and private citizens. As the Court noted in *DDT II*, "the statutory scheme contemplates that [pesticide cancellation] questions will be explored in the full light of a public hearing. • • •" 439 F. 2d at 594. With such broad opportunities to participate in the original proceedings, the public interest—and the interests of the parties who participated in such proceedings—requires that the issues before the Administrator not be relitigated without a threshold determination that there is substantial new evidence which may maerially affect the prior order. This procedure does not prejudice the interests of parties seeking modification. If there is substantial new evidence, which may materially affect the prior order, a formal hearing should be convened to adjudicate whether such evidence requires modification or reversal of the prior order. On the other hand, however, the public interest demands that public agencies not be required to expend limited resources on reconsideration of facts previously adjudicated. Public resources should not be committed to reconsider a prior final order unless there is substantial new evidence which may materially affect such order.

For the foregoing reasons, EPA has adopted Subpart D to the Rules of Practice (40 CFR Part 164) setting forth the procedures to be followed in the case of an application under FIFRA sections 3 or 18 which requests use of a pesticide at a site and on a pest for which registration has been finally cancelled or suspended. These revised procedures require that in any such case the Administrator will initially determine, on the basis of the application and supporting data, whether there is substantial new evidence which may materially affect the prior order and whether such evidence could not have been discovered by due diligence on the part of the parties to the original proceeding. In any case where it is determined, as in this case, that there is no substantial new evidence which may materially affect the prior order, then the application will be denied.

In any case where it is determined that there is such evidence, then a formal hearing will be convened to determine whether such evidence materially affects the prior order and requires its modification. In such a case, the ultimate determination will be made on the basis of the record in the adjudicatory hearing and the recommendations of the administrative law judge presiding over the hearing, taking into account the human and environmental risks found by the Administrator in his prior order and the cumulative impact of past, present, and anticipated uses in the future.

The procedures also provide that in emergency circumstances the Administrator may rule on the application without convening a formal hearing when he determines that: (1) The application presents a situation involving need to use the pesticide to prevent an unacceptable risk to (i) human health, or (ii) fish and wildlife when such use would not pose a human health hazard; and (2) there is no other feasible alternative solution to such risk; and (3) the time available to avert the risk to human health or fish and wildlife is insufficient to permit convening a hearing; and (4) the public interest requires the granting of the requested use as soon as possible.

[4] In addition to DDT, in each of the other major cancellation and suspension proceedings initiated pursuant to FIFRA Section 6, EPA has similarly provided extensive notice and formal hearing opportunities.

The aldrin and dieldrin suspension order issued by the Administrator on October 1, 1974, followed almost three years of administrative proceedings. The initial cancellation notice for the major uses of aldrin and dieldrin was issued by the Administrator on March 18, 1971. Formal administrative hearings commenced on August 7, 1973. During the following twelve months of hearing, 249 witnesses testified, and over 35,000 pages of transcript and exhibits were considered and the suspension is now before the Court of Appeals for the District of Columbia.

Similarly, the two administrative proceedings currently in progress with respect to pesticide products containing mercury and mirex have involved lengthy hearings. The notice of intent to hold hearings on mirex was issued on March 28, 1973. The formal hearings were begun on December 3, 1973, and have not yet concluded. To date, over 60 witnesses have testified in those hearings resulting in a record of over 12,400 pages. As in the aldrin and dieldrin proceedings, a scientific advisory committee report on mirex was prepared prior to the commencement of the formal hearings.

The cancellation of pesticide products containing mercury was issued on March 22, 1972. The formal administrative hearings began on October 1, 1974, and are still in progress. Forty witnesses have testified thus far in those hearings generating a record of over 2,400 pages.

V 40168 APR 8 75 XUM

This provision for dispensing with a formal hearing does not apply to the Louisiana application since the use of DDT on cotton does not involve a need to use the pesticide to prevent an unacceptable risk relating to human health or fish and wildlife.

In the case of the petition by the State of Louisiana, notice of these revised procedures and of a tentative time schedule within which they would operate was given to all parties involved in the informal public hearings held in Washington, D.C., on March 5, 1975. Because of the March 5, 1975 notice to interested parties, including the State of Louisiana, formal adoption of such procedures on the eve of my decision as to substantial new evidence did not prejudice the interests of interested parties including the State of Louisiana. All such parties received notice of these procedures on March 5 and were encouraged to submit an additional brief statement summarizing what they maintained to be substantial new evidence on March 10, 1975. The State of Louisiana, and other interested parties have submitted such statements.

In addition, the Louisiana application was filed under FIFRA section 18 pursuant to which Louisiana is required to show that there is a pest outbreak for which no alternatives are available and which will result in significant economic or health problems. 40 CFR Part 166. Louisiana has questioned whether EPA is now changing the substantive standard by which its application will be evaluated. The procedures adopted do not, however, change the substantive rules by which the Louisiana application will be measured. The issues raised by the Louisiana application under section 18 were adjudicated and finally decided in the 1972 DDT cancellation case. In that case the Administrator was required to make, and made, specific findings and conclusions with respect to the risks and benefits associated with DDT use on cotton. The Administrator's findings and conclusions were then affirmed by the Court of Appeals for the District of Columbia in *DDT V.* Thus, no showing under section 18 of a pest outbreak, of unavailability of alternatives and of significant economic problems could now be made without substantial new evidence. The procedures adopted clarify the application of the general rules under sections 3 and 18 to specific cases, such as the Louisiana application, which in substance request modification or reversal of a prior final order.

These procedures are not inconsistent with previous EPA practice. Since the 1972 Order, EPA has received approximately 44 applications under FIFRA sections 3 and 18 for the use of DDT on cotton. All of these applications have been denied summarily on the basis that they failed to set forth sufficient new information which would warrant approval in view of the general human and environmental risks associated with such DDT use and enumerated in the 1972 Order.

In addition to the 44 DDT-cotton requests, EPA has received applications for uses of DDT on other crops which were not at issue in the prior DDT adjudicatory hearings. In 1973 and 1974 DDT was authorized for use under FIFRA section 3 for the pea leaf weevil in Idaho and Washington. These authorizations considered the available evidence "in light of the terms of the June 1972 [cancellation] order * * *." 39 FR at 10322. However, the use of DDT for the pea leaf weevil was not cancelled by the Administrator in his 1972 Order and thus the pea leaf weevil applications did not in substance request the use of a pesticide on a site and against a pest which was cancelled by final order. In fact, the pea leaf weevil was first detected at damaging levels in 1970 and relatively little was known about the impact of climatic and biotic factors on its development or about resistant crop strains or planting techniques which could mitigate infestation. The area of application was very dry (15–20 inches of rain per year), had few trees and little vegetation other than the dry pea crop. The area involved thus presented little potential for contamination of aquatic ecosystems. Because the weevil was a new pest, there were no pesticides registered for the requested use to protect dry peas in Idaho and Washington which accounted for 95 percent of total U.S. dry pea production.

In 1974 DDT was authorized for use by the U.S. Forest Service on the Douglas-fir tussock moth in parts of Oregon, Idaho and Washington. That decision specifically stated that: "The use of DDT for control of the tussock moth was not specifically addressed in [the 1972 DDT cancellation] order, but there is no present registration of DDT for this purpose." 39 FR 8377. The use of DDT on the Douglas-fir tussock moth had been registered in 1947 by the Forest Service, but the use was later abandoned by USDA in 1969. Accordingly, the use of DDT to control the Douglas-fir tussock moth had not been subjected to formal review through an adjudicatory proceeding. In addition, the tussock moth case presented a significant environmental need for DDT. At stake were 650,000 acres of mature forests containing the Douglas-fir. In 1972 and 1973, the moth had defoliated trees on 800,000 acres—of which 17,000 acres of forest were completely killed and on an additional 71,000 acres at least half of the Douglas-fir were killed. Mature forests—including Douglas-fir—require many years to develop even assuming prompt and thorough replanting. A new "crop" cannot be grown "next year." Moreover, the defoliation of such vast forest lands presented serious fire hazards. It was estimated that with any fire outbreak a forest defoliated by the tussock moth would burn and spread 6 times faster than normal (25 acres per hour rather than 4 acres per hour). Thus, anticipated defoliation presented serious health hazards as well as economic losses (estimated $67 million loss). In addition, even without forest fires, extensive defoliation of watershed areas may have caused significant water pollution by virtue of sedimentation attributable to runoff. Finally, the Douglas-fir tussock moth application sought the use of approximately 490,000 pounds of DDT over 650,000 acres, whereas the Louisiana application is for 2,250,000 pounds over 450,000 acres—roughly 5 times more DDT per acre.

Although the status of DDT requests, such as those for cotton, as petitions for reconsideration of the 1972 Order and the standard for determining whether to reconsider the 1972 Order (substantial new evidence which may materially affect the prior order) may not have been fully articulated in determinations issued by EPA since the 1972 Order, in substance EPA was applying the same standards which have been formally adopted for this case and for similar cases in the future. To the extent that prior practices and procedures may have differed from the recently promulgated procedures, such changes are necessitated for the reasons set forth in this opinion and in the preamble to Subpart D of the Rules of Practice.

C. Hearings on the Louisiana Application. The five days of informal public hearings already held in connection with the Louisiana application produced 1180 pages of transcript and numerous exhibits. A seven-man panel of EPA technical and administrative experts heard the testimony presented, reviewed exhibits submitted by the participants, and analyzed the statements submitted by all interested parties which summarized the evidence bearing on the Louisiana petition. This panel was also charged to review the whole of the data and make a preliminary assessment as to whether "(1) the applicant has presented substantial new evidence which may materially affect the prior cancellation or suspension order and which was not available to the Administrator at the time he made his final cancellation or suspension determination and (2) such evidence could not, through the exercise of due diligence, have been discovered by the parties to the cancellation or suspension proceeding prior to the issuance of the final order." (40 CFR 164.132 (a)).

The report and conclusions of the panel were presented to me on Thursday, March 13, 1975. The panel concluded that Louisiana had not presented any substantial new evidence which may materially affect the 1972 Order. The report and conclusions of the panel are being published as an appendix to this Statement.

Having reviewed and discussed the report and conclusions of the panel I have made a separate evaluation of the factors involved in the Louisiana situation including consultation with the EPA staff and review of the summary statements filed by the parties to the informal hearings. In addition, I have informally consulted with a panel of the EPA Hazardous Materials Advisory Committee (HMAC). The HMAC panel was charged

to explore preliminarily scientific questions which may have been presented. The HMAC panel spent Friday, March 14, reviewing the Louisiana application and discussing the questions presented with the EPA hearing panel and others. The HMAC panel did not reach any conclusions or make any recommendations with respect to whether there was any substantial new evidence which may materially affect the 1972 Order. I appreciate the HMAC panel's conscientious efforts and in reaching my decision I have taken into account my brief discussions with them.

III. Hazards From The Requested Use of DDT. Very little evidence concerning human health and the environment was actually presented by Louisiana during the informal proceedings. Certainly there is no evidence before me that would mitigate the clear findings of Administrator Ruckelshaus in 1972 with respect to environmental harm and risk to man posed by DDT. In fact, data produced since the 1972 hearings that have been called to my attention reaffirm and augment the serious nature of the environmental and human health hazards posed by DDT.

There is no dispute that the use of 2.25 million pounds of DDT in Louisiana this year would have serious adverse environmental effects irrespective of any good faith educational or regulatory restrictions that might be imposed by either the Federal Government or the State of Louisiana. In its application (La. App. at 10), Louisiana stated that:

> It is recognized that the use of DDT, even when the precautions outlined above are taken, will result in widespread contamination of the environment with undesirable residues of this chemical.

However, Louisiana adds, without substantiation, its belief that:

> Even the most severe of the localized effects are unlikely to be of more than extremely short duration. (La. App. at 12).

I cannot agree either that the severe effects of widespread contamination and undesirable residues which result would be only local or that they would be of extremely short duration.

There are certain basic characteristics of DDT that are indisputable. These include its persistence, mobility and broad range of toxicological effects. Perhaps the most insidious of its characteristics is the fact that the most serious of DDT's toxicological effects are chronic or subchronic and most often of an irreversible nature. Such effects are not normally apparent by routine scientific observation until it is too late. This is cause for the exercise of particular vigilance and scrutiny in the evaluation of any request for the use of this compound.

The particular use in question here would in my opinion present conditions conducive to the widespread contamination and dispersal of DDT throughout the environment. There is little question but that the aerial and ground spraying of 2.25 million pounds of DDT in the August climatic conditions of Louisiana would result in considerable off-target drift and even more significant volatilization and environmental dispersion of the compounds. There is ample evidence in the 1972 record of the volatility and persistence of DDT.

One of the principal restrictions proposed by Louisiana would limit DDT application to one-half mile from dairies or forage, silage, and grain crops used to feed dairy animals. Similar type restrictions were proposed and explored in the 1972 hearings and it was concluded then that such limitations simply could not curb the environmental contamination that follows from this type of DDT use. Indeed, Administrator Ruckelshaus concluded in 1972: "I am convinced by a preponderance of the evidence that, once dispersed, DDT is an uncontrollable, durable chemical that persists in the aquatic and terrestrial environments." (1972 Order, 37 FR at 13370). Included in the 1972 General Findings were the following:

> A. No directions for use of DDT, even if followed, can over the long run completely eliminate DDT's injury to man or other vertebrate animals.
>
> B. No warning or caution for use of DDT, even if followed, can over the long run prevent injury to living man and other vertebrate animals (37 FR at 13375, VII).

Many examples of DDT's ability to persist and move in the environment were presented in the 1972 hearings. Perhaps the most dramatic example was the discovery of DDT in the wildlife of Antarctica, where of course it had never been used. This continent, with its ice shelf, lies over 600 miles from the tip of South America, over 1,000 miles from New Zealand, and over 2,000 miles from the tip of South Africa, which are the closest possible sources for its DDT contamination. From these examples, one can see the extreme unlikelihood that any of the proposed restrictions, e.g., one-half mile aerial application restriction around dairy farms, etc., will mitigate the resulting DDT contamination of food, feed, air and human water supplies as well as fish and wildlife in proximate as well as distant areas.

The significance of my initial discussion of the likely massive environmental contamination that will result from the proposed use of 2.25 million pounds of DDT centers on the resulting exposure and increased risks to humans and to wildlife. The principal risk to humans is cancer. As Judge Leventhal of the U.S. Court of Appeals for the District of Columbia pointed out, cancer is a "sensitive and fright-laden" matter compounded by the fact that carcinogenic effects are "generally cumulative and irreversible when discovered." *Environmental Defense Fund* v. *Environmental Protection Agency*, 465 F. 2d 528 (1972). This "sensitive" issue has been highlighted recently by the publicity given to the study showing a particularly high rate of cancer in the Louisiana area.

In 1972, then Administrator Ruckelshaus made the factual finding that "DDT is a potential human carcinogen." (37 FR at 13375, IV, A, 9). As the basis for this finding the Administrator cited the fact that: "Laboratory tests have * * * produced tumorigenic effects on mice when DDT was fed to them at high levels." (Id. at 13371). The laboratory tests referred to were cited as the Bionetics study in which mice were fed 140 ppm of DDT and the Lyons study (at that time incomplete and still in progress) in which "(i)ncreased hepatomas [liver tumors] were noted in male and female mice fed DDT at 250 ppm." (Id. at 13371 n. 20).

The Administrator further found in his evaluation of the cancer hazard of DDT that: "there is no adequate human epidemiological data on the carcinogenicity of DDT, nor is it likely that it can be obtained." (Id. at 13375, IV, A, 9(e)). This finding has not been challenged and remains true today. Thus, the laboratory findings of carcinogenicity retain their preeminence in the overall evaluation of the cancer risk of DDT to man. On the basis of these prior findings, I conclude that the requested use of 2.25 million pounds of DDT in Louisiana this year poses an unacceptable cancer risk to man. There is no substantial new evidence which would materially reduce the risk perceived in 1972.

Since the issuance of the 1972 Order, even more disturbing evidence of the carcinogenicity of DDT than that relied upon by Administrator Ruckelshaus has been published in the scientific literature. Nearly five months after the 1972 Order and some nine months after the close of the DDT hearing the first final report of the Lyon study, referred to as "still in progress" in the 1972 Order, was published. That report showed DDT not only to cause a significant increase in liver tumors in the first generation of mice fed 250 ppm DDT, as noted in the 1972 Order, but also revealed that a similar significant increase in liver tumors was shown in two generations of male mice fed 50 ppm, 10 ppm and 2 ppm, the lowest known dosage of DDT ever tested. *Int. J. Cancer:* 10, 489–506 (1972). The majority of the "Working Group" of an international conference of distinguished pathologists who later examined the DDT induced liver tumors from this study found the tumors to be malignant. The entire "Working Group" concluded that "exposure to DDT represents a carcinogenic risk for man." "Report of Working Group", Int. Agency for Research on Cancer, October 27, 1972.

In September of 1973, the final results of the Lyon study, extended to six full generations of mice (nearly 4,000 animals) fed DDT at 2, 10, 50 and 250 ppm levels, were published. The findings in the succeeding four generations of mice confirmed the results reported in October 1972 in the parent and first generation treatment group. In the male mice in all six generations DDT caused a significant increase in liver cancer at every treatment level including 2 ppm, the lowest dosage tested. Journal of the National Cancer Institute, Vol. 51, No. 3, September 1973.

V 40168
APR 8 75
XUM

In November 1973 a team of Russian scientists reported the results of a multigeneration DDT feeding study in which two groups of A-strain mice were fed 10 and 50 ppm DDT in the parent generation while five succeeding generations were fed 10 ppm. DDT caused a significant increase in lung tumors at both feeding levels in the parent groups. All of the five succeeding generations showed an increase in lung tumors over control animals; the increase was significant statistically in the second, third and fourth generations fed 10 ppm, the only dose so tested. *Int. J. Cancer:* 11, 688–693 (1973). This finding of DDT induced carcinogenicity at a site other than the liver supports the results of an earlier report by a Hungarian team which showed DDT to cause a progressively significant increase in leukemia and other malignant tumors at several different sites in the second through the fifth generations of mice fed approximately 3 ppm of DDT in the diet. *Fd. Cosmet. Toxicol.*, Vol. 7, 215–222 (1969).

In March 1974 the first study of the effects of the long term feeding of p,p' DDE, the principle DDT metabolite found in all humans and in the highest quantity of all of the metabolites, was reported. At the only feeding level tested (250, ppm), p,p DDE was shown to be an extremely effective liver carcinogen in both male and female mice, but particularly in females in which there was a 98 percent incidence of tumors compared to only 1 percent in the control animals. Another DDT metabolite, p,p' DDD fed at the same single feeding level caused a significant increase in lung tumors. Journal of the National Cancer Institute, Vol. 52, No. 3, March 1974.

In addition, evidence reviewed by me in September 1974 that had been introduced in the Aldrin/Dieldrin suspension hearing revealed the apparent synergistic effects on the development of tumors in mice fed DDT and Dieldrin in combination. (39 FR at 37268) While such a possibility had long been feared this was the first evidence actually demonstrating such effects. Knowing that these two compounds are stored in the tissues of the entire population of the U.S. and are and have been breathed and ingested simultaneously for years is an added cause for serious concern.

As I stated in my Order of March 14th denying the Louisiana application, these recent findings tend to reaffirm and augment the cancer hazard of DDT perceived by Administrator Ruckelshaus in 1972. Had the quantum of cancer evidence not changed since 1972 there is no doubt but that the basis for the 1972 finding of a carcinogenic risk would still lead me to concur completely with the seriousness of the cancer risk expressed in the 1972 Order. (See my October 1, 1974, Order Suspending Aldrin/Dieldrin Registrations, 39 FR 37265–72). What has been called to my attention in these informal proceedings by the National Audubon Society and others concerning more recent cancer testing does, however, convince me that the cancer hazard is not as "remote" as previously thought.

My review of the evidence in the recent Aldrin/Dieldrin suspension proceeding brought to light certain additional factors bearing on my present consideration. The apparent DDT/Dieldrin synergistic carcinogenic response discussed above is one such factor. In addition, I notice that much has been raised in the past concerning the relevance of carcinogenic results achieved in experiments using "high levels" of a compound, an issue that I was not faced with in the Aldrin/Dieldrin case. The only dosage level cited in the 1972 DDT Order as producing tumorigenic results was 250 ppm, although reference was made to a second study in which it is known that 140 ppm was the feeding level used. We now have evidence that DDT is capable of causing a significant incidence of tumors in test animals at levels as low as 2 ppm in the diet, the lowest dosage ever tested.

For purposes of reference, it should be noted that in 1972, the most recent year for which complete figures are available, DDT residues were found in the tissues of 99.93 percent of some 4,285 humans involved in the annual EPA Human Monitoring Program. The *average* level in these humans was 11.15 ppm DDT or nearly five times higher than the daily intake shown to cause a significant incidence of tumors in mice. The maximum level of DDT found in any one individual was 311.34 ppm. This recent information was introduced in the Aldrin/Dieldrin suspension hearing and is an update of the human monitoring data considered in the 1972 DDT hearing which reported similar findings.

Data from the Human Monitoring Program reveal that DDT quantitative residue values in humans are not uniformly distributed throughout the population. Residents of the South have consistently shown higher levels of DDT in their tissues than residents of other parts of the country. Moreover, black males, one of the highest cancer risk segments of the population, store the highest amounts of DDT.

I realize that a valid direct quantitative comparison between intake levels causing cancer in test animals and storage levels in humans is not possible at this time. Among others, one complicating factor is that there are some chemical agents to which man is more sensitive than test animals and some agents to which man is less sensitive. We have no way of knowing or predicting outside of actual measurable human experience. I cite these values for several important reasons, however. First, since storage is a function of intake, these levels demonstrate a continuous human exposure to DDT from past usage. Second, the fact that humans are storing such significant levels in comparison with dosage levels in the same range which can produce irreversible carcinogenic effects is a sobering and extremely cautionary observation. Third, our experts tell us that because of the persistence of DDT these levels in humans based on 1972 data, are not expected to decline significantly over the next several years. Thus, any consideration of a present request for further use of DDT must of necessity consider the residual effects of all past and present usage as well as any uses reasonably anticipated to occur as a result of granting the instant request for use. It is my opinion that humans in this country cannot and should not be subjected to the further DDT environmental insult that would result from a granting of the Louisiana petition.

In its summary statement of the evidence (La. Statement at 8), Louisiana cites as support for the argument that the carcinogenic risk of DDT "is now quantifiable and still remote" several statements allegedly attributable to an EPA official responsible for the reevaluation of DDT. In fairness to the official cited it should be noted that the conclusionary quote attributed to him—"Thus subsequent evidence confirms that human risk is remote and that the limited use in question poses no unreasonable risk of harm to man"—was never made and is not to be found in the reference cited. See Hearings Before the Subcommittee of the Commission on Appropriations; Subcommittee on Agriculture—Environmental and Consumer Protection Appropriations for 1975, Pt. 5, Environmental Programs, April 4, 1974.

I can find no merit in Louisiana's reliance on the sole sentence of the actual quote which mentions carcinogenicity, since it has been taken out of context and no supporting data or further explanation follow, either in the text of the Subcommittee Report or in Louisiana's evidence summary. I believe that the most complete statement of the DDT cancer evidence is found in the 1972 Order and in my discussion herein. The principles of chemical carcinogenesis which I have been guided by in my evaluation of this experimental evidence are set forth in my discussion of carcinogenicity in the Aldrin/Dieldrin Suspension Order (39 FR 37265–72).

Finally, serious concerns in connection with the Louisiana request have come both from private environmental groups, the Louisiana Wildlife and Fisheries Commission and the U.S. Department of Interior, all of whom feel that permitting the use of 2.25 million pounds of DDT would seriously jeopardize the fish and wildlife of Louisiana and surrounding areas and in particular the brown pelican, one of America's endangered species. The concern for the effects of DDT on wildlife has also been expressed by the shrimp and fishing industries of Louisiana who fear losses both through direct mortality and through seizures of shrimp and fish containing excessive DDT residues by responsible Federal authorities. Past experience has taught us that such concerns are indeed valid.

The case against DDT in 1972 was thoroughly documented in the area of environmental harm. Mr. Ruckelshaus stated in the 1972 Order (37 FR at 13371): "The case against DDT involves more, however, than a long-range hazard to man's health. The evidence presented by the Agency's Pesticides Office and the intervenors, EDF, compellingly demonstrates the adverse impact of DDT on

fish and wildlife." Later in his 1972 Order (id, at 13373), Mr. Ruckelshaus reiterated this conclusion: "the Agency and EDF have established that DDT is toxic to non-target insects and animals, persistent, mobile and transferable and that it builds up in the food chain. No label directions for use can completely prevent those hazards."

I am convinced that the use of 2.25 million pounds of DDT in Louisiana this year would result in adverse impact on fish and wildlife, both in Louisiana and in surrounding areas. Since environmental hazards were covered in such detail in the 1972 Order and since no new evidence has been introduced to refute those findings I hereby incorporate by reference those appropriate discussions and findings from the 1972 Order which deal with the adverse effects of DDT on fish and wildlife.

Moreover, I am mindful of the unfortunate economic consequences that have been suffered by various food and feed industries as a result of pesticide residues in excess of established tolerances or action levels. In this particular situation the Louisiana shrimp and fish industries as well as beef cattle, dairy and animal feed producing industries are all innocent bystanders to the use of DDT on cotton. Nonetheless, they still run the real risk of suffering adverse economic consequences from resulting excessive DDT residues. The uncontrollable nature of the compound and past experience teaches us the inevitability of finding impermissible residues of DDT in certain of these food and feed commodities as a result of such massive nearby use.

IV. Need For the Requested Use of DDT. I adopt the report of the EPA seven-man review panel which is attached as an appendix to this Statement. The panel reached the following conclusions with respect to the requested use of DDT:

1. Average cotton yields have declined in the last two years as compared to the preceding ten years. However, there is no evidence to indicate that any meaningful conclusions concerning the relationship of yields to the presence or absence of DDT can be drawn from such a comparison.

2. The tobacco budworm is but one of many factors which affect yields, and it is quite clear that no evidence was presented to support the proposition that the tobacco budworm was the principal cause of reduced yields in the past two years.

3. The tobacco budworm has become a late-season cotton pest; however, it is not clear that the predominance of this pest occurred as recently as three years ago; instead, it may have risen to its present status prior to 1972. Furthermore, because of resistance problems, it is just as likely that the tobacco budworm will remain a late-season pest whether or not DDT or methyl parathion or any other currently available pesticide is used.

4. The Louisiana estimates of economic losses totally ignore the numerous factors which affect cotton yields. The underlying assumptions on which the estimates are based are inconsistent with actual experience in Louisiana and are contrary to sound analytical methodology.

5. There is no conclusive evidence to indicate whether the DDT mixture can be expected to be effective in controlling tobacco budworm in 1975.

6. Louisiana has not demonstrated that all currently registered insecticides are ineffective against tobacco budworm.

7. A repetition of cotton insecticide shortages in 1974 is unlikely to occur in 1975.

8. It is impossible to predict the likelihood of a tobacco budworm outbreak in 1975 at this time. However, if past cotton production practices are continued, and more sophisticated production methods are ignored, the likelihood of an outbreak will be enhanced.

9. Louisiana has not taken fullest possible advantages of integrated pest management techniques which other states have found to be of considerable benefit.

A. Economic Impact. The major problem which Louisiana wished to address through the use of DDT in 1975 is one of preventing additional economic loss to cotton producers who were already hard hit in 1973 and 1974. Estimates of total potential economic losses have been made by both the State and USDA. The State estimates are derived from an assumed continuation of estimated losses in 1973 and 1974; the USDA estimates from an economic model.

In its application, Louisiana estimated that tobacco budworm "specifically caused the loss of approximately 50–60 million dollars in 1974 in direct and indirect loss to the cotton industry" in the State. An economic analysis included in the State's application estimates that cotton producers' combined 1973–74 losses were $50,645,250 and that increased unit costs arising from reduced yields, i.e., unit costs of production, ginning, and warehousing, were $17,773,500. These estimates were based on the following assumptions which tend to inflate the estimated losses: (i) all losses in yields would be attributable to the unavailability of DDT, (ii) the total harvested cotton acreage was the same in both 1973 and 1974, (iii) lint cotton losses per acre were 111 pounds, and (iv) that the relative efficacy of DDT compared to alternatives, is high. This approach overlooks other factors which seriously affect cotton yields, such as, weather, planting time, disease, etc. See Report of the EPA Special Review Group (EPA Report) at 6–D.

The USDA analysis of potential economic losses was $15.8 million in 1974. Even this analysis may be subject to revision because it rests, in part, on efficacy data which the Special Review Group found to be of questionable validity. See EPA Report at 6 E/F.

No matter which estimate is taken, it must be compared to total income measures for the State to put the estimated impact into the perspective of the State's economy as a whole. Estimates of farm income and State income from 1972 show that these values were $800 million and $14 billion, respectively. Thus, while the estimated losses constitute approximately 7.5 percent of total farm income, they do not appear to represent a major upsetting factor to the total economy of the State. The potential economic effects must therefore be viewed in their proper context of localized microeconomic dislocations. This is not to say that such effects are to be dismissed lightly, since they may constitute severe burdens on individuals—farmers and ginners and their employees—and on other industries in the affected parishes. Yet, even if DDT were to achieve the results anticipated by the State, it would have the effect of alleviating cotton growers' economic problems while, at the same time, imposing certain health, environmental, and economic costs on third parties, e.g., dairy farmers, livestock producers, commercial fishermen, and so on. The estimates of potential loss discussed above include only the direct and indirect costs which might arise as a result of reduced cotton yields; there has been no allowance made for the increased costs, economic and otherwise, of using DDT as requested in the State's petition. Nor have the offsets available by improved utilization of alternative pest control techniques or alternative crops been taken into account as reductions to the estimated gross economic loss.

One of the key assumptions made in the petition is that the economic problems of Louisiana cotton growers are linked to the lack of DDT. Another is that all losses are attributable to damage by the tobacco budworm. These assumptions fall under critical analysis.

To begin with, it is necessary to examine some of the institutional factors that have affected the economic situation. An institutional change of immense importance occurred in 1974 with the introduction of the new cotton allotment program. This program was part of the 1973 Agricultural Act, and it required important changes in agricultural policies and philosophies, placing a great deal of reliance on the free market and requiring a good deal more judgment on the part of the farmer than was required under the previous programs. With respect to cotton, the Act replaced an across-the-board payment of 15 cents per pound with a target price program, i.e., when the national average price for a calendar year falls below the target price (currently 38 cents per pound), growers are reimbursed for the difference. In regard to the shift away from cotton subsidies, the Special Review Group found that cotton growers "are in a transitional period requiring adjustments not only in their production planning but also in their handling of factors which affect cotton yields and pest control, which, in many instances, are interrelated." See EPA Report at 6D.

Another important change made by the Agricultural Act was the introduction of a disaster payment program, which economically protects farmers if they lose more than one-third of their crop. In the circumstance where farmers plant cotton on non-allotment acres and suffer a large yield-per-acre loss for any season, they often are not eligible for disaster payments. This situation was relatively common in Louisiana last year, thus increasing the farmers' economic dislocation.

In the past two years, cotton price fluctuations also worked to the growers' disadvantage. In 1973, much of the cotton crop was contracted. From a market point of view, 1973 was one of the cotton

V 40 168 APR 8 75 XUM

industry's better years. But since most growers sold their crop early to futures speculators, the latter were the primary beneficiaries of rising prices during the year. At the beginning of 1974, cotton growers were particularly optimistic. Forecasts and expert thinking were oriented toward an extremely good cotton year and farmers planted large acreages, apparently relying on high price estimates. In Louisiana, acreage jumped from 530,000 in 1973 to 665,000 in 1974. A large portion of this increased acreage was planted under high risk conditions, since many farmers could not expect to be covered under the disaster payments provisions of the 1973 Act, and a good deal of cotton was planted after the optimum planting time (before May 15 in Louisiana), thereby increasing the likelihood of a late-season tobacco budworm problem. In addition, with their 1973 experience in mind, many growers chose not to contract; nationally, about 20 percent contracted in 1974, compared to 75 percent in 1973. Unfortunately, the market again worked to the growers' detriment. Toward the end of the growing season, prices fell precipitously. With costs having increased significantly, cotton growers were caught in a severe cost-price squeeze, and many of them suffered serious losses.

Naturally, the economic factors that have affected cotton production in Louisiana in recent years have also affected it in other States. Furthermore, Louisiana has not been alone in experiencing a downward trend in cotton yields in the last few years. The same thing has happened in all the Mississippi Delta cotton-producing States. In fact the USDA Crop Reporting Board's report dated January 10, 1975, shows that the other States in this region all have experienced sharper declines. According to that report, yields in 1974, compared to 1969–73 averages, declined 28–29 percent in Arkansas, Mississippi, and Tennessee; 36 percent in Missouri; and 7.5 percent in Louisiana.

In summary, 1974 was an exceedingly bad year for cotton producers in Louisiana and elsewhere—market prices were low, costs were high, and they were faced with adverse natural phenomena such as whether and insects. On the institutional side, the commodity market was incorrectly assessed.

B. Tobacco Budworm. Louisiana's application indicates that the tobacco budworm has reached outbreak proportions and has become resistant to registered insecticides.

An increase in budworm infestation has been observed in recent years, particularly during August and September when cotton is most susceptible to infestations of this pest. Resistance to insecticides, including mixtures containing DDT, has apparently played a part in the recent predominance of this pest. However, it is unclear when the predominance of the budworm in the late-season occurred. It is possible that both an increase in resistance combined with increased populations has been a developing trend which started in years when DDT was used and has continued up to the present time. The tobacco budworm may be showing resistance to all insecticides, including DDT. In any event, the data furnished to the Special Review Group have not established when the tobacco budworm outbreak occurred.

Louisiana maintained that the DDT mixture was the only effective method of controlling the tobacco budworm. The experimental testing designs used by Louisiana make it impossible to attach any significance to the claimed differences in the relative efficacy of DDT over other currently registered insecticides. In fact, some of the data submitted by Louisiana showed that one alternative pesticide had nearly the same effectiveness as the DDT-toxaphene-methyl parathion mixture, and that certain combinations of pesticides had a significant impact on cotton yields. EPA Report 6F. Accordingly, alternative controls for the tobacco budworm are available.

Conclusion

A great deal of consideration has been given to all aspects of the Louisiana application for the use of DDT on cotton in 1975. I have carefully reviewed the report of the EPA seven-man panel who listened to the testimony presented during the five days of informal hearings and who read all of the written exhibits submitted to the hearing record. The written summaries of the evidence submitted by interested parties have been read by me and discussed with my staff and advisors. Every opportunity has been given to the State of Louisiana to present its case in the most favorable light possible. In accordance with Subpart D of EPA's Rules and Practice for Applications Under sections 3 and 18 to modify Previous Cancellation or Suspension Orders (40 FR 12261), I have reviewed the totality of the evidence in an effort to determine whether the applicant has presented substantial new evidence which may materially affect the 1972 Order cancelling virtually all uses of DDT. The 1972 Order was an important EPA action reached after extensive administrative and judicial proceedings. The 1972 Order weighed all risks and benefits of DDT use.

I am convinced at a minimum that no substantial new evidence exists which may materially affect the 1972 Order as it relates to the cancellation of DDT registrations for cotton. Certain evidence presented, moreover, would indicate that the environmental and human risks enunciated in the 1972 Order may now be of even greater magnitude than in 1972. In addition, I find that the use of DDT on cotton in Louisiana this year is not necessary. There is no substantial evidence that DDT would be efficacious or that alternative chemical pesticides and other control techniques are unavailable or inefficacious.

Accordingly, I incorporate this statement of reasons into my Order of March 14, 1975, denying the section 18 application by the State of Louisiana for emergency use of DDT on cotton in 1975.

Dated: March 17, 1975.

RUSSELL E. TRAIN,
Administrator.

To: Acting Deputy Assistant Administrator for Pesticide Programs.
From: Special Review Group.
Subject: Louisiana's Application for Emergency Exemption.

This memorandum is the report of the special review group appointed to evaluate Louisiana's petition for an emergency exemption to use a maximum of 2.25 million pounds of DDT to control tobacco budworm on cotton this year.

1. The Issue.

The issue addressed in this report is whether:

a. The applicant has presented substantial new evidence which would justify reconsideration of the DDT cancellation order, insofar as this requested use of DDT is concerned, and which was not available at the time the cancellation order was issued, and

b. Whether such evidence could not, through the exercise of due diligence, have been discovered by the parties to the cancellation proceeding prior to the issuance of the final order.

For the purposes of this report, the determination to be made on the above issue is referred to as the determination of whether there is "substantial new evidence."

2. Background.

On June 14, 1972, after three years of intensive administrative and judicial inquiry, which included seven months of formal administrative hearings under the Administrative Procedure Act, the Administrator issued an order cancelling most DDT registrations, including all registrations for use of DDT to control cotton insects. This order was upheld by the United States Court of Appeals for the District of Columbia. At the time of the Administrator's cancellation order, the primary DDT use was for control of cotton pests and amounted to 10 million pounds annually. Thus, Louisiana's request to use 2.25 million pounds in 1975 represents approximately one fourth of the amount of DDT used on cotton at the time of the cancellation order.

Last year, EPA allowed two uses of DDT, i.e., 500,000 pounds to control tussock moth and 10,000 pounds to control the pea leaf weevil. Unlike the use of DDT to control cotton insects, which was a registered use until the cancellation and which was a major issue in the cancellation proceedings, its use to control tussock moth and pea leaf weevil was not registered at the time of the cancellation and was not considered in the cancellation proceedings.

3. Louisiana's application.

Louisiana is requesting an emergency exemption for the use of 2.25 million pounds of DDT in combination with toxaphene and methyl parathion to control a possible tobacco budworm infestation. There would be up to five applications of the DDT mixture at five-day intervals. On a per acre basis, each application would consist of one pound of DDT plus two pounds of toxaphene and one-fourth to one-half pound of methyl parathion. DDT would be applied only when there is a tobacco budworm infestation at or above levels at which economic injury would be expected to occur. Use of the DDT mixture would not begin until August 1975. Farmers would be urged to take certain measures to minimize use of DDT and minimize its environmental impact, but for the most part these measures would not be mandatory.

4. EPA Actions.

Louisiana's petition was delivered to EPA on January 24, 1975. A notice of the receipt of the petition was published February 10, 1975, along with a notice of public hearing to be held on February 27–28 in Baton Rouge and March 3 in Washington, D.C. The hearings in Washington were extended to the 4th and 5th of March upon notice given in Baton Rouge. Extensive testimony was presented by representatives of farm environmental groups and Federal agencies and by various experts and individual citizens. These hearings were conducted by the special review group for the purpose of gathering information to evaluate Louisiana's petition.

5. Analytical Framework.

For purposes of evaluating Louisiana's application, the major representations were identified and broken down into the following major premises in order to understand the underlying assumptions on which the representations were based:

A. Cotton yields have declined by an average of 121 pounds per acre in the last two years as compared to the preceding ten.

B. Failure to control tobacco budworm has been the principal cause of the reduced yields in the past two years.

C. The tobacco budworm problem has reached outbreak proportions in the last three years and has become the major late-season cotton pest.

D. The reduced yields in the last two years have had a serious economic impact.

E. The mixture of DDT-toxaphene-methyl parathion was effective against the tobacco budworm when it was last used and can be expected to be effective this year.

F. Currently registered insecticides are ineffective against heavy infestations of tobacco budworm.

G. There will be a shortage of currently registered insecticides.

H. It is anticipated that tobacco budworm will be a major problem again in 1975 and will significantly reduce cotton yields.

I. The requested use of DDT poses no unreasonable risk to human health.

J. Cotton growers will use DDT in accordance with a program designed to control its use and minimize environmental impact.

K. Integrated pest management techniques are useful but will not replace chemical control when outbreaks occur.

6. Analysis.

A. Cotton yields have declined by an average of 121 pounds per acre in the last two years as compared to the preceding ten.

B. Failure to control tobacco budworm has been the principal cause of the reduced yields in the past two years.

These statements represent a narrow view of what has been happening in Louisiana's cotton-producing industry. They overlook significant data about cotton production in Louisiana in recent years and important factors affecting cotton yields.

Louisiana's yield data are presented in Attachment A, which is a reproduction of a table included in the State's application. For convenience, the State's graphic presentation of the same data is reproduced as Attachment B.

There is a serious question as to whether the comparison of 1963–72 average yields with 1973–74 results puts the data into meaningful perspective. In testimony at the public hearings on Louisiana's application, other ways of parsing the data were suggested. For example, it was suggested that the year-to-year reductions during the past two years be compared with the average annual decline from 1966 through 1972, on the ground that the latter period runs from the year in which the first indication of tobacco budworm resistance to insecticides occurred in Louisiana through the last year in which DDT was widely used.

A meaningful comparison would reflect, or otherwise take into account, all the variables that could affect cotton yields. Louisiana has not made such a comparison. Instead, the State has argued that weather changes account for year-to-year fluctuations in cotton yields but that man-made factors are responsible for long-term trends, and has asserted that withdrawal of DDT is the only significant man-made change that has occurred in recent years.

In Louisiana, there has been a downward trend in cotton yields extending back to 1968. Dr. John S. Roussel, Coordinator of Cotton Research, testified: "From 1968 through 1974, annual fluctuations can again be noted but now the trend is downward." In the first four years of this period (indeed, throughout the 1963–72 period), DDT was available and was widely used in combination with toxaphene and methyl parathion. Yet, yield losses were 85 pounds in 1967 and 67 pounds in 1972; both figures are larger than the year-to-year reductions in the last two years.

A multitude of factors—many of which are interrelated—affect cotton yields. They include weather conditions, e.g., amount and timing of rainfall; occurrence of drought; soil type; plant variety used, e.g., whether it is early or late maturing, insect or disease resistant, and so on; time of planting; planting pattern in the field; occurrence of disease, e.g., boll rot; timing and magnitude of insect infestations; quantities of fertilizer and herbicides applied to the crop; use of pesticides; existence of insect resistance to pesticides, etc.

To illustrate the effect of some of the interrelationships on cotton yields: Late planting may mean that the cotton will still be growing late in the season when tobacco budworm population levels are most likely to be high. Heavy rainfall late in the Summer also extends the growing period and makes the cotton plant more vulnerable to tobacco budworm infestations.

Louisiana's application concedes that the interrelationship of tobacco budworm and other factors contributed to the recent yield reductions (even though the Governor's transmittal letter attributes all losses to the tobacco budworm). Late planting and weather conditions were cited in the application as causes for yield reductions.

A more detailed analysis was provided by Dr. L. D. Newsom, Head of the Entomology Department at Louisiana State University in his response to a USDA questionnaire in November 1974. The following is an excerpt of Dr. Newsom's letter regarding the 1974 crop:

"Damage from *Heliothis* infestations ranged from none to light on cotton that was planted during the proper period, grew off normally, was not subjected to drought stress, matured normally, and was treated properly. It was moderate to a total loss where the crop was planted late. Moderate to severe losses occurred where cotton was subjected to drought stress during July and the first part of August followed by rain and regrowth during the latter part of the season. In these situations, satisfactory control of the tobacco budworm was not obtained with any treatment regimen.

"Better data will be available on losses upon completion of a survey that is in progress. It should be strongly emphasized that relatively cool, cloudy conditions with excessive rain during late August and September resulted in poor growing conditions for maturing the crop and one of the most (word not legible on xerox copy) outbreaks of boll rot on record in Louisiana. Many growers have attributed all of their losses, regardless of cause, to *Heliothis* damage."

In the recent hearings, Dr. Newsom was asked for an estimate of the extent to which yield losses could be attributed to tobacco budworm. He responded that he would place it at more than 50 percent and less than 100 percent.

On the same question, Dr. John S. Roussel, coordinator of cotton research in Louisiana, testified that he could not "partition this yield reduction in detail" and went on to say:

The best we can do is assume that over a ten-year period we have had all of these factors involved. Admittedly, two years is not an awful lot to compare ten years to, but this is the best data we have at the present time. And we know that the population was there. We know that it was in existence and it was not being controlled.

Louisiana's assessment of the situation also fails to take into account various other factors that could have influenced yields during the 1968–74 period. There was a trend toward later harvesting of the cotton crop. Dr. Roussel's testimony showed that the percentage of cotton harvested in October–November increased from 64 percent in 1963–65 to 85 percent in 1972–74. Later harvesting is relevant because it prolongs the exposure of the cotton crop to late-season pest infestations. There also was an upward trend in acreage planted; the average annual increase was 40,000 acres. USDA's report on Louisiana's application indicates that "as acreage in a parish increases, yield per acre decreases as poorer quality land is utilized."

C. The tobacco budworm has reached outbreak proportions in the last three years and has become the major late-season cotton pest.

Louisiana officials have asserted that there has been a marked change in the seasonal pattern of tobacco budworm infestations. There generally are two periods of *Heliothis* infestation in cotton; the first one occurs during June and early July, while the second begins the following month and continues until the crop matures, when it is no longer vulnerable to attack by the tobacco budworm. Historically, tobacco budworm has been the predominant insect during the early infestation (which is less serious because the cotton plant is still capable of compensating for insect damage), while bollworm has been predominant later in the season. According to Louisiana's data, a shift has occurred, in that tobacco budworm is now predominant during the later infestation. This shift is suggested by the following table, which is a reproduction of one appearing in Louisiana's application; however, the absence of data for the period 1965–1971 does not permit any inferences to be drawn as to precisely when the alleged shift occurred:

Percentages of Heliothis collected from cotton that were identified as tobacco budworm

Month	Year					
	1952	1963	1964	1972	1973	1974
July	66	12	6	------	84	25
August	5	2	1	74	23	58
September	36	9	3	85	91	86

The increased level of late-season tobacco budworm apparently is related to the increase in tobacco budworm resistance to insecticidal control. This theory has been propounded by Dr. Graves, Louisiana State University, with respect to tobacco budworm resistance to organophosphorous compounds. It is supported by data reported by Hanna (1973, A Quarter-Century of Cotton Insects in the Brazos Valley). In analyzing the shift in tobacco budworm population levels in the

V 40 168
APR 8 75

Brazos Valley (Texas) between 1962–72, Hanna stated that at the beginning of this period, tobacco budworms were highly resistant to chlorinated hydrocarbons but could be controlled with high doses of organophosphorous insecticides. At this time bollworms had not developed any massive resistance. At the end of the period tobacco budworms had developed resistance to organophosphates also; the bollworms were resistant to chlorinated hydrocarbons but not to organophosphorous materials. For the last three years, considerable budworm problems have occurred in late-maturing fields.

It is emphasized that pesticide resistance in the tobacco budworm in Texas developed first to organochlorine insecticides (DDT-toxaphene) and then to organophosphorous insecticides (primarily methyl parathion). Louisiana's data do not show exactly when the shift in tobacco budworm infestations occurred, but resistance to DDT-toxaphene in Louisiana was noted by Dr. Graves in 1966, Dr. Roussel stated that in the decade 1963–72 the combination of DDT-toxaphene-methyl parathion was applied an average of 10 times per acre per season on cotton grown in Louisiana. Obviously, at this rate of use, the selection pressure for development of resistance by tobacco budworm to the DDT mixture was intense. Dr. Graves' resistance data, as submitted in the State's petition, shows that of the 12 sites where insecticide resistance was detected in 1972–74 sampling, seven had relatively high levels of resistance to DDT-toxaphene. Thus, the contention that the tobacco budworm population shift has been very recent (after 1972) and due primarily to resistance to organophosphorous compounds is not entirely supported by data, though it could possibly be true.

In contrast, Dr. Pimentel, Cornell University, has noted in his testimony on the tobacco budworm problem in Louisiana that "from 1967 through 1972, when DDT was removed, you will note there is an average decline in yield per acre of cotton of about 30 pounds • • • Now, if you take the reduction from 1972 to 1973, we have a reduction of 28 pounds. And then the reduction from 1973 to 1974 is a reduction of 32 pounds. So that the average reduction in yield for those last two years is exactly equal or similar to the reductions in yield that you had the previous • • • 6 or 7 years. So that I say the trend here as being I would agree with my colleagues that there is a decline in yield, and I would agree with Dr. Newsom that this is probably a good deal due to resistance of the budworm, if we can go by the experience that occurred in Mexico and Texas, that this resistance is increasing and there is a decrease in yield, but that this reduction in yield has not increased following the removal of DDT, it has only remained constant because the insects are becoming more and more resistant to all of the insecticides used." It should be noted that more recent 1974 data, which had not been brought to Dr. Pimentel's attention, indicate that the 1973–1974 yield reduction was 81 pounds. The additional reduction may be due to increasing tobacco budworm resistance to all insecticides and/or to the other factors that may have affected 1974 yields (see 7B).

D. The reduced yields in the last two years have had a serious economic impact.

In his letter transmitting Louisiana's application, Governor Edwards estimated that tobacco budworm "specifically caused the loss of approximately 50–60 million dollars in 1974 in direct and indirect loss to the cotton industry" in Louisiana. An economic analysis in the State's application estimates that cotton producers combined 1973–74 losses were $50,645,250 and that increased unit costs arising from reduced yields, i.e., unit costs of production, ginning, and warehousing, were $17,773,500.

The $50,645,250 figure is an upper estimate based on five assumptions, one of which is a lint cotton price of 60¢ per pound. Historically, the highest price paid to cotton producers has been 58.4¢ per pound. In 1973, the average price was 37.5¢ per pound. In 1974, the average price was 46.3¢ per pound.

Four other assumptions underlie the $50 million figure:

That 615,000 acres were harvested. This figure approximates the 1974 harvest. The 1973 total was 520,000 acres.

That lint cotton loss per acre was 111 pounds. This figure is the difference between 1963–72 average yields and 1973–74 average yield; see Attachment A. Also see 6 A/B for comments on the validity of this time-series comparison.

That all yield losses in 1973–74 were due to the unavailability of DDT. Other factors affecting cotton yields are ignored. See 6 A/B for a detailed analysis of this assumption.

That use of DDT-toxaphene-methyl parathion would have resulted in yields closer to the 1963–72 average, or, in other words, that the relative efficacy of the DDT mixture would have been high, compared to the best alternative. See 6 E/F for analysis of this assumption.

These assumptions are inconsistent with actual experience in Louisiana, unsupported by experimental testing of cotton insecticides, and/or contrary to sound analytical methodology. Each assumption tends to inflate the dollar value of the economic impact on cotton producers.

In an attempt to predict the economic impact of not using the DDT mixture this year, a consultant to USDA has employed a model that takes into account a number of factors that affect cotton yields, including amount and timing of rainfall, cotton acreage, bollworm infestation, and boll rot. It was assumed that use of the DDT mixture would save two insecticide applications per acre and, in accordance with the State's controlled use program, involve $3 per acre for scouting and supervision costs. The resulting estimate of the cost of not using the DDT mixture is about $15.8 million. The methodology used here is much sounder and more sophisticated than that employed by Louisiana in estimating 1973–74 losses. Though there has not been time to examine the USDA model in detail, it should be noted that the assumptions as to relative efficacy of the DDT mixture and alternatives are based on the testing performed in Louisiana in recent years and therefore must be considered in light of the analysis presented in 6 E/F.

There is no question that some notable changes have occurred in the economics of cotton production over the past few years. Starting in 1974, cotton growers no longer received from USDA a subsidy for cotton produced on their allotted acreage. Previously, they received 15¢ per pound subsidy. In the DDT cancellation order, the Administrator noted that there was testimony that "this subsidy is the difference between profit and break-even (but that) it is not clear whether or not break-even includes a return to the farm owner in terms of salary or return on his investment." The legislation repealing this subsidy was enacted in 1973.

The legislation now in effect provides for Federal payments to cotton growers of an amount equal to the difference between the national average market price during a calendar year and a so-called target price. In 1974, the first year in which this new policy was in effect, cotton prices declined sharply late in the year; nevertheless, because the calendar-year average was above the target price (38¢ per pound), cotton growers received no payments. Legislation now under consideration in the Congress would raise the target price to 43¢ per pound.

As long as subsidy payments were being made, cotton growers had a cushion that protected them, to some extent, from the impact of price and production-cost variations and yield fluctuations. With their allotment acreage subsidized, they had an incentive to try to maximize yields by using large quantities of fertilizer and chemicals and planting indeterminate or late-season cotton varieties, even though such practices might, in the long run, contribute to the occurrence of pest problems. Nevertheless, yields in Louisiana began decreasing after 1968, and growers planted increasing acreage to maintain their incomes. USDA's report notes that increasing acreage is associated with declining yields; see 6 A/B. Without the subsidy program, cotton growers are forced to rely on their own estimate of future cotton supply and demand in making their production decisions. Thus, from an economic standpoint, they are in a transitional period requiring adjustments not only in their production planning but also in their handling of factors which affect cotton yields and pest control, which, in many instances, are interrelated.

There was testimony during the DDT cancellation hearings to the effect that demand for cotton was strong and stocks were low. In 1973, cotton prices, which had been stable for many years, began rising. They reached an all-time peak of 58.4¢ per pound in April 1974. With cotton prices so high, cotton growers substantially increased their acreage. In Louisiana, acreage planted jumped from 530,000 in 1973 to 665,000 in 1974. Then, prior to harvest, cotton prices dropped sharply. At the same time, production costs were increasing. Various data on production costs were cited at the public hearings on Louisiana's application, but no comprehensive figures were presented. There also was testimony that Louisiana cotton growers are having difficulty obtaining loans to cover production costs; again, no comprehensive data were presented.

Naturally, the economic factors that have affected cotton production in Louisiana in recent years have also affected it in other States. Furthermore, Louisiana has not been alone in experiencing a downward trend in cotton yields in the last few years. The same thing has happened in all the Mississippi Delta cotton-producing States. In fact, the USDA Crop Reporting Board's report dated January 10, 1975, shows that the other States in this region all have experienced sharper declines, ranging from 28–29 percent in Arkansas, Mississippi, and Tennessee to 36 percent in Missouri.

Whether substantial new evidence has been presented in the economics area is a difficult question. The difficulty lies largely in determining the materiality of evidence concerning economic changes experienced by cotton growers in one of several States where such changes have occurred. It is clear that the DDT cancellation order dealt with the cotton economy as a whole. No assumptions were made that cotton-production costs and profits in specific areas, such as Louisiana, were the same as those in other cotton-producing areas or that relative cotton-production costs and profits in the various cotton-producing areas would remain static in the future.

The economic outlook for any single area obviously was not the touchstone of the Administrator's statement that: "I am convinced by the evidence that continued use of DDT is not necessary to insure an adequate supply of cotton at reasonable cost." The evidence presented by the State of Louisiana, which has accounted for about five percent of the Nation's total cotton production in

recent years, clearly does not indicate that an adequate supply of cotton will not be available if Louisiana cotton producers are barred from using DDT.

There is evidence that the cost of using (the DDT mixture will be lower than the cost of using) alternatives, such as toxaphene-methyl parathion or EPN-methyl parathion. Taking into account both material and application costs and assuming that use of the DDT mixture will save two applications per acre during the period of treatment for tobacco budworm, it is estimated that the cost differential would range from eight to twelve dollars per acre; this figure must be reduced by three dollars per acre (USDA estimate) to cover the costs of the field scouting and supervision contemplated by Louisiana's program for controlling the use of the DDT mixture.

Of paramount importance, however, is the lack of sound evidence on which to base any prediction as to the relative efficacy of the DDT mixture and alternatives in 1975. In short, any economic benefits attributed to the use of DDT are, at best, speculative at this time. Even were such evidence available, it would not demonstrate that an adequate supply of cotton could not be produced at a reasonable cost, either in Louisiana or elsewhere. In this connection, it should be noted that while other States responding to a USDA survey in November 1974 noted the existence of some difficulty in controlling tobacco budworm infestations, including insecticide resistance problems, none of them suggested that use of the DDT mixture would be necessary this year.

E. The mixture of DDT-toxaphene-methyl parathion was effective against the tobacco budworm when it was last used and can be expected to be effective this year.

F. Currently registered insecticides are ineffective against heavy infestations of tobacco budworm.

In the DDT cancellation order, the Administrator's factual findings as to the benefits of DDT included the following:

That DDT is useful for the control of certain cotton insect pests.

That cotton pests are becoming resistant to DDT.

That methyl parathion and other organophosphate chemicals are effective for the control of cotton pests.

Efficacy

The Administrator's order cancelling DDT registrations suggests that other registered pesticides were considered to be at least as effective as the DDT mixture; in contrast, Louisiana's application asserts that the DDT mixture is the only one considered effective against heavy infestations of tobacco budworm.

A detailed analysis of Louisiana's data is presented in Attachment D to this report. Very briefly, this analysis indicates that deficiencies in the experimental design of the testing performed at State experiments stations and gaps in the data gathered during this testing make it impossible to draw any clear-cut conclusions as to the relative efficacy of the DDT mixture and other insecticides. The data derived from testing in 1972 (the last year in which the DDT mixture was tested) do not demonstrate that alternatives to the DDT mixture were ineffective; indeed, when yields in treated vs. untreated plots are compared, at least one of the alternatives, i.e. chlordimeform, appeared to be nearly as effective as the DDT mixture. Looking at all 1972–74 test results, it is apparent that several alternatives produced yields which were significantly greater than yields in untreated plots. These alternatives included methyl parathion used alone and in combination with toxaphene, EPN, and chlordimeform; a combination of toxaphene, methyl parathion, and methomyl; and a chlordimeform-methomyl combination.

Another significant gap in Louisiana's presentation is the absence of data on the extent and duration of tobacco budworm infestations at or above the economic injury threshold level. This point is germane to the issue of whether five applications of the DDT mixture at five-day intervals, as proposed by Louisiana, would effectively control tobacco budworm. Louisiana's data on the efficacy of the DDT mixture were based on nine applications in one test and eleven applications in the other.

USDA's support of the statement that no currently registered alternatives to the DDT mixture will effectively control tobacco budworm is based on Louisiana's 1972 test data (the deficiencies of which are briefly described above and delineated in greater detail in Attachment C) and on USDA testing at Waco, Texas, in 1972. The Waco test was merely a comparison of the DDT mixture and no treatment; it had no bearing on the relative efficacy of the DDT mixture and alternative materials.

Pesticide Resistance

Louisiana officials interpret their data on pesticide resistance as showing that resistance to pesticides other than the DDT mixture occurs in all the major cotton growing areas in the State. In 1972, however, studies of pesticide resistance included tobacco budworm samples from one site in District III and none in Districts II, IV, VI, and VII; together these districts accounted for 74 percent of the cotton acreage planted that year. Moreover, the tobacco budworm population sampled at the site in District III was susceptible to methyl parathion and DDT-toxaphene. In 1973 and 1974, tobacco budworm samples were collected at only two and four sites, respectively. In short, it is questionable that these data are truly representative, particularly since there is general agreement that resistance may vary significantly from one location to another.

Testing for pesticide resistance generally is performed by collecting field samples of the insect and exposing them in a laboratory to various doses of the insecticides being tested. Dr. Graves, who performs this testing in Louisiana, testified that "the only usefulness of this data is to find the range which would correspond to reduction in yield with field infestations present when control is not achieved." In other words, he was underlining the importance of determining the efficacy of an insecticide at the same field location from which samples for laboratory studies of resistance are collected. This correlation of laboratory data to field efficacy data for DDT and alternatives is supported by data from only one location in the State (Red River Valley, 1972). The State apparently relies on the data from this one study to show that methyl parathion failed to control tobacco budworm when there was a five-fold increase in resistance, while DDT-toxaphene remained effective when there was a two-fold increase in resistance.

Other data presented at the recent hearings on Louisiana's application raise a question about the extent to which reliance can be placed on just one lab-field correlation. USDA representatives introduced a report (Adkisson and Nemec, 1966. Comparative Effectiveness of Certain Insecticides for Killing Bollworms and Tobacco Budworms. Tex. Agr. Exp. Sta. B–1048) which showed that a seven-fold increase in resistance to DDT-toxaphene can be associated with an inadequate level of insecticidal efficacy, i.e., only 21 percent insect mortality 48 hours after treatment. Of the 12 sites sampled in Louisiana in the 1972–74 period at which some level of insecticide resistance was detected, seven had tobacco budworm populations greater than a seven-fold level of resistance to DDT-toxaphene.

In addition to the serious questions as to whether Louisiana's laboratory resistance data are representative of the major cotton-producing areas and whether the one lab-field correlation is meaningful, the data on this issue are deficient in that there are no data on tobacco budworm resistance to DDT-toxaphene-methyl parathion or to methyl parathion in combination with other commonly used insecticides nor any data on efficacy in the field of DDT-toxaphene vs. DDT-toxaphene-methyl parathion.

G. There will be a shortage of currently registered pesticides.

It is generally recognized that there was a shortage of cotton insecticides last year. This shortage was due largely to raw materials shortages and increased demand arising from increases in cotton acreage. From inquiries to manufacturers of insecticides registered for use against tobacco budworm, it is clear that most of them expect this year's supplies to be about the same as last year's. Since cotton acreage in the U.S. is expected to decline from nearly 14 million acres in 1974 to about 9.5 million this year, a repetition of last year's shortages is unlikely.

H. It is anticipated that tobacco budworm will be a major problem again in 1975 and will significantly reduce cotton yields.

Whether a late-season outbreak of tobacco budworm will occur again in 1975 is uncertain. There is no predictive model which would enable Louisiana to forecast the level of infestation based on factors such as overwintering populations, flight-range potential, reproductive capacity, etc.

Louisiana's application does indicate that the second-generation tobacco budworm population can be surveyed, beginning about June 15, to determine the time and areas in which damaging populations can be expected to occur and to identify areas where levels of resistance to currently available insecticides are likely to be so high that the use of the DDT mixture will be necessary.

In contrast, Dr. Roussel testified: "I have no idea how to predict budworm, but I do say and I will say that, based on the extremely mild winter we have, that our pest problem generally in the State will probably be more severe. However, that can be modified with weather conditions that exist in May, June, and July." As to the usefulness of the second-generation field surveys, Dr. Roussel testified that "it will not tell us that we will or will not have an outbreak in August."

Dr. Newsom testified that the "problem in Louisiana reached crisis proportions in 1974. It may be relatively slight, or no problem at all during 1975. Past experiences, however, indicate that it may be expected to intensify."

Though there is no method for predicting the occurrence and magnitude of future tobacco budworm infestations it seems clear that past practices in the Louisiana cotton-producing industry, if not altered, tend to increase the likelihood of an outbreak this year:

In 1972 and 1973, about 36–38 percent of the cotton growers in Louisiana used diapause control procedures, i.e., one or two late-season applications of methyl parathion to reduce the population of boll weevils going into the overwintering stage and thereby reduce the initial infestation level in the

V 40168
APR 8 75
XUM

succeeding year. Whether the same percentage of growers used diapause control procedures last year is not known, but in light of the losses experienced last year, it is likely that growers were less inclined to incur the expense. In any event, it is generally agreed among entomologists that diapause control is most effective when it is employed throughout an infested area. Diapause control is related to tobacco budworm control in that it can reduce the need for in-season use of insecticides to control boll weevil infestations and thereby preserve tobacco budworm predators and parasitolds. Since boll weevil is an important pest on more than two-thirds of Louisiana's cotton acreage, any decline in the use of diapause control will tend to have a substantial influence on the tobacco budworm problem.

Because of generally favorable climate and soil, Louisiana historically has produced high yields of cotton. Naturally, the higher the yield is, the higher a grower's income will be. Until recently, therefore, cotton growing in Louisiana has been oriented toward maximum production through the use of indeterminate or late-season varieties of cotton and extensive use of fertilizer, herbicides, and insecticides. Until insecticide resistance appeared in the tobacco budworm, this practice was understandable. In 1975, because of the anticipated difficulty in controlling late-season tobacco budworm infestations, the State's Guide for Cotton Insect Control will make the following recommendations:

Avoid late planting.

Use nitrogenous fertilizers moderately.

Delay insecticide applications as long as possible. Apply insecticides only when insects reach damaging levels.

Plant soybeans when cotton cannot be planted within the recommended planting interval, i.e., April 20–May 15.

This year will be the first one in which the first, second, and fourth recommendations have appeared in the Guide. It is likely that many farmers will be hesitant to follow these procedures until their advisability and economic feasibility have been clearly demonstrated. To the extent that they ignore these recommendations, the potential for another tobacco budworm outbreak will be increased.

I. The requested use of DDT poses no unreasonable risk to human health.

No human health data were included in Louisiana's application. To the extent that such data were included in testimony at the public hearings, the data were almost entirely derived from studies performed and reported prior to the DDT cancellation action. Additionally, the only human health information cited by the State of Louisiana in its summary of "substantial new evidence" consisted of quotations attributed to an EPA official extracted from a House Agricultural Subcommittee hearing record. At least one portion of the alleged quotation cited—i.e. "Thus subsequent evidence confirms that human risk is remote and that the limited use in question poses no unreasonable risk of harm to man" (Petition for Reconsideration, at p. 6)—does not even appear in the Subcommittee hearing record. None of the brief comments made in other summary statements is supported by any evidence that would contradict the findings on human health that were set forth in the DDT cancellation order. Moreover, the recent Aldrin/Dieldrin suspension order found that DDT reacts with another ubiquitous environmental contaminant, Dieldrin, to produce synergistic carcinogenic effects. (Order of the Administrator, at p. 31).

J. Cotton growers will use DDT in accordance with a program designed to control its use and minimize environmental impact.

In the DDT cancellation order, the Administrator's statement of general findings including the following:

"No directions for use of DDT, even if followed, can over the long run completely eliminate DDT's injury to man or other vertebrate animals."

"No warning or caution for use of DDT, even if followed, can over the long run prevent injury to living man and other vertebrate animals and useful invertebrate animals."

"The use of DDT in controlled situations in limited amounts may present less risk than usage in greater amounts, but still contaminates the environment."

Exactly what would constitute a "controlled situation" or "limited amounts" is not defined.

Louisiana's application specifies that "no DDT will be applied until the occurrence of the tobacco budworm has been confirmed at population levels at or above the economic injury threshold" and describes a field survey program and related distribution control measures to implement this commitment. Louisiana's officials' testimony indicated that a detailed operational plan has yet to be prepared. Nor was any estimate offered as to the extent to which this program can be expected to reduce the use of DDT below the projected maximum of five applications per acre to every acre of cotton in the State.

Louisiana's application also identifies a number of regulatory restrictions and educational measures designed to minimize environmental impact. Regulatory restrictions would include a mandatory half-mile separation between DDT spraying and dairies or forage, silage, and grain crops used to feed dairy animals; a similar restriction—with exact distance to be determined by testing prior to use of DDT—will be applied to spraying in the vicinity of grazing areas for beef cattle. Educational measures would include urging farmers to plant alternative crops in areas that are extremely sensitive to DDT, e.g., near pastures; to harvest hay, silage, and grain crops before use of DDT begins; to consider prevailing wind direction in planting cotton so that drift will be away from sensitive areas; and so on.

Assurances were given that implementation of the various regulatory and educational measures is practicable. There was testimony that cotton growers can be expected to be highly responsive to the program. State officials rejected the suggestion that some or all of the voluntary measures should be mandatory. They indicated that 35 State employees would be charged with monitoring compliance. Legislation to be considered when the State legislature convenes next month would provide for a penalty of up to $500 for violation of any of the regulatory restrictions.

Following its description of the measures designed to control the use of DDT and limit environmental impact, Louisiana's application asserts:

"It is recognized that the use of DDT, even when the precautions outlined above are taken, will result in widespread contamination of the environment with undesirable residues of this chemical. However, the amount that will be used for this emergency will be no more than one-fourth to one-third of that used each year for more than two decades without any evidence of irreversible adverse environmental effects."

Elsewhere, it asserts:

"Except for isolated residue problems in selected commodities, it is not expected that the use of DDT will curtail the range of beneficial uses of the environment. Even the most severe of the localized effects are unlikely to be of more than extremely short duration."

In the course of the recent hearings on Louisiana's application, there was testimony from representatives of the Governor's Council on Environmental Quality, the Stream Control Commission, and the Fish and Wildlife Commission, all of whom subscribed to the foregoing statements. In response to questions, however, neither they nor any other State officials could cite any analysis that has been done to project environmental impacts with and/or without the various use control and environmental protection measures. One State representative sought to minimize the significance of the statement concerning undesirable residues by saying that any DDT residue is undesirable.

Louisiana officials seem to be implicitly agreeing with the Administrator's general findings as to the inevitability of environmental injury when DDT is used. No significant new scientific data were presented to refute these findings. They also seem to be saying that the requested use would involve a limited amount in a controlled situation, but no analysis of the anticipated effectiveness of the control measures is available, and there apparently is no detailed operational plan for obtaining compliance. In short, while it may be Louisiana's position that its use control and environmental protection measures represent a significant change from the way in which DDT was used prior to the EPA cancellation action, and while it may be possible to substantiate this position, no substantiation has been offered thus far.

K. "Pest management techniques such as trap crops, resistant varieties, diapause programs, insect pathogens, etc., are not developed adequately to preclude the need for effective insecticides. Research under Louisiana conditions has shown that certain of these techniques are useful in reducing the probability of pest outbreaks but they will not replace direct chemical control when outbreaks do occur." Louisiana's application, page 22.

The key question concerning the usefulness of integrated pest management (IPM) methods in the Louisiana cotton-producing industry is not whether the use of such methods will eliminate the need for an effective insecticide for tobacco budworm control. IPM, by design, attempts to use all necessary insect control methodologies but in a sequence that will optimize the control benefits and minimize the amount and optimize the timing of insecticide applications. IPM may actually result in greater use of insecticides (Evaluation of IPM Programs for Cotton in the United States, 1974, Report to CEQ and EPA). For example, in Texas in 1973, cotton farmers participating in the IPM program used 33,686 more pounds of insecticides than did non-participating farmers, i.e., about one pound per acre more insecticide was used by participants. However, better timing of the application of insecticides and use of diapause control enabled the participating farmers to increase yields and thereby reduce the amount of insecticide used to produce a bale of cotton by 7% (i.e., 13.54 pounds of insecticide/bale without the program vs. 12.62 pounds/bale with the program).

Like any other new product, IPM methods for cotton insect control must be carefully designed and "sold" to potential users. Lacewell and Casey (1974, IPM Report to CEQ and EPA) listed the following items as necessary components of a successful program:

1. Program support by a strong producer organization.

2. Strong individual producer support of the program, coordinated through the producer group or association.

3. County extension entomologists possessing above-average competence, initiative, enthusiasm, and ability.

4. A strong research component developing optimum pest management strategies and new and innovative approaches in all phases of cotton production, oriented toward local or regional climatic and other requirements, and effective flow of information between research and implementation.

5. Continued governmental support, justified by documentation of actual and potential benefits to producers as well as to society.

The potential benefits of IPM for cotton insect control have been clearly demonstrated in Texas. The crux of the IPM issue in Louisiana is twofold: 1) What is the level of the research effort in Louisiana to develop IPM as an alternative to complete reliance on conventional insecticidal control? and 2) What is the level of implementation of these methods by cotton producers in the State?

USDA conducted a survey of cotton-producing States in November 1974 to determine the extent of tobacco budworm problems and identify needed research on this problem. Both Texas and Louisiana have severe tobacco budworm problems. The difference in the research recommendations of these two States is marked, however. Basically, Texas said: Screen alternative chemical, biological, or behavior materials; place further emphasis on pest management; and develop *Heliothis* resistant cotton varieties. In contrast, Louisiana suggested: Greatly expand testing of as many new chemicals as possible; initiate a crash program on the development of synthetic pyrethroids (a conventional insecticide); seek permission to use DDT until a new chemical is registered; and give top priority to an immediate and long-range effort on resistant varieties. In short, most of Louisiana's suggestions were directed towards furthering the use of conventional insecticides.

The inadequacies of this response to the tobacco budworm problem are further compounded by the low level of grower participation in cotton IPM programs. Most of the currently used IPM methods require a nearly complete participation by growers within a large area to be effective. As an example, Dr. Brazzel, USDA (DDT Cancellation Hearing, 1972, Vol 3), stated that diapause control of the boll weevil, to be effective, would require nearly 100 percent participation of the cotton growers within the infested area. In 1973, only 38 percent of the cotton acreage was exposed to diapause control measures in Louisiana. Another method which has been proven to reduce the number of insecticidal applications necessary during the course of a cotton growing season is the use of field scouts to determine the need for insecticide treatment. In 1974, 260,000 acres, or 40 percent of the land planted to cotton in Louisiana was scouted. Dr. Clower, Professor and Project Leader for Cotton Insect Research, Louisiana State University (1974, A Statement Regarding the Plan to Eradicate the Boll Weevil from the United States) in a discussion of the feasibility of IPM techniques for use in a boll weevil eradication program stated "I personally have worked on the trap crop principle in cotton for over 10 years and feel that it offers an excellent pest management mechanism under Louisiana conditions. Louisiana is the first state to officially recommend it to growers." Yet, only 6,500 acres, or a maximum of 1 percent of the cotton acreage in Louisiana in 1974 was planted in trap crops. This figure, however, may be below the norm for the State due to excessive rainfall during the 1974 planting period.

IPM techniques, such as diapause control, trap cropping, and the judicious use of insecticides through scouting, reduce the probability of damaging pest outbreaks including tobacco budworm. The commercial feasibility of implementing these methods to control cotton insects has been demonstrated in other States. Furthermore, IPM may be used to avoid tobacco budworm outbreaks by the use of early planting and early maturing varieties of cotton. The data indicate, however, that the level of grower participation in cotton IPM in Louisiana is inadequate.

7. Conclusions.

A. Average cotton yields have declined in the last two years as compared to the preceding ten years. However, there is no evidence to indicate that any meaningful conclusions concerning the relationship of yields to the presence or absence of DDT can be drawn from such a comparison.

B. The tobacco budworm is but one of many factors which affect yields, and it is quite clear that no evidence was presented to support the proposition that the tobacco budworm was the principal cause of reduced yields in the past two years.

C. The tobacco budworm has become a late-season cotton pest; however, it is not clear that the predominance of this pest occurred as recently as three years ago; instead, it may have risen to its present status prior to 1972. Furthermore, because of resistance problems, it is just as likely that the tobacco budworm will remain a late-season pest whether or not DDT or methyl parathion or any other currently available pesticide is used.

D. The Louisiana estimates of economic losses totally ignore the numerous factors which affect cotton yields. The underlying assumptions on which the estimates are based are inconsistent with actual experience in Louisiana and are contrary to sound analytical methodology.

E. There is no conclusive evidence to indicate whether the DDT mixture can be expected to be effective in controlling tobacco budworm in 1975.

F. Louisiana has not demonstrated that all currently registered insecticides are ineffective against tobacco budworm.

G. A repetition of cotton insecticide shortages in 1974 is unlikely to occur in 1975.

H. It is impossible to predict the likelihood of a tobacco budworm outbreak in 1975 at this time. However, if past cotton production practices are continued, and more sophisticated production methods are ignored, the likelihood of an outbreak will be enhanced.

I. No evidence was offered to refute the findings contained in the 1972 cancellation order that DDT is a potential human carcinogen.

J. Adverse effects to the environment can only be minimized, not eliminated. The proposed controls for minimizing the adverse effects are laudable in some respects and lacking in others. The likelihood of these controls being carried out in the spirit in which they are proposed is subject to question because of the voluntary aspects of many of the most important controls and the considerable administrative problems posed by the use of 2.25 million pounds of DDT by large numbers of farmers covering an area which may be as large as 450,000 acres.

K. Louisiana has not taken fullest possible advantage of integrated pest management techniques which other States have found to be of considerable benefit.

ATTACHMENT A TO THE REPORT OF THE SPECIAL REVIEW GROUP

The following table is a reproduction of one contained in Louisiana's application (pg. 15) for an emergency exemption (with 1974 yield corrected to reflect more recent data presented at the public hearings):

Year:	Pounds lint per acre
1963	628
1964	544
1965	540
1966	502
1967	621
1968	636
1969	551
1970	555
1971	576
1972	509
Total	5,762
10 yr. average	576
1973	461
1974	430
Total	911
2 yr. average	455
Difference	121

ATTACHMENT C TO THE REPORT OF THE SPECIAL REVIEW GROUP

ANALYSIS OF EFFICACY DATA

In this analysis of Louisiana's data on the efficacy of the DDT mixture and other insecticides, the standards used in evaluating the data are identified (underlined), and the findings are related back to the standards. When a pesticide proposed for use in an emergency situation is one which has been cancelled after extensive administrative inquiry, it is appropriate that reasonably rigorous standards be applied to the supporting data. Otherwise, the mere assertion that an emergency exists, even if well substantiated, would leave EPA without any meaningful basis for judgment as to the efficacy of the proposed solution. In an emergency, even more than in routine pest control situations, it is vital that the pest control method to be used be effective, particularly since the consequences of using an ineffective method could be much more serious.

A. What is the pretreatment infestation level? If multiple pest species are involved, what are the relative proportions of the various species during the course of the test?

The tobacco budworm and the bollworm are two closely related species belonging to the genus *Heliothis* and are similar in appearance to the naked eye. In the efficacy data tables in Louisiana's application (pp. 27–32), presenting the results of testing in 1972–74 at experiment stations in Northeast and Northwest Louisiana, the State's two principal cotton-producing areas, neither the pretreatment infestation levels nor the relative levels of tobacco budworm and bollworm are specified. Comments related to Tables 1, 3, and 5 assert that tobacco budworm was the primary pest during September, but exact figures were not given there or in testimony at the recent hearings. Proper experimental design would have included sampling in the untreated check plots to determine infestation levels and relative proportions of tobacco budworm and bollworm before and during pesticide testing. In the absence of such sampling data, the exact impact of the tobacco budworm and the efficacy of the chemicals tested cannot be determined. All that can be said is that control of *Heliothis* was or was not achieved.

B. Were the infestation levels before treatment and during the testing significant?

Though pretreatment infestation levels were not determined, the data in Tables 1–5 for untreated check plots indicate heavy infestation pressures during the course of the experiments. The significance of these infestation pressures are manifest in the reported yield differences between treated and untreated plots.

C. Did the pest infestation occur at a point during the development of the host plant (cotton) which resulted in a significant impact on yield or crop quality?

As indicated in B, it is apparent from the data on untreated plots that the *Heliothis* infestations did occur during a critical period in the development of the cotton plants, except that the comment related to Table 1 is that "this infestation occurred too late to have a maximum impact on production, hence inferior treatments still produced relatively good yields."

D. Was the experiment designed properly to eliminate or account for the impact of independent variables, e.g., boll rot, climatic stress, presence of other insect pests, and therefore clearly demonstrate the impact of the insecticide treatment?

The test data reported in Tables 1–5 were derived from testing using a replicated, random block design. Though this design does not isolate independent variables, the use of untreated check plots does make it possible to account for the impact of such variables. This type of experimental design is widely accepted by entomologists. A conditional or multiple regression analysis would have been useful in assessing the relative importance of the several variables which might have affected yield; no such analysis has been presented.

E. Was the use of the insecticide related to a reduction in the target insect population?

Tables 1–5 provide no data on the impact of any insecticide on the total *Heliothis* numbers or, in particular, tobacco budworm. Louisiana's evaluation of the insecticides is based on levels of damage to squares and bolls and on production of seed cotton per acre. These indices are useful, of course, but absence of data on numbers of insects before and after treatment adds to the difficulty of evaluating efficacy against the tobacco budworm. This problem is exemplified by the data in Table 1 showing that treatment with phosvel resulted in a lower level of boll damage (2 percent) than did treatment with the DDT mixture (5 percent); however, yield in the DDT mixture-treated plot was higher. USDA's Dr. Richard Ridway testified that in his efficacy tests he tries to include estimates of the tobacco budworm population in the test plots.

F. Can comparisons of the efficacy of the test material vs. registered standards be made in order to determine relative efficacy?

The relative efficacy of the DDT mixture vs. registered alternatives is a key question. In the absence of direct comparisons of the DDT mixture to the registered alternatives tested in 1973 and 1974 (Tables 3–5), it is inappropriate to use these data to support the contention that use of the DDT mixture is essential. The logical question is whether the DDT mixture would have been effective in 1973 and 1974; this question cannot be answered with Louisiana's data. It is noteworthy that USDA did not include Tables 3–5 in its analysis of Louisiana's application.

G. Have any of the insecticides demonstrated any adverse effects in terms of phytotoxicity?

Louisiana officials testified that methyl parathion has been found to cause delays in maturation of cotton plants; however, no data on this point appear in the State's application. In addition, a review of the scientific literature indicates that no significant phytotoxic effects were noted in a test comparing DDT-toxaphene and DDT-methyl parathion.

H. Were the variations in insect populations and damage and yield estimates analyzed statistically to determine if they were statistically significant?

The only statistical analysis presented by Louisiana is a test of the statistical significance of yield in treated vs. untreated plots. For the insecticide testing performed in 1972, this analysis showed that, in addition to the DDT mixture, all five registered alternatives tested at the Northeast Louisiana experiment station and two of five tested at the Red River station in Northwest Louisiana yielded significantly more seed cotton per acre than was derived from untreated plots. No multiple-range type analyses were presented; such analyses would have permitted evaluation of the significance of differences in insect damage and yields among the various chemicals tested.

STATE OF LOUISIANA REQUEST FOR EMERGENCY USE OF DDT ON COTTON

Statement of Reasons for Denial

Order and Determination of the Administrator that Reconsideration of the Agency's Prior Order of Cancellation of DDT for Use on Cotton is Not Warranted.

The history of prior administrative and judicial proceedings involving the regulation and curtailment of the use of DDT is long and involved. A summary of those prior proceedings is contained in the preamble of my recent promulgation of Subpart D of the Environmental Protection Agency's ("EPA") Rules of Practice for Applications Under sections 3 and 18 to Modify Previous Cancellation or Suspension Orders (40 F.R. 12261). The culmination of those proceedings came in June, 1972, with the issuance, by former EPA Administrator William D. Ruckelshaus, of a final order cancelling virtually all uses of DDT (37 FR 13369).

On February 10, 1975, EPA published notice in the FEDERAL REGISTER (40 FR 6229) of the request by the State of Louisiana, under section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act, as amended ("FIFRA"), and regulations thereunder, for the use of pesticides containing DDT (1,1,1-trichlorophenyl ethane) on cotton to control the tobacco budworm. EPA also published notice in the FEDERAL REGISTER (40 FR 6228) of informal public hearings with respect to Louisiana's application. The hearings were subsequently held in Baton Rouge, Louisiana, on February 27 and 28, 1975 and in Washington, D.C., on March 3, 4 and 5, 1975.

On March 12, 1975, EPA announced revised procedures with respect to applications such as Louisiana's which in substance seek modification of prior cancellation orders. These procedures are required by virtue of the fact that modification of a final order without a formal hearing would undercut the statutory scheme of FIFRA and prejudice the rights of parties who participated in the lengthy cancellation hearings. A more detailed statement of the reasons for adopting these procedures is set forth in the preamble to the Rules of Practice for Applications Under sections 3 and 18 to Modify Previous Cancellation or Suspension Orders which I signed on March 12, 1975, and which I incorporate by reference herein. Prior to the holding of informal hearings on Louisiana's application, a seven-man panel of EPA technical and administrative experts was appointed to hear the testimony presented at the hearings, review all exhibits submitted by the participants, and analyze the statements submitted by all interested parties which summarize the evidence bearing on the Louisiana petition. This panel was also charged to review the whole of the data and make a preliminary assessment as to whether

(1) "the applicant has presented substantial new evidence which may materially affect the prior cancellation or suspension order and which was not available to the Administrator at the time he made his final cancellation or suspension determination and (2) such evidence could not, through the exercise of due diligence, have been discovered by the parties to the cancellation or suspension proceeding prior to the issuance of the final order." (40 CFR 164.132(a)).

The report and conclusions of the panel were presented to me on Thursday, March 13, 1975. The panel concluded that Louisiana had not presented any substantial new evidence which may materially affect the 1972 Cancellation Order. The report and conclusions of the panel will be published in the FEDERAL REGISTER along with the statement of reasons in support of my order and determination.

Having reviewed and discussed the report and conclusions of the panel I have made a separate evaluation of the factors involved in the Louisiana situation including consultation with the EPA staff and summary statements filed by the parties to the informal hearings.

Because of the extraordinary time constraints necessarily present in this case and the need to announce my determination as soon as possible in order that Louisiana farmers can proceed with spring planting arrangements, I am announcing my determination today and deferring publication of the complete statement of the basis for my determination until next Monday, March 17, 1975.

The environmental impact resulting from the amount of DDT projected for the Louisiana application gives me cause for great concern. No evidence was presented that would refute the finding in 1972 that DDT is a mobile, persistent compound that is uncontrollable in the environment even when used in accordance with strict directions for use. Thus, the use of several million pounds of DDT in Louisiana will likely result in wide scale environmental contamination. The finding in 1972 that DDT poses a cancer risk for man is still true today. In fact scientific experimental evidence generated since the June, 1972, decision tends to reaffirm and augment this cancer hazard. In addition to the added risks to man and wildlife, there are various commercial fish, livestock and feed industries likely to be affected economically by the resulting residues. I could find no new substantial evidence that might materially change the 1972 findings.

In addition, I could find no new substantial evidence on the benefit side of this use of DDT. The best available evidence indicates that fluctuating weather conditions, national overplanting of cotton, crop subsidy, price, and other economic factors tend to have a greater impact on reduced cotton yields in Louisiana than the tobacco budworm insect.

Alternative controls are available to Louisiana farmers. Other pesticides—for example, Galecron, EPN, and methyl parathion, coupled with proper application timing—have been shown to be effective and are expected to be available in sufficient quantity this year. Farmers in the Brazos Valley of Texas and the Arkansas Delta have controlled budworm problems without DDT, using integrated pest management, such as "scouting," and by using alternative pesticides. Early planting also appears to reduce the susceptibility of cotton to tobacco budworm infestation.

The record further indicates that it is feasible to plant alternative crops that do not have similar insect problems and which can produce valuable food and feed products.

Accordingly, the section 18 application by the State of Louisiana for emergency use of DDT on cotton in 1975 is denied. A more detailed description of the reasons for this order will follow on Monday, March 17, 1975.

Dated: March 14, 1975.

RUSSELL E. TRAIN,
Administrator.

[FR Doc.75-9080 Filed 4-7-75;8:45 am]

[FRL 356-3]

STATE OF LOUISIANA REQUEST FOR EMERGENCY USE OF DDT ON COTTON

Supplemental Statement of Reasons for Denial

Supplement to the Order and Determination and Statement of Reasons for the Order and Determination of the Administrator that Reconsideration of the Agency's Prior Order of Cancellation of DDT for Use on Cotton is Not Warranted.

On June 30, 1972, former Administrator Ruckelshaus cancelled virtually all Federal registrations of DDT—including use on cotton. (37 FR 13369) (1972 Order). That 1972 Order was then affirmed by the U.S. Court of Appeals for the District of Columbia. *See DDT V*, Statement at 17–18. Since that time EPA has received and denied approximately 44 separate requests to use DDT on cotton on the basis that considering the general human and environmental risks associated with such DDT use, the applicants failed to establish sufficient new information to warrant approval of the request. Statement at 23. On January 24, 1975, the State of Louisiana applied for a specific exemption under section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act, as amended (FIFRA) for the application of 2.25 million pounds of DDT to control the tobacco budworm on approximately 450,000 acres of cotton. By "Order and Determination" of March 14, 1975, I denied the request. A full statement of my reasons was set forth in my 50 page March 17, 1975, "Statement of Reasons for the Order and Determination of the Administrator that Reconsideration of the Agency's Prior Order of Cancellation of DDT for Use on Cotton is Not Warranted" (Statement). That Statement summarized the extensive prior administrative and judicial determinations relating to DDT. On March 21, 1975, the State of Louisiana and the U.S. Department of Agriculture (USDA) petitioned for reconsideration of my March 14, 1975, Order and my March 17, 1975, Statement. These petitions alleged various grounds for reconsideration including comments contained in a report given on March 19, 1975, to the EPA Hazardous Material Advisory Committee by an Ad Hoc Study Group (Ad Hoc Group).[1]

FIFRA section 18 provides that "the Administrator may, in his discretion, exempt any Federal or State agency from any provision of this Act if he determines that emergency conditions exist which require such exemption." I have determined that in cases such as Louisiana's—where pesticide use has been cancelled by final order after exhaustive proceedings involving the same issues—this discretionary power of exemption should only be exercised in accordance with appropriate procedures. Such procedures are necessary in order (1) to assure that public resources will not be wasted in repeated administrative litigation of questions which will not materially affect the prior order and for which an opportunity for thorough adjudicatory hearings has already been provided and (2) to provide that if substantial new evidence is presented which may materially affect the prior order the discretionary exemption power will not be exercised so as to modify the prior order without giving the parties to the original proceeding an opportunity to participate in a formal hearing on the particular questions presented. These considerations led me to adopt modifications of the Rules of Practice which govern such EPA hearings. See 40 CFR 164.130 (40 FR 12261).

In the case of the Louisiana petition the State has now had a full opportunity to present additional information in 5 days of public hearings held solely for that purpose. During the February and March; 1975, hearings on the Louisiana application 93 witnesses were heard, 1180 pages of transcript were generated and more than 1080 pages of exhibits were introduced.

After these additional hearings had been completed, I reviewed the written summary statements filed by the parties, considered the conclusions of the EPA seven-man panel (EPA Review Panel) which heard the testimony and held informal discussions with my staff and with the Ad Hoc Group. I then concluded that there was no substantial new evidence which may materially affect the 1972 Order and I denied the petition.

[1] The Ad Hoc Group spent Friday, March 14, 1975 reviewing the Louisiana application and discussing it with representatives of the State, the USDA and the EPA Review Panel. The Ad Hoc Group reviewed the Louisiana application but did not hear any of the testimony at the 5 days of public hearings nor was it able in the one day available to it to read the 1080 pages of exhibits submitted, to consider the additional written statements filed by the U.S. Department of Interior-Fish and Wildlife Service, the Environmental Defense Fund, the Health Research Group, USDA or Louisiana or to review the 50 written comments received from the public pursuant to EPA's February 10 FEDERAL REGISTER Notices.

V 40168 APR 8 75

After reconsidering the record in this proceeding and the petitions for reconsideration as well as the conclusions of the EPA Review Panel and the comments of the Ad Hoc Gorup, I deny the requested reconsideration and state as basis for my denial the following:

CANCER RISK TO MAN

First, there is no new evidence which casts doubt on the 1972 findings that continued use of DDT poses a cancer risk to man. Post-1972 laboratory studies confirm the carcinogenic properties of DDT. Administrator Ruckelshaus found in 1972 that "there is no adequate human epidemiological data on the carcinogenicity of DDT, nor is it likely that it can be obtained." (37 FR 13375). There are no post-1972 human epidemiological studies which disprove or contradict this finding concerning the human cancer risk of DDT. When we deal with cancer we deal with a matter of grave concern. The 1972 findings did not, of course, conclude that DDT causes cancer in man; the 1972 findings concluded that DDT poses a cancer risk to man. Science provided no conclusive answers in 1972, and no such conclusive answers to the human cancer risk are available today. What remains, however, is clear and uncontested evidence of DDT's ability to induce cancer in laboratory animals. As former Administrator Ruckelshaus concluded in his 1972 DDT findings (37 FR 13375, IV, A, 3(c)), and as I recently stated in my Order suspending registrations of aldrin/dieldrin, given our uncertainty about the precise mechanisms that cause cancer and given the lack of adequate epidemiological studies on such ubiquitous environmental contaminants, "I believe that a carcinogenic reaction in any species of test animal must be considered sufficient to describe the test compound as a carcinogen and so a threat to human health." (39 FR 37270). In the face of laboratory data demonstrating carcinogenesis, regulatory decisions which directly affect the public health cannot be deferred—with concomitant irreversible human exposure—pending completion of epidemiological studies which require many years, are often of questionable significance and in any event provide data for making public health decisions only after the public health may have been irreversibly jeopardized.[1]

[1] The only "evidence" submitted by Louisiana or USDA (and referred to by the Ad Hoc Group) on the human health risks associated with DDT use is an April, 1974, quotation from an EPA official to the effect that: "There is, at the present time, no evidence that DDT is carcinogenic (or tumorgenic) in any animal species when administered at levels less than two orders of magnitude higher than the maximum dose attainable by plant manufacturers and workers over a lifetime of exposure." I have consulted with the official involved and find that he estimated the "maximum dose" of DDT plant workers to be approximately 0.257 mg/kg/day. Two orders of magnitude higher than that would be 25.7 mg/kg/day. These estimates are derived from Laws, et al, 1967. At the time of the 1972 Order the lowest dosage which had produced tumors in laboratory animals was 37.5 mg/kg/day (250 p.p.m.). Accordingly, as of 1972, tumor induction had not been confirmed in laboratory animals at feeding levels lower than a level two orders of magnitude higher than estimated maximum plant worker intake. (Maximum intakes estimated according to Ortelee, 1958, were 0.57 mg/kg/day and two orders of magnitude greater than that would be 57 mg/kg/day.) This comparison is interesting, but does not cast doubt on the 1972 finding of cancer risk to man. Moreover, the EPA official in question had not, at the time of his statement, had an opportunity to review post-1972 DDT carcinogenic laboratory studies. These studies indicate DDT tumor induction in laboratory animals at feeding levels as low as 0.3 mg/kg/day (2 p.p.m.) (see Statement at 32–33), a level comparable to Law's estimated maximum intake of plant workers (0.257 mg/kg/day) and substantially lower than Ortelee's estimated maximum worker intake (0.57 mg/kg/day).

The Louisiana petition also refers to a November 28, 1974, letter of Dr. Lloyd Tepper. That letter summarized various DDT cancer data, but did not undercut the 1972 finding of the human cancer risk posed by DDT. The pre-1972 data referred to by Dr. Tepper had been considered in the 1972 Order. The post-1972 data referred to by Dr. Tepper confirm the carcinogenesis of DDT in the laboratory mouse and the positive correlation between such a finding and broader carcinogenic effects in other species.

ENVIRONMENTAL RISKS

Second, there is no new evidence which casts doubt on the 1972 findings that continued use of DDT poses serious risks to fish and wildlife. None of the participants in the recent hearings on Louisiana's petition presented evidence contesting the basic environmental findings of former Administrator Ruckelshaus. In the 1972 Order he found that "once dispersed, DDT is an uncontrollable, durable chemical that persists in the aquatic and terrestrial environments." 1972 Order, 37 F.R. 13370. He concluded that DDT was "highly volatile" (37 FR 13370 n. 16) and "can vaporize from crops and soils" (37 FR at 13375); that it "can be transported by drift during aerial application" (Id. at II, A, 3(a)); and that it "can be attached to eroding soil particles" (Id. at II, A, 3(c)). Administrator Ruckelshaus also found that DDT "can persist in the soils for years and even decades" (Id. at II, A, 1); that it "can persist in aquatic ecosystems" (Id. at II, A, 2); and that "it is occasionally found in remote areas or in ocean species, such as whales, far from any known area of application" (37 FR at 13370–71). As a result of its persistence and mobility, he found that DDT is "concentrated in organisms and transferred through food webs" (37 FR 13375); that DDT "accumulation in the food chain and crop residues results in human exposure" (Id. at III, A, 2); and that "human beings store DDT" in their tissues (Id. at III, A, 3).

These inherent characteristics of DDT are particularly important in view of the uncontested findings of Administrator Ruckelshaus that the 1972 evidence "compellingly demonstrates the adverse impact of DDT on fish and birdlife." 1972 Order, 37 FR 13371. No new evidence has been introduced and none has been cited by USDA or Louisiana which undercuts this prior finding.

Moreover, no evidence has been offered by Louisiana or USDA to contest the specific 1972 findings of adverse environmental effect:

1. DDT affects phytoplankton species' composition and the natural balance in aquatic ecosystems.
2. DDT is lethal to many beneficial agricultural insects.
3. DDT can have lethal and sublethal effects on useful aquatic freshwater invertebrates, including arthropods and molluscs.
4. DDT is toxic to fish.
5. DDT can affect the reproductive success of fish.
6. DDT can have a variety of sublethal physiological and behavioral effects on fish.
7. Birds can mobilize lethal amounts of DDT residues.
8. DDT can cause thinnings of bird eggshells and thus impair reproductive success. (1972 Order, 37 FR 13371 at IV, A, 1–8).

Not only is there no new evidence which would reduce the environmental hazards previously found, but Louisiana's application for use of DDT candidly states that: "The undesirable features of once more applying DDT to large areas of cropland are recognized." Louisiana Application at 5. Many of these undesirable features have been recited in Louisiana's application which contains a brief statement of the Louisiana Wildlife & Fisheries Commission. Because it was formally adopted by the Commission with respect to the State's requested DDT use and because it shows the applicability of many of the general environmental hazards of DDT to the specific environment of Louisiana and surrounding areas, I find it appropriate to quote the entire statement as follows:

STATEMENT BY THE LOUISIANA WILDLIFE AND FISHERIES COMMISSION ON EFFECTS OF DDT ON WILDLIFE

The EPA will be petitioned to life the ban against DDT for the control of the tobacco budworm and the pink bollworm in cotton during the 1975 growing season. The Louisiana Wildlife and Fisheries Commission has been asked to comment on the impact of this insecticide on fish and wildlife.

There is documented evidence that DDT (metabolites), which is one of the chlorinated hydrocarbons, is very persistent in the environment and has been detected in high concentrations in fish, birds and mammals. Actual damage has occurred in the form of direct mortality, reproductive failure, and behavioral changes. DDT is acutely toxic to fish, shrimp, crabs, less toxic to birds and mammals. DDT applied on land areas through natural drainage will find its way into the marine environment along the Louisiana Coast. Examples of damage are listed below:

I. Mortality of Penaeid (Brown & White) Shrimp[1] occurs at 0.15 ppb (parts per billion) and bioassays conducted in Mississippi indicate 50 percent of the freshwater shrimp[2] tested over 24 hours and in four

[1] American Fisheries Society, Volume 101, No. 3, 1972, Nimmo, D. R.

[2] American Fisheries Society, Volume 99, No. 4, 1970, Page 696, Fugerson, Denzel.

different locations were killed at the following concentrations: 2.5 ppb, 6.3 ppb, 5.7 ppb, 3.7 ppb,

II. DDT is toxic to fish,[3] killing half the following fish exposed 96 hours at concentrations of: Bullheads, 5 ppb; Goldfish, 21 ppb; Minnows, 10 ppb; Carp, 10 ppb; Bluegill, 6 ppb; Bass, 2 ppb.

Other bioassay reports indicate a 96 hour tlm 50 on bluegills ranging from 7 to 16 ppb.

III. DDT causes thinning of egg shells and consequent critical reduction in hatching success of pelicans,[4] sea gulls, woodcock and various raptors. Direct mortality to pelicans has been attributed to DDT on birds obtained from Florida and held at the Rockefeller Refuge.

IV. Robert L. Rudd states in his book "Pesticides of the Living Landscape", that half of the reptiles and amphibians are killed where DDT is used at the rate of 1 pound per acre.

V. Toxicity of Crawfish—half were killed when exposed to 0.6 ppm over 24 hour period.

High DDT residues found in fish resulted in the closing of Mossy and Wolf Lakes in Mississippi to commercial fishing and a warning to the public against eating excessive amounts of the fishes from these lakes, effective July 6, 1971.

Completion Report F–25–1, 1970, "A Monitoring of Pesticide Levels and Water Quality of the Major Drainage Ditches Entering Wolf Lake, Mossy Lake and Broad Lake," Mississippi Game and Fish Commission, Cotton and Herring.

The significance in this action is that direct economic losses have been incurred as a result of DDT residues affecting the marketability of commercial fish. The woodcock season in New Brunswick was recently closed. The stated reason being high concentrations of DDT in muscle tissues of these birds. This is a direct recreational loss.

Adopted: January 13, 1975, by the Louisiana Wildlife and Fisheries Commission.

See Louisiana Application at 33–63.

The Ad Hoc Group reported that it also believed that the 1972 findings of the environmental hazards of DDT are applicable to the requested use of 2.25 million pounds in Louisiana this year. Ad Hoc Group at 4.

The Ad Hoc Group concluded, however, that "The environmental ramifications appear to be limited to Louisiana." Id. at 5. In support of this conclusion the Group stated that the "area to be treated is over 100 miles north of the Gulf of Mexico * * *," that "all drainage ways [for the treated area] end up in the Atchafalaya River and Atchafalaya Bay * * *" and that none of the areas in question "drain into the Mississippi." Id. I reject this conclusion of the Ad Hoc Group. Given the volatility of DDT, its demonstrated ability to drift during aerial application and its ability to move with eroding soil particles,[5] I am convinced that environmental contamination resulting from the aerial and ground application of 2.25 million pounds in Louisiana will not be confined to Louisiana. (See also Statement by the Louisiana Wildlife & Fisheries Commission on Affects of DDT on Wildlife at second paragraph, infra.).

Much more important, however, it is no consolation to the citizens of Louisiana or to the Louisiana commercial shrimp and fish industries that DDT contamination from this use will be confined to the State and will drain off into the Atchafalaya River Basin and Bay. This area is one of the most fertile and sensitive fish and wildlife habitats in the Southeastern United States, providing habitat for the breeding and rearing of vast numbers of aquatic and terrestrial species including bass, bullheads, bluegills, crayfish, crabs, deer and woodcock. Fears of the toxic effects of DDT on commercial shrimp species caused the Louisiana Shrimp Association to oppose the requested exemption for DDT use in Louisiana. The Association maintained that any anticipated benefits to cotton farmers would be outweighed by the risk to Louisiana's shrimp and other commercial fish industries. The Ad Hoc Group also concluded that "there is concern about the hazard to juvenile shrimp downstream from the cotton growing area." Ad Hoc Group at 5.

In addition, it is not contested that even with the educational and regulatory restrictions proposed by Louisiana, as a result of the inherent characteristics of DDT serious adverse environmental effects will occur. In its application Louisiana stated that:

It is recognized that the use of DDT, even when the precautions outlined above are taken, will result in widespread contamination of the environment with undesirable residues of this chemical. Louisiana Application at 10.

The Ad Hoc Group states that approvals of two limited and controlled applications for use of DDT subsequent to the 1972 Order for control of the tussock moth and pea leaf weevil, were "contingent on the agreement to conduct monitoring studies under EPA surveillance" and that this information "should be pertinent to subsequent requests." The quantities of DDT requested by Louisiana for the cotton acreage involved are approximately 6⅔ times greater per acre than that authorized for the Douglas-fir Tussock Moth. Even in the case of the significantly reduced quantities of DDT authorized for the tussock moth, however, in a summary document submitted to me by the U.S. Department of Interior, Fish and Wildlife Service, the Department expressed its opposition to the Louisiana request and stated that the tussock moth control monitoring program "reinforced our fears that the environment would be unacceptably contaminated by DDT."

NEED FOR DDT

Third, there is no substantial new evidence regarding the need to use DDT which may materially affect the 1972 Order.

Witnesses for Louisiana at the recent hearings on the Louisiana application testified that there has been a declining trend in cotton yields dating back to 1968. This data submitted in support of the need for DDT show that substantial yield reductions—exceeding those during the past two years—occurred in 1969 and 1972 despite large-scale use of the DDT mixture. In fact in the year preceding cancellation of DDT, the use of DDT on cotton in Louisiana accounted for more than 53 percent of the total quantity of DDT used in the United States for all purposes. Of total nationwide use on cotton that year, the amount used in Louisiana constituted more than 63 percent. In contrast, Louisiana's 1974 cotton acreage constitutes approximately 4 percent of the nation's total. Witnesses for Louisiana also testified that many factors other than the tobacco budworm infestation and the unavailability of DDT may have affected cotton yields during the past two years.

There is no dispute that many cotton producers—not only in Louisiana but also in other places—are experiencing economic difficulties. Prices are down. Production costs are up. There is no longer a Federal subsidy for cotton. Added to the effects of these factors is the general recession affecting all sectors of the Nation's economy. The availability of DDT will not by itself determine whether Louisiana cotton producers prosper or suffer this year, particularly in light of the lack of any clear-cut evidence that the DDT mixture would be efficacious against tobacco budworm. There was testimony that economic factors alone are going to cause a sharp reduction in cotton acreage this year throughout the cotton-producing States

[3] American Fisheries Society 1970, Volume 99, No. 1, Page 20. Macek, Kenneth J.

[4] "Relations of the Brown Pelican to Certain Environmental Pollutants in Louisiana", Joanen, Ted.

[5] American Fisheries Society 1963, Volume 92, No. 4, Page 428, Munsey and Oliver.

[6] All of which the Ad Hoc Group specifically recognized when it stated that "the environmental hazards of DDT as reviewed in the DDT [1972] findings relating to persistence, biological concentration, and transport mechanisms are applicable [to the Louisiana situation]." Ad Hoc Group at 4. The Ad Hoc Group stated that reductions in DDT residues in soils, shell fish and migratory birds had occurred, that persistence in well illuminated ocean waters may be less than anticipated but that residues of up to 1 p.p. m. have been showing up in offshore fish livers and DDT persistence together with temperatures have been associated with bluecrab problems in Florida salt marshes. These mixed "indications" do not contradict the 1972 findings. In the year preceding cancellation approximately 12 million pounds of DDT were added to the environmental burden of the U.S. In earlier years even greater quantities of DDT had been added to our environment each year. In the two years and 10 months since cancellation no such serious annual DDT additions have occurred. Because of its mobility and bioaccumulation, it is not surprising that some reduction in soil residues in certain areas may have occurred. However, human monitoring studies show a relatively constant level of DDT and its metabolites in human tissues since cancellation. Moreover, according to the Ad Hoc Group serious DDT residues in fish have continued and in some areas past DDT uses have been associated with continued environmental problems. Accordingly, these mixed data referred to by the Ad Hoc Group do not constitute substantial new evidence which may materially affect the 1972 Order.

V 40168 APR 8 75 XUM

and a shift to alternative crops. In Louisiana, this cutback itself is likely to outweigh all other factors in terms of economic impact on cotton producers and related service industries and thus on the State's economy as a whole.

The EPA Review Panel thoroughly examined all of the evidence presented during the recent 5-day hearings. I adopted the report of the EPA Review Panel in my March 17 Statement. My discussion in the March 17 Statement sets forth the basis for my March 14 Order. In short, although Louisiana and other parties have had ample opportunity to do so, they have presented no substantial evidence—new or old—to support the premises that the tobacco budworm problem is new, that recognition of its occurrence and seriousness is new, or that the DDT mixture is the only insecticide that can be expected to prevent economically significant damage arising from a possible tobacco budworm outbreak this year.

Louisiana and USDA now assert that I should reconsider my decision as a result of the comments of the Ad Hoc Group. The Group stated that "one could not, in 1972, anticipate the rapid increase in resistance to methyl parathion by the tobacco budworm nor the rapid geographical spread of resistance." Ad Hoc Group at 2.

To accept this statement, one would have to ignore several important factors. By 1970 near total resistance to methyl parathion and all other chemicals commonly used for control of the tobacco budworm had already developed in the Tampico and Matamoros areas of Mexico and in the Lower Rio Grande area of Texas as a result of massive use of this and other compounds and resulting selective pressure on tobacco budworm populations. This shift from insecticide susceptibility to resistance could have been anticipated whenever chemicals were being used intensively over a large area.

In fact, Louisiana appears to have anticipated such resistance. The testimony of Dr. James Tynes, Louisiana Cooperative Extension Service, in the recent hearings on the Louisiana application noted that, in May and June 1971, he had called attention to the problem of tobacco budworm resistance to methyl parathion and its implications for cotton production in Louisiana. In addition, in a published (May 1971) article he introduced into the record, Dr. Tynes had noted that tobacco budworm resistance to methyl parathion had been associated with difficulty in controlling an infestation in at least one location in Louisiana back in 1970. It seems apparent that the Ad Hoc Group was not aware of this testimony.

The Ad Hoc Group's statement that the DDT-toxaphene combination is "known to exhibit a synergistic effect of up to twenty-fold against moderately DDT resistant populations" is totally irrelevant to the question of the efficacy of DDT-toxaphene. It is true that combining DDT and toxaphene results in a synergistic effect against the tobacco budworm as compared to DDT alone.[1] This comparison begs the question since the application seeks the use of the DDT-toxaphene mixture and since Louisiana's own data indicate that tobacco budworm resistance to the DDT-toxaphene mixture was seven-fold or greater at seven of twelve Louisiana sites sampled in 1972–74. With such tobacco budworm resistance levels the DDT-toxaphene mix has been shown to be ineffective for control of this insect.

The Ad Hoc Group also stated that "under high population pressures the requested mixture offers the best chance of successful pest management for 1975." After hearing all the evidence in the 5-day hearings and reviewing all exhibits, together with the written statements and public comments, the EPA Review Panel concluded that there was no substantial new evidence to support such a proposition. In my March 17 Statement I adopted the report and conclusions of the EPA Review Panel. I find no additional evidence in the Ad Hoc Group statement and accordingly find no basis to change my prior decision.

* * * * *

In conclusion, after reconsidering the record in this proceeding I reaffirm my March 14 Order in which I denied the Louisiana application for authorization to use 2.25 million pounds of DDT on 450,000 acres of cotton this year. I rest my reaffirmation of the prior denial on this Supplement and on my March 14 Order and my March 17 Statement, which I specifically adopt and incorporate herein by reference. There remains no substantial new evidence which may materially affect the 1972 Order with respect to the human cancer risk posed by DDT, the environmental hazards of DDT and the need to use DDT on cotton.

Dated: April 1, 1975.

RUSSELL E. TRAIN,
Administrator.

[FR Doc.75–9081 Filed 4–7–75;8:45 am]

[1] The basis for this statement apparently comes from data published by Graves, Clower, and Bradley (1967, Resistance of the Tobacco Budworm to Several Insecticides in Louisiana) which compared the LD50 for tobacco budworms, exposed to several insecticides, collected near Transylvania, Louisiana, in 1966. In this test the LD50 for DDT was approximately 30 times greater than the combination toxaphene-DDT (2:1).

[FRL 356–8]

EFFLUENT LIMITATIONS AND GUIDELINES

Steam Electric Power; Availability of Document

On January 6, 1975, the Agency published a notice that a technical report entitled "Development Document for Effluent Limitations Guidelines and New Source Performance Standards for the Steam Electric Power Generating Point Source Category" would be available from the Government Printing Office in four to six weeks. This report is now available. An errata sheet for this document is also available from the Government Printing Office and one copy of this should accompany each copy of the development document. Persons obtaining copies of the development document without the errata sheet should obtain one from the Government Printing Office.

Dated: April 2, 1975.

JAMES L. AGEE,
Assistant Administrator for Water and Hazardous Materials.

RADIO TECHNICAL COMMISSION FOR AERONAUTICS

Notice of Change in Meeting Date

The meeting of the Radio Technical Commission for Aeronautics Special Committee 127, "Emergency Locator Transmitters," originally scheduled for April 9, 1975 (40 FR 12848, Mar. 21, 1975) has been re-scheduled. The new date for the meeting is April 23, 1975. The meeting will be held in Conference Room 6332, Nassif Building, 400 Seventh Street SW., Washington, D.C. commencing at 9:00 a.m. Notice of this meeting is hereby published pursuant to Public Law 92–463.

AGENDA

1. Opening Comments by Chairman
2. Administrative announcements
3. Review and Approval of Minutes of the meeting of January 29, 1975.
4. Reports of Task Groups:
   a. Inertial Switches
   b. Battery Standards
   c. Antenna Standards
   d. Cockpit Control and Alerting
5. New Business
6. Task Assignments
7. Date and place of next meeting.

The meeting is open to the public on a space available basis. Any member of the public may file a written statement with the Commission either before or after the meeting. Any member of the public wishing to make an oral statement must consult with the Commission prior to the meeting.

Those desiring more specific information may contact the RTCA Secretariat, Suite 655, 1717 H Street NW., Washington, D.C. 20006, or phone, Area Code (202) 296–0484.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] VINCENT J. MULLINS,
Secretary

[FR Doc.75–9128 Filed 4–7–75;8:45 am]

CATAMOUNT BROADCASTERS, INC., ET AL.

Order Designating Applications for Consolidated Hearing on Stated Issues

In re Applications of Catamount Broadcasters, Inc., Bennington, Vermont, (Req: 94.3 mHz, Channel 232 3 kW (H&V), 110 feet); Equinox Wireless Co., Bennington, Vermont, (Req: 94.3 mHz, Channel 232 0.138 kW (H&V), 1,138 feet); Bennington Radio, Inc., Bennington, Vermont, (Req: 94.3 mHz, Channel 232 0.125 kW (H&V), 1,175 feet); for construction permits.

1. The Commission, by the Chief of the Broadcast Bureau, acting pursuant to delegated authority, has before it the above-captioned applications which are mutually exclusive in that they seek the same channel in Bennington, Vermont.

2. The financial data submitted by Bennington Radio, Inc. [BRI] reveals that $73,848 will be required to construct and operate the proposed facility for a period of one year without reliance on revenues. To meet this projected requirement, the applicant relies upon $15,000 stock subscriptions from the four principals and a $75,000 loan from the United Jersey Bank. As to the former, none of the stock subscribers have filed subscription agreements, as required by section III, paragraph 4(a) of FCC Form 301; therefore, this amount cannot be deemed available to BRI. Similarly unavailable is the bank loan, which expired by its terms on February 26, 1975. As a consequence, BRI has not demonstrated that it will have any funds available to satisfy its financial requirements. Accordingly, a financial issue will be specified against BRI.

V40168 APR 8 75 XUM

3. Data submitted by the applicants indicate that there would be a significant difference in the size of the areas and populations which would receive service from the proposals. Consequently, for the purposes of comparison, the areas and populations which would receive primary service, together with the availability of other primary aural services (1 mV/m or greater in the case of FM) in such areas will be considered under the standard comparative issue, for the purpose of determining whether a comparative preference should accrue to any of the applicants.

4. Except as indicated by the issues specified below, the applicants are qualified to construct and operate as proposed. However, since the proposals are mutually exclusive, they must be designated for hearing in a consolidated proceeding on the issues specified below.

5. Accordingly, *it is ordered*, That, pursuant to section 309(e) of the Communications Act of 1934, as amended, the applications are designated for hearing in a consolidated proceeding, at a time and place to be specified in a subsequent Order, upon the following issues:

1. To determine whether Bennington Radio, Inc., is financially qualified to construct and operate as proposed.

2. To determine the areas and populations which would receive primary service from each of the proposed operations and the availability of other primary service to such areas and populations.

3. To determine which of the proposals would, on a comparative basis, best serve the public interest.

4. To determine, in the light of the evidence adduced pursuant to the foregoing issues which of the applications should be granted.

6. *It is further ordered*, That, to avail themselves of the opportunity to be heard, the applicants herein, pursuant to § 1.221(c) of the Commission's rules, in person or by attorney, shall, within 20 days of the mailing of this Order, file with the Commission in triplicate, a written appearance stating an intention to appear on the date fixed for the hearing and present evidence on the issues specified in this Order.

7. *It is further ordered*, That the applicants herein shall, pursuant to section 311(a)(2) of the Communications Act of 1934, as amended, and § 1.594 of the Commission's rules, give notice of the hearing, either individually or, if feasible, and consistent with the rules, jointly, within the time and in the manner prescribed in such rule, and shall advise the Commission of the publication of such notice as required by § 1.594(g) of the rules.

Adopted: March 21, 1975.

Released: March 31, 1975.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

[FR Doc.75-9124 Filed 4-7-75;8:45 am]

[Docket Nos. 20405, 20406; File Nos. 102-A-ML-114, 12-A-L-124]

E. W. HEMPHILL AND BORDER AIRCRAFT, INC.

Order Designating Applications for Consolidated Hearing on Stated Issues

In re Applications of E. W. Hemphill, d/b/a Hemphill Flying Service, Miami Beach, Florida; Border Aircraft, Incorporated, Brownsville, Texas; for an Aeronautical Advisory Station to serve the International Airport at Brownsville, Texas.

1. E. W. Hemphill, d/b/a Hemphill Flying Service (hereinafter called Hemphill) has timely filed an application for renewal of aeronautical advisory station WWS8 to serve the International Airport at Brownsville, Texas, and Border Aircraft, Incorporated (hereinafter called Border) has filed a new application for authority to operate an aeronautical advisory station at the same airport. Since § 87.251(a) of the Commission's rules provides that only one aeronautical advisory station may be authorized at a landing area, the above-captioned applications are mutually exclusive. Accordingly, it is necessary to designate the applications for comparative hearing in order to determine which, if either, should be granted. Except for the issues specified herein, each applicant is otherwise qualified.

2. By letter, dated January 7, 1975, Border has alleged that Hemphill is no longer in business at the International Airport and that an organization called Hunt Pan-Am is now operating the advisory station under Hemphill's authorization. Since the Commission has received no application for assignment of station WWS8 from the present licensee (Hemphill) to any other person, the allegation, if factually correct, could constitute an unauthorized transfer of a station authorization.

3. In view of the foregoing, *it is ordered*, That, pursuant to the provisions of section 309(e) of the Communications Act of 1934, as amended, and § 0.331 of the Commission's rules, the above-captioned applications are hereby designated for hearing in a consolidated proceeding at a time and place to be specified in a subsequent Order on the following issues:

(a) to determine which applicant would provide the public with better aeronautical advisory service based on the following considerations:

(1) location of the fixed-base operation and proposed radio station in relation to the landing area and traffic patterns;

(2) hours of operation;

(3) personnel available to provide advisory service;

(4) experience of applicant and employees in aviation and aviation communications;

(5) ability to provide information pertaining to primary and secondary communications as specified in Section 87.257 of the Commission's rules;

(6) proposed radio system including control and dispatch points; and

(7) the availability of the radio facilities to other fixed base operators.

(b) to determine the facts with respect to the alleged unauthorized assignment of station WWS8 from Hemphill to another organization presently operating the radio station; and

(c) to determine in light of the evidence adduced on the foregoing issues which, if either, of the applications should be granted.

4. *It is further ordered*, That the burden of proof and the burden of proceeding with the introduction of evidence on issue (b) is on Border, and on all other issues, the burdens are on each applicant with respect to its application except issue (c) which is conclusory.

5. *It is further ordered*, That to avail themselves of an opportunity to be heard, Hemphill and Border, pursuant to § 1.221 (c) of the Commission's rules, in person or by attorney, shall within 20 days of the mailing of this Order, file with the Commission, in triplicate, a written appearance stating an intention to appear on the date set for hearing and present evidence on the issues specified in this Order. Failure to file a written appearance within the time specified may result in dismissal of the application with prejudice.

Adopted: March 27, 1975.

Released: April 12, 1975.

[SEAL] CHARLES A. HIGGINBOTHAM,
Chief, Safety and Special Radio Services Bureau.

[FR Doc.75-9125 Filed 4-7-75;8:45 am]

[Docket Nos. 20266, 20267; File Nos. BPH-8863, BPH-8965; FCC 75R-142]

KENNEBEC WESTERN BROADCASTING CO. AND WILLSON BROADCASTING CO.

Construction Permits; Memorandum Opinion and Order Enlarging Issues

1. The Review Board has before it for consideration a motion to enlarge issues, filed January 8, 1975, by Kennebec Western Broadcasting Company (Kennebec), seeking the addition of the following issues against Willson Broadcasting Company (Willson) [40 FR 10516]:[1] (1) a misrepresentation issue, (2) a community ascertainment issue, (3) an ineptness issue, (4) a financial qualifications issue, (5) a Rule § 1.526 issue, and (6) a strike application issue.[2]

[1] Other related pleadings before the Board for consideration are:
(1) Willson's opposition, filed February 12, 1975 (and an erratum thereto, filed February 18, 1975), and (2) the Broadcast Bureau's comments, filed February 12, 1975.

[2] Kennebec also requests the addition of a site availability issue against Willson. This request, however, has been mooted by the Presiding Judge's acceptance of Willson's petition for leave to amend, and erratum thereto, filed February 13 and 18, 1975, respectively, which, in part, specifies a new antenna, transmitter, and studio location. See FCC 75M-471, released March 12, 1975.

MISREPRESENTATION, COMMUNITY ASCERTAINMENT, AND INEPTNESS ISSUES[3]

2. Initially, Kennebec argues that Willson violated the requirement contained in the Primer on Ascertainment of Community Problems by Broadcast Applicants, 27 FCC 2d 650, 21 RR 2d 1507 (1971), that the person-to-person interviews with community leaders be held when it conducted certain interviews with Hanford, California leaders by telephone.[4] Kennebec also argues that the telephone interviews of community leaders vitiates Willson's ascertainment survey and requires that the survey be "reviewed anew". Alternatively, Kennebec argues that should the interviews in question be upheld, an issue is raised concerning whether or not a "meaningful dialogue" was established between Willson and the telephone interviewees as required by the Primer, supra. Kennebec further asserts that the survey contained in Willson's original application did not reflect consultations with leaders in several important areas, including agriculture, women's organizations, and employment services. According to movant, Willson also failed to interview leaders in the communities of Lemoore and Dinuba, which it claims it will serve. Movant also claims that Willson exhibited a lack of candor in not advising the Commission of the fact that several interviews were conducted by telephone and by implying that interviews were conducted "in Hanford" when in fact some were conducted via long-distance telephone calls. Kennebec also claims that Willson again exhibited a lack of candor by purporting to conduct a thorough survey when, in fact, it virtually ignored representatives of government, labor, principal businesses, ethnic minorities, and others. Finally, Kennebec claims that if Willson was not lacking in candor, it was at least inept in conducting its survey.

3. The Review Board believes that Kennebec's allegations do not warrant the addition of the requested issues. With respect to the telephone interview aspects of Willson's community ascertainment efforts, it is to be noted that subsequent to the filing of Kennebec's motion, Willson undertook face-to-face reinterviews with most of the leaders who were originally surveyed by telephone, including Mr. Gaitan, and filed an amendment to reflect the reinterviews with the Presiding Judge. The amendment has been accepted by the Judge.[5] Thus, at this time, there is no question that the required dialogue with a cross section of community leaders has taken place. With reference to groups allegedly not contacted by Willson and omitted from its survey, a review of Willson's September 11, and November 14, 1974 amendments satisfies the Board that representatives of appropriate groups reflecting the economic, social, governmental, and ethnic composition of the primary service area, both in and out of Hanford, were interviewed.[6] With specific reference to Kennebec's allegations concerning the absence of interviews with leaders of Lemoore, and Dinuba, California, the Board is of the opinion that Willson has undertaken interviews with numerous community leaders in the counties in which these communities are located who can reasonably be said to have a "broad overview of community problems."[7] See Primer, supra, Q. and A. 7. Nor does the Board find any merit in Kennebec's allegations of misrepresentation. In so far as the telephone interviews are concerned, there is no requirement that an applicant disclose whether interviews were conducted by telephone or were face-to-face. California Stereo Inc., 39 FCC 2d 401, 26 RR 2d 887 (1973). Moreover, the use of the phrase "in Hanford" by Willson is not misleading. Rather, it is clear that Willson merely had reference to Hanford community leaders. The Board is further satisfied that Willson's survey, as supplemented by the September 11, 1974, November 14, 1974, and February 12, 1975 amendments, was thorough and complete and, therefore, in no sense misleading, and finally, that Kennebec has made no showing whatever to support the addition of an ineptness issue.

FINANCIAL ISSUE

4. In support of this requested issue, Kennebec first points out that Willson's president, Gary Willson, has pledged to provide up to $90,000 to finance the applicant's proposal. To establish his ability to meet this commitment, Kennebec continues, Mr. Willson, in part, relies on the market value of two pieces of property he owns in California. However, Kennebec questions whether Willson will be able to generate sufficient funds from the sale of these properties to meet the projected first year expenses of the station, alleging that the market value of one of the pieces of property is lower than the price represented by Willson[8] and, also, that a proposed zoning change undercuts the marketability and value of the second piece of property.[9] In support of these allegations, Kennebec submits the affidavit of Daniel P. Shellcoe, a real estate agent, show states his opinion as to the total net amount Willson could expect to obtain for the sale of the two properties, and his knowledge with respect to mortgage fund availability, seller financing, and the proposed zoning change.

5. Willson opposes addition of the issue, arguing with respect to the first piece of property, that Shellcoe's estimates of market value and of available mortgage money are incorrect, and, as to the second, that no zoning change with respect to the property is now contemplated by the local planning authority. Thus, Willson contends, in addition to $36,900 in net liquid assets listed on Gary Willson's balance sheet, it may still anticipate net cash from sale of the Lafayette property of $24,000 and $31,100 from sale of the Alamo residence, for a total availability of $92,000. In support of its position, Willson submits letters from a real estate agent, mortgage bankers, and a local zoning official attempting to refute the Shellcoe affidavit. The Bureau also opposes addition of the requested issue on the grounds that Shellcoe affidavit submitted by Kennebec merely represents a difference of opinion as to the net revenue that would be generated by the sale of the properties. The Bureau concludes that the requested issue is not factually supported.

6. The Board will deny the requested issue. We find Kennebec's claims to be lacking in specific support. Thus, Shellcoe's conclusions regarding mortgage money availability, seller financing of homes, and the proposed zoning change are either speculative or based upon hearsay and not on personal knowledge. Cf. Southland, Inc., 37 FCC 2d 125, 25 RR 2d 186 (1972). Kennebec has failed to provide affidavits from individuals who (1) are representatives of mortgage banking companies in the area, or (2) are zoning officials with personal knowledge of the alleged proposed zoning amendment. Moreover, the letters submitted in opposition with Willson's covering affidavit, although not themselves in affidavit form, are from individuals with personal knowledge of the matters raised, and support Willson's proposed plan of financing.[10] Thus, no basis exists in the present allegations for the addition of a financial issue against Willson.

SECTION 1.526 ISSUE

7. Kennebec argues that Willson violated § 1.526[11] of the Rules in that its

[3] Because these requested issues all relate to Willson's community ascertainment efforts, the Board has chosen to treat them together.

[4] In support of this allegation, Kennebec attaches the affidavits of Arturo Gaitan and Katie McGee who state that they were interviewed by Willson's president, Gary Willson, via telephone. Also attached is an affidavit of Kennebec's president, Robert Fuller, in which he states that others named in Willson's survey have advised him that they too were interviewed by telephone.

[5] Order, FCC 75M-471, released March 12, 1975. See note 2, supra.

[6] Kennebec's enumeration of groups allegedly omitted largely ignores contacts listed in Willson's amendments.

[7] Specifically, these include representatives of government, agriculture, and education.

[8] This refers to Willson's residence at Alamo, California which is appraised at $105,000; the property, according to Willson's application, is subject to a $63,500 mortgage.

[9] This is a dwelling in Lafayette, California appraised at between $39,000 and $41,000 with a mortgage of $16,000.

[10] In this regard, we point out that in challenging the marketability of the Alamo residence, Shellcoe's affidavit relies heavily on an assumed loan maximum from the Bank of America, whereas Willson supplies a letter from that bank stating a higher figure.

[11] Section 1.526 provides, in pertinent part, that "Every applicant for a construction permit for a new station in the broadcast services shall maintain for public inspection a file for such station containing * * *" a copy of the application and all letters, exhibits, amendments, etc. related thereto.

V 40168 APR 8 75 XUM

public inspection file was not available and up-to-date at the local chamber of commerce, where it was placed, for approximately three months and that, therefore, a § 1.526 issue should be specified against Willson. In support of this request, Kennebec attaches an affidavit of Irene Hodges, office manager of the Hanford Chamber of Commerce, to whom Willson had tendered the application, stating, in part, that the file was missing from September 1974 until December 19, 1974, when it was found "in the bottom of a box of Xerox supplies" at the Chamber. The Bureau, in the absence of a satisfactory explanation from Willson, supports the requested issue.

8. In opposition, Willson asserts that the file was unavailable due to the fact that the Chamber had misplaced it but opposes the requested issue noting that no prejudice has been alleged or shown. Willson states that it was not informed during the period in question that the file was missing and notes further that upon being advised that the file was missing, it promptly sent another copy to the Chamber.

9. The Board will add a Rule 1.526 issue since it is undisputed that Willson's public file was not available for public inspection at the designated location for a period of over three months. While we recognize the fact that the file was not misplaced through any act or omission of an employee or principal of Willson, the fact remains that it is an applicant's duty under § 1.526 of the Rules to maintain the public inspection file. An applicant, therefore, "cannot attempt to delegate its responsibility to maintain such a file to the custodian involved." Centreville Broadcasting Company, FCC 71R–62, 21 RR 2d 216. However, since there is no showing of intentional misconduct or prejudice to Kennebec, the requested issue will be added on a comparative basis only. Cf. Tri-County Stereo, Inc., 50 FCC 2d 170, 171, 32 RR 2d 304, 306, (1974).

STRIKE APPLICATION ISSUE

10. Kennebec's final request is for the addition of a strike application issue against Willson based upon the following allegations: (1) Willson filed its application subsequent to Kennebec's filing; (2) at the time of Willson's filing, another FM channel was available in Hanford; (3) nevertheless, Willson filed for the same channel requested by Kennebec; and (4) the "skeleton nature" of Willson's original application and the extensive amendments thereto indicate Willson's motive was to block or impede Kennebec's application.

11. The Bureau and Willson both oppose the addition of a strike issue; the Bureau argues that there is no basis in fact for the requested issue and Willson submits that its application was filed in good faith. Specifically, Willson asserts that its choice of the FM channel was not based on a desire to block Kennebec, but rather upon its belief that the dial placement of the channel was superior, which, Willson continues, is an important consideration for a general market station. Willson also asserts that its preparation for filing for the channel was undertaken prior to Kennebec's filing. Moreover, Willson states that it believed that if it had applied for the other available channel, Station KNGS, Hanford's daytime only standard broadcast station, would have also applied; in this regard, Willson delineates why it felt that it stood a better chance in a comparative hearing against Kennebec.

12. The Board will not add the requested strike issue. Kennebec has failed to substantiate its allegations with affidavits of individuals with personal knowledge of the facts surrounding the preparation and filing of Willson's application and has completely failed to make any showing that Willson's primary or incidental purpose was to prevent or delay Kennebec from securing a license. See *Sumiton Broadcasting Co., Inc.*, 15 FCC 2d 400, 404, 14 RR 2d 1000, 1007 (1968). In these circumstances, the Board agrees with the Bureau that Kennebec's allegations are "far too speculative to warrant the addition of a strike issue." *Pleasant Broadcasting Co.*, 20 FCC 2d 1065, 1067, 18 RR 2d 109, 112 (1969). Also, Willson has adequately and reasonably explained the timing of its application, the selection of a channel, and its general purpose in filing. See Colorado West Broadcasting, Inc., 47 FCC 2d 190, 30 RR 2d 575 (1974). Therefore, no issue is warranted.

13. Accordingly, *it is ordered*, That the motion to enlarge issues, filed January 8, 1975, by Kennebec Western Broadcasting Company IS GRANTED to the extent indicated herein, and IS DENIED in all other respects, and

14. *It is further ordered*, That the issues in this proceeding are enlarged to include the following issue:

To determine whether Wilson Broadcasting Company has failed to comply with the provision of § 1.526 of the Commission's rules, and, if so, to determine the effect thereof on its comparative qualifications to be a Commission licensee.

Adopted: March 27, 1975.

Released: April 2, 1975.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] VINCENT J. MULLINS,
Secretary.

[FCC 75R–143] Docket Nos. 20268, 20269, 20270; File No. BPH–8250, BPH–8405, BPH–9038]

TOWN AND COUNTRY RADIO, INC., ET AL.

Construction Permits; Memorandum Opinion and Order Enlarging Issues

In re applications of Town and Country Radio, Inc., Suffold, Virginia; John Laurino, Gordon L. Hood and Vernon S. Lee, d/b/a, Voice of the People, Suffolk, Virginia; Tidewater Sounds, Inc., Suffolk, Virginia.

1. This proceeding involves the mutually exclusive applications of Town and Country Radio, Inc., John Laurino, Gordon L. Hood and Vernon S. Lee, d/b/a Voice of the People (Voice), and Tidewater Sounds, Inc. (Tidewater). The Chief of the Broadcast Bureau, acting pursuant to delegated authority, designated these applications for comparative hearing by Orders, 40 FR 2472, published January 13, 1975, and 40 FR 2613, published January 14, 1975. Presently before the Review Board is a petition to enlarge issues, filed January 28, 1975, by Tidewater, requesting addition of Rule 1.526, financial, Rule 1.514, business practices (rate card), Rule 1.65, and misrepresentation issues against Voice.[1]

2. *Rule 1.526 Issue.* Tidewater requests addition of a Rule 1.526 issue on the grounds that it failed to obtain reasonable access to the public file for Station WYAL, Scotland Neck, North Carolina,[2] and that the file was incomplete. As to access, Tidewater states that on January 13, 1975, John S. Voorhees, one of the law clerks[3] of the firm representing Tidewater in this proceeding, went to the WYAL studios to examine the public file and that, while he was promptly shown the file, he was intimidated and severely harassed. Specifically, Voorhees avers that the station manager, Byron Thomas, asked Voorhees to identify himself, his employer, and where he was from. Voorhees also avers that he was asked for his driver's license and that Thomas handed it to an "Officer Ebberly",[4] stating that they were going to "check to see if your are who you say you are." According to Voorhees, Thomas then asked about the car Voorhees arrived in and took down the license plate number and ran a check to determine its ownership. Then, avers Voorhees, a "Detective Murphy" came into the room where Voorhees was viewing the file and required

[1] Also before the Board are the following related pleadings: (a) opposition, filed February 12, 1975, by Voice; (b) Broadcast Bureau's comments, filed February 12, 1975; (c) supplement to (a) filed February 18, 1975, by Voice; (d) additional supplement to (a), filed February 24, 1975, by Voice; (e) reply, filed February 25, by Tidewater; (f) errata to (e), filed February 26, 1975 by Tidewater; (g) request for official notice, filed March 3, 1975, by Voice; (h) affidavit in support of (d), filed March 5, 1975, by Voice; (i) motion to strike (d) and (h), filed March 7, 1975, by Tidewater; (j) comments on (i), filed March 14, 1975, by the Bureau; (k) opposition to (i) and motion to strike portions of (e), filed March 17, 1975, by Voice; and (l) opposition to (k), filed March 24, 1975, by Tidewater.

[2] John Laurino, 80 percent owner of Voice is also the 100 percent owner of WYAL Radio, Inc., licensee of Station WYAL. Tidewater bases its request on the co-ownership involved.

[3] In support, Tidewater supplies an affidavit from Voorhees as well as a corroborating affidavit of Nicholas R. Lefevre, who accompanied Voorhees to the station.

[4] Ebberly was identified as a local policeman and a part-time announcer at the station.

Voorhees to produce further identification, which Murphy said was going to be "checked out." Thomas allegedly then produced a camera and requested permission to take photographs of Voorhees but Voorhees denied him permission to do so. Next, Thomas allegedly asked permission to make photostatic copies of Voorhees's notes and when Voorhees declined, Thomas told Murphy that Voorhees and Lefevre could be held on "suspicion" and stated further that they were checking the FBI files. Finally, avers Voorhees, Murphy told them they were free to go stating "we do things differently in North Carolina than they do up in Washington." Tidewater also alleges that Voorhees found that the public file for Station WYAL was incomplete in that, in violation of § 1.526(e) of the Commission's rules, a recent renewal application and related amendments were not present. Thus, Tidewater urges, an inquiry should be permitted to inquire into both the accessibility and contents of Station WYAL's public file. The Bureau agrees that the requested issue should be added.

3. In opposition, Voice first points out the public file was promptly provided to Voorhees on request. Next, in explanation of the "precautions" taken concerning the treatment of Voorhees and Lefevre, Voice states that the appearance of the two men was alarming in that they were shabbily dressed and one of them wore a beard. And, continues Voice, the elaborate identification checks were deemed necessary in view of a number of armed robberies and instances of vandalism in the area and the recent "take over" of an Alabama station by "radicals". Also, Voice states that it did not request Detective Murphy to come to the station, but that he arrived of his own accord. As to the contents of the public file, Voice concedes that, "through misunderstanding and inadvertence", some of the older public files had not been maintained, but maintains that the omission was minor in nature, and that this was an isolated violation.

4. The Review Board will add an issue encompassing both the accessibility and content of the public file. While a licensee is permitted to ascertain the identity of those members of the public who seek to view the public file, the unchallenged actions of the station personnel as described above raises a serious question as to whether Station WYAL sought to harass, intimidate or otherwise discourage members of the public from inspecting its public files. In this regard, the Commission has expressly admonished licensees that they may not require persons seeking to inspect their public files to identify the organization to which they belong or which they represent, as was done here. WBRN, Inc., 32 FCC 2d 729, 730, 23 RR 2d 384, 386 (1971); see also Licensee Obligations Regarding Inspection of Public Records, 23 RR 2d 1588 (1971). Thus, we believe that an evidentiary inquiry into this matter is warranted. Turning to the question of the contents of the public file, the Board here again believes inquiry is warranted. The Commission has also explicitly stated that "it (is) desirable, to effectuate fully the policy of the Communications Act and Section 1.526, to have the two previous renewal applications and related material, as well as the application now pending, available." Report and Order, Retention Period for Material for Public Inspection, 22 FCC 2d 509, 512, 18 RR 2d 1765, 1768–69 (1970). Thus, the Commission has determined that the type of material missing in the present situation is both important and relevant and, in view of the absence of an entire renewal application and related amendments, the Board cannot condone this apparent violation on grounds of alleged inadvertence. Accordingly, an appropriate issue will be added.[5]

5. *Financial and Rule 1.514 Issues.* In support of the requested financial issue, Tidewater challenges the availability of a proposed $200,000 bank loan relied on by Voice. Tidewater first alleges that the bank loan commitment letter relied upon by Voice has, by its terms, already expired.[6] Tidewater also asserts that the terms of the bank letter are too "noncommittal" to be acceptable.[7] Next, petitioner notes that the security required is the endorsement or guarantee of John Laurino, Voice's principal stockholder, and three broadcast stations owned by Laurino. Further, Tidewater notes that should Laurino sell any of these stations, the guarantee of the stations will attach to any proceeds obtained therefrom. However, Tidewater alleges, Laurino has stated that he will divest his ownership and/or assign the licenses in his stations in the event his present application is successful. Tidewater therefore concludes that questions are raised as to whether the bank was aware of these circumstances at the time of its commitment and as to the availability of this collateral. Tidewater also argues that Voice has failed to fully comply with Section III, paragraph 1(b) of FCC Form 301, which requires a complete itemization of costs of operation for one year and therefore requests addition of a Rule 1.514 issue.[8]

6. The Board will deny the requested financial issue. First, we cannot agree with Tidewater's interpretation of the bank's requirement of a review of Laurino's financial statements should his present application not be granted within six months. We believe a more reasonable interpretation to be that it will simply require a standard review of the proposed security before making a final loan.[9] Nor can we agree with petitioner that the letter is too "noncommital". The Commission does not require a prospective broadcast applicant to provide a contractually binding commitment, but merely reasonable assurance of the availability of the loan. See, *e.g.* Lamar Life Broadcasting Co., 26 FCC 2d 112, 20 RR 2d 509 (1970). And, in our view, the bank letter, taken as a whole, evidences a sufficient commitment; *i.e.* the letter is specific as to the terms of repayment, security, and other requirements which Voice must satisfy before the loan is consummated. Finally, as to the security required, we note that the language in the bank letter states that should Laurino's broadcast holdings be liquidated the proceeds therefrom would remain as collateral. Therefore, contrary to Tidewater's allegation in this regard, we believe this satisfactorily demonstrates the bank's awareness of the possible divestiture of the stations and the bank's willingness to continue to rely on the stations or the proceeds from their sale as collateral. Finally, Tidewater's remaining allegations regarding encumbrances on the collateral are purely speculative and warrant no further consideration. Accordingly, the requested financial issue will be denied.

7. *Business Practices (Rate Card) Issue.* In support of this requested issue, Tidewater alleges that John Laurino, the principal partner in Voice, engaged in deceptive business practices by distributing rate cards for his wholly owned Station WYAL which showed a contour coverage map that exceeded its actual coverage in both population and area.[10] Tidewater bases its allegation on a comparison of the contour map shown on the rate card with a predicted contour map of Station WYAL taken from the Commission's files.[11] Additionally, Tidewater asserts that the absence of "legends" on the map created the likelihood of a variety of erroneous and confusing interpretations.[12] The Broadcast Bureau supports addition of the issue on the grounds that the rate card contour map is a "gross exaggeration" of the primary service contour recognized by the Commission.

[5] In so holding, we reject Voice's contention that we may not add an issue in this proceeding based on allegations involving an operating station under common ownership with the applicant herein. See *e.g.* Key Broadcasting Corp., 50 FCC 2d 357, 32 RR 2d 445 (1974); cf. Deep South Radio, Inc., 47 FCC 2d 1045, 30 RR 2d 1474 (1974).

[6] That portion of the bank letter, dated November 15, 1973, referred to by Tidewater reads as follows:

Should your application not be approved in the next six months we would require that current financial statements for you [Mr. Laurino] and your radio interests be presented for our analysis prior to actually finalizing this transaction.

[7] Petitioner notes that the bank states that "we are in a position to lend the necessary funds projected."

[8] However, Tidewater concedes in its reply that a recent Voice amendment, accepted by the Presiding Judge, by Order FCC 75M–392, released February 26, 1975, moots the need for inquiry into this matter. Voice's Request for Official Notice of the Judge's acceptance of this amendment will be granted.

[9] We also note that in an affidavit attached to Voice's opposition, Laurino states that, in July 1974, he provided the bank with current financial information on the stations.

[10] The rate card in question is allegedly dated October 1, 1968 and submitted to the Commission in 1970 and 1971.

[11] In support, Tidewater submits a statement from a consulting engineer which, in Tidewater's opinion, demonstrates the differences in coverage.

[12] Tidewater states that the contour map had no indication of the strength of the contours and there was no distance scale.

V 40168 APR 8 75 XUM

8. In opposition, Voice first concedes that it "does not here defend the correctness" of the map in showing the relevant contours of Station WYAL; however, states opposer, Station WYAL broadcasts a "listenable" signal to areas beyond its normally defined contours. In addition, Voice challenges the correctness of the calculations of petitioner's consulting engineer. And, at any rate, Voice states, use of the rate card in question was discontinued in the summer of 1973 and its present rate cards do not have contour maps.

9. In reply, Tidewater reiterates its earlier contentions and also asserts that Voice and Laurino are guilty of an additional misrepresentation in that Station WYAL's present rate cards do, in fact, have contour maps. Moreover, Tidewater states, its analysis shows that these contour maps are also inaccurate. Tidewater submits a further engineering statement in support.

10. The Board will add the requested issue. It is axiomatic that a licensee of the Commission is required to deal candidly and truthfully with the public and "the implementation of inaccurate and exaggerated coverage maps is not consistent with this requirement." Athens Broadcasting Co., Inc., 27 FCC 2d 7, 10, 20 RR 2d 1115, 1118 (1971). Further, "it is the [Applicant's] obligation to show that [map] contours were accurately portrayed". Universal Communications of Pittsburgh, 31 FCC 2d 542, 17 RR 2d 491, 492 (1970). Yet Voice does not even contend that the map contours depicted and the rate cards submitted to the Commission in 1970 and 1971 were correct. Moreover, comparison of Station WYAL's coverage map with information on file with the Commission compels us to agree with the Bureau that an apparently substantial exaggeration of WYAL's coverage was depicted. We also believe that a serious question is raised as to the accuracy of Station WYAL's more recent contour maps. While petitioner's allegations as to the accuracy of the maps distributed with Station WYAL's new rate cards are contained in its reply, we note that they are responsive to statements contained in Voice's opposition that any misleading practices have been discontinued. Therefore, an appropriate inquiry will be authorized.[25]

[25] The allegations of misrepresentation in statements concerning whether the newer rate cards contained maps (as opposed to the accuracy of the maps), are raised for the first time in a reply pleading and we will therefore not treat these allegations herein. See *e.g.* Industrial Business Corp., 40 FCC 2d, 69, 26 RR 2d 447 (1973); and WIOO, Inc., 39 FCC 2d 351, 26 RR 2d 704 (1973). Furthermore, we note that these allegations are also part of a separate petition to enlarge, filed March 6, 1975, by Tidewater and we will issue our ruling on that request at a future date. Moreover, the additional supplement, filed February 24, 1975 by Voice, the motion to strike, filed March 7, 1975, by Tidewater and the opposition and motion to strike the motion to strike, filed March 17, 1975, by Voice, (see note 1, *supra*) are unauthorized, and will therefore be dismissed.

11. *Rule 1.65 and misrepresentation issues.* In support of the requested Rule 1.65 issue, Tidewater alleges that, contrary to the requirement that any "unsatisfied judgments or decrees against [an] applicant or party to [the] application"[26] must be reported, Voice has failed to amend its application to show an outstanding federal tax lien in the amount of $12,557.93 against Vernon S. Lee, a partner in Voice.[27] Tidewater acknowledges that the address of the Lee against whom the lien is held differs from that given for the Lee who is a partner in Voice. However, asserts petitioner, because the names and cities are the same, Voice should be made to affirmatively demonstrate that they are not one and the same or, in the absence thereof, a Rule 1.65 issue should be added. Furthermore, contends petitioner, should they be the same, a misrepresentation issue should be added because Voice relies on a bank loan to the partnership but has not fully revealed the financial background of one of its partners.

12. In opposition, Voice concedes that the two Lees in question are the same but argues that a federal tax lien is not a "judgment or decree" and thus there is no requirement to report it. Moreover, states opposer, Lee is a limited partner who holds only 3% of Voice's stock and the lien has absolutely no effect on Voice's financial qualifications.[28] Finally, Voice claims inadvertence and states that, at the time the lien was filed, Lee was cooperating with the Internal Revenue Service by paying monthly installments on the amount owed, was unaware that the lien had been filed, and that the lien was never discussed with the IRS prior to its filing.

13. The Board will deny the requested Rule 1.65 and misrepresentation issues. Whether or not a federal tax lien constitutes a judgment or decree, we are of the opinion that, in view of all the circumstances, no purpose would be served by an evidentiary inquiry into this matter in any event. First, contrary to petitioner's claim, we see no basis upon which the Lee tax lien could affect Voice's financial qualifications. Lee's interest in the applicant and his control and obligations are *de minimus*. Also, his financial position is of no apparent relevance to Voice's bank loan since the security required relates solely to Laurino and his broadcast interests.[29] Thus the Board finds no apparent motive for concealment on Voice's part and where, as here, there was no motive to mislead or conceal, no pattern of violations has been shown, and the violations were of questionable significance, the Board has frequently refused to specify a Rules 1.65 issue. See *e.g.* CBS, Inc., 49 FCC 2d 1214, ---- RR 2d ---- (1974); Auburn Publishing Company, 34 FCC 2d 134, 24 RR 2d 29 (1972); and Harvit Broadcasting Corp., 32 FCC 2d 656, 23 RR 2d 328 (1971). Finally, in light of the foregoing, the Board finds no basis for adding the requested misrepresentation issue.

14. *Accordingly, it is ordered*, That the additional supplement to opposition to petition to enlarge issues, filed February 24, 1975, by Voice of the People; the motion to strike, filed March 7, 1975, by Tidewater Sounds, Inc.; and the opposition to motion to strike and motion to strike, filed March 17, 1975, by Voice of the People, ARE DISMISSED; and

15. *It is further ordered*, That the request for official notice, filed March 3, 1975, by Voice of the People, IS GRANTED; and

16. *It is further ordered*, That the petition to enlarge issues, filed January 28, 1975, by Tidewater Sounds, Inc., is granted to the extent indicated herein, and is denied in all other respects, and that the issues in this proceeding are enlarged to include the following:

(a) To determine whether WYAL Radio, Inc., violated § 1.526 of the Commission's rules by engaging in harassment or intimidation, or otherwise attempted to discourage members of the general public from inspecting the public file of Station WYAL, and by having an incomplete file; and, if so, to determine the effect thereof on the requisite and/or comparative qualifications of Voice of the People to be a Commission licensee;

(b) To determine whether WYAL Radio, Inc. has misrepresented the coverage area and contours of Station WYAL on its rate cards or promotional material distributed to the public and its actual or potential advertisers; and if so, the effect on the basic and/or comparative qualifications of Voice of the People to be a Commission licensee.

17. *It is further ordered*, That the burden of proceeding with the introduction of evidence on the issues added herein shall be on Tidewater Sounds, Inc., and the burden of proof shall be on Voice of the People.

Adopted: March 31, 1975.

Released: April 3, 1975.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] VINCENT J. MULLINS,
Secretary.

[FR Doc.75-9127 Filed 4-7-75;8:45 am]

[26] FCC Form 301, section II, 10(g).

[27] The lien was allegedly filed on July 15, 1974.

[28] In this regard, Voice states that Laurino holds all the powers of the partnership, that Lee holds none, and that, under the partnership agreement, Lee is liable for neither net losses nor debts of the partnership.

[29] In this regard, see paragraphs 5–6, *supra*.

FEDERAL HOME LOAN BANK BOARD

[H. C. No. 188]

UNITED FINANCIAL CORPORATION OF CALIFORNIA

Receipt of Application

APRIL 3, 1975.

Notice is hereby given that the Federal Savings and Loan Insurance Corporation has received an application from United Financial Corporation of California, Los Angeles, California, a unitary savings and loan holding company, for approval of acquisition of control of the Avalon Savings and Loan Association, Wilmington, California, an insured institution, under the provisions of section 408(e) of the National Housing Act, as amended (12 U.S.C. 1730a(e)), and § 584.4 of the regulations for Savings and Loan Holding Companies, said acquisition to be effected through the purchase of all of the stock of Avalon Savings and Loan Association by a subsidiary of United Financial Corporation of California, the Citizens Savings and Loan Association, San Francisco, California, for cash and long term notes from the subsidiary. Comments on the proposed acquisition should be submitted to the Director, Holding Companies Section, Office of Examinations and Supervision, Federal Home Loan Bank Board, Washington, D.C. 20552, on or before May 8, 1975.

[SEAL] GRENVILLE L. MILLARD, JR.,
Assistant Secretary,
Federal Home Loan Bank Board.

[FR Doc.75-9138 Filed 4-7-75;8:45 am]

FEDERAL MARITIME COMMISSION

U.S. ATLANTIC AND GULF/AUSTRALIA-NEW ZEALAND CONFERENCE

Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, (46 U.S.C. 814)).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1100 L Street, NW., Room 10126; or may inspect the agreement at the Field Offices located at New York, N.Y., New Orleans, Louisiana, San Francisco, California and Old San Juan, Puerto Rico. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C., 20573, on or before April 28, 1975. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of Agreement filed by:

Stanley O. Sher, Esq.
Billig, Sher & Jones, P.C.
1126 Sixteenth Street, N.W., Suite 300
Washington, D.C. 20036

Agreement No. 6200–19, entered into by the member lines of the U.S. Atlantic & Gulf/Australia-New Zealand Conference, modifies Article 9(a) of the approved conference agreement to provide that any coordinated group of common carriers by water (i.e., any two or more common carriers by water which have entered into a service agreement which has been approved by the Federal Maritime Commission under section 15 of the Shipping Act, 1916, and which relates to the trade covered by this agreement) may become a party to the conference agreement by furnishing evidence of ability and intention to maintain a regular common carrier service in the trade. In this regard, a regular common carrier service means not less than a total of twelve sailings every 12 months for such a coordinated group.

Dated: April 3, 1975.

By Order of the Federal Maritime Commission.

FRANCIS C. HURNEY,
Secretary.

FEDERAL POWER COMMISSION

[Docket No. G-3209, et al.]

AMOCO PRODUCTION CO. (OPERATOR), ET AL.

Applications for Certificates, Abandonment of Service and Petitions To Amend Certificates[1]

MARCH 28, 1975.

Take notice that each of the Applicants listed herein has filed an application or petition pursuant to section 7 of the Natural Gas Act for authorization to sell natural gas in interstate commerce or to abandon service as described herein, all as more fully described in the respective applications and amendments which are on file with the Commission and open to public inspection.

Any person desiring to be heard or to make any protest with reference to said applications should on or before April 18, 1975, file with the Federal Power Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure a hearing will be held without further notice before the Commission on all applications in which no petition to intervene is filed within the time required herein if the Commission on its own review of the matter believes that a grant of the certificates or the authorization for the proposed abandonment is required by the public convenience and necessity. Where a petition for leave to intervene is timely filed, or where the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[1] This notice does not provide for consolidation for hearing of the several matters covered herein.

[Docket No. RP75-80]

ALABAMA-TENNESSEE NATURAL GAS CO.

FPC Gas Tariff, Proposed Changes

MARCH 31, 1975.

Take notice that Alabama-Tennessee Natural Gas Company (Alabama-Tennessee), PO Box 918, Florence, Alabama 35630, on March 25, 1975, tendered for filing as part of its FPC Gas Tariff, Third Revised Volume No. 1, Ninth Revised Sheet No. 3-A, First Revised Sheet No. 5, First Revised Sheet No. 11, First Revised Sheet No. 14, and Second Revised Sheet No. 36-F and, in the alternative, Substitute Ninth Revised Sheet No. 3-A, Substitute First Revised Sheet No. 5, Substitute First Revised Sheet No. 11, Substitute First Revised Sheet No. 14, and Second Revised Sheet No. 36-F. These revised sheets or, in the alternative, the substitute revised sheets are proposed to become effective on April 25, 1975.

Alabama-Tennessee states that the proposed changes would increase revenues from jurisdictional sales and service under the Revised Sheets by $822,760.47 and under Substitute Revised Sheets by $824,016.10, based upon the 12 month period ending December 31, 1974, as adjusted. Alabama-Tennessee states that the increased rates are required for recovery of fixed costs over the reduced volumes of gas available for sale and to provide an increase in the composite depreciation rate from 3.2 percent to 5.5 percent and an increase in the rate of return from 8.25 percent to 11.48 percent, as well as to reimburse Alabama-Tennessee for other increases which are being, and will be, experienced in its costs of service, including cost of purchased gas.

Alabama-Tennessee states that the revised tariff sheets provide for the following rates:

Rate schedule	Revised sheets	Substitute revised sheets
G-1:		
Demand	$3.41	$3.36
Commodity	66.03	64.67
SG-1: Commodity	90.94	89.36
I-1: Commodity	68.03	66.67

Alabama-Tennessee states that copies of the filings have been mailed to all of its jurisdictional customers and affected State regulatory Commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before April 18, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. CP75-14]

ALGONQUIN LNG, INC. AND ALGONQUIN GAS TRANSMISSION CO.

Extension of Time

MARCH 31, 1975.

On March 20, 1975, Algonquin LNG, Inc. filed a motion to extend the date for filing briefs on exceptions to the initial decision of the Presiding Administrative Law Judge issued February 28, 1975 in the above-designated matter. The motion states that the parties have been notified and have no objection.

Upon consideration, notice is hereby given that, pursuant to § 1.31(a) of the Commission's rules of practice and procedure, the date for filing briefs on exceptions in the above matter is extended to and including April 14, 1975, and the date for filing briefs opposing exceptions is extended to and including May 5, 1975.

KENNETH F. PLUMB,
Secretary.

[Dockets Nos. CI75-389; CI75-391; CI75-393]

THE CALIFORNIA CO., A DIVISION OF CHEVRON OIL CO., ET AL.

Extension of Procedural Dates

MARCH 31, 1975.

In the matter of The California Company, a Division of Chevron Oil Company, Kerr-McGee Corporation, and Phillips Petroleum Company.

On March 24, 1975, The California Company filed a motion to extend the procedural dates fixed by order issued March 17, 1975, in the above-designated matter. The motion states that the parties have been notified and have no objection.

Upon consideration, notice is hereby given that the procedural dates in the above matter are modified as follows:

Service of testimony by all supporting parties, April 15, 1975.

Hear, April 30, 1975 (10 a.m. e.d.t.).

KENNETH F. PLUMB,
Secretary.

[FR Doc.75-9056 Filed 4-7-75;8:45 am]

[Docket No. E-8684]

CAROLINA POWER AND LIGHT CO.

Order Referring Motion to Presiding Administrative Law Judge and Scheduling Prehearing Conference

APRIL 1, 1975.

On March 3, 1975, ElectriCities of North Carolina (ElectriCities) filed a "Motion for an Order Directing Production of Documents and Answering of Interrogatories" in which ElectriCities complains of a lack of response on the part of Carolina Power & Light Company (CP&L) to certain data requests. CP&L filed a response to ElectriCities' motion on March 18, 1975.

Due to the complexity and number of the requests by ElectriCities and the allegations of CP&L, we believe the most expeditious manner to handle this matter is to refer it to the Presiding Administrative Law Judge to be handled in accordance with the procedures set forth in § 1.26 of the Commission's rules and regulations. Moreover, we shall schedule a prehearing conference wherein all issues related to ElectriCities' Motion shall be raised and argued.

The Commission finds. Good cause exists to refer ElectriCities' motion to the Presiding Administrative Law Judge and to schedule a prehearing conference as hereinafter ordered and conditioned.

The Commission orders. (A) ElectriCities' March 3, 1975, Motion is hereby referred to the Presiding Administrative Law Judge to be handled in accordance with the procedures set forth in § 1.26 of the Commission's rules and regulations.

(B) A prehearing conference shall be held at 10 a.m., on Tuesday, April 15, 1975, at the Federal Power Commission, Washington, D.C. 20426, wherein all issues related to ElectriCities' Motion shall be raised and discussed.

(C) The Secretary shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Commission.

[SEAL] KENNETH F. PLUMB,
Secretary.

[Dockets Nos. RP72-142 and PGA75-3]

CITIES SERVICE GAS CO.

Order Clarifying and Amending Prior Order

APRIL 1, 1975.

On March 5, 1975, Cities Service Gas Company (Cities) filed an Application for Clarification, Reconsideration or Rehearing relating to the Commission's February 3, 1975, letter order accepting Third Alternate Substitute Ninth Revised Sheet PGA-1 in this proceeding which reflected a .23 cent per Mcf increase in Cities' rates. Cities claims that

V 40 168 APR 8 75 XUM

the last sentence of the first paragraph of that letter order which reads: "The rates are subject to refund and any orders issued at Docket No. RP74–4" is ambiguous and that the cited language may be interpreted to mean that the .23 cents per Mcf adjustment is subject to refund.

It was not our intention to set a refund obligation upon Cities' current .23 cent per Mcf adjustment. Our statement at the end of paragraph one of the February 3, 1975 letter order was to apprise Cities that only to the extent that the Base Tariff Rates have been made subject to refund at Docket No. RP74–4, the rates as approved are subject to future adjustment.

The Commission finds and orders. (A) The last sentence of the first paragraph of our letter order of February 3, 1975 should be deleted and in its place the following sentence should be inserted:

To the extent that the Base Tariff Rates reflected on the tariff sheet have been made subject to refund at Docket No. RP74–4, the rates approved herein are subject to future adjustment.

(B) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

(SEAL) KENNETH F. PLUMB, *Secretary.*

EL PASO NATURAL GAS CO.

Order Accepting for Filing and Suspending Proposed PGA Increase

MARCH 31, 1975.

On February 24, 1975, El Paso Natural Gas Company (El Paso) tendered for filing proposed revised tariff sheets[1] to its FPC Gas Tariff. El Paso also tendered certain alternate tariff sheets which were proposed in order to amortize certain overriding royalty payments incurred during the period June 1, 1974 through December 1, 1974. On February 28, 1975, El Paso tendered for filing revised tariff sheets[2] to provide for amortization of the overriding royalty payments for the period July 10, 1974 through November 30, 1974.

Notice of these two filings was issued March 5 and March 6, 1975, respectively, with comments, protests and petitions to intervene due on or before March 14 and March 20, 1975. To date, no protests or petitions to intervene have been filed.

The instant filings reflect an increase in El Paso's annualized purchased gas costs, a surcharge to recover amounts in El Paso's unrecovered purchased gas cost account, a proposed change in the method of calculation of purchased gas costs to reflect changes in El Paso's gas purchase patterns, and the surcharge to amortize the overriding royalty payments for the period from July 10 through November 30, 1974.

Our review of that portion of El Paso's filing pursuant to its purchased gas cost adjustment clause indicates that it includes certain small producer and emergency purchases at rates in excess of the rates provided by Opinion No. 699–H.[3] Therefore the rates have not been shown to be just and reasonable. Accordingly, we shall accept the proposed rate increase for filing and suspend it for one day, until April 2, 1975, when it will be permitted to become effective subject to refund. This action is without prejudice to El Paso's right to file revised tariff sheets reflecting only those purchased gas cost increases not in excess of the rates provided by Opinion No. 699–H and which also may reflect, as of April 1, 1975, El Paso's proposed change to modify the computation of purchased gas costs based on changes in El Paso's gas purchase pattern.

This approval is also subject to any rate adjustments and/or refunds which may be required as a result of further orders in Docket No. R–389–B or of any appeals of such orders to the Courts. Such rate adjustments and/or refunds shall, of course, be governed by the provisions of El Paso's PGA clause and § 154.38(d)(4) of the regulations.

El Paso's filing of February 28, 1975, is consistent with our order on motion for authorization to collect amortization charge, issued February 24, 1975. We shall therefore accept it for filing and suspend it for one day, when it will be permitted to become effective, subject to further order and refund and to the conditions contained in our order of February 24, 1975.

We note, however, that El Paso has not filed tariff sheets reflecting amortization of the overriding royalty charges incurred during the period July 10, 1974 through December 1, 1974, as provided by our order issued March 19, 1975, in these dockets. Instead, El Paso's February 28, 1975 filing reflected only the overriding royalty charges for the period from July 10 through November 30, 1974. We shall permit El Paso to submit revised tariff sheets reflecting the overriding royalty charges for that longer period, subject to the conditions of this order and our order of February 24, 1975.

The Commission finds. It is necessary nor appropriate in the public interest and to aid in the enforcement of the Natural Gas Act.

(1) El Paso's proposed revised tariff sheets filed February 24 and February 28, 1975, be accepted for filing, suspended for one day, and permitted to become effective, subject to refund.

(2) The increased costs other than those associated with that portion of emergency and small producer purchases in excess of the rates prescribed by Opinion No. 699–H are just and reasonable and in compliance with the standards set forth in Docket No. R–466.

The Commission orders. (A) El Paso's proposed tariff sheets are accepted for filing, suspended for one day, when they will be permitted to become effective, subject to refund, pending further Commission order.

(B) Within 15 days of the issuance of this order, El Paso may file revised tariff sheets to become effective April 1, 1975, reflecting that part of the increase proposed herein other than increased costs associated with that portion of emergency and small producer purchases in excess of the rates prescribed by Opinion No. 699–H and also reflecting the changes in the computation of purchased gas costs based on changes in El Paso's gas purchase patterns.

(C) Within 15 days of the issuance of this order, El Paso may file revised tariff sheets to become effective April 2, 1975, reflecting overriding royalty charges for the period July 10 through December 1, 1974, subject to the conditions contained in Commission order issued February 24, 1975, and further order herein.

(D) The Secretary shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Commission.

(SEAL) KENNETH F. PLUMB, *Secretary.*

[Dockets Nos. RP74–22; RP74–23]

EL PASO NATURAL GAS CO. AND NORTHWEST PIPELINE CORP.

Further Extension of Time

MARCH 31, 1975.

On March 21, 1975, El Paso Natural Gas Company filed a motion in Docket No. RP74–22 and Northwest Pipeline Corporation filed a motion in Docket No. RP74–23, to extend the dates for filing briefs on exceptions and briefs opposing exceptions to the initial decision of the Presiding Administrative Law Judge issued August 28, 1974, in the above-designated matters heard on a common record. The California Public Utilities Commission objects to the former motion. All other parties have been notified and have no objection.

Notice is hereby given that the date for filing briefs on exceptions is extended to April 30, 1975, and the date for filing briefs opposing exceptions is extended to May 20, 1975.

By direction of the Commission.

MARY B. KIDD, *Acting Secretary.*

[FR Doc.75–9059 Filed 4–7–75;8:45 am]

[Docket No. CI75–549]

KERR-McGEE CORP.

Notice of Application

MARCH 31, 1975.

Take notice that on March 17, 1975, Kerr-McGee Corporation (Applicant), P.O. Box 25861, Oklahoma City, Oklahoma 73125 filed in Docket No. CI75–549 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale for resale and delivery of natural gas in interstate commerce to Southern Natural Gas Company (Southern) from the State Lease 1999 Well No. 22 in Breton Sound Block 28, Plaquemines Parish, Louisiana, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to sell casinghead gas attributable to its 50 percent working interest in the State Lease 1999 Well No. 22 to Southern at the national rate[1] for a period of one year from the end of a 60-day emergency period[2] within the contemplation of § 2.70 of the Commission's general policy and interpretations (18 CFR 2.70).

Applicant states in support of its application that State Lease 1999 Well No. 22 is a wildcat well which discovered an abnormally high pressure low GOR oil reservoir in a sand at 10,300 feet and that the production facilities being used to separate and handle the well's production are temporary in nature. Applicant asserts that the production receiving station and gathering line was installed for other service and are not suited to long-term production. Applicant alleges evaluation of this well has barely begun and a one-year period will be required to complete evaluation. Applicant states that shortly after initial completion the well commenced producing significant quantities of salt water and for this reason Applicant states its productive life is questionable.

Any person desiring to be heard or to make any protest with reference to said application should on or before April 18, 1975, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB, *Secretary.*

[FR Doc.75–9061 Filed 4–7–75;8:45 am]

[Docket No. CI67–1594, et al.]

KERR-McGEE CORP., ET AL.

Further Extension of Time

APRIL 1, 1975.

On March 26, 1975, Kerr-McGee Corp. and on March 28, 1975, Phillips Petroleum Co. and Southern Natural Gas Co. filed motions to extend the time within which to elect to transfer sums under the overriding royalty provision of the Commission's order issued October 29, 1974, as most recently modified by notice issued February 28, 1975, in the above-designated matter.

Upon consideration, notice is hereby given that the time in which to take the above action is extended to and including April 28, 1975.

KENNETH F. PLUMB, *Secretary.*

[FR Doc.75–9062 Filed 4–7–75;8:45 am]

[Docket No. RP74–26]

LOUISIANA-NEVADA TRANSIT CO.

Order Approving Settlement Agreement

APRIL 1, 1975.

On February 3, 1975 with the Presiding Administrative Law Judge certified to the Commission a settlement agreement and the related record in this proceeding. Notice of the certification was issued February 6, 1975, with comments due on or before February 24, 1975. The Commission Staff (Staff) filed comments which favored the settlement agreement.

This proceeding involves a filing by Louisiana-Nevada Transit Company (LNT) made on September 28, 1973. LNT filed proposed tariff sheets which would increase LNT's jurisdictional rate from 24.26¢ Mcf to 39.50¢ Mcf under LNT's Rate Schedule G–1. The filing also proposed the inclusion of a purchased gas adjustment (PGA) clause in LNT's tariff. The Arkansas Public Service Commission (PSC) and the City of DeQueen, Arkansas (DeQueen) both timely sought and were granted the right to intervene. DeQueen is LNT's only jurisdictional customer. DeQueen sought and, by Order issued December 7, 1973, was denied rehearing of the Commission's Order of October 31, 1973 which accepted for filing LNT's proposed rates. DeQueen subsequently petitioned the United States Court of Appeals for the District of Columbia Circuit for review of the October 31, 1973 and December 7, 1973 orders.

A prehearing conference was held before the Presiding Administrative Law Judge on June 17, 1974, at which time LNT's case in chief and Staff's direct case were copied into the record. On January 20, 1975 a further hearing was convened at which time DeQueen's direct case, LNT's rebuttal evidence, and Staff's revised exhibits were copied into the record. At the request of Staff the hearing was recessed to permit settlement discussions. Three days of settlement discussions followed which resulted in the herein accepted settlement agreement. Staff, LNT, and DeQueen participated in these proceedings, PSC having chosen not to participate in any of the above outlined proceedings.

Staff's direct case and revised exhibits supported a rate of 36.05¢/Mcf. The difference between Staff's recommended rate and LNT's proposed rate arose over differences in projected gas supplies available to LNT after April 30, 1974. LNT produced actual figures on gas supply that justified a rate of 39.50¢/Mcf using Staff's cost of service.[1]

A summary of the settlement provisions at Docket RP74–26 is as follows:

LNT's filed rate will remain effective subject to the following conditions: 1. LNT will refund 5 cents per Mcf to DeQueen in respect of the volumes sold from November 2, 1973 through February

---

[1] First Substitute Fourteenth Revised Sheet No. 2–B and First Revised Sheet No. 67–B to Original Volume No. 1; First Substitute Fourth Revised Sheet No. 1–D to Third Revised Volume No. 2; First Substitute Sixth Revised Sheet No. 1–C and Substitute First Revised Sheet No. 1–D to Original Volume No. 2–A.

[2] Second Substitute Fourteenth Revised Sheet No. 2–B to Original Volume No. 1; Second Substitute Fourth Revised Sheet No. 1–D to Third Revised Volume No. 2; Second Substitute Sixth Revised Sheet No. 1–C to Original Volume No. 2–A.

[3] Docket No. R–389–B, issued December 4, 1974.

[1] The application states the total initial price including all adjustments and tax reimbursement is 64.90 cents per Mcf at 15.025 psia for gas containing 1,091 Btu per cubic foot, inclusive of 0.510 cent per Mcf allowance for delivery at a point on the buyer's line.

[2] Applicant indicates the 60-day emergency period expires on May 9, 1975. 18 CFR 157.29.

[1] Staff's cost of service is shown in Appendix A. The capitalization and return allowance is shown in Appendix B. Both appendices are filed as part of the original document.

V 40168
APR 8 75

28, 1975, together with interest at 7 percent.

2. LNT may track advance payments as provided in a settlement appendix, provided that a rate increase for such tracking may not be filed to become effective before September 1, 1975.

3. Except for PGA filings and as provided in 2 above, LNT shall not file increased rates to become effective after suspension prior to November 1, 1975.

4. DeQueen will not file any objection to the currently pending purchase gas adjustment tendered by LNT January 13, 1975.

5. DeQueen will withdraw its aforementioned petition for review in the United States Court of Appeals for the District of Columbia Circuit.

The advance payments tracking clause referred to in 2 above is tied to LNT's contract with the Crystal Oil Company. The clause limits increases to be tracked to: (1) Only those under a single, current contract between LNT and the Crystal Oil Company, (2) $200,000 per well or actual cost per well whichever is less, and (3) $1,000,000 total outlays during the life of the contract. There is no automatic termination of this term of the settlement agreement upon the filing of a new rate increase by LNT.

As set out in our Order Denying Rehearing, issued February 26, 1975 in Northern Natural Gas Company, Docket Nos. RP71-107, et al., the Commission is opposed to permanent tracking clauses for other than purchased gas and research and development costs. Therefore, we will approve the settlement agreement on the condition that LNT shall not increase its rates to reflect advance payments pursuant to the advance payment tracking provision in 2 above on or after the effective date of a new general rate increase filed by LNT pursuant to section 4 of the Natural Gas Act.

Our review of this settlement agreement, as well as the entire record in this proceeding, indicates that, as conditioned, the proposed settlement agreement adequately resolves the issues raised by the filing, is in the public interest, and should therefore be approved and made effective as hereinafter ordered and conditioned.

The Commission finds. Approval of the settlement agreement certified to us by the Presiding Administrative Law Judge in this proceeding, as conditioned herein, is reasonable and appropriate in the public interest in carrying out the provisions of the Federal Power Act.

The Commission orders. (A) The settlement agreement certified to us by the Presiding Administrative Law Judge is incorporated herein by reference, approved and made effective as provided by the provision of the settlement agreement, upon the condition that LNT shall not increase its rates to reflect advance payments pursuant to the advance payment tracking provision in 2 above on or after the effective date of a new general rate increase filed by LNT pursuant to section 4 of the Natural Gas Act.

(B) Within 30 days of the date of issuance of this order, LNT shall refund 5 cents per Mcf to DeQueen in respect of the volumes sold from November 2, 1973 through February 28, 1975, together with interest at 7 percent.

(C) This order is without prejudice to any findings or orders which have been made or which will hereafter be made by the Commission, and is without prejudice to any claims or contentions which may be made by the Commission, its staff, or any party or person affected by this order, in any proceeding now pending or hereafter instituted by or against LNT or any person or party, except as provided in the settlement agreements.

(D) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

[SEAL] KENNETH F. PLUMB, *Secretary.*

[FR Doc.75-9078 Filed 4-7-75;8:45 am]

[Docket No. RI75-40]

MOBIL OIL CORP.

Order Denying Reconsideration of Order Setting Date for Hearing

APRIL 1, 1975.

On March 6, 1975, Mobil Oil Corporation (Mobil) filed a petition for reconsideration of our order in Docket No. RI75-40 issued on February 28, 1975, that set the above proceeding for hearing. More specifically, Mobil requests that the Commission grant its petition for special relief pursuant to § 2.76[1] of the Commission's General Policy and Interpretations filed in the instant docket on September 30, 1974, or, in the alternative, continue the hearing set in our February 28, 1975, order to June 2, 1975, with Mobil's testimony and evidence to be filed on May 1, 1975.

Mobil bases its claim for relief on the fact that we granted the same special relief to LVO Corporation (LVO) in Docket No. CI74-19 on April 22, 1974. LVO's petition covered, inter alia, sales of natural gas from the two wells in the Bradshaw Field, Hamilton County, Kansas, in which Mobil also holds a partial working interest, and with respect to which Mobil seeks special relief in this proceeding.[2]

On July 23, 1974, we issued six orders[3] with reference to petitions for special relief. Each order stated, inter alia, that an analysis of a special relief petition required close scrutiny of the additional reserves which are estimated to be recoverable, and the costs therefor. Our order granting relief to LVO in Docket No. CI74-19 was issued before we adopted our current standards with regard to the recovery of reserves and costs associated therewith. However, Mobil's petition for special relief in the instant docket was filed after these standards took effect. Since Mobil was not a party to the LVO proceedings in Docket No. CI74-19, its plea for relief in the instant proceeding must stand on its own merits.

We also find Mobil's argument unpersuasive that, on the basis of Episcopal Theological Seminary v. Federal Power Commission, 269 F.2d 228 (D.C. Cir. 1959) and the Commission's order in Cities Service Oil Company, et al., Docket Nos. RI74-142 et al. (issued November 12, 1974), the Commission must grant its petition for special relief.

The Episcopal case upheld an order issued June 6, 1958, in Docket Nos. G-8697, *et al.* (19 F.P.C. 917) that denied applications for rehearing of an order issued April 14, 1958 (19 F.P.C. 519) which, inter alia, disallowed a periodic escalation for failure to submit evidence of economic justification therefor.

The Cities case is not dispositive because special relief to LVO for its sales from the remaining portion of the wells was decided on the basis of standards which have since been superseded and are not currently in effect whereas in Cities, the appropriate level of special relief for the interest owners there was determined at the same time pursuant to identical standards.

On the basis of the above, we conclude that reconsideration of our order issued February 28, 1974, should be denied. However, concerning Mobil's alternate plea to continue the hearing, we find that good cause exists to grant a continuance to the dates requested.

The Commission orders. (A) Mobil's Petition For Reconsideration Of Order Setting Date For Hearing filed March 6, 1975, is hereby denied.

(B) The procedural dates set forth in Ordering Paragraphs (B), (D), (E), and (F) of our February 28, 1975, order in these proceedings are changed to the following:

June 2, 1975—Hearing date.
May 1, 1975—Mobil's direct case.
May 23, 1975—Staff's direct case.
May 29, 1975—Rebuttal due.

By the Commission.

[Docket No. CP75-271]

McCULLOCH INTERSTATE GAS CORP.

Notice of Application

MARCH 31, 1975.

Take notice that on March 5, 1975, McCulloch Interstate Corporation (Applicant), 10880 Wilshire Boulevard, Los Angeles, California 90024, filed in Docket No. CP75-271 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the operation of Applicant's existing facilities for the purpose of transporting gas owned by Colorado Interstate Gas Company (CIG) or delivered to Applicant for CIG's account by Mountain Fuel Supply Company (Mountain Fuel), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that Mountain Fuel will deliver gas produced from certain acreage in the Spearhead Ranch, Converse County, Wyoming, to Applicant at the interconnection of Applicant's facilities with Mountain Fuel's facilities in Converse County. The subject gas is either owned by CIG or delivered to Applicant for CIG's account. Applicant proposes to transport said gas approximately 35 miles in its existing 16-inch transmission line and deliver the gas to CIG at the existing interconnection of Applicant's and CIG's Powder River laterals near Douglas, Wyoming. Applicant further states that no new facilities will be required for Applicant to effectuate the proposed transportation service.

Applicant proposes to charge CIG 3.5 cents per Mcf of gas for the proposed transportation service, subject to future adjustment. Applicant estimates that it will transport annual volumes of 732,000 Mcf of gas under the requested authority, which will produce annual transportation revenues to Applicant of approximately $27,370.

Any person desiring to be heard or to make any protest with reference to said application should on or before April 14, 1975, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB, *Secretary.*

[Dockets Nos. CP74-286; CP75-196]

NATURAL GAS PIPELINE CO. OF AMERICA

Postponement of Hearing

MARCH 28, 1975.

On March 27, 1975, Staff Counsel filed a motion for an order consolidating the above-designated matters, for fixing a date to file evidence, and to postpone hearing date fixed by order issued February 24, 1975, in CP74-286.

Notice is hereby given that, pending further Commission action on the above motion, the hearing date is postponed until May 22, 1975, at 10 a.m. (e.d.t.).

MARY B. KIDD, *Acting Secretary.*

[Docket No. RP74-75]

NORTHERN NATURAL GAS CO.

Order Setting Procedural Dates

APRIL 1, 1975.

By Notice issued January 21, 1975, the Commission deferred the procedural dates for service of Intervenor evidence and Northern rebuttal evidence, as well as the date for the hearing for purposes of cross-examination pending action on Northern's application for rehearing of our December 30, 1974, order. By order issued February 28, 1975, the Commission denied the applications for rehearing filed by Northern and the Northern Distributor Group. Accordingly, we find it appropriate to establish procedural dates for the expeditious resolution of the issues raised in this proceeding.

The Commission finds. Good cause exists to reset procedural dates in this proceeding for the expeditious resolution of the issues raised herein.

The Commission orders. (A) Any Intervenor evidence in this proceeding shall be served on or before April 22, 1975. Any rebuttal evidence by Northern shall be filed on or before May 6, 1975. A hearing for purposes of cross-examination of the evidence shall commence at 10 a.m. on June 3, 1975, in a hearing room in the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426.

(B) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

[Dockets Nos. E-8999, E-9000, E-9001]

ORANGE AND ROCKLAND UTILITIES, INC. AND ROCKLAND ELECTRIC CO.

Further Extension of Procedural Dates

MARCH 28, 1975.

On March 21, 1975, Staff Counsel filed a motion to extend the procedural dates fixed by order issued February 7, 1975, in the above-designated matter. The motion states that the parties have been notified and have no objection.

Upon consideration, notice is hereby given that the procedural dates in the above matter are modified as follows:

Service of staff's testimony, May 20, 1975.
Service of intervenor's testimony, June 3, 1975.
Service of company rebuttal, June 17, 1975.
Hearing, July 7, 1975 (10 a.m., edt).

[Docket No. R-389-B]

RATES FOR SALES OF NATURAL GAS FROM CERTAIN WELLS AND DEDICATIONS TO INTERSTATE COMMERCE

Notice of Form of Application

MARCH 31, 1975.

Applications for certificates of public convenience and necessity have been filed under the Commission's Opinion Nos. 699, *et seq.* (18 CFR 2.56a) which have in some instances sought certification at a rate in excess of the rate provided for in § 2.56a(a).

Notice is hereby given that when any such application is filed, that is, pursuant to § 2.56a(g) Special Relief, it should be entitled "Petition For Special Relief", in accordance with the provision of § 2.56a(g)[1] and should clearly and openly state that it is such a petition on the face of the application.

MARY B. KIDD, *Acting Secretary.*

[Docket No. R-389-B]

RATES FOR SALES OF NATURAL GAS FROM CERTAIN WELLS AND DEDICATIONS TO INTERSTATE COMMERCE

Order on Clarification

MARCH 31, 1975.

On March 7, 1975, the Commission issued an order on clarification in which we answered specific questions which had been posed by Panhandle Eastern Pipe Line Company and Trunkline Gas Company (Panhandle) in a joint petition for reconsideration and clarification filed on February 4, 1975, to our Opinion No. 699-H.[2] Since the issuance of said order of clarification many parties to this proceeding have indicated that further clari-

[2] Mobil owns a 12.23 and a 12.49065 percent interest, respectively, in the two wells covered by its petition for special relief more particularly described in our February 28, 1975, order in Docket No. RI75-40.

[3] C. K. Oil Company, Docket No. RI74-234; Cities Service Oil Company, et al., Docket Nos. RI74-142, et al.; Dinero Oil Company, Docket No. RI74-220; Sun Oil Company, Docket No. RI74-236; Sun Oil Company, Docket No. RI74-237; Terra Resources, Inc., Docket No. RI74-240.

[1] 18 CFR § 2.56a(g).

[2] Opinion No. 699-H, mimeo, page 82.

[3] Opinion No. 699-H was issued December 4, 1975 —— FPC ——.

V 40 68 APR 8 75 XUM

fication is needed.[1] We are aware that this matter is now pending in the United States Court of Appeals for the Fifth Circuit.[2] However, since our purpose was not to seek to modify or set aside, in whole or in any part, any finding or order in Opinion Nos. 699 and 699–H, we believe that our clarification was proper. Consequently, we believe that further explanation of that clarification is likewise proper.

In explanation, it probably would have been more appropriate to set out the fact that the postulate to each of Panhandle's questions related only to date of discovery or identity of a reservoir. Both Phillips Petroleum Company (Phillips) and Rodman Corporation, et al. (Rodman) recognized that fact in their respective petitions (Phillips' Pet. pp. 5–6; Rodman's Pet. p. 3) but asked that the Commission make clear that the answers it gave in the order of March 7, 1975, related to claims for the new rates based on a newly discovered reservoir. We had thought we had made the answers clear when we declared the fact situations and the date of commencement of drilling or service to be immaterial to the questions as presented. Nevertheless, we shall restate the general rules of applicability of Opinion Nos. 699, et seq., to eliminate any doubt as to the meaning of those rules.

The rate and proposed rate increases filed in accordance with Opinion Nos. 699, et seq., and to be accepted thereunder shall be for (1) sales from wells commenced on or after January 1, 1973 (including sales from a different reservoir in an existing well where the completion, operation into such different reservoir commenced on or after January 1, 1973);[4] (2) "sales made pursuant to contracts for the sale of natural gas in interstate commerce for gas not previously sold in interstate commerce prior to January 1, 1973," as set forth in § 2.56a(a)(2)(ii), as amended by Opinion No. 699–I; (3) sales made pursuant to a contract which replaced a contract which had expired by its own terms on or after January 1, 1973; or pursuant to a contract executed on or after January 1, 1973, which replaced a contract which had expired by its own terms prior to January 1, 1973; and (4) sales made from a reservoir discovered on or after January 1, 1973, pursuant to § 2.56a(k), as amended by Opinion No. 699–I.

Such categories of gas qualifying for the national gas rate, as prescribed in Opinion No. 699, et seq., have been consistently applied by the Commission since the promulgation of said opinions and accompanying orders. As we stated in the order of March 7, 1975, "• • • the exclusive jurisdiction to modify or set aside the order issued by us in Docket No. R–389–B is now vested in the Court." Any interpretation that may have been placed on our order of March 7, 1975, by any party cannot change that fact.

The Commission finds. (1) The applications filed by the parties named above, insofar as they seek clarification of the order issued herein on March 7, 1975, be granted.

The Commission orders. (A) The applications filed hereinsofar as they seek clarification of the order issued herein on March 7, 1975, are granted, and the response hereinabove set forth constitutes our clarification thereof.

By the Commission.

[SEAL] KENNETH F. PLUMB, *Secretary.*

[FR Doc.75–9070 Filed 4–7–75;8:45 am]

[Docket No. CP75–39]

SOUTHERN NATURAL GAS CO.

Petition To Amend Certificate of Public Convenience and Necessity

APRIL 1, 1975.

Take notice that on March 20, 1975, Southern Natural Gas Company (Petitioner) filed in Docket No. CP75–39 a petition to amend the order issued in said docket on October 21, 1974, pursuant to section 7(c) of the Natural Gas Act, as implemented by section 157.7(b) of the Regulations thereunder (18 CFR 157.7 (b)), so as to increase the single project cost limitations to $2,500,000 for offshore projects and so as to expand the definition of authorized budget-type gas purchase facilities to include those facilities which connect producers' facilities with the facilities of another natural gas company authorized to transport for the account of or exchange with Petitioner gas purchased by Petitioner, all as more fully set forth in the petition to amend, which is on file with the Commission and open to public inspection.

The petition states by the October 21, 1974, order in the instant docket Petitioner is presently authorized to construct, during the 12-month period commencing on said date, and operate gas purchase facilities necessary to transport and receive into its main pipeline system supplies of natural gas available from producing areas located adjacent to said system, at a cost limitation of $1,750,000, for offshore projects. Petitioner requests the above described increase in single project cost limitation and an expanded definition of budget-type gas purchase facilities, stating that such a request is within the contemplation of the Commission's Order No. 522, issued January 16, 1975, in Docket No. RM75–2, Budget-type Applications—Gas Purchase Facilities (18 CFR 2.58, 157.7(b)).

Petitioner states that it now expects the cost associated with gas purchase facilities to be constructed to attach supplies of gas offshore to exceed $1,750,000, and seeks modification of the definition of budget-type gas purchase facilities in its original certificate in light of its reliance on exchange and transportation arrangements to obviate duplicative transmission facilities.

Any person desiring to be heard or to make a protest with reference to said petition should on or before April 21, 1975, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

KENNETH F. PLUMB, *Secretary.*

[FR Doc.75–9068 Filed 4–7–75;8:45 am]

[Docket No. CI75–553]

TEXACO INC.

Notice of Application

APRIL 1, 1975.

Take notice that on March 17, 1975, Texaco Inc., P.O. Box 430, Bellaire, Texas 77401, filed in Docket No. CI75–553 an application for a certificate of public convenience and necessity pursuant to section 7(c) of the Natural Gas Act and § 2.75 of the Commission's rules of practice and procedure to authorize Applicant to sell natural gas from the High Island Block 119 Field, offshore Texas to United Gas Pipe Line Company at the initial rate of $1.18 per Mcf and all stated fixed price escalations.

With the exception of the royalty interest, who does not join this application, Applicant is the only party whose gas is to be sold under the terms and conditions of said contract.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE. Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8 and 1.10). All such petitions or protests should be filed on or before April 18, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB, *Secretary.*

[FR Doc.75–9069 Filed 4–7–75;8:45 am]

[Docket No. RP75–76–1]

TEXAS GAS TRANSMISSION CORP. (MISSISSIPPI VALLEY GAS CO.)

Notice of Petition for Extraordinary Relief

MARCH 31, 1975.

Take notice that on March 17, 1975, Mississippi Valley Gas Company (MVG) filed a petition for emergency relief, pursuant to section 5 of the Natural Gas Act and § 2.78 of the Commission's general policy and interpretations (18 CFR 2.78), from curtailment by its supplier, Texas Gas Transmission Corporation (Texas Gas), and for interim relief pendente lite in order to prevent forced shedding of firm electric load by two of its customers, City of Clarksdale, Mississippi (Clarksdale), and Greenwood Utilities, Greenwood, Mississippi (Greenwood), as well as for emergency relief for two other customers, Cooper Steel, a Division of Cooper Industries, Inc. (Cooper Steel), and Viasic Foods, Inc. (Viasic), all as more fully set forth in MVG's petition as augmented by incorporated petitions by the four aforesaid customers, all of which are on file with the Commission and open to public inspection.

MVG states it operates wholly within the state of Mississippi and is engaged primarily in the purchase, sale and distribution of natural gas to residential, commercial and industrial consumers in various areas of the state. MVG states that most of the gas it sells is purchased from four different interstate pipeline companies and that commencing April 1, 1975, MVG's supply from Texas Gas for that supply area which serves, inter alia, the four above-named customers will be critical. MVG states it is filing the instant petition on behalf of Clarksdale, Greenwood, Cooper Steel, and Viasic, each of which is seeking emergency relief in the belief such a procedure is required; but if the Commission will entertain said individual customer's petitions on their own behalf, MVG requests that it be dismissed as a party to the instant proceeding. MVG disclaims all liabilities and obligations arising out of or connected with such customers' requests.

By accompanying petition Clarksdale[1] states it has been advised by MVG that MVG will suspend delivery of virtually all natural gas to Clarksdale's electric generating stations, effective April 1, 1975. Clarksdale states it is presently in no position to rely on fuel oil as the primary fuel for its generating plant. Clarksdale cites a lack of adequate storage supply of fuel oil, its present inability to finance the required storage facilities conversion would require, and the present lack of an adequate internal delivery system to deliver oil to the generating units, all of which are said to render it impossible for Clarksdale to convert full time to the burning of fuel oil in its generating plant and to meet the economic burden laced upon its generating plant by a 100 percent curtailment of natural gas.[2]

Clarksdale requests immediate interim relief from a 100 percent curtailment of natural gas to its generating plant for a period of 6 months from April 1, 1975, during which it can take necessary steps to acquire sufficient oil for the new storage tank, complete the conversion of its internal delivery system and develop a supply and external delivery system for fuel oil. Additionally, Clarksdale requests permanent relief in the form of a guaranteed supply of 10,000 Mcf of natural gas per month to its South plant and Third Street plant (5,000 Mcf to each plant) required to fuel the pilots in the burners. Clarksdale states pilots cannot operate safely on oil and natural gas is necessary to fuel the pilots which ignite the oil in the burners. Finally, Clarksdale requests relief in emergency situations be granted on a permanent basis so that it can use natural gas to fuel its generators.[3]

By accompanying petition Greenwood[4] states that MVG has notified it that as a result of curtailments of MVG by Texas Gas MVG intends to curtail completely all gas deliveries to Greenwood effective April 1, 1975. Greenwood seeks emergency relief in the form of continued gas deliveries from April 1, 1975, until Greenwood had completed its present efforts, to make its electric generation facilities independent of natural gas, estimated to be accomplished around December 15, 1975. Greenwood alleges such relief is needed to avoid the shedding of firm electric load by it during this interim conversion period. Greenwood states that it estimates that it will require 5,200 Mcf of gas per day during the peak (summer) period, slightly less during off-peak period, and additional gas on an emergency standby basis (up to approximately 14,747 Mcf per day) which would be used in a dire emergency where due to the unavailability of alternate fuels, gas is absolutely required to avoid shedding firm electric load.

Greenwood states that it has two generation stations, Henderson Station and Wright Station, and that historically it has used natural gas as the primary fuel at both stations, with oil and coal as the primary standby fuel at Wright and coal as the primary standby at Henderson.

Greenwood states it is now in the process of trying to purchase and install the necessary equipment so that it can operate entirely on coal and oil but that during the interim it requires the abovestated temporary allocation of gas as standby fuel.

By accompanying petition Cooper Steel[5] seeks emergency relief resulting from an alleged incorrect consumption history which has resulted in an allocation of 14,814 Mcf of natural gas per year. Cooper Steel alleges that MVG erroneously stated by letter notice dated February 17, 1975, that it had consumed 26,149 Mcf in the year 1974 and curtailed this figure to 14,814 Mcf. Cooper Steel states this allocation of 14,814 Mcf is 15 percent of the requested needs and that this volume would permit Cooper Steel to operate for approximately eight weeks. Cooper Steel states that pursuant to MVG's curtailment plan MVG had no authority to allocate to Cooper Steel any history developed outside of MVG's service territory. Cooper Steel states further that accordingly MVG in its curtailment letter credited Cooper Steel with the 1974 customer volume record earned by Indian Head, Inc., in the plant it now occupies and determined the abovestated allocation.

Cooper Steel states MVG had previously agreed to deliver to it an interruptible maximum daily demand of 578 Mcf and an interruptible maximum hourly demand of 24 Mcf of gas. Cooper Steel asserts that its peak daily requirements are 426.2 Mcf per day and 8,234 Mcf per month and requests a firm supply. Cooper Steel requests that such relief be granted on a permanent basis. Cooper Steel states its standby fuel is propane and normal operation would require 1,144,538 gallons of this alternate fuel per year. At current prices, Cooper Steel indicates, the cost of natural gas per million Btu is $0.6666 and that the cost of propane per million Btu is $3.1816.

By accompanying petition Viasic seeks emergency relief from 100 percent curtailment of natural gas deliveries, stating

[1] On March 17, 1975, Northwest Pipeline Corporation filed a motion for clarification and on March 24, 1975, Exchange Oil & Gas Corporation filed for reconsideration; Rodman Corporation, Pennzoil Company, Pennzoil Louisiana & Texas Offshore, Inc., Pennzoil Offshore Gas Operators, Inc., Pennzoil Producing Company, Tenneco Oil Company and Texas Gulf, Inc. filed a joint "suggestion", and Phillips Petroleum Company filed for reconsideration.

[2] National Rate cases for New Gas, Docket No. 74–3330.

[4] Where a spacing order is obtained permitting the drilling of a well commenced on or after January 1, 1973, the production therefrom is entitled to the new gas ceiling under Category (1). See Opinion No. 699–H, mimeo p. 50.

[1] The City of Clarksdale, Mississippi, owns and operates an electric generating transmission and distribution system serving an area of approximately 24,000 people which area includes the corporate limits of Clarksdale, the town of Lyon, Mississippi, and adjacent outlying areas. This system is said to be completely isolated from all other electrical generating and distribution systems.

[2] Clarksdale states a complete conversion to fuel oil will result in an increase of electrical charges by approximately 50 percent.

[3] Clarksdale states an emergency would be defined as a situation fitting one of the following categories: 1) An equipment failure in the internal fuel delivery system resulting in the inability to feed fuel oil to the burners; 2) Any time the combined cycle steam and gas turbine unit is down during a peak load situation; and 3) A failure or breakdown in the external fuel delivery system resulting in unavailability of fuel, examples of which are ice storms, strikes, etc.

[4] Greenwood states it owns and operates an isolated municipal electric generation and distribution system serving its community of approximately 30,000 people.

[5] The petition states on July 30, 1974, Cooper Industries set up Cooper Steel as a corporate division in a program designed to provide cold rolled and heat treated steel needed by Lufkin Rule Company, another corporate division. Cooper Steel states it has installed $6,000,000 of equipment in the Greenville, Mississippi, plant and its heat treating and tempering facilities were operational prior to the curtailment letter from MVG of February 17, 1975. Cooper Steel states initial employment at its plant is 75 skilled operators with full employment estimated at 125 to 150.

V 40168 APR 8 75 XUM

by letter notice dated February 17, 1975, MVG has informed it that Vlasic would receive no gas from April 1, 1975, through March 1976. Vlasic states its plant located at Greenville, Mississippi, is a food processing plant which has not yet been placed in operation. As a new project Vlasic states that it has no history of consumption [6] but it had previously executed an interruptible contract with MVG to take and pay a hourly maximum of 42 Mcf of natural gas and a daily maximum of 300 Mcf of natural gas.

Vlasic states its plant's standby source of energy is fuel oil and that it has applied to its supplier for an additional allocation of fuel oil to enable the plant to operate fulltime. Vlasic states that the cost of plant operations by fuel oil will be 3.4 times the cost of operation with natural gas. Vlasic maintains that there are exceptional circumstances which present an emergency of the first order as unemployment in the Greenville area is excessive due to the changing agricultural economy and industrial layoffs. Vlasic states it projects employing on a regular basis at its plant 250 individuals plus an additional 250 during the summer, the great majority of which it estimates will be black females living in the Greenville area.

Vlasic states the operation of its plant for processing vegetables into pickles will be relatively steady for the first year of operation. Vlasic requests a first year allocation of 300 Mcf of gas per day and 4,833 Mcf of gas per month and after the first year, peak day and month requirements for the months of May through September of 600 Mcf and 9,666 Mcf, respectively. Vlasic requests that deliveries of such natural gas be made under a firm contract; however, if that isn't possible, Vlasic requests that an interruptible supply be granted under a contract which will provide that the maximum reductions of the supply available to Vlasic at Greenville will not exceed the proportion of reduction supplied to other food processing plants having a natural gas consumption history of at least one year. Vlasic states that the end-use of all natural gas requested is the firing of boilers for the production of steam and that the relief requested is permanent.

Any person desiring to be heard or to make any protest with reference to said petition should on or before April 18, 1975, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

KENNETH F. PLUMB,
Secretary.

[FR Doc.75-9073 Filed 4-7-75;8:45 am]

FEDERAL RESERVE SYSTEM

THE BANK OF NOVA SCOTIA

Formation of Bank Holding Co.; Correction

In FR document 75-8770 appearing at page 15012 of the issue for Thursday, April 3, 1975, the name of the bank to be acquired should read: "Banco Mercantil de Puerto Rico, Inc., San Juan (Rio Pedras), Puerto Rico".

Board of Governors of the Federal Reserve System, April 3, 1975.

[SEAL] GRIFFITH L. GARWOOD,
Assistant Secretary of the Board.

[FR Doc.75-9052 Filed 4-7-75;8:45 am]

FIDELCOR, INC.

Order Approving Acquisition of Keen Factors, Inc.

Fidelcor, Inc., Rosemont, Pennsylvania, a bank holding company within the meaning of the Bank Holding Company Act ("Act"), has applied for the Board's approval, under section 4(c)(8) of the Act and § 225.4(b)(2) of the Board's Regulation Y, to establish a de novo indirect [1] subsidiary named Trefoil Capital Corporation of California, Inc., and through said subsidiary to acquire substantially all of the assets of Keen Factors, Inc., Beverly Hills, California ("Keen"), a company that engages in the making and acquiring, for its own account or for the account of others, loans and other extensions of credit such as would be made by a commercial finance or factoring company, and the servicing of such loans and other extensions of credit for others. Such activities have been determined by the Board to be closely related to banking (12 CFR 225.4(a)(1) and (3)).

Notice of the application, affording opportunity for interested persons to submit comments and views on the public interest factors, has been duly published (39 FR 33408 (1974)). The time for filing comments and views has expired, and the Board has considered all comments received in the light of the public interest factors set forth in section 4(c)(8) of the Act (12 U.S.C. 1843(c)(8)).

Applicant, the sixth largest banking organization in Pennsylvania, controls one bank (The Fidelity Bank, Rosemont, Pennsylvania) with total domestic deposits of $1.5 billion, representing approximately 3.9 per cent of the total deposits held by commercial banks in the State.[2] Applicant also has wholly-owned nonbanking subsidiaries engaged in the activities of real estate lending, advising a real estate investment trust, consumer lending, and commercial financing, among others.

Keen lends funds on a secured basis usually receiving security in the form of accounts receivable, inventory, machinery, equipment and real estate.[3] In addition, Keen purchases a small [4] amount of accounts receivable from its clients prior to the dates that payments are due from its clients' customers. This advance factoring is done on a notification basis, whereby debtors are informed by Keen that it has purchased the accounts receivable and that they are to make their payments directly to Keen. Keen operates its sole office in Beverly Hills, California, and, as of February 28, 1974, held total gross receivables of approximately $1.3 million, including factored accounts. Applicant's subsidiary, Trefoil Capital Corporation ("Trefoil"), with offices located in both New York, New York and Philadelphia, Pennsylvania, engages only in commercial finance lending. Subsequent to its acquisition of Trefoil in 1973, Applicant transferred the commercial finance lending activities of its subsidiary bank to Trefoil. Trefoil's gross receivables, as of June 30, 1974, amounted to approximately $22 million. Due to the geographical distances between offices of Trefoil and that of Keen (approximately 3,000 miles), and the fact that neither Trefoil nor Keen originate any loans in the service areas of the other, it does not appear that competition exists between the two firms. Further, in view of the relatively small size of Keen, and of its estimated market shares (less than one per cent), it would not appear that its affiliation with Applicant would foreclose entry into any commercial financing market by others.[5] Neither Trefoil nor Keen appears to be a likely de novo entrant into any market in which the other competes. Thus, the Board concludes that consummation of the proposed transaction would have no significantly adverse effects on either actual or potential competition.

Applicant's acquisition of Keen would enhance Keen's access to financial resources necessary to expand its commercial financing and factoring operations. Those operations have not expanded significantly since 1971. Consummation should produce further public benefits to the extent that the availability of additional commercial financing and factoring facilities may be expected to increase, at least moderately, the volume of Keen's business and to decrease interest rates in the relevant market area. There is no evidence in the record indicating that acquisition of Keen by Applicant would result in any undue concentration of resources, unfair competition, conflicts of interests, unsound banking practices or other adverse effects upon the public interest.

Based upon the foregoing and other considerations reflected in the record, the Board has determined in accordance with the provisions of section 4(c)(8) of the Act that consummation of this proposal can reasonably be expected to produce benefits to the public that outweigh possible adverse effects. Accordingly, the application is hereby approved. This determination is subject to the conditions set forth in § 225.4(c) of Regulation Y and to the Board's authority to require such modification or termination of the activities of a holding company or any of its subsidiaries as the Board finds necessary to assure compliance with the provisions and purposes of the Act and the Board's regulations and orders issued thereunder, or to prevent evasion thereof.

The transaction shall be made not later than three months after the effective date of this Order, unless such period is extended for good cause by the Board or by the Federal Reserve Bank of Philadelphia, pursuant to authority delegated hereby.

By order of the Board of Governors,[6] effective April 1, 1975.

[SEAL] THEODORE E. ALLISON,
Secretary of the Board.

[FR Doc.75-9092 Filed 4-7-75;8:45 am]

GENERAL BANCSHARES CORP.

Order Approving Acquisition of Bank

General Bancshares Corporation, St. Louis, Missouri, a bank holding company within the meaning of the Bank Holding Company Act ("Act"), has applied for the Board's approval under section 3(a)(3) of the Act (12 U.S.C. 1842(a)(3)) to acquire 100 percent (less directors' qualifying shares) of the voting shares of Traders National Bank of Kansas City, Kansas City, Missouri ("Bank").

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with section 3(b) of the Act (12 U.S.C. 1842(b)). The time for filing comments and views has expired, and the Board has considered the application and all comments received in light of the factors set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant is the seventh largest banking organization in Missouri and controls seven Missouri banks with total deposits of $362.8 million, representing approximately 2.4 per cent of the total deposits held by commercial banks in the State.[1] In addition, Applicant controls three banks in Illinois and one in Tennessee, all of which were acquired by Applicant prior to the enactment of the Bank Holding Company Act of 1956. Acquisition of Bank would increase Applicant's share of State deposits by approximately one-half of one per cent, while Applicant's rank among the State's banking organizations would remain unchanged.

Bank (deposits of $81.5 million) is the eighth largest commercial bank in the Kansas City banking market and controls approximately 1.9 per cent of the total deposits held by commercial banks in this market.[2] Applicant's closest Missouri banking subsidiary to Bank is located approximately 240 miles east of Bank in St. Louis County, Missouri. There is no significant existing competition between any of Applicant's banking or nonbanking subsidiaries and Bank, and it appears unlikely that any such competition would develop in the future due in part to Missouri's branching law. Inasmuch as the six largest Missouri bank holding companies each own two or more banks in the market, acquisition of Bank by Applicant may promote competition by introducing a new banking alternative into the market and by strengthening Bank's competitive position therein. Accordingly, on the basis of the facts of record, the Board concludes that competitive considerations are consistent with approval of the application.

The financial and managerial resources and future prospects of Applicant and its subsidiary banks are regarded as generally satisfactory and consistent with approval of the application. Bank's affiliation with Applicant should result in a strengthening of Bank's overall financial condition, as well as providing Bank with additional managerial expertise. Thus, the banking factors lend weight toward approval of the application.

In regard to considerations relating to convenience and needs, Applicant intends to supply Bank with access to Applicant's wide range of banking expertise, particularly in the area of data processing services. In addition, Bank's construction and cattle lending activities would be expanded. These considerations relating to the convenience and needs of the community to be served lend additional weight toward approval of the application. It is the Board's judgment that the proposed acquisition would be in the public interest and that the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be made (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after the effective date of this Order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of St. Louis pursuant to delegated authority.

By order of the Board of Governors,[6] effective April 1, 1975.

[SEAL] THEODORE E. ALLISON,
Secretary of the Board.

[FR Doc.75-9093 Filed 4-7-75;8:45 am]

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-522A and 50-523A]

PUGET SOUND POWER & LIGHT COMPANY ET AL.

Receipt of Attorney General's Advice and Time for Filing of Petitions To Intervene on Antitrust Matters

The Commission has received, pursuant to section 105c. of the Atomic Energy Act of 1954, as amended, a letter of advice from the Attorney General of the United States, dated March 21, 1975, a copy of which is attached as Appendix A.

Any person whose interest may be affected by this proceeding may, pursuant to § 2.714 of the Commission's "rules of practice," 10 CFR Part 2, file a petition for leave to intervene and request a hearing on the antitrust aspects of the application. Petitions for leave to intervene and requests for hearing shall be filed by May 8, 1975 either (1) by delivery to the NRC Public Docketing and Service Section at 1717 H Street NW., Washington, D.C., or (2) by mail or telegram addressed to the Secretary, Nuclear Regulatory Commission, Washington, D.C. 20555, ATTN: Docketing and Service Section.

For the Nuclear Regulatory Commission.

ABRAHAM BRAITMAN,
Chief, Office of Antitrust and Indemnity, Nuclear Reactor Regulation.

APPENDIX "A"

MARCH 21, 1975.

Skagit Nuclear Power Project Units 1 and 2, Puget Sound Power & Light Co.; Pacific Power & Light Co.; The Washington Water Power Co.; Washington Public Power Supply System [NRC Docket Nos. 50-522A and 50-523A] Department of Justice File 60-415-101.

You have requested our advice pursuant to the provisions of section 105 of the Atomic Energy Act of 1954, as amended, in regard to the above-captioned facility, which will be located near the City of Sedro Wolley in Skagit County, Washington. Each of the two units will have an approximate net electrical capacity of 1,288 megawatts.

[1] All banking data are as of June 30, 1974, and reflect bank holding company formations and acquisitions approved through October 31, 1974.

[2] Real estate never serves as the sole collateral for a loan by Keen, but, on occasion, serves as collateral in addition to other collateral.

[3] As of February 28, 1974, Keen's purchased receivables amounted to $189,876.

[4] The relevant market in which Keen competes is the Los Angeles Regional Area, covering eleven counties in the southern third of California and Mohave County in northwestern Arizona and Clark and Lincoln Counties in southeastern Nevada. Trefoil competes in regional markets centered upon New York City and Philadelphia.

[5] Vlasic states that the proportion of reduction applied by MVG to customers which have at least a one year consumption record is 33⅓ percent.

[6] Trefoil Capital Corporation of California, Inc., would be wholly-owned by Applicant's subsidiary, Trefoil Capital Corporation, New York, New York.

[6] Voting for this action: Vice Chairman Mitchell and Governors Bucher, Holland, Wallich, and Coldwell. Absent and not voting: Chairman Burns and Governor Sheehan.

[1] All banking data are as of June 30, 1974.

[2] The Kansas City banking market is approximated by the Kansas City SMSA less Ray County, and the southern half of Cass County, Missouri.

[6] Voting for this action: Chairman Burns and Governors Mitchell, Bucher, Holland, and Wallich. Absent and not voting: Governors Sheehan and Coldwell.

V 40168 APR 8 75 XUM

It has been preliminarily agreed that the ownership in these projects will be divided among the Puget Sound Power & Light Company (30 percent), Pacific Power & Light Company (30 percent), Washington Public Power Supply System (15 percent) and the Washington Water Power Company (5 percent). The remaining 10 percent share was to have been acquired by the Idaho Power Company, but that company has now decided not to participate; its share will be reallocated among the remaining four owners. Each utility will be entitled to receive the output of these projects in proportion to its respective ownership share.

APPLICANTS

Puget Sound Power & Light Company (PSP&L) is an investor-owned electric utility with principal offices in Bellevue, Washington. It serves approximately 400,000 customers located principally in the Puget Sound region of western Washington. PSP&L presently owns generating facilities with a total net plant capability of approximately 427 megawatts. These facilities consist of six hydroelectric plants, one oil-fired steam plant, one combustion turbine, and one internal combustion unit, all located in the State of Washington. PSP&L also has a seven percent ownership interest in the Centralia Project, two coal-fueled units at Centralia, Washington. PSP&L and the Montana Power Company are jointly constructing two 350 megawatt coal-fueled units at Colstrip, Montana. PSP&L has several long-term contracts for the purchase of approximately 1700 megawatts of power from certain hydroelectric projects on the Columbia River operated by public utility districts. In addition, PSP&L has agreed to purchase 414 megawatts from new units to be installed by Public Utility District No. 1 of Chelan County at its Rock Island Project on the Columbia River. Puget has also purchased power under the Columbia Storage Power Exchange Agreement, as well as under an exchange agreement with the Bonneville Power Administration (Bonneville).

PSP&L intends to purchase a 5% interest in the proposed Washington Public Power Supply System Nuclear Project No. 3, a 1240 megawatt nuclear facility to be built near Satsop, Washington. PSP&L has an option to acquire a similar interest in Washington Public Power Supply System's Nuclear Project No. 5 now being planned.

Pacific Power & Light Company (PP&L) is an investor-owned electric utility with its principal offices in Portland, Oregon. PP&L owns thirty-three hydroelectric generating plants with a rated capacity of 868,393 kilowatts and seven steam-electric plants with a rated capacity of 1,494,433 kilowatts. PP&L has contracts to purchase power from various public agencies and public utility districts on long-term agreements as well as peaking capacity from Bonneville. PP&L presently operates a coal-fueled 750 megawatt generating station near Glenrock, Wyoming, and also owns 47.5 percent of the Centralia Project, two coal-fueled 700 megawatt facilities at Centralia, Washington, which are jointly-owned by four publicly-owned and the three investor-owned utilities. PP&L and Idaho Power Company presently are developing the Jim Bridger power and coal mining complex in southwestern Wyoming. PP&L, along with the Black Hills Power & Light Company, is developing a bid on a 300 megawatt coal-fueled facility. PP&L has a 2.5 percent ownership interest in the Trojan Nuclear Project being constructed by Portland General Electric Company and the City of Eugene, Oregon. The Department of Justice advised the Atomic Energy Commission that it need not conduct an antitrust hearing with respect to the Trojan project. PP&L also will have a 10 percent ownership interest in the proposed Washington Public Power Supply Systems Nuclear Project Number 3.

Washington Public Power Supply System (WPPSS) is a municipal corporation and a joint operating agency of the State of Washington. Its membership, which is established by Washington state law, is made up of eighteen operating public utility districts in the State of Washington and the cities of Richland, Seattle, and Tacoma, Washington. WPPSS presently operates the Packwood Lake Hydroelectric Project in Lewis County, Washington, and the Hanford Electric Generating Project, which utilizes by-product steam from the Energy Research and Development Administration's reactor near Richland, Washington. WPPSS previously applied to your predecessor commission for licenses to construct and operate WPPSS Nuclear Project Number 1. With respect to that project, the Department of Justice advised the Atomic Energy Commission that it did not believe that an antitrust hearing was necessary. In addition, WPPSS has under construction its Nuclear Project Number 2, formerly known as Hanford No. 2, pursuant to AEC Construction Permit CPPR-93. The Department advised the AEC that an antitrust hearing with respect to that project appeared unnecessary. We have recently advised the Nuclear Regulatory Commission that it need not conduct an antitrust hearing with respect to pending WPPSS Nuclear Projects Numbers 3 and 4.

The Washington Water Power Company (WWPC) is an investor-owned electric utility with its principal offices in Spokane, Washington. Approximately 65 percent of the Company's power needs is supplied by Company-owned hydroelectric projects. The remainder is purchased from public utility districts and other investor-owned utilities. WWPC will have a 15 percent ownership interest in two coal-fired electric plants to be constructed at Colstrip, Montana. In addition, WWPC will have a 5 percent ownership interest in the proposed WPPSS Nuclear Project Number 3.

INTERCONNECTION AND COORDINATION WITH OTHERS

The Pacific Northwest is an area where there is a high degree of coordination and cooperation between utilities involved in the generation and transmission of electrical power.

The dominant factor in the area in terms of energy transmission is Bonneville; it has over 12,000 miles of transmission facilities in the Pacific Northwest representing about 80 percent of the bulk power transmission capacity in that region. Bonneville is generally described as the leading force promoting coordination and joint planning with respect to electrical power. Bonneville markets power to 149 customers in the region.

In the Pacific Northwest, five private utilities (including PSP&L, PP&L, and WWPC), 110 publicly-owned agencies, WPPSS and Bonneville have formed the Joint Power Planning Council to coordinate planning for existing and future thermal and hydroelectric resources for the region. The area includes the States of Washington, Oregon, and portions of northern California, Idaho and Montana. The Joint Power Planning Council has developed the Hydro Thermal Power Program plan for power generation to meet the area's anticipated load growth.

RESULTS OF ANTITRUST REVIEW

With one exception, our study of this application did not indicate any antitrust problems. The only matter requiring exploration pertained to allegations that the City of Tacoma, Washington, which may be receiving some of the power generated by this project because of its membership in WPPSS, was refusing to wheel power from Bonneville to five utilities who were, at one time, served by Tacoma. These five utilities are members of the Pierce County Cooperative Power Association (PCCPA). Many of the details concerning this controversy were presented to the United States Senate Committee on Appropriations on May 21, 1973, and can be found in Senate Hearings for the Committee on Appropriations on H.R. 8947, Public Works for Water and Power Development and Atomic Energy Commission Appropriations, Fiscal Year 1974, 93rd Congress, 1st Session, Part 6, at pages 7, 175-7, 194.

We advised the Commission on January 29, 1975, in our advice letter on WPPSS Nuclear Project Number 3, that negotiations between the PCCPA group and Tacoma for transmission service from Bonneville to the PCCPA group have been concluded, and since July 1, 1974, power from Bonneville has been wheeled over Tacoma facilities to the PCCPA group in accordance with an agreement between them. This agreement is subject to approval by the Tacoma City Council. On the same assumption as stated in the January 29, 1975 letter, namely, that the Tacoma City Council will approve the transmission agreement in the near future, we conclude that an antitrust hearing will not be necessary with respect to the instant application.

[FR Doc.75-8941 Filed 4-7-75;8:45 am]

[Docket Nos. 50-518A, 50-519A, 50-520A, and 50-521A]

TENNESSEE VALLEY AUTHORITY

Receipt of Attorney General's Advice and Time for Filing of Petitions To Intervene on Antitrust Matters

The Commission has received, pursuant to section 105c of the Atomic Energy Act of 1954, as amended, the following advice from the Attorney General of the United States, dated March 24, 1975:

"You have requested our advice pursuant to section 105 of the Atomic Energy Commission Act of 1954, as amended, in regard to the above-captioned application. The Hartsville Plant will consist of four 1,200 MW units, the first of which is scheduled for operation in September, 1980, with the final one scheduled to begin operation in 1983. The total estimated cost of the project will approach $2 billion.

"On December 11, 1972 the Department of Justice rendered antitrust advice to the Commission regarding Tennessee Valley Authority's application for construction permits for its proposed Watts Bar Nuclear Plant. On December 17, 1973 we rendered advice in connection with TVA's Bellefonte Plant. We have examined the information submitted by applicant in connection with the present application, as well as other pertinent information with respect to applicant's competitive relationships which has become available during the past year. None of the foregoing information provides any basis for changing the conclusions which we set forth with regard to the Watts Bar and Bellefonte applications. Our conclusion therefore is that, so far as we are aware, there are no antitrust problems which would require a hearing by your Commission on the instant application."

Any person whose interest may be affected by this proceeding may, pursuant to § 2.714 of the Commission's "rules of practice," 10 CFR Part 2, file a petition for leave to intervene and request a hearing on the antitrust aspects of the application. Petitions for leave to intervene and requests for hearing shall be filed by May 8, 1975 either (1) by delivery to the NRC Public Docketing and Service Section at 1717 H Street NW., Washington, D.C., or (2) by mail or telegram addressed to the Secretary, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, ATTN: Docketing and Service Section.

ABRAHAM BRAITMAN,
Chief, Office of Antitrust & Indemnity, Nuclear Reactor Regulation.

NATIONAL SCIENCE FOUNDATION

ADVISORY PANEL FOR PHYSICS

Open Meeting

The National Science Foundation announces that a meeting of the Advisory Panel for Physics will be held on April 24–26, 1975, at 9 a.m., at 1800 G Street, NW., Washington, D.C. Room numbers are included below in the agenda. This notice is given in accordance with the Federal Advisory Committee Act (Pub. L. 92–463).

The purpose of the Panel is to provide general advice and recommendations on the impact of NSF support of physics, and to review and evaluate specific proposals in Physics.

APRIL 24 ROOM 543

Review of the Atomic; Molecular, and Plasma Physics Programs of the Foundation, with consideration of the national perspective in these areas.

APRIL 25 AND 26 ROOM 540

Remarks and presentation by NSF staff members on:
(1) NSF FY 1976 Budget
(2) Helium Recovery
(3) Funding Pressures Due to Changes in Other Agencies
(4) Panel Discussions of Funding of Research Instruments and Research Institutes

This meeting will be open to the public. Individuals who wish to attend or would like more information about this Panel should contact Dr. Marcel Bardon, Section Head, Physics Section, Room 348, National Science Foundation, Washington, D.C. 20550, telephone 632–4310. Summary minutes of this meeting may be obtained from the Committee Management Coordination Staff, MAO, Room 248, National Science Foundation, Washington, D.C. 20550.

Dated: April 3, 1975.

FRED K. MURAKAMI,
Committee Management Officer.

[FR Doc.75-9079 Filed 4-7-75;8:45 am]

OFFICE OF MANAGEMENT AND BUDGET

CLEARANCE OF REPORTS

List of Requests

The following is a list of requests for clearance of reports intended for use in collecting information from the public received by the Office of Management and Budget on April 2, 1975 (44 U.S.C. 3509). The purpose of publishing this list in the FEDERAL REGISTER is to inform the public.

The list includes the title of each request received; the name of the agency sponsoring the proposed collection of information; the agency form number(s), if applicable; the frequency with which the information is proposed to be collected; the name of the reviewer or reviewing division within OMB, and an indication of who will be the respondents to the proposed collection.

The symbol (X) identifies proposals which appear to raise no significant issues, and are to be approved after brief notice through this release.

Further information about the items on this daily list may be obtained from the Clearance Office, Office of Management and Budget, Washington, D.C. 20503 (202–395–4529), or from the reviewer listed.

NEW FORMS

ACTION

Grantee Project Director Interview Guide, single-time, grantees and project directors of 18 senior companion programs, Community and Veterans Affairs Division, 395–3532.

DEPARTMENT OF AGRICULTURE

Statistical Reporting Service, April 1975 Farm Grain Stocks Quality Control Survey, single-time, grain producers, Hulett, D. T., 395–4730.

DEPARTMENT OF COMMERCE

Bureau of the Census:
FAA General Aviation Survey, S–331, S–331 (L), single-time, general, aviation aircraft owners, Strasser, A., 395–3880.
Treasury—Asset Depreciation Study, TAD–1, single-time, manufacturing establishments, Hulett, D. T., 395–4730.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Health Resources Administration, Physician's Associates' Careers, HRABHRD1125, on occasion, physician's associate students and graduates, Strasser, A., 395–3880.

SELECTIVE SERVICE SYSTEM

REGISTRANTS PROCESSING MANUAL

Suspension of Registration

The Registrants Processing Manual is an internal manual of the Selective Service System. The following portions of that manual are considered to be of sufficient interest to warrant publication in the FEDERAL REGISTER:

Temporary Instruction No. 613-9/642-8—Suspension of Registration.

BYRON V. PEPITONE, *Director.*

APRIL 3, 1975.

TEMPORARY INSTRUCTION No. 613-9/642-8

Issued: April 1, 1975.

Subject: Suspension of Registration.

On March 29, 1975, the President issued Proclamation 4360, which revokes all former Proclamations providing procedures for registration under the Military Selective Service Act, and terminates current Selective Service registration procedures. In accordance with this Presidential proclamation, the Selective Service System will cease registration effective midnight April 1, 1975.

Any Registration Cards (SSS Form 1 or SSS Form 1-Mailer) completed and received on or before April 1, 1975 shall be processed. If the registration was a late registration, it shall be processed in accord with Chapter 642, RPM.

Any Registration Card which is not completed and received on or before April 1, 1975 shall not be processed. The applicant for registration shall be notified by letter that he is not registered, and shall be notified how he shall proceed to register at some future time (see Attachment 1, T.I. 613-9/642-8, for sample letter).

During the period when registration procedures are suspended, a person who failed to register timely prior to April 1, 1975, and for whom a registration card is received, may still be considered a violator. If such a person attempts to register, he shall be notified that he may be considered a violator (see Attachment 2, T.I. 613-9/642-8, for sample letter).

Although no further registrations are to be processed, violators who, prior to April 1, 1975, failed to register timely and who are later identified as having failed to register, shall be processed in accord with Chapter 642, RPM in the same manner as if they were late registrants who registered on April 1, 1975, except that Attachment 2, T.I. 613-9/642-8, or Attachment 3, T.I. 613-9/642-8, sample letter shall be used as appropriate in place of Attachment 642-1, the use of which is no longer authorized.

In the future, when a person attempts to register and he is in violation of the Act, he should be given the opportunity to complete a statement as to the reasons he failed to register in a timely manner. If he does not complete such a statement, the employee whom he contacted to register shall complete and sign a Report of Information (SSS Form 119). The signed statement or the SSS Form 119 shall be submitted to the local board having jurisdiction over his place of residence for determination as to his failure to register in a timely manner. Further processing will be accomplished in the same manner as for a late registrant.

The Presidential proclamation does not terminate the individual's duty to register, but changes the procedures by which registration is accomplished. It is anticipated that a future Presidential proclamation will provide new registration procedures.

Section 642.10(1) of the RPM is suspended.

This temporary instruction will remain in effect until rescinded.

BYRON V. PEPITONE, *Director.*

[LOCAL BOARD STAMP]

Date of Mailing: ------

To: ----------

(Address)

DEAR ——: Continuous registration for Selective Service has been suspended as of April 1, 1975, by Presidential proclamation. Since your registration card was not completed and received by that date, it will not be processed. You are not registered with the Selective Service System. It is anticipated that the President will announce by a future Proclamation an annual registration, at which time instructions for you and all other unregistered young men born in 1957 or prior years will be issued.

Sincerely,

——— ———,
Authorized Signature.

(Address)

DEAR ——: Continuous registration for Selective Service has been suspended as of April 1, 1975, by Presidential Proclamation. Since your Registration Card was not completed and received by that date you are not registered. It is anticipated that the President will announce by a future proclamation an annual registration, at which time instructions for you and all other unregistered young men born in 1957 or prior years will be issued.

Since you had failed to register when required prior to April 1, 1975, it appears that you may be in violation of the law.

You are entitled to present any information to your local board which will explain the reason for your failure to register in a timely manner but you are not required to do so. If you wish to, you may write the information below, and return this letter to your local board within 15 days of the above date in the enclosed pre-addressed envelope which requires no postage.

——— ———,
Authorized Signature.

Enclosure.

Reason(s) for Late Registration: (Use reverse side if additional space is required).

——— ———,
Signature of Registrant.

INTERSTATE COMMERCE COMMISSION

IRREGULAR-ROUTE MOTOR COMMON CARRIERS OF PROPERTY

Elimination of Gateway Letter Notices

APRIL 2, 1975.

The following letter-notices of proposals to eliminate gateways for the purpose of reducing highway congestion, alleviating air and noise pollution, minimizing safety hazards, and conserving fuel have been filed with the Interstate Commerce Commission under the Commission's gateway elimination rules (49 CFR, 1065), and notice thereof to all interested persons is hereby given as provided in such rules.

An original and two copies of protests against the proposed elimination of any gateway herein described may be filed with the Interstate Commerce Commission on or before April 18, 1975. A copy must also be served upon applicant or its representative. Protests against the elimination of a gateway will not operate to stay commencement of the proposed operation.

Successively filed letter-notices of the same carrier under these rules will be numbered consecutively for convenience in identification. Protests, if any, must refer to such letter-notices by number.

No. MC 107064 (Sub-No. E7) (Correction), filed May 21, 1974, published in the FEDERAL REGISTER January 16, 1975. Applicant: STEERE TANK LINES, INC., P.O. Box 2298, Dallas, Tex. 75221. Applicant's representative: H. L. Rice, Jr. (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Petroleum products*, in bulk, in tank vehicles, from points in that part of Texas on, south, and west of a line beginning at the Texas-New Mexico State line, thence along U.S. Highway 70 to junction U.S. Highway 83, thence along U.S. Highway 83 to the International Boundary line between the United States and Mexico (except points in El Paso County, Tex., to points in Washington). The purpose of this filing is to eliminate the gateway of Ector County, Tex. The purpose of this correction is to expand the territorial description.

No. MC 107064 (Sub-No. E18) (Correction), filed May 21, 1974, published in the FEDERAL REGISTER February 13, 1975. Applicant: STEERE TANK LINES, INC., P.O. Box 2998, Dallas, Tex. 75221. Applicant's representative: H. L. Rice, Jr. (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Petroleum products*, in bulk, in tank vehicles, from points in that part of Texas in and west of Bailey, Lamb, Crosby, Garza, Scurry, Mitchell, Coke, Tom Green, Schleicher, Sutton, and Val Verde Counties, Tex., to points in Indiana. The purpose of this filing is to eliminate the gateway of any point in Ector County, Tex. The purpose of this correction is to include Crosby in the origin points.

No. MC 107515 (Sub-No. E576), filed January 27, 1975. Applicant: REFRIGERATED TRANSPORT CO., INC., P.O. Box 308, Forest Park, Ga. 33050. Applicant's representative: R. M. Tettlebaum, Suite 375, 3379 Peachtree Rd. NE., Atlanta, Ga. 30326. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen foods*, in vehicles equipped with mechanical refrigeration, (1) from points in the Lower Peninsula of Michigan to points in California, Nevada, Arizona, and New Mexico, and Curry, Josephine, Jackson, and Klamath Counties, Oreg., (2) from points in Michigan on and south of Michigan Highway 55 to points in Oregon and Washington, (3) from points in Michigan on, east, or south of a line beginning at the Indiana-Michigan State line and extending along Michigan Highway 66 to junction Michigan Highway 55, thence along Michigan Highway 55 to Lake Huron to points in Idaho. The purpose of this filing is to eliminate the gateway of Columbus, Ohio.

No. MC 109124 (Sub-No. E3) (Correction), filed May 13, 1974, published in the FEDERAL REGISTER March 3, 1975. Applicant: SENTLE TRUCKING CORPORATION, 210 Alexis Rd., P.O. Box 6538, Toledo, Ohio 43612. Applicant's representative: Marc Gilmore (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Hot rolled steel products, cold finished steel products, coil steel, and iron or steel plates and sheets*, from points in Allegheny, Beaver, Cambria, Westmoreland, Indiana, Lawrence, Armstrong, Butler, and Mercer Counties, Pa., to points in Illinois, except those points east and south of a line beginning at the Illinois-Indiana State line, and extending along Interstate Highway 70 to junction Interstate Highway 57, thence along Interstate Highway 57 to the Mississippi River (Alliquippa, Pa., and Portage, Ind.) *; (2) *Hot rolled steel products, cold finished steel products, coil steel, and iron or steel plates and sheets*, from points in Erie, Crawford, Venango, Clarion, Butler, Mercer, Armstrong, Beaver, Allegheny, Cambria, and Westmoreland Counties, Pa., to Follansbee, W. Va. (Aliquippa, Pa., and Pittsburgh, Pa.) *; and (3) *Iron or steel plates, pipe, wire, sheets, rods, bars, stampings, billets, and castings, and coil steel*, from points in Erie, Crawford, Warren, Forrest, Venango, Mercer, Jefferson, Clarion, Butler, Lawrence, Armstrong, Indiana, Allegheny, and Westmoreland Counties, Pa., to Charleston and Wheeling, W. Va. (Brackenridge, Pa.) *. The purpose of this filing is to eliminate the gateways indicated by asterisks above. The purpose of this correction is to include (2) and (3) above.

No. MC 110817 (Sub-No. E43), filed May 13, 1974. Applicant: E. L. FARMER & COMPANY, Odessa, Tex. Applicant's representative: James W. Hightower, 136 Wynnewood Professional Bldg., Dallas, Tex. 75224. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Machinery, materials, supplies and equipment*, incidental to, or used in, the construction, development, operation, and maintenance of facilities for the discovery, development, and production of natural gas and petroleum; (2) *earth drilling machinery and equipment*, and *machinery, equipment, materials, supplies and pipe* incidental to, used in, or in connection with (a) the transportation, installation, removal, operation, repair, servicing, maintenance, and dismantling of drilling machinery and equipment; (b) the completion of holes or wells drilled; (c) the production, storage, and transmission of commodities resulting from drilling operations at well or hole sites; and (d) the injection or removal of commodities to or from holes or wells; (3) *machinery, equipment, materials, and supplies*, used in, or in connection with the construction, operation, repair, servicing, maintenance, and dismantling of pipelines, other than pipelines used for the transmission of natural gas, petroleum, their products and by-products, water, or sewerage, restricted to the transportation of shipments moving to or from pipelines rights-of-way, between points in Tennessee, on the one hand, and, on the other, points in Colorado. The purpose of this filing is to eliminate the gateways of any points in Texas or Oklahoma.

No. MC 110817 (Sub-No. E47), filed May 13, 1974. Applicant: E. L. FARMER & COMPANY, Odessa, Tex. Applicant's representative: James W. Hightower, 136 Wynnewood Professional Bldg., Dallas, Tex. 75224. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Machinery, equipment, materials, and supplies*, used in, or in connection with the discovery, development, production, refining, manufacture, processing, storage, transmission, and distribution of natural gas and petroleum and their products and byproducts; and *machinery, equipment, materials, and supplies* used in, or in connection with the construction, operation, repair, servicing, maintenance, and dismantling of pipelines (including the stringing and picking up thereof), (2) *Earth drilling machinery and equipment, and machinery, equipment, materials, supplies and pipe* incidental to, used in, or in connection with (a) the transportation, installation, removal, operation, repair, servicing, maintenance, and dismantling of drilling machinery and equipment; (b) the completion of holes or wells drilled; (c) the production, storage, and transmission of commodities resulting from drilling operations at well or hole sites; and (d) the injection or removal of commodities to or from holes or wells.

(3) *Machinery, equipment, materials, and supplies* used in or in connection with the construction, operation, repair, servicing, maintenance, and dismantling of pipelines, other than pipelines used

for the transmission of natural gas, petroleum, their products and byproducts, water, or sewerage, restricted to the transportation of shipments moving to or from pipeline rights-of-way; (4) *Machinery, equipment, materials, and supplies* used in connection with the construction, operation, repair, servicing, maintenance, and dismantling of pipelines for the transportation of water and sewerage, including the stringing and and picking up of pipe, between points in Louisiana, on the one hand, and, on the other, points in Arizona. Restriction: The operations authorized herein are restricted to the transportation of traffic originating at or destined to pipeline rights-of-way. The purpose of this filing is to eliminate the gateway of any point in Texas.

No. MC 110817 (Sub-No. E48), filed May 13, 1974. Applicant: E. L. FARMER & COMPANY, Odessa, Tex. Applicant's representative: James W. Hightower, 136 Wynnewood Professional Bldg., Dallas, Tex. 75224. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Machinery, equipment, materials, and supplies* used in, or in connection with the discovery, development, production, refining, manufacture, processing, storage, transmission, and distribution of natural gas and petroleum and their products and byproducts; and *machinery, equipment, materials, and supplies* used in, or in connection with the construction, operation, repair, servicing, maintenance, and dismantling of pipelines (including the stringing and picking up thereof), (2) *Earth drilling machinery and equipment, and machinery, equipment, materials, supplies and pipe* incidental to, used in, or in connection with (a) the transportation, installation, removal, operation, repair, servicing, maintenance, and dismantling of drilling machinery and equipment; (b) the completion of holes or wells drilled; (c) the production, storage, and transmission of commodities resulting from drilling operations at well or hole sites; and (d) the injection or removal of commodities to or from holes or wells; (3) *Machinery, equipment, materials, and supplies* used in or in connection with the construction, operation, repair, servicing, maintenance, and dismantling of pipelines, other than pipelines used for the transmission of natural gas, petroleum, their products and byproducts, water, or sewerage, restricted to the transportation of shipments moving to or from pipeline rights-of-way, between points in Florida, on the one hnad, and, on the other, points in Arizona. The purpose of this filing is to eliminate the gateway of any point in Texas.

No. MC 110817 (Sub-No. E54), filed May 13, 1974. Applicant: E. L. FARMER & COMPANY, Odessa, Tex. Applicant's representative: James W. Hightower, 136 Wynnewood Professional Bldg., Dallas, Tex 75224. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Machinery, materials, supplies*, and *equipment*, incidental to, or used in, the construction, development, operation, and maintenance of facilities for the discovery, development, and production of natural gas and petroleum (except the picking up or stringing of pipe in connection with main or trunk pipelines); (2) *Earth drilling machinery* and *equipment*, and *machinery, equipment, materials, supplies, and pipe*, incidental to, used in, or in connection with (a) the transportation, installation, removal, operation, repair, servicing, maintenance, and dismantling of drilling machinery and equipment; (b) the completion of holes or wells drilled, (c) the production, storage, and transmission of commodities resulting from drilling operations at well or hole sites, and (d) the injection or removal of commodities to or from holes or wells; and (3) *Machinery, equipment, materials, and supplies* used in or in connection with the construction, operation, repair, servicing, maintenance, and dismantling of pipelines, other than pipelines used for the transmission of natural gas, petroleum, their products and by-products, water, or sewerage, restricted to the transportation of shipments moving to or from pipeline rights-of-way, between points in that part of Mississippi on, west, and south of a line beginning at the Mississippi-Tennessee State line, thence along Mississippi Highway 15 to junction Mississippi Highway 41, thence along Mississippi Highway 41 to junction U.S. Highway 278, thence along U.S. Highway 278 to the Mississippi-Alabama State line, on the one hand, and, on the other, points in Kansas. The purpose of this filing is to eliminate the gateway of any point in Oklahoma.

No. MC 110817 (Sub-No. E52), filed May 13, 1974. Applicant: E. L. FARMER & COMPANY, Odessa, Tex. Applicant's representative: James W. Hightower, 136 Wynnewood Professional Bldg., Dallas, Tex. 75224. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Machinery*, materials, supplies, and equipment, incidental to, or used in, the construction, development, operation, and maintenance of facilities for the discovery, development, and production of natural gas and petroleum (except the picking up or stringing of pipe in connection with main or trunk pipelines); (2) *Earth drilling machinery* and *equipment*, and *machinery, equipment*, materials, supplies, and pipe incidental to, used in, or in connection with (a) the transportation, installation, removal, operation, repair, servicing, maintenance, and dismantling of drilling machinery and equipment, (b) the completion of holes or wells drilled, (c) the production, storage, and transmission of commodities resulting from drilling operations at well or hole sites; and (3) *Machinery, equipment, materials, and supplies* used in or in connection with the construction, operation, repair, servicing, maintenance, and dismantling of pipelines, other than pipelines used for the transmission of natural gas, petroleum, their products and by-products, water, or sewerage, restricted to the transportation of shipments moving to or from pipeline rights-of-way, between points in that part of Missouri on, south, and east of a line beginning at the Missouri-Kansas State line, thence along Missouri Highway 116 to junction U.S. Highway 69, thence along U.S. Highway 69 to the Missouri-Iowa State line, on the one hand, and, on the other, points in Utah. The purpose of this filing is to eliminate the gateway of any point in Oklahoma.

No. MC 110817 (Sub-No. E59), filed May 13, 1974. Applicant: E. L. FARMER & COMPANY, Odessa, Tex. Applicant's representative: James W. Hightower, 136 Wynnewood Professional Bldg., Dallas, Tex. 75224. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Machinery, materials, supplies*, and *equipment*, incidental to, or used in, the construction, development, operation, and maintenance of facilities for the discovery, development, and production of natural gas and petroleum (except the picking up or stringing of pipe in connection with main or trunk pipe

lines); (2) *Earth drilling machinery and equipment*, and *machinery, equipment, materials, supplies*, and pipe incidental to, used in, or in connection with (a) the transportation, installation, removal, operation, repair, servicing, maintenance, and dismantling of drilling machinery and equipment, (b) the completion of holes or wells drilled, (c) the production, storage, and transmission of commodities resulting from drilling operations at well or hole sites, and (d) the injection or removal of commodities to or from holes or wells; and (3) *Machinery, equipment, materials*, and *supplies* used in or in connection with the construction, operation, repair, servicing, maintenance, and dismantling of pipelines, other than pipelines used for the transmission of natural gas, petroleum, their products, and by-products, water, or sewerage, restricted to the transportation of shipments moving to or from pipeline rights of way, between points in that part of Missouri on and south of a line beginning at the Missouri-Kansas State line, thence along Missouri Highway 150 to junction U.S. Highway 50, thence along U.S. Highway 50 to junction U.S. Highway 54, thence along U.S. Highway 54 to the Missouri-Illinois State line, on the one hand, and, on the other, points in Colorado. The purpose of this filing is to eliminate the gateway of any point in Oklahoma.

No. MC 110617 (Sub-No. E60), filed May 13, 1974. Applicant: E. L. FARMER & COMPANY, Odessa, Tex. Applicant's representative: James W. Hightower, 136 Wynnewood Professional Bldg., Dallas, Tex. 75224. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Machinery, materials, supplies*, and *equipment*, incidental to, or used in, the construction, development, operation, and maintenance, of facilities for the discovery, development, and production of natural gas and petroleum (except the picking up or stringing of pipe in connection with main or trunk pipelines); (2) *Earth drilling machinery and equipment*, and *machinery, equipment, materials supplies*, and pipe incidental to, used in, or in connection with (a) the transportation, installation, removal, operation, repair, servicing, maintenance, and dismantling of drilling machinery and equipment, (b) the completion of holes or wells drilled, (c) the production, storage, and transmission of commodities resulting from drilling operations at well or hole sites, and (d) the injection or removal of commodities to or from holes or wells; (3) *Machinery, equipment, materials*, and *supplies* used in or in connection with the construction, operation, repair, servicing, maintenance, and dismantling of pipelines, other than pipelines used for the transmission of natural gas, petroleum, their products and by-products, water, or sewerage, restricted to the transportation of shipments moving to or from pipeline rights-of-way; and (4) *Machinery, equipment, materials*, and *supplies* used in connection with the construction, operation, repair, servicing, maintenance, and dismantling of pipelines for the transportation of water and sewerage, including the stringing and picking up of pipe, restricted to the transportation of traffic originating at or destined to pipeline rights-of-way, between points in that part of Kansas on and west of a line beginning at the Kansas-Nebraska State line, thence along U.S. Highway 75 to junction Kansas Highway 47, thence along Kansas Highway 47 to junction U.S. Highway 169, thence along U.S. Highway 169 to the Kansas-Oklahoma State line, on the one hand, and, on the other, points in Arkansas. The purpose of this filing is to eliminate the gateway of any point in Oklahoma.

No. MC 110617 (Sub-No. E62), filed May 13, 1974. Applicant: E. L. FARMER & COMPANY, Odessa, Tex. Applicant's representative: James W. Hightower, 136 Wynnewood Professional Bldg., Dallas, Tex. 75224. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: (1) *Machinery, materials, supplies*, and *equipment*, incidental to, or used in, the construction, development, operation, and maintenance of facilities for the discovery, development, and production of natural gas, and petroleum (except the picking up or stringing of pipe in connection with main or trunk pipelines); (2) *Earth drilling machinery and equipment*, and *machinery, equipment, materials, supplies*, and *pipe* incidental to, used in, or in connection with (a) the transportation, installation, removal, operation, repair, servicing, maintenance, and dismantling of drilling machinery and equipment, (b) the completion of holes or wells drilled, (c) the production, storage, and transmission of commodities resulting from drilling operations at well or hole sites, and (d) the injection or removal of commodities to or from holes or wells; (3) *Machinery, equipment, materials*, and *supplies* used in or in connection with the construction, operation, repair, servicing, maintenance, and dismantling of pipelines, other than pipelines used for the transmission of natural gas, petroleum, their products and byproducts, water, or sewerage, restricted to the transportation of shipments moving to or from pipeline rights of way; and

(4) *Machinery, equipment, materials*, and *supplies* used in connection with the construction, operation, repair, servicing, maintenance, and dismantling of pipelines for the transportation of water and sewage, including the stringing and picking up of pipe, restricted to the transportation of traffic originating at or destined to pipeline rights-of-way, between points in that part of Montana on and east of a line beginning at the International Boundary line between the United States and Canada, thence along Montana Highway 232 to junction U.S. Highway 87, thence along U.S. Highway 87 to junction Montana Highway 230, thence along Montana Highway 230 to junction U.S. Highway 87, thence along U.S. Highway 87 to junction U.S. Highway 191, thence along U.S. Highway 191 to junction Interstate Highway 90, thence along Interstate Highway 90 to junction U.S. Highway 89, thence along U.S. Highway 89 to the Montana-Wyoming State line, on the one hand, and, on the other, points in New Mexico (except points in Valencia, McKinley, San Juan, Rio Arriba, Taos, Colfax, and Union Counties). The purpose of this filing is to eliminate the gateway of any point in Texas.

No. MC 111401 (Sub-No. E58), filed May 12, 1974. Applicant: GROENDYKE TRANSPORT, INC., P.O. Box 632, Enid, Okla. 73701. Applicant's representative: Victor R. Comstock (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Petroleum products* (except lubricating oils), in bulk, in tank vehicles, (1) from points in Texas on and east of U.S. Highway 83, and on and

north of U.S. Highway 290, and on and west of Interstate Highway 35 to points in Kentucky and Tennessee, restricted against the transportation of liquid wax, from Tulsa, Okla., to points in Kentucky and Tennessee, (2) from points in Texas on and north of U.S. Highway 66 to points in Alabama, Kentucky, Louisiana, Mississippi, and Tennessee, restricted against the transportation of liquid wax, from Tulsa, Okla., to points in Kentucky and Tennessee, and liquefied petroleum gas and natural gasoline to points in Mississippi. The purpose of this filing is to eliminate the gateways of Ardmore, Cleveland, Cushing, Duncan, Tulsa, and Wynnewood, Okla.

No. MC 111401 (Sub-No. E59), filed May 12, 1974. Applicant: GROENDYKE TRANSPORT, INC., P.O. Box 632, Enid, Okla. 73701. Applicant's representative: Victor R. Comstock (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Liquid petrochemicals*, in bulk, in tank vehicles, from points in Colorado on and south of U.S. Highway 160 and on and west of Interstate Highway 25 to points in Kentucky, Louisiana, Missouri, Indiana, Ohio, Demopolis, Ala., and Chicago and Ringwood, Ill. The purpose of this filing is to eliminate the gateway of Kings Mill, Tex.

No. MC 111401 (Sub-No. E60), filed May 12, 1974. Applicant: GROENDYKE TRANSPORT, INC., P.O. Box 632, Enid, Okla. 73701. Applicant's representative: Victor R. Comstock (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Petroleum products*, in bulk, in tank vehicles, from points in Oklahoma on and east of U.S. Highway 81 and on and south of Interstate Highway 40 to points in Utah and Nevada. The purpose of this filing is to eliminate the gateway of Wynnewood, Okla.

No. MC 11401 (Sub-No. E62), filed May 12, 1974. Applicant: GROENDYKE TRANSPORT, INC., P.O. Box 632, Enid, Okla. 73701. Applicant's representative: Victor R. Comstock (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Lubricating oils*, in bulk, in tank vehicles, from points in Oklahoma located on and east of U.S. Highway 81 to points in California, Nevada, Oregon, and Washington. The purpose of this filing is to eliminate the gateway of Ft. Worth, Tex.

No. MC 111401 (Sub-No. E64), filed May 12, 1974. Applicant: GROENDYKE TRANSPORT, INC., P.O. Box 632, Enid, Okla. 73701. Applicant's representative: Victor R. Comstock (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Petroleum products*, as described in Appendix XIII to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209, in bulk, in tank vehicles, from points in Texas on and east of Interstate Highway 35 and on and north of Interstate Highway 20 to points in Arizona. The purpose of this filing is to eliminate the gateway of Sunray, Okla.

No. MC 111401 (Sub-No. E67), filed May 14, 1974. Applicant: GROENDYKE TRANSPORT, INC., P.O. Box 632, Enid, Okla. 73701. Applicant's representative: Victor R. Comstock (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Lubricating oil*, in bulk, in tank-vehicles, (1) from points in Texas on and north of U.S. Highway 66 to points in Alabama, Kentucky, Mississippi, Tennessee, Utah, and Wyoming, (2) from points in Texas on and east of U.S. Highway 83 to points in Tennessee, Kentucky, Utah, and Wyoming, (3) from points in Texas on and east of U.S. Highway 83 and on and north of Interstate Highway 20 to points in Alabama. The purpose of this filing is to eliminate the gateway of Oklahoma.

No. MC 111496 (Sub-No. E1) (Correction), filed June 4, 1974, published in the FEDERAL REGISTER February 10, 1975. Applicant: TWIN CITY FREIGHT, INC., 2550 Long Lake Road, Roseville, Minnesota 55113. Applicant's representative: R. E. Caturia (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities*, except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and commodities requiring special equipment, between Fargo, N. Dak., on the one hand, and, on the other, those points in North Dakota on and north of North Dakota Highway 5. The purpose of this filing is to eliminate the gateway of points in Walsh County,. N. Dak. The purpose of this filing is to correct the territorial description.

No. MC 111496 (Sub-No. E2) (Correction), filed June 4, 1974, published in the FEDERAL REGISTER February 6, 1975. Applicant: TWIN CITY FREIGHT, INC., 2550 Long Lake Road, Roseville, Minnesota 55113. Applicant's representative: R. E. Caturia (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities*, except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and commodities requiring special equipment. (1) between Grand Forks, N. Dak., on the one hand, and, on the other, those points in North Dakota on and north of North Dakota Highway 5, (2) between Minot, N. Dak., on the one hand, and, on the other, in North Dakota which are both on and north of North Dakota Highway 5 and on and east of North Dakota Highway 20. The purpose of this filing is to eliminate the gateways of points in Walsh County, N. Dak. The purpose of this filing is to correct the territorial descriptions.

No. MC 111496 (Sub-No. E3), (Correction) filed June 4, 1974, published in the FEDERAL REGISTER February 6, 1975. Applicant: TWIN CITY FREIGHT, INC., 2550 Long Lake Road, Roseville, Minnesota 55113. Applicant's representative: R. E. Caturia (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities*, except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and commodities requiring special equipment, (1) between Williston, N. Dak., on the one hand, and, on the other, those points in North Dakota which are both on and north of North Dakota Highway 5 and on and east of North Dakota Highway 20 (points in Walsh County, N. Dak.)*, (2) between points in Norman County, Minn., on the one hand, and, on the other, those points in North Dakota which are on and north of North Dakota Highway 5 (Fargo, and points in Walsh County, N. Dak.)*. The purpose of this filing is to eliminate the gateways indicated by asterisks above. The purpose of this filing is to correct the territorial destination descriptions.

No. MC 111496 (Sub-No. E4) (Correction), filed June 4, 1974, published in the FEDERAL REGISTER February 12, 1975. Applicant: TWIN CITY FREIGHT, INC., 2550 Long Lake Road, Roseville, Minn. 55113. Applicant's representative: R. E. Caturia (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities*, except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, livestock, commodities in bulk, commodities requiring special equipment, and those injurious or contaminating to other lading, (1) between points in Clay County, Minn., on the one hand, and, on the other, those points in North Dakota on and north of North Dakota Highway 5, (2) between points in Wilkin County, Minn., on the one hand, and, on the other, those points in North Dakota on and north of North Dakota Highway 5. The purpose of this filing is to eliminate the gateways of Fargo, and points in Walsh County, N. Dak. The purpose of this filing is to correct the territorial destination descriptions.

No. MC 111496 (Sub-No. E5) (Correction), filed June 4, 1974, published in the FEDERAL REGISTER February 12, 1975. Applicant: TWIN CITY FREIGHT, INC., 2550 Long Lake Road, Roseville, Minn. 55113. Applicant's representative: R. E. Caturia (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities*, except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and commodities requiring special equipment, and those injurious or contaminating to other lading, between points in Becker and Otter-tail Counties, Minn., on the one hand, and, on the other, those points in North Dakota on and north of North Dakota Highway 5. The purpose of this filing is to eliminate the gateways of points in Fargo and Walsh Counties, N. Dak. The purpose of this filing is to correct the territorial destination descriptions.

Applicant's representative: Charles R. Dunford (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Chemicals and petroleum products*, in bulk, in tank vehicles, from Louisville, Ky., to points in West Virginia, restricted against any transportation to or from points in Indiana located within the Louisville, Ky., commercial zone. The purpose of this filing is to eliminate the gateway of Doe Run, Ky. The purpose of this correction is to reflect the correct "E" number, previously published as E11.

No. MC 112617 (Sub-No. E14) (Correction), filed May 11, 1974, published in the FEDERAL REGISTER February 18, 1975. Applicant: LIQUID TRANSPORTERS, INC., P.O. Box 21395, Louisville, Ky. 40221. Applicant's representative: Charles R. Dunford (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Chemicals and petroleum products*, in bulk, in tank vehicles, from Louisville, Ky., to points in Illinois, restricted against any transportation to or from points in Indiana located within the Louisville, Ky., commercial zone. The purpose of this filing is to eliminate the gateway of Doe Run, Ky. The purpose of this correction is to reflect the correct "E" number, previously published as E12.

No. MC 112617 (Sub-No. E19) (Correction), filed May 11, 1974, published in the FEDERAL REGISTER February 18, 1975. Applicant: LIQUID TRANSPORTERS, INC., P.O. Box 21295, Louisville, Ky. 40221. Applicant's representative: Charles R. Dunford (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Calcium carbide residue, fly ash, plastic granules, and* resin powder, in bulk, in tank vehicles, from Louisville, Ky., to points in Michigan and Wisconsin. The purpose of this filing is to eliminate the gateway of Seymour, Ind. The purpose of this correction is to reflect the correct "E" number, previously published as E13.

No. MC 112617 (Sub-No. E20) (Correction), filed May 11, 1974, published in the FEDERAL REGISTER February 18, 1975. Applicant: LIQUID TRANSPORTERS, INC., P.O. Box 21395, Louisville, Ky. 40221. Applicant's representative: Charles R. Dunford (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Chemical and petroleum products*, in bulk, in tank vehicles, from Louisville, Ky., to points in Ashtabula County, Ohio, restricted against any transportation to or from points in Indiana located within the Louisville, Ky., commercial zone. The purpose of this filing is to eliminate the gateway of Doe Run, Ky. The purpose of this correction is to reflect the correct "E" number, previously published as E14.

No. MC 112617 (Sub-No. E22) (Correction), filed May 11, 1974, published in the FEDERAL REGISTER February 18, 1975. Applicant: LIQUID TRANSPORTERS, INC., P.O. Box 21395, Louisville, Ky. 40221. Applicant's representative: Charles R. Dunford (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Petroleum products*, as described in Appendix XIII to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 (except petroleum products as described in Appendices XIV and XV to the *Descriptions* case, *supra*), in bulk, in tank vehicles, from points in Kentucky within 5 miles of Brandenburg (excluding Brandenburg and Ekron, Ky.), to points in Connecticut, Delaware, Massachusetts, New Hampshire, and New Jersey. The purpose of this filing is to eliminate the gateway of Seymour, Ind., and refineries at or near Leach, Ky. The purpose of this correction is to reflect the correct "E" number, previously published as E15.

No. MC 112617 (Sub-No. E23) (Correction), filed May 11, 1974, published

in the FEDERAL REGISTER February 18, 1975. Applicant: LIQUID TRANSPORTERS, INC., P.O. Box 21395, Louisville, Ky. 40221. Applicant's representative: Charles R. Dunford (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Petroleum products*, as described in Appendix XIII to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 (except petroleum products described in Appendices XIV and XV to the *Descriptions* case, *supra*), in bulk, in tank vehicles, from points in Kentucky within 5 miles of Brandenburg (except Brandenburg and Ekron, Ky.), to points in Rhode Island, Vermont, and those points in that part of New York on and east of a line beginning at the St. Lawrence River extending along Interstate Highway 81 to the New York-Pennsylvania State line. The purpose of this filing is to eliminate the gateway of Seymour, Ind., and refineries at or near Leach, Ky. The purpose of this correction is to reflect the correct "E" number, previously published as E16.

No. MC 112617 (Sub-No. E24) (Correction), filed May 11, 1974, published in the FEDERAL REGISTER February 18, 1975. Applicant: LIQUID TRANSPORTERS, INC., P.O. Box 21395, Louisville, Ky. 40221. Applicant's representative: Charles R. Dunford (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Liquid chemicals*, in bulk, in tank vehicles, from West Henderson, Ky., to points in Maryland, Pennsylvania, and West Virginia. The purpose of this filing is to eliminate the gateway of Doe Run, Ky. The purpose of this correction is to reflect the correct "E" number, previously published as E17.

No. MC 112668 (Sub-No. E1) (Correction), filed May 15, 1974, published in the FEDERAL REGISTER January 27, 1975. Applicant: HARVEY R. SHIPLEY & SONS, INC., Finksburg, Md. 21048. Applicant's representative: Norman E. Shipley (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Salt*, in bulk, from Retsof, N.Y., to points in the District of Columbia, and points in Fauquier, Fairfax, Loudon, and Prince William Counties, Va., points in Jefferson County, W. Va., and points in Maryland (except Baltimore and points in Garrett, Allegany, and Washington Counties). The purpose of this filing is to eliminate the gateway of Baltimore, Md. The purpose of this correction is to expand the destination territories.

No. MC 114019 (Sub-No. E279) (Correction), filed May 25, 1974, published in the FEDERAL REGISTER March 11, 1975. Applicant: MIDWEST EMERY FREIGHT SYSTEM, INC., 7000 S. Pulaski Rd., Chicago, Ill. 60629. Applicant's representative: Arthur J. Sibik (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meats, meat products* and *meat by-products*, and *articles* distributed by meat packinghouses, as described in Sections A and C of Appendix I to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766 (except commodities in bulk, in tank vehicles), from the facilities of Iowa Beef Packers, Inc., at or near Emporia, Kans., to Alcorn, Attala, Benton, Bolivar, Calhoun, Carroll, Chickasaw, Choctaw, Clay, Coahoma, DeSoto, Grenada, Hinds, Holmes, Humphreys, Issaquena, Itawamba, Kemper, LaFayette, Lauderdale, Leake, Lee, Leflore, Lowndes, Madison, Marshall, Monroe, Montgomery, Neshoba, Newton, Moxubee, Oktibbeha, Panola, Pontotoc, Prentiss, Quitman, Ranking, Scott, Sharkey, Sunflower, Tallahatchie, Tate, Tippah, Tishomingo, Tunica, Union, Warren, Washington, Webster, Winson, Yalobusha, and Yazoo Counties, Miss. Restriction: Restricted to shipments moving from, to, or between warehouses or other facilities of retail food and household supply and furnishings business houses, in peddle service. The purpose of this filing is to eliminate the gateway of Memphis, Tenn. The purpose of this correction is to correct the "E" number, previously published as E179.

No. MC 114019 (Sub-No. E369) (Correction), filed May 16, 1974, published in the FEDERAL REGISTER March 3, 1975. Applicant: MIDWEST EMERY FREIGHT SYSTEM, INC., 7000 S. Pulaski Rd., Chicago, Ill. 60629. Applicant's representative: Arthur J. Sibik (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Prepared foods*, other than frozen, from Rochester, N.Y., to Denver, Colo., and points in that part of Kansas on and east of U.S. Highway 281, and points in Missouri on and west of U.S. Highway 65. The purpose of this filing is to eliminate the gateways of Milan and Morrison, Ill. The purpose of this correction is to correct the "E" number, previously published as E319.

No. MC 114194 (Sub-No. E1), filed June 3, 1974. Applicant: KREIDER TRUCK SERVICE, INC., 8003 Collinsville Road, East St. Louis, Ill. 62201. Applicant's representative: A. Bruce Fraser (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1a) *Adhesives*, from the plantsite of H. B. Fuller Company at Kansas City, Kans., to points in that part of Kentucky located on and east of U.S. Highway 41 and to points in that part of Tennessee located on and east of U.S. Highway 41; (1b) *adhesives*, in bulk, from the plantsite of National Starch and Chemical Company, at Kansas City, Mo., to points in that part of Kentucky located on and east of U.S. Highway 41 and to points in that part of Tennessee located on and east of U.S. Highway 41; (2) *syrups and sweeteners*, in bulk, from Granite City, Ill., to points in Connecticut, Delaware, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont, West Virginia, and the District of Columbia; (3) *sugar*, in bulk, from St. Louis, Mo., to points in Connecticut, Delaware, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont, West Virginia, and the District of Columbia; (4) *glues and adhesives*, in bulk, from St. Louis, Mo., to points in Colorado; (5) *coloring syrup*, in bulk, from Granite City, Ill., to points in Massachusetts and Pennsylvania; (6) *sugar*, in bulk, from St. Louis, Mo., to points in Arizona, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, and Wyoming; (7) *flour*, in bulk, from Evansville and Mt. Vermon, Ind., to points in Kansas, Nebraska and Oklahoma; (8) *starch*, dry, in bulk, from Indianapolis, Ind., to points in Arizona, California, Colorado, Idaho, Kansas, Missouri, Montana, Nebraska, Nevada, New Mexico, Oklahoma, Oregon, Texas, Utah, Washington, and Wyoming. The purpose of this filing is to eliminate the gateways of (1a) St. Louis, Mo., (1b) that part of St. Louis Commercial Zone located in Granite City, Ill., (2) Edinburg, Ind., (3) Edinburg, Ind., (4) the plantsite of the H. B. Fuller Company at Kansas City, Kans., (5) Edinburg, Ind., (6) Keokuk, Iowa., (7) St. Louis, Mo., and (8) Granite City, Ill.

No. MC 114211 (Sub-No. E847), filed June 4, 1974. Applicant: WARREN TRANSPORT, INC., P.O. Box 420, Waterloo, Iowa 50704. Applicant's representative: Kenneth R. Nelson (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Cast iron pipe and fittings* and *accessories* therefor when moving with such pipe, from points in Minnesota, to points in Oklahoma and Texas, with no transportation for compensation on return except as otherwise authorized. The purpose of this filing is to eliminate the gateway of the plant site of the Griffin Pipe Company located at or near Council Bluffs, Iowa.

No. MC 114211 (Sub-No. E930), filed June 4, 1974. Applicant: WARREN TRANSPORT, INC., P.O. Box 420, Waterloo, Iowa 50704. Applicant's representative: Kenneth R. Nelson (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Tractors* (except those with vehicle beds, bed frames and fifth wheels), *equipment* designed for use in conjunction with tractors *and construction machinery and equipment*, from ports of entry between Edmunson, Maine, and Norfolk, Va., to points in Colorado, and to points in that part of South Dakota on and west of a line beginning at the Minnesota-South Dakota State line extending along U.S. Highway 212 to junction of South Dakota Highway 20, thence along South Dakota Highway 20 to junction U.S. Highway 281, thence along U.S. Highway 281 to the South Dakota-North Dakota State line, to points in that part of Nebraska on and west of a line beginning at the Iowa-Nebraska State line extending along Interstate Highway 80 to junction U.S. Highway 81, thence along U.S. Highway 81 to the Nebraska-Kansas State line, and to points in that part of Kan-

V 40168 APR 8 75 XUM

sas on and west of a line beginning at the Oklahoma-Kansas State line extending along U.S. Highway 281 to junction with Kansas Highway 2, thence along Kansas Highway 2 to junction Interstate Highway 35, thence along Interstate Highway 35 to junction U.S. Highway 81, thence along U.S. Highway 81 to the Nebraska-Kansas State line, restricted to the transportation of commodities in foreign commerce. The purpose of this filing is to eliminate the gateway of Grand Island, Nebr.

No. MC 114211 (Sub-No. E931), filed June 4, 1974. Applicant: WARREN TRANSPORT, INC., P.O. Box 420, Waterloo, Iowa 50704. Applicant's representative: Kenneth R. Nelson (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Tractors*, with or without attachments, *tractor attachments*, and *parts* of tractors and tractor attachments when moving in mixed loads with commodities specified above, between Port of Entry of Sweetgrass, Mont., on the one hand, and, on the other, points in that part of Kansas on and east of a line beginning at the Kansas-Oklahoma State line extending along U.S. Highway 281 to junction U.S. Highway 56, thence along U.S. Highway 56 to junction U.S. Highway 156, thence along U.S. Highway 156 to junction Kansas Highway 14, thence along Kansas Highway 14 to junction Kansas Highway 9, thence along Kansas Highway 9 to junction Kansas Highway 15, thence along Kansas Highway 15 to the Kansas-Nebraska State line; that part of Nebraska on and east of a line beginning at the Kansas-Nebraska State line extending along Nebraska Highway 15 to junction U.S. Highway 136, thence along U.S. Highway 136 to junction Nebraska Highway 50, thence along Nebraska Highway 50 to junction Nebraska Highway 2, thence along Nebraska Highway 2 to the Nebraska-Iowa State line; that part of Iowa on and south of a line beginning at the Nebraska-Iowa State line extending along Iowa Highway 2 to junction U.S. Highway 71.

Thence along U.S. Highway 71 to junction U.S. Highway 34, thence along U.S. Highway 34 to junction Interstate Highway 35, thence along Interstate Highway 35 to junction Interstate Highway 80, thence along Interstate Highway 80 to the Iowa-Illinois State line, and points in that part of Illinois on and south of a line beginning at the Iowa-Illinois State line extending along Interstate Highway 80 to junction Interstate Highway 74, thence along Interstate Highway 74 to junction Illinois Highway 17, thence along Illinois Highway 17 to junction Illinois Highway 114, thence along Illinois Highway 114 to the Illinois-Indiana State line, restricted to the transportation of commodities in foreign commerce. The purpose of this filing is to eliminate the gateway of Topeka, Kans.

No. MC 114211 (Sub-No. E932), filed June 4, 1974. Applicant: WARREN TRANSPORT, INC., P.O. Box 420, Waterloo, Iowa 50704. Applicant's representative: Kenneth R. Nelson (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Self-propelled tractors* and *attachments* and *parts* therefor when moving incidental to and in the same vehicle with tractors (not including tractors with vehicle beds, bed frames, or fifth wheels, nor any of the above-specified commodities which, because of their size or weight, require the use of special equipment) each weighing 15,000 pounds or more, from points in that part of Missouri on, south and west of a line beginning at the Kansas-Missouri State line extending along U.S. Highway 24 to junction U.S. Highway 65, thence along U.S. Highway 65 to junction U.S. Highway 36, thence along U.S. Highway 36 to junction Missouri Highway 11, thence along Missouri Highway 11 to junction U.S. Highway 63, thence along U.S. Highway 63 to junction U.S. Highway 54, thence along U.S. Highway 54 to junction Missouri Highway 17, thence along Missouri Highway 17 to the Missouri-Arkansas State line, to points in that part of Wisconsin on and east of a line beginning at the Iowa-Wisconsin State line extending along U.S. Highway 18 to junction Wisconsin Highway 35, thence along Wisconsin Highway 35 to junction U.S. Highway 53, thence U.S. Highway 53 to the Wisconsin-Minnesota State line and to points in the Upper Peninsula of Michigan, with no transportation for compensation on return except as otherwise authorized, restricted to commodities which are transported on trailers. The purpose of this filing is to eliminate the gateway of Dubuque, Iowa.

No. MC 114211 (Sub-No. E935), filed June 4, 1974. Applicant: WARREN TRANSPORT, INC., P.O. Box 420, Waterloo, Iowa 50704. Applicant's representative: Kenneth R. Nelson (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Tractors*, with or without attachments, *tractor attachments*, and *parts* of tractors and tractor attachments when moving in mixed loads with commodities specified above, between the port of entry of Port Angeles, Wash., on the one hand, and, on the other, points in Illinois and points in that part of Kansas on and east of a line beginning at the Kansas-Oklahoma State line extending along U.S. Highway 281 to junction U.S. Highway 24, thence along U.S. Highway 24 to junction Kansas Highway 181, thence along Kansas Highway 181 to junction U.S. Highway 36, thence along U.S. Highway 36 to junction U.S. Highway 81, thence along U.S. Highway 81 to the Kansas-Nebraska State line, that part of Nebraska on and east of a line beginning at the Nebraska-Kansas State line extending along U.S. Highway 81 to junction U.S. Highway 136, thence along U.S. Highway 136 to junction U.S. Highway 77, thence along U.S. Highway 77 to junction U.S. Highway 30, thence along U.S. Highway 30 to the Nebraska-Iowa State line, and that part of Iowa on, east and south of a line beginning at the Iowa-Nebraska State line extending along U.S. Highway 30 to junction U.S. Highway 69, thence along U.S. Highway 69 to junction Iowa Highway 3, thence along Iowa Highway 3 to the Iowa-Wisconsin-Illinois State line, restricted to the transportation of commodities in foreign commerce. The purpose of this filing is to eliminate the gateway of Topeka, Kans.

No. MC 114211 (Sub-No. E937), filed June 4, 1974. Applicant: WARREN TRANSPORT, INC., P.O. Box 420, Waterloo, Iowa 50704. Applicant's representative: Kenneth R. Nelson (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Self-propelled grading, paving, finishing machinery, equipment, parts, accessories and attachments*, from points in Arizona to points in New York, with no transportation for compensation on return except as otherwise authorized. The purpose of this filing is to eliminate the gateways of Canton, S. Dak., and the plant site of Stinar Corporation at Minneapolis, Minn.

No. MC 114211 (Sub-No. E938), filed June 4, 1974. Applicant: WARREN TRANSPORT, INC., P.O. Box 420, Waterloo, Iowa 50704. Applicant's representative: Kenneth R. Nelson (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Agricultural machinery, implements* and *parts* therefor, from Moline, East Moline, and Rock Island, Ill., to points in that part of South Dakota on and west of a line beginning at the South Dakota-North Dakota State line extending along U.S. Highway 281 to junction U.S. Highway 14, thence along U.S. Highway 14 to junction South Dakota Highway 37, thence along South Dakota Highway 37 to the Nebraska-South Dakota State line, to points in that part of Nebraska on and west of a line beginning at the Nebraska-Iowa State line extending along Nebraska Highway 2 to junction U.S. Highway 77, thence along U.S. Highway 77 to junction Interstate Highway 80, thence along Interstate Highway 80 to junction Nebraska Highway 15, thence along Nebraska Highway 15 to junction U.S. Highway 275, thence along U.S. Highway 275 to junction U.S. Highway 20, thence along U.S. Highway Highway 20 to junction U.S. Highway 281, thence along U.S. Highway 281 to the Nebraska-South Dakota State line, and to points in Wyoming, with no transportation for compensation on return except as otherwise authorized, restricted against the transportation of commodities the transportation of which, because of size and weight, requires the use of special equipment or special handling and restricted against the transportation of those commodities described in *Mercer Extension-Oil Field Commodities*, 74 M.C.C. 459. The purpose of this filing is to eliminate the gateways of points in Lincoln County, Nebr.

No. MC 114211 (Sub-No. E939), filed June 4, 1974. Applicant: WARREN TRANSPORT, INC., P.O. Box 420, Waterloo, Iowa 50704. Applicant's representative: Kenneth R. Nelson (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Farm tractors* (except those with vehicle beds, bed frames and fifth wheels) *equipment* designed for use in conjunction with farm tractors, *parts* thereof, from points in that part of North Dakota on, south and east of a line beginning at the United States-Canada Boundary line extending along Interstate Highway 29 to junction North Dakota Highway 5, thence along North Dakota Highway 5 to junction North Dakota Highway 1, thence along North Dakota Highway 1 to junction North Dakota Highway 17, thence along North Dakota Highway 17 to junction North Dakota Highway 20, thence along North Dakota Highway 20 to junction North Dakota Highway 200, thence along North Dakota Highway 200 to junction North Dakota Highway 32, thence along North Dakota Highway 32 to junction North Dakota Highway 13, thence along North Dakota Highway 13 to the Minnesota-North Dakota State line, to points in that part of Montana on and south of a line beginning at the United States-Canada Boundary line extending along U.S. Highway 93 to junction Montana Highway 200, thence along Montana Highway 200 to junction U.S. Highway 87, thence along U.S. Highway 87 to junction Montana Highway 200, thence along Montana Highway 200 to junction Montana Highway 22, thence along Montana Highway 22 to junction U.S. Highway 10, thence along U.S. Highway 10 to the North Dakota-Montana State line, and to points in Washington, Oregon, California, Idaho, Nevada, Arizona, Utah, New Mexico, Colorado, Wyoming, with no transportation for compensation on return except as otherwise authorized. The purpose of this filing is to eliminate the gateway of Fargo, N. Dak.

No. MC 114211 (Sub-No. E941), filed June 4, 1974. Applicant: WARREN TRANSPORT, INC., P.O. Box 420, Waterloo, Iowa 50704. Applicant's representative: Kenneth R. Nelson (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Farm machinery and parts thereof*, (except commodities the transportation of which because of size or weight requires the use of special equipment, and except commodities described in the *Mercer Extension-Oil Field Commodities*, 74 M.C.C. 459), from points in that part of Oklahoma on and west of a line beginning at the Oklahoma-Kansas State line extending along U.S. Highway 77 to the Oklahoma-Texas State line, to points in that part of Florida on and east of a line beginning at Perry, Fla., extending along U.S. Highway 221 to junction Florida Highway 14, thence along Florida Highway 14 to junction Florida Highway 145, thence along Florida Highway 145 to the Florida-Georgia State line; parts of Tennessee on and east of a line beginning at the Tennessee-Alabama State line extending along Interstate Highway 65 to junction U.S. Highway 64, thence along U.S. Highway 64 to junction U.S. Highway 45, thence along U.S. Highway 45 to junction Tennessee Highway 20, thence along Tennessee Highway 20 to junction U.S. Highway 51, thence along U.S. Highway 51 to junction Tennessee Highway 78, thence along Tennessee Highway 78 to the Tennessee-Kentucky State line; parts of Alabama on, east and north of a line beginning at the Georgia-Alabama State line extending along U.S. Highway 280 to junction U.S. Highway 431, thence along U.S. Highway 431 to the Tennessee-Alabama State line; and parts in Georgia on, north and east of a line beginning at the Alabama-Georgia State line extending along U.S. Highway 280 to junction U.S. Highway 55, thence along U.S. Highway 55 to junction U.S. Highway 82, thence along U.S. Highway 82 to junction U.S. Highway 41, thence along U.S. Highway 41 to the Georgia-Florida State line, with no transportation for compensation on return except as otherwise authorized. The purpose of this filing is to eliminate the gateway of Claremore, Okla.

No. MC 114211 (Sub-No. E944), filed June 4, 1974. Applicant: WARREN TRANSPORT, INC., P.O. Box 420, Waterloo, Iowa 50704. Applicant's representative: Kenneth R. Nelson (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Road building equipment*, from points in North Dakota, to points in that part of Georgia on and south of a line beginning at the Alabama-Georgia State line extending along U.S. Highway 78 to junction Interstate Highway 20, thence along Interstate Highway 20 to junction Interstate Highway 75, thence along Interstate Highway 75 to junction Interstate Highway 16, thence along Interstate Highway 16 to junction Georgia Highway 29, thence along Georgia Highway 29 to junction Georgia Highway 46, thence along Georgia Highway 46 to junction Georgia Highway 17/26, thence along Georgia Highway 17/26 to Savannah, Ga., to points in that part of Alabama on and south of a line beginning at the Tennessee-Alabama State line extending along Alabama Highway 20 to junction U.S. Highway 72, thence along U.S. Highway 72 to junction Interstate Highway 65, thence along Interstate Highway 65 to junction Alabama Highway 67, thence along Alabama Highway 67 to junction U.S. Highway 278, thence along U.S. Highway 278 to junction U.S. Highway 431, thence along U.S. Highway 431 to junction U.S. Highway 78, thence along U.S. Highway 78 to the Alabama-Georgia State line, to points in that part of Arkansas on and south of a line beginning at the Arkansas-Oklahoma State line extending along Interstate Highway 40 to junction Interstate Highway 55, thence along Interstate Highway 55 to the Tennessee-Arkansas State line, and to points in Louisiana, Mississippi, Florida, with no transportation for compensation on return except as otherwise authorized. The purpose of this filing is to eliminate the gateways of points in Kansas, Claremore, Okla., and Canton, S. Dak.

No. MC 114211 (Sub-No. E946), filed June 4, 1974. Applicant: WARREN TRANSPORT, INC., P.O. Box 420, Waterloo, Iowa 50704. Applicant's representative: Kenneth R. Nelson (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Road building equipment* (except in each instance, commodities which because of size or weight requires the use of special equipment and except commodities described in *Mercer Extension-Oil Field Commodities*, 74 M.C.C. 459), from points in Iowa, Illinois, and from points in that part of Nebraska on and east of a line beginning at the Kansas-Nebraska State line extending along U.S. Highway 81 to junction U.S. Highway 136, thence along U.S. Highway 136 to junction U.S. Highway 77, thence along U.S. Highway 77 to the Iowa-Nebraska State line, and from points in that part of Kansas on and east of a line beginning at the Oklahoma-Kansas State line extending along U.S. Highway 77 to junction Kansas Highway 15, thence along Kansas Highway 15 to junction Interstate Highway 35, thence along Interstate Highway 35 to junction U.S. Highway 81, thence along U.S. Highway 81 to the Nebraska-Kansas State line, to all ports of entry west of California Highway 1 between Los Angeles and San Diego, Calif., with no transportation for compensation on return except as otherwise authorized. The purpose of this filing is to eliminate the gateways of Claremore, Okla., and points in Kansas.

No. MC 114211 (Sub-No. E954), filed June 4, 1974. Applicant: WARREN TRANSPORT, INC., P.O. Box 420, Waterloo, Iowa 50704. Applicant's representative: Kenneth R. Nelson (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Self-propelled tractors* and *road making machinery* and *contractors' equipment* and *supplies*, from Noyes, Minn., to points in Arizona, New Mexico, Texas, Oklahoma, Missouri, Arkansas, Louisiana, Tennessee, Illinois, Alabama, Georgia, Florida, South Carolina, North Carolina, Kentucky, Indiana, Ohio, West Virginia, Vermont, New Hampshire, Maine, and to points in that part of California on and south of a line beginning at San Francisco, Calif., extending along Interstate Highway 80 to junction California Highway 17, thence along California Highway 17 to junction Interstate Highway 580, thence along Interstate Highway 580 to junction Interstate Highway 205, thence along Interstate Highway 205 to junction California Highway 120, thence along California Highway 120 to junction U.S. Highway 6, thence along U.S. Highway 6 to the California-Nevada State line; and to points in that part of Nevada on and south of a line beginning at the California-Nevada State line extending along U.S. Highway 6 to the Nevada-Utah State line; to points in that part of Utah on and south of a line beginning at the Nevada-Utah State line extending along U.S. Highway 6 to junction Utah Highway 26, thence along Utah Highway

26 to junction U.S. Highway 91, thence along U.S. Highway 91 to junction Utah Highway 26, thence along Utah Highway 26 to junction U.S. Highway 89, thence along U.S. Highway 89 to junction Utah Highway 29, thence along Utah Highway 29 to junction Utah Highway 10, thence along Utah Highway 10 to junction U.S. Highway 6, thence along U.S. Highway 6 to the Utah-Colorado State line.

To points in that part of Colorado on and south of a line beginning at the Utah-Colorado State line extending along U.S. Highway 6 to junction U.S. Highway 36, thence along U.S. Highway 36 to junction U.S. Highway 385, thence along U.S. Highway 385 to junction U.S. Highway 34, thence along U.S. Highway 34 to the Colorado-Nebraska State line; to points in that part of Nebraska on and south of a line beginning at the Colorado-Nebraska State line extending along U.S. Highway 34 to junction U.S. Highway 136, thence along U.S. Highway 136 to junction U.S. Highway 75, thence along U.S. Highway 75 to junction Nebraska Highway 2, thence along Nebraska Highway 2 to the Nebraska-Iowa State line; to points in that part of Iowa on and east of a line beginning at the Nebraska-Iowa State line extending along Iowa Highway 2 to junction Iowa Highway 59, thence along Iowa Highway 59 to junction Iowa Highway 39, thence along Iowa Highway 39 to junction Iowa Highway 175, thence along Iowa Highway 175 to junction U.S. Highway 71, thence along U.S. Highway 71 to junction U.S. Highway 18, thence along U.S. Highway 18 to junction Iowa Highway 4, thence along Iowa Highway 4 to the Iowa-Minnesota State line; to points in that part of Wisconsin on and south of a line beginning at the Minnesota-Wisconsin State line extending along Wisconsin Highway 70 to junction Wisconsin Highway 27, thence along Wisconsin Highway 27 to junction U.S. Highway 8, thence along U.S. Highway 8 to the Wisconsin-Michigan State line; and to points in that part of Michigan on and south of a line beginning at the Wisconsin-Michigan State line extending along U.S. Highway 8 to junction U.S. Highway 2, thence along U.S. Highway 2 to Escanabo, Mich., with no transportation for compensation on return except as otherwise authorized. The purpose of this filing is to eliminate the gateway of Minneapolis, Minn.

No. MC 114211 (Sub-No. E955), filed June 4, 1974. Applicant: WARREN TRANSPORT, INC., P.O. Box 420, Waterloo, Iowa 50704. Applicant's representative: Kenneth R. Nelson (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Self-propelled sweepers* and *hod buggies*, from Noyes, Minn., to points in New York, Massachusetts, Connecticut, New Jersey, Delaware, Virginia, Pennsylvania, and Maryland, with no transportation for compensation on return except as otherwise authorized. The purpose of this filing is to eliminate the gateway of Minneapolis, Minn.

No. MC 114211 (Sub-No. E956), filed June 4, 1974. Applicant: WARREN TRANSPORT, INC., P.O. Box 420, Waterloo, Iowa 50704. Applicant's representative: Kenneth R. Nelson (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Self-propelled tractors, road making machinery* and *contractors' equipment* and *supplies*, from Noyes, Minn., to points in New York, with no transportation for compensation on return except as otherwise authorized. The purpose of this filing is to eliminate the gateway of the plant site of the Stinar Corporation at Minneapolis, Minn.

No. MC 114211 (Sub-No. E957), filed June 4, 1974. Applicant: WARREN TRANSPORT, INC., P.O. Box 420, Waterloo, Iowa 50704. Applicant's representative: Kenneth R. Nelson (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Road building equipment* (except in each instance, commodities which because of size or weight requires the use of special equipment, and except commodities described in *Mercer Extension-Oil Field Commodities*, 74 M.C.C. 459), from that part of Oklahoma on and east of a line beginning at the Kansas-Oklahoma State line extending along U.S. Highway 75 to junction Indian Nation Turnpike, thence along Indian Nation Turnpike to the Oklahoma-Texas State line, to points in Washington, Oregon, California, Idaho, Nevada, Utah, Arizona, Montana, Wyoming, North Dakota, and points in that part of New Mexico on and west of a line beginning at the New Mexico-Colorado State line extending along Interstate Highway 25 to junction U.S. Highway 64, thence along U.S. Highway 64 to junction New Mexico Highway 68, thence along New Mexico Highway 68 to junction U.S. Highway 84, thence along U.S. Highway 84 to junction U.S. Highway 85, thence along U.S. Highway 85 to junction New Mexico Highway 90, thence along New Mexico Highway 90 to junction U.S. Highway 80.

Thence along U.S. Highway 80 to the New Mexico-Arizona State line and to points in that part of Wisconsin on and north of a line beginning at the Wisconsin-Minnesota State line extending along Wisconsin Highway 77 to junction Wisconsin Highway 27, thence along Wisconsin Highway 27 to junction Wisconsin Highway 70, thence along Wisconsin Highway 70 to junction Wisconsin Highway 13, thence along Wisconsin Highway 13 to junction U.S. Highway 8, thence along U.S. Highway 8 to junction U.S. Highway 51, thence along U.S. Highway 51 to junction Wisconsin Highway 64, thence along Wisconsin Highway 64 to junction Wisconsin Highway 47, thence along Wisconsin Highway 47 to junction Wisconsin Highway 29, thence along Wisconsin Highway 29 to Lake Michigan, and to points in that part of Colorado on and west of a line beginning at the Colorado-Nebraska State line extending along Colorado Highway 113 to junction U.S. Highway 138, thence along U.S. Highway 138 to junction Colorado Highway 71, thence along Colorado Highway 71 to junction U.S. Highway 350, thence along U.S. Highway 350 to junction Interstate Highway 25, thence along Interstate Highway 25 to the Colorado-New Mexico State line, with no transportation for compensation on return except as otherwise authorized, restricted against shipments moving in foreign commerce to points in Canada. The purpose of this filing is to eliminate the gateway of Claremore, Okla.

No. MC 114211 (Sub-No. E958), filed June 4, 1974. Applicant: WARREN TRANSPORT, INC., P.O. Box 420, Waterloo, Iowa 50704. Applicant's representative: Kenneth R. Nelson (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Self-propelled farm machinery* and *parts* thereof, from Noyes, Minn., to points in Arizona, New Mexico, Texas, Oklahoma, Kansas, Missouri, Arkansas, Louisiana, Illinois, Indiana, Kentucky, Tennessee, Mississippi, Alabama, Ohio, North Carolina, South Carolina, Georgia, Florida, and to points in that part of California on and south of a line beginning at San Francisco, Calif., extending along Interstate Highway 80 to junction California Highway 17, thence along California Highway 17 to junction Interstate Highway 580, thence along Interstate Highway 580 to junction Interstate Highway 205, thence along Interstate Highway 205 to junction California Highway 120, thence along California Highway 120 to junction U.S. Highway 6, thence along U.S. Highway 6 to the California-Nevada State line; to points in that part of Nevada on and south of a line beginning at the California-Nevada State line extending along U.S. Highway 6 to the Nevada-Utah State line; to points in Utah on and south of line beginning at the Nevada-Utah State line extending along U.S. Highway 6 to junction Utah Highway 26, thence along Utah Highway 26 to junction U.S. Highway 91, thence along U.S. Highway 91 to junction Utah Highway 26, thence along Utah Highway 26 to junction U.S. Highway 89, thence along U.S. Highway 89 to junction Utah Highway 29, thence along Utah Highway 29 to junction Utah Highway 10, thence along Utah Highway 10 to junction U.S. Highway 6, thence along U.S. Highway 6 to the Utah-Colorado State line.

To points in that part of Colorado on and south of a line beginning at the Utah-Colorado State line extending along U.S. Highway 6 to junction U.S. Highway 36, thence along U.S. Highway 36 to junction U.S. Highway 385, thence along U.S. Highway 385 to junction U.S. Highway 34, thence along U.S. Highway 34 to the Colorado-Nebraska State line; to points in that part of Nebraska on and south of a line beginning at the Colorado-Nebraska State line extending along U.S. Highway 34 to junction U.S. Highway 136, thence along U.S. Highway 136 to junction U.S. Highway 75, thence along U.S. Highway 75 to junction Nebraska Highway 2, thence along Nebraska Highway 2 to the Nebraska-Iowa State line; to points in that part of Iowa on and east of a line beginning at the Nebraska-Iowa State line extending along Iowa Highway 2 to junction U.S. Highway 59, thence along U.S. Highway 59 to junction Iowa Highway 39, thence along Iowa Highway 39 to junction Iowa Highway 175, thence along Iowa Highway 175 to junction U.S. Highway 71, thence along U.S. Highway 71 to junction U.S. Highway 18, thence along U.S. Highway 18 to junction Iowa Highway 4, thence along Iowa Highway 4 to the Iowa-Minnesota State line; to points in that part of Michigan on and south of a line beginning at the Wisconsin-Upper Peninsula of Michigan State line extending along U.S. Highway 8 to junction U.S. Highway 2, thence along U.S. Highway 2 to Escanabo, Mich.; and to points in that part of Wisconsin on and south of a line beginning at the Minnesota-Wisconsin State line extending along U.S. Highway 70 to junction Wisconsin Highway 27, thence along Wisconsin Highway 27 to junction U.S. Highway 8, thence along U.S. Highway 8 to the Wisconsin-Michigan State line, with no transportation for compensation on return except as otherwise authorized. The purpose of this filing is to eliminate the gateway of Minneapolis, Minn.

No. MC 114211 (Sub-No. E959), filed June 4, 1974. Applicant: WARREN TRANSPORT, INC., P.O. Box 420, Waterloo, Iowa 50704. Applicant's representative: Kenneth R. Nelson (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Road building equipment* (except in each instance, commodities which because of size or weight requires the use of special equipment and except commodities described in *Mercer Extension-Oil Field Commodities*, 74 M.C.C. 459), from that part of Minnesota on and west of a line beginning at the Iowa-Minnesota State line extending along U.S. Highway 218 to junction Interstate Highway 90, thence along Interstate Highway 90 to junction Minnesota Highway 76, thence along Minnesota Highway 76 to junction U.S. Highway 14, thence along U.S. Highway 14 to the Minnesota-Wisconsin State line; points in that part of Iowa on and west of a line beginning at the Iowa-Missouri State line extending along U.S. Highway 169 to junction Interstate Highway 80, thence along Interstate Highway 80 to junction U.S. Highway 65, thence along U.S. Highway 65 to junction Iowa Highway 14, thence along Iowa Highway 14 to junction U.S. Highway 218, thence along U.S. Highway 218 to the Minnesota-Iowa State line; and points in South Dakota, Colorado, Kansas, and Nebraska, to points in that part of Alabama on and south of a line beginning at the Mississippi-Alabama State line extending along U.S. Highway 90 to Mobile, Ala.; to points in that part of Mississippi on and south of a line beginning at the Mississippi-Louisiana State line extending along U.S. Highway 90 to the Mississippi-Alabama State line; and to points in that part of Louisiana on and south of a line beginning at Lake Charles, La., extending along U.S. Highway 90 to the Louisiana-Mississippi State line, with no transportation for compensation on return except as otherwise authorized. The purpose of this filing is to eliminate the gateways of Claremore, Okla., and points in Kansas.

No. MC 114211 (Sub-No. E960), filed June 4, 1974. Applicant: WARREN TRANSPORT, INC., P.O. Box 420, Waterloo, Iowa 50704. Applicant's representative: Kenneth R. Nelson (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Road building equipment* (except in each instance, commodities which because of size or weight require the use of special equipment, and except commodities described in *Mercer Extension-Oil Field Commodities*, 74 M.C.C. 459), from points in Nebraska, Kansas, Colorado, and from points in that part of South Dakota on and west of a line beginning at the Nebraska-South Dakota State line extending along U.S. Highway 81 to junction U.S. Highway 16, thence along U.S. Highway 16 to junction South Dakota Highway 37, thence along South Dakota Highway 37 to junction South Dakota Highway 34, thence along South Dakota Highway 34 to junction U.S. Highway 281, thence along U.S. Highway 281 to the North Dakota-South Dakota State line, to points in that part of Florida on and west of a line beginning at Miami, Fla., extending along U.S. Highway 1 to junction Interstate Highway 95, thence along Interstate Highway 95 to the Florida-Georgia State line, and to points in that part of Georgia on and east of a line beginning at the Florida-Georgia State line extending along Interstate Highway 95 to the Georgia-South Carolina State line; to points in that part of South Carolina on and east of a line beginning at the South Carolina-Georgia State line extending along Interstate Highway 95 to junction U.S. Highway 17, thence along U.S. Highway 17 to the South Carolina-North Carolina State line; and to points in that part of North Carolina on and east of a line beginning at the South Carolina-North Carolina State line extending along U.S. Highway 17, north to Wilmington, N.C., with no transportation for compensation on return except as otherwise authorized. The purpose of this filing is to eliminate the gateways of Claremore, Okla., and points in Kansas.

No. MC 114211 (Sub-No. E961), filed June 4, 1974. Applicant: WARREN TRANSPORT, INC., P.O. Box 420, Waterloo, Iowa 50704. Applicant's representative: Kenneth R. Nelson (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Cast iron pressure pipe* (except pipe used in or in connection with the discovery, development, production, refining, manufacture, processing, storage, transmission, and distribution of natural gas and petroleum, and their products), and *fittings* and *accessories* therefor when moving with such pipe, from points in that part of Texas on and west of a line beginning at the Oklahoma-Texas State line extending along U.S. Highway 283 to junction U.S. Highway 277, thence along U.S. Highway 277 to junction Texas Highway 83, thence along Texas Highway 83 to junction U.S. Highway 377, thence along U.S. Highway 377 to Del Rio, Tex., and to points in that part of Oklahoma on and west of a line beginning at the Kansas-Oklahoma State line extending along U.S. Highway 281 to junction U.S. Highway 60, thence along U.S. Highway 60 to junction U.S. Highway 183, thence along U.S. Highway 183 to junction U.S. Highway 62, thence along U.S. Highway 62 to junction U.S. Highway 283, thence along U.S. Highway 283 to the Oklahoma-Texas State line, to points in that part of Ohio on and north of a line beginning at the Ohio-Indiana State line extending along Ohio Highway 34 to junction U.S. Highway 127, thence along U.S. Highway 127 to junction Ohio Highway 2, thence along Ohio Highway 2 to Toledo, Ohio, with no transportation for compensation on return except as otherwise authorized. The purpose of this filing is to eliminate the plant site of the Griffin Pipe Company located at or near Council Bluffs, Iowa.

No. MC 114211 (Sub-No. E962), filed June 4, 1974. Applicant: WARREN TRANSPORT, INC., P.O. Box 420, Waterloo, Iowa 50704. Applicant's representative: Kenneth R. Nelson (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Road building equipment* (except in each instance, commodities which because of size or weight requires the use of special equipment, and except commodities described in *Mercer Extension-Oil Field Commodities*, 74 M.C.C. 459), from points in South Dakota, Nebraska, Kansas, and Colorado; from points in that part of Iowa on and west of a line beginning at the Iowa-Missouri State line extending along U.S. Highway 169 to junction Iowa Highway 9, thence along Iowa Highway 9 to junction Iowa Highway 4, thence along Iowa Highway 4 to the Iowa-Minnesota State line; and points in that part of Minnesota on and west of a line beginning at the Minnesota-Iowa State line extending along Minnesota Highway 4 to junction Minnesota Highway 60, thence along Minnesota Highway 60 to junction U.S. Highway 169, thence along U.S. Highway 169 to junction U.S. Highway 12, thence along U.S. Highway 12 to the Minnesota-Wisconsin State line, to points in that part of Alabama from Mobile, Ala., extending along U.S. Highway 98 to the Alabama-Florida State line and to points in that part of Florida on and southeast of a line beginning at the Alabama-Florida State line extending along U.S. Highway 98 to junction U.S. Highway 19, thence along U.S. Highway 19 to junction U.S. Highway 41, thence along U.S. Highway 41 to Miami, Fla., with no transportation for compensation on return except as otherwise authorized. The purpose of this

V 40168
APR 8 75

filing is to eliminate the gateways of Claremore, Okla., and points in Kansas.

No. MC 114211 (Sub-No. E966), filed June 4, 1974. Applicant: WARREN TRANSPORT, INC., P.O. Box 420, Waterloo, Iowa 50704. Applicant's representative: Kenneth R. Nelson (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Tractors* and *tractor attachments* when moving as contractors' equipment moving in foreign commerce, between the port of entry of Madawaska, Maine, on the one hand, and, on the other, points in Colorado, South Dakota, Kansas, Nebraska, and points in that part of Minnesota on and west of a line beginning at the Minnesota-Iowa State line extending along Minnesota Highway 4 to junction U.S. Highway 16, thence along U.S. Highway 16 to junction U.S. Highway 59, thence along U.S. Highway 59 to junction Interstate Highway 94, thence along Interstate Highway 94 to the North Dakota-Minnesota State line, and that part of Iowa on and west of a line beginning at the Iowa-Missouri State line extending along U.S. Highway 34 to junction Iowa Highway 25, thence along Iowa Highway 25, to junction U.S. Highway 30, thence along U.S. Highway 30 to junction U.S. Highway 71, thence along U.S. Highway 71, to junction Iowa Highway 175, thence along Iowa 175 to junction Iowa Highway 4, thence along Iowa Highway 4 to the Iowa-Minnesota State line restricted to the transportation of commodities in foreign commerce. The purpose of this filing is to eliminate the gateway of Topeka, Kans.

No. MC 114211 (Sub-No. E967), filed July 3, 1974. Applicant: WARREN TRANSPORT, INC., P.O. Box 420, Waterloo, Iowa 50704. Applicant's representative: Kenneth R. Nelson (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Agricultural implements* and *parts* therefor, from Greeley, Colo., to points in that part of Texas on and east of a line beginning at the Texas-Oklahoma State line extending along U.S. Highway 75 to junction Interstate Highway 45, thence along Interstate Highway 45 to junction Texas Highway 14, thence along Texas Highway 14 to junction Texas Highway 6, thence along Texas Highway 6 to junction Texas Highway 159, thence along Texas Highway 159 to junction Texas Highway 237, thence along Texas Highway 237 to junction U.S. Highway 77, thence along U.S. Highway 77 to junction Texas Highway 185, thence along Texas Highway 185 to Seadrift, Tex., and to points in Illinois, Indiana, Minnesota, Missouri, Wisconsin, Michigan, and Ohio, with no transportation for compensation on return except as otherwise authorized, restricted against movement to oil field locations. The purpose of this filing is to eliminate the gateway of Beatrice, Nebr.

No. MC 114211 (Sub-No. E968), filed July 3, 1974. Applicant: WARREN TRANSPORT, INC., P.O. Box 420, Waterloo, Iowa 50704. Applicant's representative: Kenneth R. Nelson (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Agricultural implements* and *parts* therefor, from Denver, Colo., to points in Minnesota, Wisconsin, Michigan, Illinois, Indiana, Ohio, Missouri, and points in that part of Texas on and east of a line beginning at the Oklahoma-Texas State line extending along U.S. Highway 271 to junction Texas Highway 49, thence along Texas Highway 49 to junction U.S. Highway 259, thence along U.S. Highway 259 to junction U.S. Highway 69, thence along U.S. Highway 69 to Port Arthur, Tex., with no transportation for compensation on return except as otherwise authorized, restricted against movement to oil field locations. The purpose of this filing is to eliminate the gateway of Beatrice, Nebr.

No. MC 114211 (Sub-No. E969), filed July 3, 1974. Applicant: WARREN TRANSPORT, INC., P.O. Box 420, Waterloo, Iowa 50704. Applicant's representative: Kenneth R. Nelson (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: Cast iron pressure pipe and fittings and accessories therefor when moving with such pipe, from Coshocton, Ohio, to points in that part of Minnesota on and west of a line beginning at the Iowa-Minnesota State line extending along U.S. Highway 71 to junction Minnesota Highway 19, thence along Minnesota Highway 19 to junction Minnesota Highway 67, thence along Minnesota Highway 67 to junction U.S. Highway 212, thence along U.S. Highway 212 to junction U.S. Highway 59, thence along U.S. Highway 59 to junction U.S. Highway 75, thence along U.S. Highway 75 to the United States-Canada International Boundary line, with no transportation for compensation on return except as otherwise authorized. The purpose of this filing is to eliminate the gateway of the plant site of the Griffin Pipe Company located at or near Council Bluffs, Iowa.

No. MC 114211 (Sub-No. E970), filed July 3, 1974. Applicant: WARREN TRANSPORT, INC., P.O. Box 420, Waterloo, Iowa 50704. Applicant's representative: Kenneth R. Nelson (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Cast iron pressure pipe* and *fittings* and *accessories* therefor when moving with such pipe, from Bensonville, Ill., to points in that part of North Dakota on and west of a line beginning at the South Dakota-North Dakota State line extending along North Dakota Highway 31 to junction North Dakota Highway 21, thence along North Dakota Highway 21 to junction North Dakota Highway 49, thence along North Dakota Highway 49 to junction Interstate Highway 94, thence along Interstate Highway 94 to junction North Dakota Highway 31, thence along North Dakota Highway 31 to junction North Dakota Highway 200, thence along North Dakota Highway 200 to junction North Dakota Highway 48, thence along North Dakota Highway 48 to junction U.S. Highway 83, thence along U.S. Highway 83 to junction North Dakota Highway 256, thence along North Dakota Highway 256 to the United States-Canada International Boundary line, and to points in that part of South Dakota on, west, and south of a line beginning at the Minnesota-South Dakota State line extending along U.S. Highway 14 to junction Interstate Highway 29.

Thence along Interstate Highway 29 to junction South Dakota Highway 28, thence along South Dakota Highway 28 to junction U.S. Highway 81, thence along U.S. Highway 81 to junction South Dakota Highway 20, thence along South Dakota Highway 20 to junction U.S. Highway 281, thence along U.S. Highway 281 to junction U.S. Highway 12, thence along U.S. Highway 12 to junction South Dakota Highway 65, thence along South Dakota Highway 65 to the South Dakota-North Dakota State line; to points in that part of Kansas on and west of a line beginning at the Oklahoma-Kansas State line extending along U.S. Highway 59 to junction U.S. Highway 40, thence along U.S. Highway 40 to junction Kansas Highway 16, thence along Kansas Highway 16 to junction Kansas Highway 92, thence along Kansas Highway 92 to the Missouri-Kansas State line, and to points in Montana, Wyoming, and Colorado, with no transportation for compensation on return except as otherwise authorized. The purpose of this filing is to eliminate the gateway of the plant site of the Griffin Pipe Co., located at or near Council Bluffs, Iowa.

No. MC 114211 (Sub-No. E1007), filed July 3, 1974. Applicant: WARREN TRANSPORT, INC., P.O. Box 420, Waterloo, Iowa 50704. Applicant's representative: Kenneth R. Nelson (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Self-propelled farm machinery* and *parts* thereof, from Denver, Colo., to points in New York. The purpose of this filing is to eliminate the gateways of Nebraska City and Beatrice, Nebr., points in Iowa, and the plant site of the Stinar Corporation located at or near Minneapolis, Minn.

No. MC 114211 (Sub-No. E1008), filed July 3, 1974. Applicant: WARREN TRANSPORT, INC., P.O. Box 420, Waterloo, Iowa 50704. Applicant's representative: Kenneth R. Nelson (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Farm machinery* and *parts* thereof, from Grinnell, Iowa, to points in Oklahoma and to points in that part of Kansas on and southwest of a line beginning at the Nebraska-Kansas State line extending along U.S. Highway 73 to the Kansas-Missouri State line. The purpose of this filing is to eliminate the gateways of Des Moines, Iowa, Martin City, Mo., and points in Kansas located within 15 miles of Martin City, Mo.

No. MC 114211 (Sub-No. E1244), filed March 7, 1975. Applicant: WARREN TRANSPORT, INC., P.O. Box 420, Waterloo, Iowa 50704. Applicant's representative: Kenneth R. Nelson (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Lumber* and *particle board*, from the facilities of Kaibab Industries, at Midvale, Utah to points in Michigan, Illinois, Pennsylvania, and to points in that part of Iowa located on and north and east of a line beginning at the Nebraska-Iowa State line, thence along Iowa Highway 92 to junction U.S. Highway 59, thence along U.S. Highway 59 to junction U.S. Highway 169, thence along U.S. Highway 169 to the Missouri-Iowa State line, and to points in that part of Missouri located on and east of a line beginning at the Iowa-Missouri State line, thence along U.S. Highway 169 to junction U.S. Highway 36, thence along U.S. Highway 36 to the Missouri-Kansas State line, thence along the Missouri-Kansas State line to junction U.S. Highway 40, thence along U.S. Highway 40 to junction Missouri Highway 7, thence along Missouri Highway 7 to junction Missouri Highway 13, thence along Missouri Highway 13 to junction U.S. Highway 65, thence along U.S. Highway 65 to the Missouri-Arkansas State line restricted to the transportation of shipments originating at the facilities of Kaibab Industries at Midvale, Utah. The purpose of this filing is to eliminate the gateway of points in Custer County, S. Dak.

No. MC 114211 (Sub-No. E1245), filed March 7, 1975. Applicant: WARREN TRANSPORT, INC., P.O. Box 42, Waterloo, Iowa 50704. Applicant's representative: Kenneth R. Nelson (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Road building equipment*, between the plant site of the Hyster Company at or near Crawfordsville, Ind., on the one hand, and, on the other points in Texas restricted to the transportation of shipments originating at or destined to the above-named plant site. The purpose of this filing is to eliminate the gateway of points in Kansas.

No. MC 114211 (Sub-No. E1246), filed March 7, 1975. Applicant: WARREN TRANSPORT, INC., P.O. Box 420, Waterloo, Iowa 50704. Applicant's representative: Kenneth R. Nelson (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Grading, paving*, and *finishing machinery, equipment, parts, accessories*, and *attachments*, between the plant site of Hyster Company at or near Crawfordsville, Ind., on the one hand, and, on the other points in North Dakota, Montana, Wyoming, Utah, Nevada, California, Idaho, Oregon, Washington, and points in that part of Arizona located on and west of a line beginning at the New Mexico-Arizona State line, thence along U.S. Highway 160 to junction U.S. Highway 89, thence along U.S. Highway 89 to junction Interstate Highway 17, thence along Interstate Highway 17 to junction U.S. Highway 60, thence along U.S. Highway 60 to junction Arizona Highway 77, thence along Arizona Highway 77 to junction U.S. Highway 80, thence along U.S. Highway 80 to Douglas, Ariz., restricted to the transportation of shipments originating at or destined to the above-named plant site. The purpose of this filing is to eliminate the gateway of Canton, S. Dak.

No. MC 114211 (Sub-No. E1247), filed March 7, 1975. Applicant: WARREN TRANSPORT, INC., P.O. Box 420, Waterloo, Iowa 50704. Applicant's representative: Kenneth R. Nelson (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Self-propelled* (1) material handling equipment, winches, compaction and road making equipment, rollers, mobile cranes and highway freight trailers and (2) parts, attachments and accessories of the commodities named in (1) above between the plant site of Hyster Company at or near Crawfordsville, Ind. on the one hand, and, on the other, points in North Dakota, Montana, Idaho, Washington, Oregon and points in that part of California located on and north and west of a line beginning at the Nevada-California State line, thence along Interstate Highway 15 to junction Interstate Highway 10, thence along Interstate Highway 10 to junction California Highway 111, thence along California Highway 111 to the California-Mexico International Boundary line, and points in that part of Nevada located on and north of a line beginning at the Arizona-Nevada State line.

Thence along Interstate Highway 15 to the Nevada-California State line, and points in that part of Utah located on and west of a line beginning at the Wyoming-Utah State line thence along Utah Highway 44 to junction U.S. Highway 40, thence along U.S. Highway 40 to junction Utah Highway 33, thence along Utah Highway 33 to junction U.S. Highway 6, thence along U.S. Highway 6 to junction U.S. Highway 89, thence along U.S. Highway 89 to junction Utah Highway 4, thence along Utah Highway 4 to junction U.S. Highway 91, thence along U.S. Highway 91 to the Utah-Arizona State line, and points in that part of Wyoming located on and north of a line beginning at the Nebraska-Wyoming State line, thence along U.S. Highway 20 to junction Wyoming Highway 220, thence along Wyoming Highway 220 to junction U.S. Highway 287, thence along U.S. Highway 287 to junction Interstate Highway 80, thence along Interstate Highway 80 to junction Wyoming Highway 530, thence along Wyoming Highway 530 to the Wyoming-Utah State line restricted to the transportation of shipments originating at or destined to the above-named plant site. The purpose of this filing is to eliminate the gateway of Minneapolis, Minn.

No. MC 114211 (Sub-No. E1248), filed March 7, 1975. Applicant: WARREN TRANSPORT, INC., P.O. Box 420, Waterloo, Iowa 50704. Applicant's representative: Kenneth R. Nelson (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Road building equipment*, (except in each instance, commodities which because of size or weight require the use of special equipment, and except commodities described in *Mercer Extension—Oil Field Commodities*, 74 M.C.C. 459, from the plant site of Hyster Company at or near Crawfordsville, Ind. to points in that part of Oklahoma located on and south and west of a line beginning at the Kansas-Oklahoma State line, thence along U.S. Highway 75 to junction U.S. Highway 64, thence along U.S. Highway 64 to junction Interstate Highway 40, thence along Interstate Highway 40 to the Oklahoma-Arkansas State line, and to points in Arizona and New Mexico. The purpose of this filing is to eliminate the gateway of points in Kansas and Claremore, Okla.

No. MC 114211 (Sub-No. E1249), filed March 7, 1975. Applicant: WARREN TRANSPORT, INC., P.O. Box 420, Waterloo, Iowa 50704. Applicant's representative: Kenneth R. Nelson (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Iron and steel articles* from Newport, Ky. to points in that part of Kansas located on and west of a line beginning at the Oklahoma-Kansas State line, thence along U.S. Highway 81 to junction Interstate Highway 35, thence along Interstate Highway 35 to junction U.S. Highway 75, thence along U.S. Highway 75 to junction Kansas Highway 4, thence along Kansas Highway 4 to junction U.S. Highway 59, thence along U.S. Highway 59 to the Kansas-Missouri State line, and to points in that part of Oklahoma on and west of a line beginning at the Texas-Oklahoma State line, thence along U.S. Highway 283 to junction Oklahoma Highway 44, thence along Oklahoma Highway 44 to junction Oklahoma Highway 9, thence along Oklahoma Highway 9 to junction U.S. Highway 183, thence along U.S. Highway 183 to junction Oklahoma Highway 33, thence along Oklahoma Highway 33 to junction Oklahoma Highway 58, thence along Oklahoma Highway 58 to junction Oklahoma Highway 51, thence along Oklahoma Highway 51 to junction U.S. Highway 81, thence along U.S. Highway 81 to the Oklahoma-Kansas State line, and to points in that part of Texas located on and west of a line beginning at Laredo, Tex., thence along U.S. Highway 83 to junction U.S. Highway 377, thence along U.S. Highway 283 to the Texas-Highway 87, thence along U.S. Highway 87 to junction U.S. Highway 283, thence along U.S. Highway 283 to the Texas-Oklahoma State line restricted to the transportation of traffic destined to the above-named destinations and restricted against the transportation of commodities in bulk. The purpose of this filing is to eliminate the gateway of the plant site of Jones and Laughlin Steel Corporation located in Putnam County, Ill.

No. MC 114301 (Sub-No. E12), filed March 6, 1975. Applicant: DELAWARE EXPRESS, INC., P.O. Box 97, Elkton, Md. 21921. Applicant's representative: Chester A. Zyblut, 1522 K St. NW., Washington, D.C. 20005. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Asphalt*, in bulk, in tank vehicles, from Newark, Del., to points in Pennsylvania, New Jersey, and Maryland. The purpose of this filing is to eliminate the gateway of the plant site and storage facilities of Artic Roofing, Inc., at Wilmington, Del.

No. MC 114301 (Sub-No. E13), filed March 6, 1975. Applicant: DELAWARE EXPRESS, INC., P.O. Box 97, Elkton, Md. 21921. Applicant's representative: Chester A. Zyblut, 1522 K St. NW., Washington, D.C. 20005. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Asphalt*, in bulk, in tank vehicles, from Baltimore, Md., to points in New Jersey and to points in that part of Pennsylvania on and east of a line beginning at the Delaware-Pennsylvania State line, thence along Pennsylvania Highway 41 to junction Pennsylvania Highway 10, thence along Pennsylvania Highway 10 to junction Pennsylvania Highway 61, thence along Pennsylvania Highway 61 to junction Pennsylvania Highway 42, thence along Pennsylvania Highway 42 to junction Interstate Highway 80, thence along Interstate Highway 80 to junction U.S. Highway 15, thence along U.S. Highway 15 to the Pennsylvania-New York State line. The purpose of this filing is to eliminate the gateway of the plant site and storage facilities of Artic Roofing, Inc., at Wilmington, Del.

No. MC 114604 (Sub-No. E3), filed January 24, 1975. Applicant: CAUDELL TRANSPORT, INC., State Farmer's Market No. 33, Forest Park, Ga. 30050. Applicant's representative: Guy H. Postell, 3384 Peachtree Rd. NE., Atlanta, Ga. 30326. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (A) *Bananas*, in vehicles equipped with mechanical refrigeration; (1) from Charleston, S.C., to points in the Florida counties of Escambia, Santa Rosa, and Okaloosa (Atlanta, Ga., for items 1 through 9) *; (2) from Jacksonville, Fla., to points in the State of North Carolina which lie within Cherokee, Clay, Graham, Swain, Macon, Jackson, Haywood, Transylvania, Henderson, Polk, Buncombe, McDowell, Mitchell, Avery, Burke, Yancey, and Madison Counties; (3) from Miami, Fla., to all points in North Carolina (except those points which lie within Richmond, Scotland, Robeson, Columbus, Hoke, Moore, Lee, Harnett, Cumberland, Wake, Johnson, Bladen, Sampson, Wayne, Nash, Wilson, Edgecombe, Pitt, Greene, Lenoir, Duplin, Pender, Brunswick, New Hanover, Onslow, Carteret, Craven, Pamlico, Beaufort, Hyde, Martin, Bertie, Chowan, Washington, Tyrrell, and Dare Counties; (4) from Port Everglades, Fla., to points in North Carolina which lie within Cherokee, Graham, Clay, Macon, Swain, Jackson, Transylvania, Henderson, Polk, Buncombe, Haywood, Madison, McDowell, Yancey, Mitchell, Avery, Burke, Rutherford, Cleveland, Caldwell, Watauga, Ashe, Alleghany, Wilkes, Alexander, Catawba, Lincoln, Gaston, Mecklenburg, Cabarrus, Rowan, Iredell, Yadkin, Surry, Stokes, Forsyth, Davidson, Randolph, Guilford, Rockingham, Caswell, Chatham, Orange, and Alamance Counties;

(5) From Tampa, Fla., to points in North Carolina which lie with Cherokee, Clay, Graham, Swain, Macon, Jackson, Haywood, Transylvania, Henderson, Buncombe, Yancey, Madison, McDowell, Mitchell, Avery, Burke, Polk, Rutherford, Cleveland, Watauga, Ashe, Caldwell, Gaston, Lincoln, Catawba, Alexander, Wilkes, Alleghany, Surry, Yadkin, Iredell, Mecklenburg, Cabarrus, Stanley, Rowan, Davidson, Forsyth, Stokes, Rockingham, Guilford, Randolph, Caswell, Person, Durham, Orange, and Alamance Counties; (6) from Savannah, Ga., to points in North Carolina which lie within Cherokee, Clay, Macon, and Jackson Counties; (7) from Mobile, Ala., to points in North Carolina; (8) from Gulfport, Miss., to points in North Carolina; (9) from New Orleans, La., to points in North Carolina; (B) *Meats, meat products, meat by-products, dairy products*, and *articles* distributed by meat packinghouses as described in Sections A, B, and C of Appendix I to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766; (1) from Orangeburg, S.C., to points in Florida lying within Escambia, Santa Rosa, Okaloosa, Walton, Holmes, Washington, Bay, Jackson, Calhoun, Gulf, Liberty, Franklin, Wakulla, Gadsden, Jefferson, Leon, Madison, Taylor, Hamilton, Suwannee, Lafayette, Dixie, Columbia, Baker, Union, Gilchrist, Alachua, Levy, Nassaw, Duval, Clay, St. Johns, Bradford, Putnam, Flagler, Marion, and the point of Daytona Beach in Volusia County (Georgia) *; (C) *Meats, meat products, meat by-products, dairy products*, and *articles* distributed by meat packinghouses as described in Sections A, B, and C of Appendix I to the report in Descriptions in Motor Carrier Certificates, 61 M.C.C. 209 and 766, from Orangeburg, S.C., to all points in Alabama (Georgia) *; (D) *Meats, meat products, meat by-products, dairy products*, and *articles* distributed by meat packinghouses, as described in Sections A, B, and C of Appendix I to the report in Descriptions in Motor Carrier Certificates, 61 M.C.C. 209 and 766, from Orangeburg, S.C., to Chattanooga, Tenn. (Georgia) *; and (E) *Meats, meat products, meat by-products, dairy products*, and *articles* distributed by meat packinghouses, as described in Sections A, B, and C of Appendix I to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766, from Orangeburg, S.C., to points in South Carolina which lie within Pickens, Anderson, Oconee, and Abbeville Counties, and points in North Carolina within Cherokee and Clay Counties (Georgia) *. The purpose of this filing is to eliminate the gateways indicated by asterisks above.

No. MC 115331 (Sub-No. E27), (Correction), filed June 3, 1974, published in the FEDERAL REGISTER February 10, 1975. Applicant: TRUCK TRANSPORT, INC., 230 St. Clair Ave., East St. Louis, Ill. 62201. Applicant's representative: E. Stephen Heisley, 666 Eleventh St. NW., Washington, D.C. 20001. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Chemicals*, in containers, from points in Nevada, to points in Pennsylvania, West Virginia, Kentucky, Ohio, Indiana, Michigan, Illinois, those points in Wisconsin on and south of Wisconsin Highway 64, those points in Iowa on and east of a line beginning at the Iowa-Missouri State line and extending along U.S. Highway 218 to junction Iowa Highway 1, thence along Iowa Highway 1 to junction U.S. Highway 151, thence along U.S. Highway 151 to the Iowa-Wisconsin State line, those points in Missouri on and east of a line beginning at the Missouri-Iowa State line and extending along unnumbered Missouri highway to junction U.S. Highway 61, thence along U.S. Highway 61 to junction Interstate Highway 70, thence along Interstate Highway 70 to the Missouri-Illinois State line. The purpose of this filing is to eliminate the gateway of El Paso, Ill. The purpose of this correction is to redescribe the territorial descriptions.

No. MC 115826 (Sub-No. E20), filed June 4, 1974. Applicant: W. J. DIGBY, INC., P.O. Box 5088, Denver, Colo. 80217. Applicant's representative: Charles J. Kimball, 2310 Colorado State Bank Bldg., Denver, Colo. 80202. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Fresh, frozen, and cured meats* and *frozen meat products*, in vehicles equipped with mechanical refrigeration; (1) from those points in California on and west of a line beginning at the Pacific Ocean and extending along Interstate-Highway 8 to junction Interstate Highway 15, thence along Interstate Highway 15 to junction U.S. Highway 395, thence along U.S. Highway 395 to junction U.S. Highway 6, thence along U.S. Highway 6 to the California-Nevada State line, to points in Minnesota, Wisconsin, the District of Columbia, those in Nebraska on, east, and north of a line beginning at the Nebraska-South Dakota State line and extending along U.S. Highway 81 to junction U.S. Highway 275, thence along U.S. Highway 275 to junction U.S. Highway 77, thence along U.S. Highway 77 to junction U.S. Highway 34, thence along U.S. Highway 34 to the Nebraska-Iowa State line, those in Iowa on and north of U.S. Highway 34, and those in Indiana on and north of a line beginning at the Indiana-Illinois State line and extending along Indiana Highway 26 to junction U.S. Highway 41, thence along U.S. Highway 41 to junction Indiana Highway 28, thence along Indiana Highway 28 to junction Indiana Highway 9, thence along Indiana Highway 9 to junction Indiana Highway 67, thence along Indiana Highway 67 to the Indiana-Ohio State line; and

(2) from those points in California on and north of a line beginning at the Pacific Ocean at San Francisco, Calif., and extending along Interstate Highway 280 to San Jose, Calif., thence along Interstate Highway 680 to junction Interstate Highway 580, thence along Interstate Highway 580 to junction Interstate Highway 5, thence along Interstate Highway 5 to Stockton, Calif., thence along California Highway 99 to junction Interstate Highway 80, thence along Interstate Highway 80 to the California-Nevada State line, to points in Indiana, Iowa, Minnesota, Missouri, Nebraska, Wisconsin, the District of Columbia, and those in Kansas on, east, and north of a line beginning at the Kansas-Oklahoma State line and extending along U.S. Highway 281 to junction U.S. Highway 54, thence along U.S. Highway 54 to junction U.S. Highway 154, thence along U.S. Highway 154 to junction U.S. Highway 283, thence along U.S. Highway 283 to junction Interstate Highway 70, thence along Interstate Highway 70 to the Colorado-Kansas State line. The purpose of this filing is to eliminate the gateway of Rigby, Idaho.

No. MC 115826 (Sub-No. E38), filed June 4, 1974. Applicant: W. J. DIGBY, INC., P.O. Box 5088, Denver, Colo. 80202. Applicant's representative: Charles J. Kimball, 2310 Colorado State Bank Bldg., Denver, Colo. 80202. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Fresh, frozen, and cured meats* and *frozen meat products*, in vehicles equipped with mechanical refrigeration; (1) from those points in California north of a line beginning at the Pacific Ocean and San Diego and extending along U.S. Highway 395 to junction U.S. Highway 66, thence along U.S. Highway 66 to Barstow, thence along California Highway 58 to junction U.S. Highway 395, thence along U.S. Highway 395 to junction U.S. Highway 6, thence along U.S. Highway 6 to the California-Nevada State line and south of a line beginning at the California-Nevada State line and extending along Interstate Highway 80 to junction California Highway 20, thence along California Highway 20 to junction California Highway 1, thence along California Highway 1 to Ft. Bragg, to points in Montana, Maryland, Massachusetts, Michigan, New Jersey, New York, Ohio, Pennsylvania, and those in Illinois on and north of a line beginning at the Illinois-Iowa State line and extending along U.S. Highway 34 to junction Illinois Highway 116, thence along Illinois Highway 116 to Peoria, thence along Interstate Highway 74 to junction Illinois Highway 9, thence along Illinois Highway 9 to the Illinois-Indiana State line; and

(2) From those points in California on and west of a line beginning at San Francisco and extending along Interstate Highway 280 to San Jose, thence along Interstate Highway 680 to junction Interstate Highway 580, thence along Interstate Highway 580 to junction California Highway 33, thence along California Highway 33 to junction California Highway 140, thence along California Highway 140 to Merced, thence along California Highway 99 to junction Interstate Highway 80, thence along Interstate Highway 80 to junction California Highway 49, thence along California Highway 49 to junction California Highway 89, thence along California Highway 89 to junction California Highway 36, thence along California Highway 36 to junction U.S. Highway 395, thence along U.S. Highway 395 to Alturas, thence along California Highway 299 to the California-Nevada State line, to points in Illinois, Maryland, Massachusetts, Michigan, New Jersey, New York, Ohio, Pennsylvania, those in Montana on and east of U.S. Highway 91 and those in Colorado on, east, and north of a line beginning at the Colorado-Wyoming State line and extending along U.S. Highway 287 to junction Colorado Highway 66, thence along Colorado Highway 66 to junction U.S. Highway 36, thence along U.S. Highway 36 to junction Colorado Highway 121, thence along Colorado Highway 121 to junction Colorado Highway 470, thence along Colorado Highway 470 to junction Interstate Highway 25, thence along Interstate Highway 25 to junction U.S. Highway 24, thence along U.S. Highway 24 to the Colorado-Kansas State line. The purpose of this filing is to eliminate the gateway of Roberts, Idaho.

No. MC 117344 (Sub-No. E30), filed June 2, 1974. Applicant: MAXWELL CO., 10380 Evendale Drive, Cincinnati, Ohio 45215. Applicant's representative: Thomas L. Maxwell (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Vegetable oils*, in bulk, in tank vehicles, from points in Illinois (except Chicago), on, north, and east of a line beginning at the Illinois-Indiana State line and extending along U.S. Highway 30 to junction U.S. Highway 51, thence along U.S. Highway 51 to the Illinois-Wisconsin State line to points in Alabama on, east, and south of a line beginning at the Alabama-Tennessee State line and extending along U.S. Highway 31 to Birmingham, thence along U.S. Highway 11 to the Alabama-Mississippi State line and from Kankakee, Ill., to points in Alabama on, east, and, south of a line beginning at the Alabama-Tennessee State line and extending along U.S. Highway 231 to junction U.S. Highway 11, thence along U.S. Highway 11 to the Alabama-Mississippi State line. The purpose of this filing is to eliminate the gateway of Cincinnati, Ohio.

No. MC 117344 (Sub-No. E32), filed June 2, 1974. Applicant: MAXWELL CO., 10380 Evendale Drive, Cincinnati, Ohio 45215. Applicant's representative: Thomas L. Maxwell (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Vegetable oils*, in bulk, in tank vehicles, from points in Indiana on and north of Interstate Highway 74 (except Indianapolis), to points in Tennessee on and east of Tennessee Highway 56 (except Kingsport and Elizabethtown). The purpose of this filing is to eliminate the gateway of Cincinnati, Ohio.

No. MC 117344 (Sub-No. E72), filed June 4, 1974. Applicant: THE MAXWELL CO., 10380 Evendale Drive, Cincinnati, Ohio 45215. Applicant's representative: Thomas L. Maxwell (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Vegetable oils*, in bulk, in tank vehicles, from Dearborn County, Md., to points in Illinois and from Switzerland County, Ind., to points in Illinois on and north of U.S. Highway 36. The purpose of this filing is to eliminate the gateway of Cincinnati, Ohio.

No. MC 117344 (Sub-No. E77) (Correction), filed May 21, 1974, published in the FEDERAL REGISTER March 6, 1975. Applicant: THE MAXWELL CO., 10380 Evendale Drive, Cincinnati, Ohio 45215. Applicant's representative: Thomas L. Maxwell (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Liquid glue and liquid synthetic resins*, in bulk, in tank vehicles, from Delaware County, Ohio, to points in Alabama, Arkansas, Georgia, Mississippi, South Carolina, Tennessee, and Texas. The purpose of this filing is to eliminate the gateway of Taylorport, Ky. The purpose of this is to reflect correct "E" number, previously published as E48.

No. MC 119968 (Sub-No. E9), filed May 20, 1974. Applicant: A. J. WEIGAND, INC., 3966 Pearl Rd., Cleveland, Ohio 44109. Applicant's representative: Paul F. Beery, 8 East Broad St., Columbus, Ohio 43215. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Such commodities* as are manufactured and sold by chemical manufacturing plants (except petroleum products, in bulk, in tank trucks), when moving to or from warehouses or other facilities of chemical manufacturing plants, that are included in machinery, equipment, materials, and supplies used by chemical manufacturing plants, in bulk, between points in both Indiana and Cambria Counties (north of U.S. Highway 22), Pennsylvania, on the one hand, and, on the other, points in Illinois, Indiana, Kentucky, the southern peninsula of Michigan, those points in Ohio on and west of a line beginning at Sandusky, Ohio, and extending along U.S. Highway 250 to junction Interstate Highway 77, thence along Interstate Highway 77 to junction Interstate Highway 70, thence along Interstate Highway 70 to junction Ohio Highway 93, thence along Ohio Highway 93 to junction Ohio Highway 13, thence along Ohio Highway 13 to junction U.S. Highway 33, thence along U.S. Highway 33 to the Ohio-West Virginia State line, those points in West Virginia on and west of a line beginning at the Ohio-West Virginia State line and extending along U.S. Highway 33 to junction Interstate Highway 77, thence along Interstate Highway 77 to junction U.S. Highway 119, thence along U.S. Highway 119 to the West Virginia-Kentucky State line. Restriction: The operations herein

V 40168
APR 8 75

are subject to the condition that the authorization shall be null and void on the same date as the effective date of any action of the Commission that results in the imposition of a "no tacking" restriction on the authorities in Certificate No. MC 119969 that are the underlying rights supporting this gateway elimination proposal. The purpose of this filing is to eliminate the gateway of Dover, Ohio.

No. MC 124078 (Sub-No. E43), filed October 21, 1974. Applicant: SCHWERMAN TRUCKING CO., 611 S. 28th St., Milwaukee, Wis. 53246. Applicant's representative: Richard H. Prevette (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Sand*, in bulk, in tank vehicles, from the facilities of the Hardy Sand Co., at or near Camden and Lipe, Tenn., to points in West Virginia in and east of Mingo, Logan, Boone, Raleigh, Fayette, Nicholas, Webster, Upshur, Barbour, Taylor, and Preston Counties, W. Va. (2) *Sand*, in bulk, in tank vehicles, from the facilities of the Hardy Sand Co., at or near Camden and Lipe, Tenn., to points in Iowa in and north of Plymouth, Cherokee, Ida, Crawford, Carroll, Greene, Boone, Story, Jasper, Poweskiek, Iowa, Johnson, and Louisa Counties, Iowa. (3) *Silica sand* and *ground silica sand*, from the facilities of the Hardy Sand Co., at or near Camden and Lipe, Tenn., to points in Florida (except points in Escambia, Santa Rosa, Okaloosa, and Walton Counties). (4) *Silica sand, silica flour* and *silica sand* with additives, in bulk, in tank vehicles, from the facilities of the Hardy Sand Co., at or near Camden and Lipe, Tenn., to points in Oklahoma, Texas, and Kansas (except those in Republic, Washington, Marshall, Nemaha, Brown, Doniphan, and Atchison Counties, Kans.). The purpose of this filing is to eliminate the gateways of (1) Pound, Va.; (2) Oregon, Ill.; (3) Thomas County, Ga.; and (4) Guion, Ark.

No. MC 124078 (Sub-No. E78), filed November 11, 1974. Applicant: SCHWERMAN TRUCKING COMPANY, P.O. Box 1601, Milwaukee, Wis. 53201. Applicant's representative: Richard H. Prevette (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting:

(1) *Chemicals*, in bulk, in tank vehicles, from points in Columbia County, Fla., to points in Arkansas in and north of Phillips, Monroe, Prairie, Lonoke, Pulaski, Perry, Yell, Logan, and Sebastian Counties, Ark.; points in Kentucky, in and west of Lewis, Fleming, Bath, Montgomery, Clark, Madison, Garrard, Lincoln, Casey, Russell, and Cumberland Counties, Ky.; Indiana, Michigan, and Ohio.

(2) *Liquid chemicals*, in bulk, in tank vehicles, from points in Columbia County, Fla., to points in Illinois, Minnesota, Missouri, Rhode Island, and Wisconsin.

(3) *Liquid chemicals* (except petroleum products and fertilizers), in bulk, in tank vehicles, from points in Columbia County, Fla., to points in Colorado, in and north of Montrose, Gunnison, Chaffee, Park, Teller, El Paso, Lincoln, and Kit Carson Counties, Colo.; points in Iowa; points in Kansas in and north of Greeley, Logan, Gove, Trego, Rooks, Osborne, Mitchell, Cloud, Washington, and Marshall Counties, Kans.; Nebraska, North Dakota, South Dakota, and Wyoming.

(4) *Liquid chemicals*, in bulk, in tank vehicles, from points in Columbia County, Fla., to points in Scott, Polk, Sevier, Little River, Howard, Montgomery, Pike, Hempstead, Nevada, Clark, Hot Spring, Garland, Saline, Grant, Dallas, Ouachita, Cleveland, Jefferson, and Arkansas Counties, Ark.

(5) *Dry chemicals* (except petroleum products and fertilizers), in bulk, in tank vehicles, from points in Columbia County, Fla., to points in Minnesota, North Dakota, South Dakota, Nebraska, Wyoming; points in Kansas, in and north of Greeley, Logan, Gove, Trego, Rooks, Osborne, Mitchell, Cloud, Washington, and Marshall Counties, Kans.; and points in Colorado, in and north of Montrose, Gunnison, Chaffee, Park, Teller, El Paso, Lincoln, and Kit Carson Counties, Colo.

(6) *Dry chemicals*, in bulk, in tank vehicles, from points in Columbia County, Fla., to points in Illinois (except East St. Louis, Ill., and points in its commercial zone as defined by the Commission), Missouri (except St. Louis and points in its commercial zone as defined by the Commission), Wisconsin; points in Kentucky, in, south, and east of Greenup, Carter, Rowan, Menifee, Powell, Estill, Jackson, Rockcastle, Pulaski, Wayne, and Clinton Counties, Ky.; points in West Virginia, in, north, and west of Mingo, Logan, Boone, Kanawha, Clay, Braxton, Lewis, Upshur, Barbour, and Preston Counties, W. Va.; and points in Scott, Polk, Sevier, Little River, Howard, Montgomery, Pike, Hempstead, Nevada, Clark, Hot Spring, Garland, Saline, Grant, Dallas, Cleveland, Jefferson, Arkansas, Lincoln, Desha, Bradley, Ouachita, and Calhoun Counties, Ark. The purpose of this filing is to eliminate the gateways of (1) Robertson County, Tenn.; (2) Chattanooga, Tenn.; (3) Chattanooga, Tenn., and La Salle, Ill. (plant site restriction); (4) Maury County, Tenn.; (5) Bartow County, Ga., and La Salle, Ill.; and (6) Bartow County, Ga.

No. MC 127042 (Sub-No. E39), filed March 10, 1975. Applicant: HAGEN, INC., P.O. Box 98, Leeds Station, 3232 Highway 75 North, Sioux City, Iowa. Applicant's representative: Edward A. O'Donnell (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Scented oils, cleaning compounds*, and *toilet preparations* and *supplies*, from Madrid, Iowa, to points in Arkansas and Oklahoma, restricted against the transportation of the involved commodities in bulk. The purpose of this filing is to eliminate the gateway of Brookfield, Mo.

No. MC 127042 (Sub-No. E40), filed March 10, 1975. Applicant: HAGEN, INC., P.O. Box 98, Leeds Station, 3232 Highway 75 North, Sioux City, Iowa. Applicant's representative: Edward A. O'Donnell (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Soap, toilet preparations*, and *cleaning compounds* (except in bulk), from Eldora, Iowa, to points in Arkansas, New Mexico, Oklahoma, and Texas. The purpose of this filing is to eliminate the gateway of Brookfield, Mo.

No. MC 127042 (Sub-No. E41), filed March 10, 1975. Applicant: HAGEN, INC., P.O. Box 98, Leeds Station, 3232 Highway 75 North, Sioux City, Iowa. Applicant's representative: Edward A. O'Donnell (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Soap, toilet preparations*, and *cleaning compounds* (except in bulk), from Brookfield, Mo., to points in Michigan. The purpose of this filing is to eliminate the gateway of Eldora, Iowa.

No. MC 127834 (Sub-No. E2), filed December 20, 1974. Applicant: CHEROKEE HAULING & RIGGING, INC., 540–42 Merritt Avenue, Nashville, Tenn. 37203. Applicant's representative: Paul M. Daniell, Suite 1600, First Federal Building, Atlanta, Ga. 30303. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Iron* and *steel articles* as described in Appendix V to the report in *Description in Motor Carrier Certificate*, 61 M.C.C. 209, from the facilities of Keystone Tubular Service Corporation at Butler, Pa., to points in Arkansas, restricted to traffic originating at the facilities of Keystone Tubular Service Corporation. The purpose of this filing is to eliminate the gateway of Nashville, Tenn. (2) *Iron* and *steel articles* as described in Appendix V to the report in *Description in Motor Carrier Certificate*, 61 M.C.C. 209, from the facilities of Keystone Tubular Service Corporation at Springdale, Pa., to points in Arkansas, restricted to traffic originating at the facilities of Keystone Tubular Service Corporation. The purpose of this filing is to eliminate the gateway of Nashville, Tenn.

(3) *Iron* and *steel articles* as described in Appendix V to the report in *Description in Motor Carrier Certificate*, 61 M.C.C. 209, from the facilities of Keystone Tubular Service Corporation at Butler, Pennsylvania, to points in that part of Missouri on and south of a line beginning at the Illinois-Missouri State line, thence along Missouri Highway 34 to junction U.S. Highway 61, thence along U.S. Highway 61 to junction Missouri Highway 72, thence along Missouri Highway 72 to junction Missouri Highway 32, thence along Missouri Highway 32 to junction Missouri Highway 64, thence along Missouri Highway 64 to junction U.S. Highway 65, thence along U.S. Highway 65 to junction Missouri Highway 7, thence along Missouri Highway 7 to junction U.S. Highway 65, thence along U.S. Highway 65 to junction Missouri Highway 72, thence along Missouri Highway 72 to junction Missouri Highway 32, thence along Missouri Highway 32 to junction Missouri Highway 65, thence along Missouri Highway 65 to junction Missouri Highway 7, thence along Missouri Highway 7 to junction Missouri Highway 18, thence along Missouri Highway 18 to the Missouri-Kansas State line, restricted to traffic originating at the facilities of Keystone Tubular Service Corporation. The purpose of this filing is to eliminate the gateway of Springfield, Tenn.

(4) *Iron* and *steel articles* as described in Appendix V to the report in *Description in Motor Carrier Certificate*, 61 M.C.C. 209, from the facilities of Keystone Tubular Service Corporation at Springdale, Pennsylvania, to points in that portion of Missouri on and south of thence along Missouri Highway 34 to junction U.S. Highway 61, thence along U.S. Highway 61 to junction Missouri Highway 72, thence along Missouri Highway 72 to junction Missouri Highway 32, thence along Missouri Highway 32 to junction Missouri Highway 64, thence along Missouri Highway 64 to junction U.S. Highway 65, thence along U.S. Highway 65 to junction Missouri Highway 7, thence along Missouri Highway 7 to junction U.S. Highway 65, thence along U.S. Highway 65 to junction Missouri Highway 7, thence along Missouri Highway 7 to junction Missouri Highway 18, thence along Missouri Highway 18 to the Missouri-Kansas State line restricted to traffic originating at the facilities of Keystone Tubular Service Corporation. The purpose of this filing is to eliminate the gateway of Springfield, Tenn. (5) *Iron* and *steel articles* as described in Appendix V to the report in *Description in Motor Carrier Certificate*, 61 M.C.C. 209, from the facilities of Keystone Tubular Service Corporation at Butler, Pa. to points in that part of Kentucky on and west of U.S. Highway 231, restricted to traffic originating at the facilities of Keystone Tubular Service Corporation. The purpose of this filing is to eliminate the gateway of Springfield, Tenn. (6) *Iron* and *steel articles* as described in Appendix V to the report in *Description in Motor Carrier Certificate*, 61 M.C.C. 209, from the facilities of Keystone Tubular Service Corporation at Springdale, Pa., to points in that part of Kentucky on and west of U.S. Highway 231, restricted to traffic originating at the facilities of Keystone Tubular Service Corporation. The purpose of this filing is to eliminate the gateway of Springfield, Tenn.

By the Commission.

FOURTH SECTION APPLICATION FOR RELIEF

APRIL 3, 1975.

An application, as summarized below, has been filed requesting relief from the requirements of section 4 of the Interstate Commerce Act to permit common carriers named or described in the application to maintain higher rates and charges at intermediate points than those sought to be established at more distant points.

Protests to the granting of an application must be prepared in accordance with Rule 40 of the General rules of practice (49 CFR 1100.40) and filed on or before April 23, 1975.

FSA No. 42968—*Beet or Cane Sugar from Points in Louisiana*. Filed by Southwestern Freight Bureau, Agent, (No. B–519), for interested rail carriers. Rates on sugar, beet or cane, in bulk or in packages, in carloads, as described in the application, from points in Louisiana, to Addison and Great Southwest South, Texas.

Grounds for relief—Rate relationship.

Tariff—Supplement 108 to Southwestern Freight Bureau, Agent, tariff 72–H, I.C.C. No. 4886. Rates are published to become effective on May 16, 1975.

By the Commission.

[SEAL] ROBERT L. OSWALD,
Secretary.

Title 45—Public Welfare

CHAPTER I—OFFICE OF EDUCATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

SCHOOL CONSTRUCTION

Assistance in Cases of Certain Disasters

Notice of proposed rule making was published in the FEDERAL REGISTER on July 25, 1974 at (39 FR 27232) setting forth regulations prescribing certain policies and requirements for criteria in determining the amounts of Federal assistance to local educational agencies in cases of certain disasters, for school construction in areas affected by Federal activities, for current expenditures in areas affected by Federal activities, and for arrangements for education of children where local educational agencies cannot provide suitable free public education as provided for in Public Laws 81–874 and 81–815 (20 U.S.C. 236–241–1, 242–244 and 20 U.S.C. 631–647 respectively.) Interested persons were given 30 days in which to submit written comments, suggestions, or objections regarding the proposed regulations.

Pursuant to section 503 of the Education Amendments of 1972 a public hearing was held on August 26, 1974 in Washington, D.C. The following comments were received to which we hereby respond.

Comment. Three comments were received in reference to the second count of federally connected school membership under § 115.3(f) of Part 115. All three commenters read the proposed rule as requiring a second count of federally connected school memberships and criticized this proposal on the ground that much instructional and administrative time would be consumed in the conduct of such a count.

Response. The Office of Education is acutely aware of the many demands upon the time of local educational agencies and has consistently sought to reduce such record-keeping requirements under assistance programs to a minimum. The second count of membership in § 115.3(f) was not intended to be mandatory. It is to be conducted only at the option of the applicant. However, if the applicant does decide to make such a second count, such count must be made in the manner set forth in these regulations. To avoid confusion, language has been added to § 115.3 (e) and (f)(1) to make it clear that the second count of school membership is optional.

Comment. One comment was received which was critical of the publication of the rules related to Pub. L. 81–874 under section 503 of Pub. L. 92–318. It was stated that the proposed rules seem to represent major revisions and additions to the current regulations under these parts, and that such wholesale amendments could not be justified under the aforementioned authority.

Response. While these regulations are more detailed than those previously published under these parts, the additional detail reflects the incorporation into regulatory form of program bulletins and guidelines, clearly within the scope of section 503 of Pub. L. 92–318. Such revisions as are contained in the rules have been made in order to bring the regulations into conformity with present law and do not represent any change, other than minor and technical, in the program implementation of the basic laws.

Other changes. 1. A new paragraph (3)(n) has been added to § 112.1 to indicate that the term "Replacement or restoration of school facilities" includes amounts approved for assuring protection against personal injuries resulting from future disasters. The new paragraph incorporates statutory language of Pub. L. 93–380, section 302(b) amending Pub. L. 81–815, section 16(a).

2. In § 113.3(b)(5) the reference to "buses" in the first sentence has been deleted. A paragraph has been added to prescribe a new method of calculating the amount of Federal assistance available for replacing school buses destroyed or severely damaged by a disaster. This change in the regulation recognizes that it is extremely difficult for local educational agencies to locate suitable used buses to replace those rendered inoperative by a disaster, and that the real cost to such agencies for restoring school bus service is usually the cost of new buses less any reimbursement for those lost or any State subsidy. At present, the limit of Federal assistanse for destroyed or severely damaged buses is the "fair market value" of repair or replacement of each bus damaged or destroyed, less reimbursement for loss. The new provision sets the maximum amount of assistance at actual cost less certain adjustments.

3. A new § 115.27 has been added to provide for the implementation of the "saving clauses" in sections 304(b)(1), 305(b)(2)(A) and 305(b)(2)(B) of Pub. L. 93–380 which relate to Pub. L. 81–874. The new section references the statutory provisions and prescribes the method of computing the basis for eligibility for section 305(b)(2)(B) of Pub. L. 93–380. The basis for the method of computation is the Pub. L. 81–874 section 3 ADA as determined under the regulation for each of the three eligibility periods created by Pub. L. 93–380.

4. References in §§ 114.58(e) and 114.62(c)(2) and in the appended Guidelines, §§ 2.8, 3.3(b)(4) and 3.3(b)(5) to approval or disapproval authority vested in the Regional OE Program Officer have been rewritten. No approval or disapproval authority is vested in such officers under these provisions as rewritten in the instances cited; the Regional OE Program Officer only has authority to review and recommend approval or disapproval of certain aspects of project applications. This change was made in order to bring the regulations and guidelines into conformity with section 403(c)(2) of the General Education Provisions Act, as amended by section 503(c) of the Education Amendments of 1974 (relating to delegations of certain functions to regional offices).

5. The definition of "Parent-pupil survey", as provided in §§ 114.1(r) and 115.3(j), has been partially rewritten to indicate that if a parent of a child claimed as federally-connected, is a parent on active duty in the uniformed services (as defined in section 102 of the Career Compensation Act of 1949), there is no requirement that the parent and the child reside together. In the past, the uniformed services clause has been administered in such a manner as to require that the federally-connected child reside with the parent who is on active duty in the uniformed services. The proposed regulations reflected this view in the "parent-pupil survey" form requirements. Under the revised regulations, it will not be necessary to establish whether the child is residing with the uniformed services parent. All that will be required to be ascertained initially will be the name, rank, serial number, and branch of service of such parent. This change has been made because it is now felt that the position most in keeping with the statutory language and the legislative history of the clause is not to impose such requirement.

6. The provision in proposed § 115.51 (b) requiring a family moving into housing on Federal property to occupy such housing within 90 days of the beginning of the school term in order to permit the children in such family to attend a "section 6" school has been changed. As revised, the regulation will require only that the family occupy the housing within 90 days of the actual reporting date at the Federal installation. It is believed that the original provision worked unfairly against children whose families moved to a Federal installation in the middle of a school term and could not reasonably be expected to occupy Federal housing within the time period allotted. By providing more of an opportunity for children of Federal personnel transferred during the school year to attend "section 6" schools, the revised rule will cause less of a disruption in the education of such children.

7. In addition to the above, several minor changes have been made to correct clerical errors or to affect technical matters. In the case of the amendments to the regulation described in 2 and 3 above, after deliberation, it has been determined, pursuant to 5 U.S.C. § 553, that inviting comments from the public with respect to such amendments is unnecessary in view of the minor and technical nature of the amendments involved. Moreover, in the case of the amendment described in 2, since the incidence of major disasters cannot be predicted with certainty, it is believed appropriate in the public interest that the amendment should take effect as promptly as possible in order to afford possibly affected school districts the benefits of this broadened form of disaster assistance.

Effective date: Pursuant to section 431 (d) of the General Education Provisions Act, as amended (20 U.S.C. 1232(d)) these regulations have been transmitted to the Congress concurrently with the publication of this document in the FEDERAL REGISTER. That section provides that regulations subject thereto shall become effective on the forty-fifth day following the date of such transmission, subject to the provisions therein concerning Congressional action and adjournment.

Dated: March 12, 1975.

T. H. BELL,
U.S. Commissioner of Education.

Approved: March 31, 1975.

CASPER W. WEINBERGER,
Secretary of Health, Education, and Welfare.

PART 112—SCHOOL CONSTRUCTION ASSISTANCE IN CASES OF CERTAIN DISASTERS

Subpart A—Definitions

Sec.
112.1 Definitions.

Subpart B—Financial Assistance

112.2 Eligibility for financial assistance.
112.3 Payments.

Subpart C—Applications

112.8 Applications.
112.10 Determination of priorities among applications.
112.11 Prohibition against payment for religious worship or instruction.

Subpart D—General

112.16 Applicability of General Provisions Regulations.

AUTHORITY: Section 16, (79 Stat. 1158) added to Pub. L. 81–815 (20 U.S.C. 646) as amended, unless otherwise noted.

Subpart A—Definitions

§ 112.1 Definitions.

As used in this part—

(a) "Act" means Pub. L. 815, 81st Congress (64 Stat. 976), as amended, section 16 of which was added by the first section of Pub. L. 89–313 (79 Stat. 1158).

(20 U.S.C. 646)

(b) "Complete application" means a preapplication, Exhibit M–4 of Federal Management Circular 74–7 and such other supplemental information as the Commissioner may request.

(20 U.S.C. 636(b)(1), 646(c).)

(c) "Filed" means that all necessary parts of the preapplication or the complete application, as appropriate, bearing the required certification and verifications by the State educational agency, are received by the Commissioner on or before the applicable filing date.

(20 U.S.C. 636(a), (b)(2)(B), (c))

(d) "Initial equipment" means any movable equipment necessary and appropriate to equip school facilities.

(20 U.S.C. 645(9), 646(a))

(e) "Incident period" means those days officially designated by the President or his representative as the dates upon which major disaster damages occurred.

(20 U.S.C. 646)

(f) "Latent damages" means those damages which, in the judgment of the Commissioner, constitute disaster caused damages to school facilities which may not be apparent immediately following the incident period of the disaster.

(20 U.S.C. 646(a))

(g) "Local educational agency" as used in this part is defined in sections 15(11) and 16(a)(1)(A) of the Act. If the local education agency as so defined does not have the responsibility for providing school facilities, and that responsibility is vested in a State, county, city, or town agency, then the term shall include such an agency, together with the agency having exclusive administrative control and direction of other phases of free public education.

(20 U.S.C. 645(11), 646(a)(1)(A))

(h) "Major disaster area" means an area which is determined, pursuant to sections 102(2) and 301 of the Disaster Relief Act of 1974 to have suffered, after August 30, 1965, a major disaster as a result of any flood, drought, fire, hurricane, earthquake, storm, or other catastrophe which is or threatens to be of sufficient severity and magnitude to warrant disaster assistance by the Federal Government. That certification which is required by section 301 of the Disaster Relief Act of 1974 by the Governor of the State in which such an area is located (relating the need for disaster assistance in that area and providing assurance of the expenditure of a reasonable amount of the funds of the government of that State, or of a political subdivision thereof) will be accepted to meet the certification requirement contained in section 16(a)(2) of the Act, if it contains sufficient information to meet the purposes of that section.

(20 U.S.C. 646(a)(1)(A), (a)(2), 1224(c); 42 U.S.C. 4402(1))

(i) "'Member" of a school shall be determined in accordance with State law or regulation. In the absence of State law or regulation, such a member is a child who has presented himself at school and has been placed on the current roll. Such a child shall be considered a member from the date of enrollment until he permanently leaves the school. Permanent leaving shall be determined under State rules if such are applicable, but the date of permanent withdrawal shall be the date on which it is officially known that the pupil has left school, and not necessarily the first day after the date of last attendance. Notwithstanding the above, if contracts to make tuition payments with regard to certain children are utilized, then membership shall be determined in accordance with the provisions of section 15(5) of the Act.

(20 U.S.C. 645(5))

(j) "Membership" means the sum of members of a school as defined in § 112.1 (i).

(20 U.S.C. 645(5))

(k) "Minimum school facilities" means the lesser of either (1) or (2): (1) Those school facilities necessary (i) to operate a program of free public education for the membership of the applicant at normal capacity in accordance with the laws and customs of the State, plus (ii) to serve, in the facilities of such agency, those children referred to in section 16(a)(5)(B) of the Act, or

(2) Those school facilities which (1) existed prior to the disaster (limited, however, to replacement of such areas in like-kind), plus (ii) are necessary to serve, in the facilities of such agency, those children referred to in section 16(a)(5)(B) of the Act.

(3) Such term does not include (i) athletic stadiums or structures or facilities intended primarily for athletic exhibitions, contests, or games or other events for which admission is to be charged to the general public; or (ii) interests in land and off site improvements.

(4) Such term may include an auditorium or gymnasium, or both, if justified by the size of the school's enrollment, the educational program to be conducted and the standards and practices in the State. Such facilities may provide seating only for the capacity of the student enrollment.

(5) Air conditioning may be provided to replace any air conditioning which existed prior to the disaster. If no such air conditioning existed prior to the disaster, then it may be provided as minimum school facilities in all States which are in whole or in part south of the 39° parallel, provided a letter is obtained from the authorized representative of the State that air conditioning is being provided in school facilities currently being constructed solely with State and local funds. Such air conditioning may be provided in any other State only if such letter is obtained and supported by a survey which substantiates that air conditioning is provided in a majority of recently constructed school facilities within the State.

(20 U.S.C. 645(9), (10), 646(a)(5))

(l) "Normal capacity" of a schoolroom means the number of pupil stations which the room accommodates under ordinary conditions in accordance with the laws and customs of the State governing free public education.

(20 U.S.C. 646(a))

(m) "Preapplication" means Exhibit M–1 of FMC 74–7 and such supplemental information as may be requested by the Commissioner.

(20 U.S.C. 646(c))

(n) "Replacement or restoration of school facilities" means the reconstruction of school facilities on the existing foundation and the making of substantial structural repairs to school facilities which were seriously damaged or destroyed.

(l) Such term does not include the making of urgent repairs to protect the school facilities from further damage or deterioration or to render the school fa-

V 40 168
APR 8 75
XUM

cilities immediately available for the providing of free public education.

(2) Such term includes reasonable expenditures in order to avoid or reduce future flood losses (including relocation), in accordance with Executive Order 11296. The reasonableness of such expenditures will be determined by the Commissioner on an individual basis, based upon such factors as (i) a comparison of such expenditures with the cost of restoring or replacing the facility excluding such expenditures, (ii) the probable consequence of a failure to make such expenditures, and (iii) comparative cost of alternative methods of avoiding or reducing future flood losses.

(3) Such term includes such additional amounts that the Commissioner may approve in order to assure that the facilities, as restored or replaced, will afford appropriate protection against personal injuries resulting from a disaster.

(20 U.S.C. 646(a); E.O. 11296; 88 Stat. 522)

(o) "Replacement of area in like-kind" means the cost of replacing or restoring the total area of the facility seriously damaged or destroyed which was in use at the time of the disaster with a similar permanent or temporary facility. Permanent school facilities include those facilities which are erected or constructed on the site for school purposes, affixed to the site and which have a utilization period of not less than 20 years from the date of being so affixed. Temporary school facilities means all other school facilities, including those facilities which (1) may be classified as portable, relocatable, demountable, mobile trailers or frame structures and (2) are moved onto the site for an indefinite period. An applicant may use the amount estimated as necessary to replace or restore temporary facilities to instead construct permanent facilities.

(20 U.S.C. 646(a))

(p) "Seriously damaged" means that a school facility, structure or a portion thereof has been rendered unusable or partly unusable for school purposes for an extended period of time.

(20 U.S.C. 646(a) (1), (3))

(q) "School facilities" includes such facilities as defined in section 15(9) of the Act. Such term includes only such facilities which (1) were in use prior to the occurrence of a major disaster, including classrooms and related facilities; (2) are newly constructed facilities which the applicant accepted from the builder as being completed; and (3) are facilities for the replacement or restoration of which the local educational agency or public agency is legally responsible under the State law.

(20 U.S.C. 645 (9), (10), 646(a) (1), (3), (4))

(r) "Total square feet of floor area" means the sum of square feet of a facility in use for school purposes at the time of the disaster from the exterior wall surface to exterior wall surface, at the respective floor levels.

(20 U.S.C. 646(a))

Subpart B—Financial Assistance

§ 112.2 Eligibility for financial assistance.

(a) Eligibility for financial assistance will be determined in accordance with the provisions of the Act, and section 7(a)(4) of Pub. L. 81–874.

(20 U.S.C. 241–1(a)(4), 646(a)(6))

(b) In all cases determined pursuant to clause (a)(1)(A) of section 16, if the Commissioner finds that funds other than Federal funds will, in the near future, become available to the local educational agency specifically for the purpose of providing school construction assistance in cases of such disasters, then Federal financial assistance may, to the extent that such funds are to become so available, be in the form of a repayable advance subject to repayment, without interest, when available.

(20 U.S.C. 646(a))

(c) Factors which the Commissioner will consider when determining whether damages require restoration or replacement under section 16 of the Act (as contrasted with minor repairs authorized under section 7(b) of Pub. L. 81–874 (20 U.S.C. 241–1) include the following:

(1) The ratio of section 16 funds available to the total estimated cost of replacement or restoration of destroyed or seriously damaged facility;

(2) The speed at which such replacement or restoration may be accomplished with the local, State, and Federal funds available;

(3) Whether the remaining structure must be razed before replacement or restoration can commence;

(4) Whether the applicant intends to rebuild on another site;

(5) Whether the applicant plans restoration which will differ significantly from the original design of the structure that was damaged;

(6) Whether the applicant plans to use the amount estimated as necessary to repair or restore the damaged facility to construct additional square footage rather than to repair the damaged facilities; and

(7) Whether an insurance settlement is made on the basis of major structural damage to the facility.

(d) Federal financial assistance under section 16 of the Act will be limited to the amount deemed by the Commissioner to be necessary as additional assistance (after considering practicably available local, State or Federal resources) in order for the local educational agency to provide for the replacement or restoration of minimum school facilities destroyed or seriously damaged as a result of a major disaster:

(1) When such a school facility is seriously damaged but not destroyed, financial assistance under this section will be limited to the lesser of the following costs, as determined by the Commissioner.

(i) The cost of restoring the facility on the same foundation on the same site; or

(ii) The cost of replacing the facility on the same site or a new site;

(2) When such a school facility is destroyed, financial assistance under this section may be provided to replace the facility, at the existing site or at a new site, whichever costs, as determined by the Commissioner, will be the lesser;

(3) Costs for replacement or restoration may include, if appropriate, the cost of demolition of all or part of the affected portion of the seriously damaged or destroyed facility and the cost of replacement, with public school facilities, of those minimum private elementary or secondary school facilities which were destroyed and which will not be replaced.

(e) Assistance will be provided under section 16 of the Act only if the Commissioner, after consultation with appropriate State and local educational agencies, finds that the replacement or restoration of the seriously damaged or destroyed school facilities (1) would not be inconsistent with overall State plans with respect to the construction of school facilities; and (2) includes such reasonable steps as may be desirable to minimize future Federal expenditures for flood protection and flood disaster relief in accordance with Executive Order 11296.

(20 U.S.C. 646(c); E.O. 11296)

(f) Federal financial assistance provided under section 16 of the Act (as being necessary to enable the local educational agency to provide the needed minimum school facilities), will not exceed (1) the total needed to pay for the costs of construction incident to the replacement or restoration of school facilities destroyed or seriously damaged as a result of a major disaster, and (2) the amount needed to provide the minimum school facilities needed to serve, in the facilities of said agency, children who but for the serious damage to or destruction of private facilities would be served by said private facilities (less all amounts available to the applicant specifically for such a purpose from local, State, other Federal sources, and from the proceeds of insurance on the school facilities destroyed or seriously damaged as a result of the major disaster). The applicant will be expected to prosecute insurance claims promptly and to the full legal limit. It is not necessary to replace facilities destroyed or seriously damaged with identical facilities, provided that the replacement facility constitutes replacement of area in like-kind with minimum school facilities.

(20 U.S.C. 646(a))

(g) Funds available for replacement or restoration of school facilities destroyed or seriously damaged as a result of a major disaster include:

(1) All unobligated or unencumbered non-Federal funds which the Commissioner determines have been set aside in the nature of an insurance reserve for the purpose of replacing or restoring those school facilities of the applicant that are destroyed or seriously damaged; and

(2) The proceeds of bonds that have been voted specifically for the replacement of a school facility which is destroyed or seriously damaged.

(3) If funds described in (g)(1) or (g)(2) of this section are not immediately available, the Commissioner may provide assistance in the form of an advance to be repaid, without interest, from such proceeds when they become available as determined by the Commissioner.

(20 U.S.C. 646(a) (4), (5))

(h) The school facility so provided must be functional and not elaborate in design or extravagant in the use of materials in comparison with school facilities of a similar type constructed in the State within recent years. All replacement or restoration work must be undertaken in an economical manner.

(20 U.S.C. 646(a)(4), (c))

(i) All determinations made by the Commissioner under this part shall be made only after consultation with the appropriate State educational agency and local educational agency.

(20 U.S.C. 646(c))

§ 112.3 Payments.

(a) Payments to an applicant in a major disaster area under section 16 of the Act will be made only on the basis of a complete application which satisfies the conditions for payment prescribed by section 16 of the Act and the regulations in this part.

(b) Upon approval of the complete application of a local educational agency under section 16 of the Act, the Commissioner may pay to such agency an amount equal to 10 per centum of the estimated cost of the construction incident to the replacement or restoration of the school facilities destroyed or seriously damaged as a result of a major disaster.

(c) No construction contract exceeding the estimated cost as shown in the project application shall be entered into without prior approval.

(20 U.S.C. 636(b)(1), 646 (a), (c), (d), 1232(c))

Subpart C—Applications

§ 112.8 Applications.

(a) Federal financial assistance under section 16 of the Act will be provided on the basis of a complete application which is filed by an applicant, and which sets forth the basis for eligibility for such assistance and identifies the project or projects for which such assistance is requested.

(b) A preapplication must be filed with the Commissioner through the appropriate State educational agency on or before 90 days following that date on which the area in which the local educational agency is, in whole or in part, located is designated as being within a major disaster area except that whenever such date falls on a Saturday, Sunday or Federal holiday, the final day for filing the application shall be the next succeeding business day. The complete application must be filed with the Commissioner within 90 days of the notice of preapplication review action. In the event that necessary decision-making processes at local and State levels prevent the filing of a preapplication by the applicable filing date, a "letter of intent" to file a preapplication within 180 days and a complete application within 360 days after the occurrence of the disaster must be filed with the Commissioner.

(20 U.S.C. 636(b)(1), 646(c))

§ 112.10 Determination of priorities among applications.

(a) The Commissioner will determine the order of priority for all applications involving the replacement or restoration of school facilities, the destruction of or serious damage to which requires the relocation of students. Such applications of all local educational agencies will be assigned priorities in descending order on the basis of the percentage, that the total number of children in the school district who are so relocated (after deducting the number of children within the local educational agency who were considered in connection with another such priority with respect to the same disaster) bears to the total memberships of all schools in the school district. Such membership will be determined on the basis of the latest and best information available. For the purpose of this section, the number of children reported as requiring relocation must include the number of children displaced from private schools as a result of the major disaster who are to be served by the local educational agency and who, but for the destruction of the private school facilities, would be served by the private facilities.

(b) All other applications for the replacement or restoration of school facilities destroyed or seriously damaged as a result of a major disaster will be assigned priorities lower than the priorities assigned under paragraph (a) of this section. Priorities will be assigned to school facilities under this paragraph (b) on the basis of the amount of financial assistance requested, and estimated by the Commissioner to be reasonable in amount, in comparison with the unused bond sale capacity for public school facilities available to the school district in which the school facility to be restored or replaced was located. The unused bond sale capacity will be computed on the basis of facts as of the date of the determination of the disaster. Such applications of all local educational agencies will be assigned priorities in descending order on the basis of the percentage that the amount of the financial assistance so determined with respect to all such applications (after deducting the amount of such financial assistance under such applications previously assigned to priority in accordance with the order of their consideration that is specified by the local education agency) bears to the unused bond sale capacity available to the school district in which the school facility to be restored or replaced was located.

(20 U.S.C. 646 (b), (c))

§ 112.11 Prohibition against payment for religious worship or instruction.

Nothing contained in the Act or the regulations in this part shall be construed to authorize the use of payments made under the Act for religious worship or instruction.

(20 U.S.C. 646(a)(6); 241–1(a)(4))

Subpart D—General

§ 112.16 Applicability of general provisions regulations.

(a) Provisions contained in Parts 100 and 100a of the regulations entitled "General Provisions for Office of Education Programs" are applicable to programs conducted under the Act, with the following exceptions:

(1) Section 100a.26(b) (Criteria for review of applications);

(2) Section 100a.161 (Title to site);

(3) Subpart L, §§ 100a.209–220 (Property management requirements);

(4) Section 100a.233 (Sale of real and personal property); and

(5) Section 100a.235 (Other program income).

(b) It should be noted that certain of the provisions in such regulations are not, by their own terms, pertinent to activities which may be conducted pursuant to the Act, such as:

(1) Section 100a.19 (Cooperative arrangements);

(2) Section 100a.43 (Application for Federal assistance (nonconstruction projects));

(3) Section 100a.45 (Application for Federal assistance (short form));

(4) Section 100a.62 (Payment methods for nonconstruction projects);

(5) Section 100a.82 (Institutions of higher education);

(6) Section 100a.83 (Nonprofit organizations);

(7) Subpart H, §§ 100a.90–94 (Matching and cost sharing);

(8) Section 100a.122 (Loan guarantees);

(9) Section 100a.234 (Royalties); and

(10) Section 100a.258 (Leasing facilities).

PART 113—ASSISTANCE FOR CURRENT SCHOOL EXPENDITURES IN CASES OF CERTAIN DISASTERS

Subpart A—Definitions

Sec.
113.1 Definitions.

Subpart B—Financial Assistance in Areas Affected by Major Disasters

113.2 Financial assistance for providing free public education pursuant to section 7(a) of the Act.
113.3 Assistance for the replacement of supplies, equipment, and for leasing of facilities pursuant to section 7(b) of the Act.

Subpart C—Applications

113.8 Applications.
113.9 Dates for filing applications.
113.10 Notification to applicants.
113.11 Reports.
113.12 Inadequacy of Federal funds.
113.13 Method of payment.
113.14 Prohibition on payment for religious worship or instruction.

V 40 168 APR 8 75 XUM

Sec.
113.16 Application of General Provisions Regulations.

AUTHORITY: Sec. 7 of Pub. L. 81-874, as amended, 79 Stat. 1158 (20 U.S.C. 241-1), unless otherwise noted.

Subpart A—Definitions

§ 113.1 Definitions.

As used in this part—

(a) "Act" means Pub. L. 874, 81st Congress (64 Stat. 1100), as amended, section 7 of which was first added by Pub. L. 89-313 (79 Stat. 1159).

(20 U.S.C. 241-1)

(b) "Average daily attendance," hereinafter referred to as "ADA," means ADA as determined in accordance with State law except (notwithstanding any other provisions of the Act), where the local educational agency in which a child resides makes or contracts to make tuition payment for free public education of such a child in a school situated in another local educational agency. For the purposes of section 7 of the Act, plus the attendance of such a child at such school shall be considered (1) to be attendance at a school of the local educational agency so making or contracting to make such tuition payment, and (2) not to be attendance at a school of the local educational agency receiving such titution payment or entitled to receive such payment under the contract.

(20 U.S.C. 241-1(a), 244(10))

(c) "Complete application" means an application and such other supplemental information as the Commissioner may request.

(20 U.S.C. 241-1(a))

(d) "Disaster review team" means a group comprised of representatives of the Office of Education, Office of Facilities Engineering and Property Management, (DHEW), the State educational agency (when available) and local educational agencies.

(20 U.S.C. 241-1(a))

(e) "Filed" means that all necessary parts of the complete application bearing the required certification and verifications by the State educational agency are received by the Commissioner on or before the applicable filing date.

(20 U.S.C. 241-1(d))

(f) "Incident period" means those days officially designated by the President or his representative as the dates upon which major disaster damages occurred.

(20 U.S.C. 241-1(b))

(g) "Latent damages" means those damages which, in the judgment of the Commissioner, constitute disaster-caused damages to instructional and maintenance supplies, equipment, materials, and school facilities which damages may not be apparent immediately following the incident period of the disaster.

(20 U.S.C. 241-1(b))

(h) "Local educational agency" is defined in sections 403(6)(A) and 7(a)(1)(A) of the Act.

(20 U.S.C. 244(6)(A), 241-1(a)(1)(A))

(i) "Major disaster area" means an area which is determined, pursuant to sections 102(a) and 301 of the Disaster Relief Act of 1974 to have suffered, after August 30, 1965, a major disaster as a result of any flood, drought, fire, hurricane, earthquake, storm, or other catastrophe which is or threatens to be of sufficient severity and magnitude to warrant disaster assistance by the Federal Government. That certification which section 301 of the Disaster Relief Act of 1974 requires from the Governor of the State in which such area is located (of the need for disaster assistance in such area and the assurance of the expenditure of a reasonable amount of the funds of the government of that State, or of any political subdivision thereof) will also be deemed to meet the certification requirement contained in section 7(a)(2) of the Act.

(20 U.S.C. 241-1(a)(1)(A), (a)(2); 84 U.S.C. 1748))

(j) "Minor repairs" means that restoration of equipment, materials, and portions of school and cafeteria facilities (including site, grading, and improvements) to original condition or efficiency from a disaster-damaged condition and which restoration is immediately necessary and may be accomplished within a reasonably short period of time.

(20 U.S.C. 241-1(b), 244(13))

(k) "School facilities" as used in this part is defined in the Act at section 403(13). Data must be submitted, if available, to the Commissioner to substantiate that gymnasiums and similar facilities are not intended primarily for exhibitions for which admission is to be charged to the general public, if assistance is requested with regard to such facilities. Such facilities may include cafeteria facilities.

(20 U.S.C. 244(13))

(l) "State financial assistance" (or "State aid") with respect to free public education means any contribution, for which no repayment is expected, made by a State to or on behalf of a local educational agency within the State for the support of free public education. Such assistance does not include those payments by a State to or on behalf of a local educational agency which are made as a result of a major disaster.

(20 U.S.C. 241-1(a)(3), 240(d)(2))

Subpart B—Financial Assistance In Areas Affected by Major Disasters

§ 113.2 Financial assistance for providing free public education pursuant to section 7(a) of the Act.

(a) The Commissioner will, upon receipt of a complete application under section 7(a) and approval thereof, provide financial assistance, in amounts calculated pursuant to section 7(a) and § 113.2(c). Such assistance shall commence with the fiscal year in which the determination is published in the FEDERAL REGISTER that the local educational agency suffered a disaster or with the fiscal year in which the disaster-causing incident in the local educational agency terminated, whichever is later.

(b) Such assistance may be continued for as many as four additional consecutive fiscal years after the fiscal year of commencement, as described in the preceding paragraph, on the basis of complete applications approved during each fiscal year for which assistance is to be paid. Thus, there is a maximum of five fiscal years for which assistance may be paid under section 7(a) with respect to a particular disaster. The amount of such Federal financial assistance for providing free public education at a preexisting level shall not exceed 75 percent during the third of such fiscal years, 50 percent during the fourth and 25 percent during the fifth, of the amount of assistance paid under section 7(a) for the second fiscal year of such five-year period.

(c) The amount of financial assistance so provided by the Commissioner to the agency for use during any fiscal year will not exceed the amount which the Commissioner determines to be necessary to enable such an agency, with the other funds available to it for such a purpose, to provide a level of education equivalent to: (1) That maintained in the schools at such agency prior to the occurrence of such disaster, taking into account the additional costs reasonably necessary to carry out section 7(a)(4) of the Act, or (2) that are required to meet the budgeted or actual current operating expenditures, whichever is lesser.

(d) The amount of unobligated cash carryover for current operating expenditures to the fiscal year of the disaster (from the fiscal year prior to the disaster) will not be considered to be revenue available unless such carryover exceeds ten percent of the amount budgeted for current operating expenditures in the fiscal year of the disaster. When a carryover balance does not exist or a deficit balance exists, the creation of a carryover balance in subsequent fiscal years will not be considered a cost for purposes of determining Federal assistance under section 7(a).

(20 U.S.C. 241-1(a))

§ 113.3 Assistance for the replacement of supplies, equipment, and materials for minor repairs and for the leasing of facilities pursuant to section 7(b) of the Act.

(a) The Commissioner will provide an amount of assistance which he determines, on the basis of a complete application filed for assistance under section 7(b) of the Act to a local educational agency which is eligible for assistance pursuant to section 7(a) of the Act (following the inspection by the disaster review team and the issuance of a provisional authorization), that the following activities are necessary:

(1) To replace instructional and maintenance supplies, equipment and materials (including textbooks), whether or not acquired through the use in whole or in part of Federal funds made available under other programs, which have been destroyed or seriously damaged as a result of a major disaster and which will not be replaced by other Federal programs,

(2) To make minor repairs (as defined in § 113.1(j)), and

(3) To lease or otherwise provide (other than by the acquisition of land or the erection of buildings) school and cafeteria facilities needed to replace temporarily such facilities which have been made unavailable as a result of the major disaster. Such lease or provision may not include gymnasiums and similar facilities intended primarily for exhibitions for which admission is charged to the general public or which have (i) outdoor seating in excess of the total number of pupils enrolled in the school of the system, (ii) ticket booths or stands, and (iii) lighting stands, fixtures, etc., for nighttime events.

(b) Amounts necessary for activities described under § 113.3(a) may include reasonable expenditures for:

(1) *Preventive work.* If an applicant incurs expenditures in order to prevent disaster damage (such as expenditures to keep drains clean, build dikes to divert water from washing out playgrounds), assistance may be authorized if (i) the work is done immediately before and in anticipation of the disaster, or during the disaster, (ii) the work is done on or immediately adjacent to the school site, and (iii) the work is restricted to that which the Commissioner determines could reasonably have been expected to prevent further disaster damage.

(2) *Use of applicant-owned equipment.* When an applicant owns heavy equipment which is suitable to repair major disaster damage (including debris removal, and site redevelopment) and uses such equipment to make necessary repairs, assistance may be authorized for the cost of the use of its equipment to repair eligible major disaster damage, at the pre-disaster rental rate for similar equipment in the area. Applications for reimbursement for the use of such applicant-owned equipment to repair eligible major disater damage must be supported by documentation for each piece of equipment including:

(i) Type and description of equipment;

(ii) Number of hours used each specific day;

(iii) Total hours used;

(iv) Description of location and work on which equipment was used; and

(v) Data substantiating pre-disaster rental rate for similar equipment in the same area.

(3) *Payment for work performed by applicant's maintenance employees.* When an applicant uses maintenance employees during their regularly scheduled work hours for the repair of disaster caused damage, or to take action designed to prevent more extensive damage, assistance may be authorized for such work for the time during which the employees would otherwise have worked at regularly scheduled school maintenance work had there been no disaster. Additional assistance may also be authorized for overtime payments to such overtime employees for the maintenance, repair, or arrest of disaster-caused damages. All assistance for payment of applicant's employees will be based on the prior policy and practice of the applicant, including wage rates, in the payment of such employees.

(4) *Utilities.* Assistance may be authorized for the cost of utilities in temporary or leased facilities, including the necessary installation costs.

(5) *Replacement of equipment.* Assistance may be authorized at the fair market value for the repair or replacement of equipment (including vehicles such as automobiles, trucks and tractors). Assistance may be authorized for replacing, rather than repairing nontubular furniture of metal construction which has been submerged in salt water and for replacing rather than repairing furniture of tubular construction which has been submerged in fresh water. However, assistance for replacement costs of disaster damaged equipment which an applicant has obtained as surplus property and which was selected and procured on a basis other than its being essential to school operation will be based upon the out-of-pocket cost to the applicant at the time of acquisition. The amount of Federal major disaster assistance with reference to the repair or replacement of seriously damaged or destroyed school buses used in the daily transportation of pupils shall be determined after examination of the State transportation assistance program to establish the amount, if any, of such State assistance attributable to those buses which were seriously damaged or destroyed. Federal aid shall be limited to the actual cost of repair or replacement of those buses seriously damaged or destroyed less such State transportation assistance, insurance proceeds, and salvage or trade-in value payable on such school buses.

(6) *Off-site work.* Assistance may be authorized for emergency provision of off-site repairs to permit access to school facilities when consistent with State law, provided that such work may not be done legally or expeditiously by another local governmental unit.

(7) *Trees, shrubs and seeding.* When trees and shrubbery have been lost or have been so badly damaged as to require replacement, assistance may be authorized for their replacement with trees and shrubs of like type, but not to exceed the cost of the size customarily used for new plantings on the sites of newly constructed school facilities within the State.

(8) *Architectural and engineering fees.* Assistance for architectural and engineering fees which are related to authorized minor repairs or replacements may be authorized. The amount of such reimbursement shall not exceed the usual rate applicable in the State for similar work.

(9) *Damage of school facilities during replacement.* If a school facility suffers disaster damage while under construction or renovation, assistance may be authorized only to the extent that the applicant satisfies the Commissioner that insurance proceeds are not available for the necessary repair or replacement. However, if the applicant was in the process of taking formal action at the time of the disaster to replace temporary, or obsolete school facilities with other facilities, no assistance will be authorized for the temporary or obsolete facilities.

(10) *Damages to school facilities during major disaster recovery.* Assistance may be authorized for minor repairs of school facilities (including paving and turf) which must be damaged in order to reestablish school operations. However, assistance will not be authorized to compensate for the use of such school facilities in an activity for which the school authorities are not responsible (including their use as a refugee center, for quartering the National Guard, or for a National Guard motor or equipment pool).

(11) *Administrative expenses.* Assistance may be authorized for expenses identified as overtime payments to regular applicant employees or for pay to extra clerical help hired specifically to: (i) Develop and maintain data to substantiate and support disaster repair, replacement and related expenses, or (ii) to maintain adequate and efficient records concerning the use of disaster assistance. Assistance will not be authorized for salaries, wages, and expenses of regularly employed administrative personnel who are engaged, during regularly scheduled school hours, in disaster recovery work or work necessary to develop a determination of the extent of disaster damages or to complete and file disaster applications.

(12) *Temporary facilities.* (i) Assistance may be authorized to lease or otherwise provide (other than by acquisition of land or erection of facilities) school and cafeteria facilities needed to replace temporarily such facilities which have been made unavailable as a result of a disaster when the applicant assures the Commissioner that existing available school facilities within the district cannot reasonably accommodate pupils left unhoused by the disaster.

(ii) If appropriate private or public structures are available to the applicant, they may be leased for the period of time necessary to restore or replace permanent school facilities. Modifications and improvements necessary to permit such structures to accommodate an educational program should be performed by the owner of the facilities, and the resultant costs may be included in the basic monthly or annual fee for leasing the facilities. Furthermore, any expenses required at the end of the lease period to convert back to noneducational uses should be anticipated and may be included in the leasing fee. In the event

V 40 168 APR 8 75 XUM

that sufficient temporary instructional space may not reasonably be available in existing school facilities or in other public or private structures to accommodate, temporarily, all unhoused pupils, the local education agency may arrange to lease or purchase, whichever cost is the lesser, temporary portable school facilities. Temporary portable facilities may be leased for the period of time that it takes to replace or restore the destroyed facilities, provided that replacement or restoration is pursued with reasonable expediency. It will be the responsibility of the local educational agency to ascertain that such temporary facilities are used in accordance with State and local building laws and policies which may affect such temporary facilities.

(iii) Funds may be provided to local educational agencies to purchase temporary facilities when purchasing is financially advantageous to the United States. The local educational agency is required to agree to advertise and sell, in accordance with State or local policies and procedures, the temporary facilities after the damaged facilities have been restored or replaced. The proceeds of the sale are to be remitted to the U.S. Office of Education.

(13) *Equipment for temporary facilities.* If temporary facilities are provided to a local education agency or if permanent facilities are provided pursuant to section 16 of Pub. L. 81-815, assistance may be authorized for that equipment necessary for the operation of temporary facilities. Such equipment may be provided only if prior approval of the Commissioner is obtained. Notification of such approval will be attached to the notice of preapplication review action.

(14) *Insurance on relocatable classroom units.* The owner or lessor of relocatable classroom units shall be responsible for maintaining fire and extended coverage insurance on such relocatable units at its cost for the full insurable value thereof. The lessor should include such expense within his bid quotation, if necessary. If temporary units are purchased rather than leased, the applicant must maintain fire and extended coverage to replace any temporary units in the event that they are destroyed by fire or other catastrophe. Assistance may be authorized for such insurance.

(20 U.S.C. 241-1(a)-(b))

Subpart C—Applications

§ 113.8 Applications.

Prior to receiving benefits under section 7 of the Act, a local educational agency located in whole or in part in a major disaster area must file with the Commissioner a complete application for such financial assistance on forms prescribed by the Commissioner setting forth the need for such benefits under each pertinent subsection of the Act. Separate complete applications must be filed for assistance under sections 7(a) and 7(b) of the Act.

(a) An approved application for financial assistance under section 7(a) of the Act shall apply only to such financial assistance for providing free public education until the end of the fiscal year in which the application is approved.

(b) An approved application under section 7(b) of the Act shall apply to any expenditures made during a reasonable period of time with respect to those items which are covered by the application. An application that is appropriately made under section 7(b) of the Act will be applicable retroactively for eligible expenditures made immediately prior to, during or subsequent to the incident period of the major disaster occasioning the expenditure.

(20 U.S.C. 241-1 (a), (b))

§ 113.9 Dates for filing applications.

(a) A complete application for benefits under section 7 of the Act must be filed on or before 90 days following the date on which the determination is published in the FEDERAL REGISTER that the area in which the applicant is located, in whole or in part, is a major disaster area, except that, whenever the expiration of such time shall fall on a nonbusiness day for Federal offices, the final date for filing applications shall be the next succeeding business day.

(b) An initial application or a notice of intent to file such an application within the fiscal year for financial assistance benefits under section 7(a) must be filed on or before 90 days following the date on which the determination is published in the FEDERAL REGISTER that the area in which the application is located, in whole or in part, is a major disaster area, except that, whenever such date shall fall on a nonbusiness day for Federal offices, the final date for filing applications shall be the next succeeding business day. A complete application for financial assistance for benefits under section 7(a) for each fiscal year subsequent to that covered by the initial application must be filed by January 31 in the fiscal year following the last such initial application.

(c) The applicant is responsible for obtaining the appropriate certification of the State educational agency and for securing transmittal of the application to the Commissioner.

(20 U.S.C. 241-1)

§ 113.10 Notification to applicants.

The Commissioner will notify each applicant of the results of the review of its application. A notice of application review action will be sent to the applicant which, in appropriate instances, will describe the estimated amount of any payments to be made with respect to assistance in the cost of providing free public education, including assistance with respect to the making of minor repairs of school facilities, and the cost of replacing destroyed or seriously damaged instructional and maintenance supplies, equipment and materials (including textbooks), and of leasing or otherwise providing school or cafeteria facilities as temporary replacements.

(20 U.S.C. 241-1(a)-(b))

§ 113.11 Reports.

(a) *Reports required.* Each applicant shall submit required reports and information on such forms as the Commissioner may reasonably require concerning (1) destruction of and damage to school facilities and instructional and maintenance supplies, equipment, and materials (including textbooks), (2) payments made with respect thereto, as well as payments made to continue to provide free public education at a preexisting level, and to lease or otherwise provide school and cafeteria facilities as temporary replacements, for which benefits are sought under section 7 of the Act.

(b) *Final reports.* Each applicant whose application is approved shall submit to the Commissioner final reports concerning payments made the applicant for which benefits are sought under section 7. Final reports shall be submitted promptly with respect to section 7 as follows:

(1) Final reports with respect to the assistance under section 7(a), and final reports with respect to the cost of leasing school and cafeteria facilities as temporary replacements under section 7(b), shall be submitted to the Commissioner with respect to each fiscal year no later than September 30 following the close of the fiscal year for which the report is made.

(2) Final reports with respect to assistance under section 7(b), except final reports with respect to the cost of leasing school and cafeteria facilities as temporary replacements, shall be submitted to the Commissioner after the applicant has made final payment for approved expenditures and has received final insurance adjustments and all other funds, but in no event later than 90 days following the first anniversary date of the disaster, unless the applicant makes written request, showing good cause, for extension of time for submitting such final report and such date is extended in writing by the Commissioner.

(c) *Excessive payments.* The Commissioner may disallow any portion of the amounts requested which are determined by him not to be necessary for the intended purpose or not to be eligible for benefits under section 7 of the Act. If, after the date for filing a final report, an applicant is found to have received amounts in excess of the amounts to which it is entitled under section 7 of the Act for a given fiscal year, as determined by the Commissioner, an amount equal to the excess may be taken into consideration in determining the amounts to be subsequently certified for payment to the applicant for the current or any subsequent fiscal year. Where no subsequent payments are due, the applicant will be required to remit such excess to the Commissioner.

(20 U.S.C. 241-1(e))

§ 113.12 Inadequacy of Federal funds.

(a) If appropriated funds are inadequate to pay in full the requests contained in all approvable applications filed within the ninety (90) day filing period, the Commissioner will establish an order of priority for the approval of such applications. In determining the order in which such applications will be approved, the Commissioner will consider the relative educational and financial needs of the local educational agencies which have submitted approvable applications.

(b) Priority among approvable applications filed within the 90-day filing period will be determined as follows: A priority will be determined among applications in descending order, by ascertaining the percentage that the total Federal funds for which each applicant is estimated by the Commissioner to be eligible under the Act is of the total current operating costs of that applicant as estimated by the Commissioner, including the increased costs due to the major disaster.

(20 U.S.C. 241-1(d))

§ 113.13 Method of payment.

The Commissioner may pay in advance or by way of reimbursement, with necessary adjustments on account of overpayments or underpayments, and in such installments as he may determine, the amounts due to a local educational agency pursuant to the provisions of section 7 of the Act.

(20 U.S.C. 241-1(e), 1232d)

§ 113.14 Prohibition on payment for religious worship or instruction.

Nothing contained in the Act or in this part shall be construed to authorize the use of any payment made thereunder for religious worship or instruction.

(20 U.S.C. 241-1(a)(4))

§ 113.18 Applicability of General Provisions Regulations.

(a) Provisions contained in Parts 100 and 100a of the regulations entitled "General Provisions for Office of Education Programs" are applicable to programs conducted under the Act, with the following exceptions:

(1) Section 100a.26(b) (Criteria for review of applications);

(2) Section 100a.31 (Preapplications);

(3) Subpart L, §§ 100a.209-.220 (Property management requirements); and

(4) Section 100a.235 (Other program income).

(b) It should be noted that certain of the provisions in such regulations are not, by their own terms, pertinent to activities which may be conducted pursuant to the Act, such as:

(1) Section 100a.19 (Cooperative arrangements);

(2) Section 100a.44 (Application for Federal assistance) (Construction projects);

(3) Section 100a.41 (Preapplication for Federal assistance);

(4) Section 100a.42 (Notice of preapplication review action);

(5) Section 100a.63 (Payment methods for construction projects);

(6) Section 100a.82 (Institutions of higher education);

(7) Section 100a.83 (Nonprofit organizations);

(8) Subpart H, §§ 100a.90-.94 (Matching and Cost Sharing); and

(9) Subpart K, §§ 100a.155-.192 (Construction requirements).

PART 114—ASSISTANCE FOR SCHOOL CONSTRUCTION IN AREAS AFFECTED BY FEDERAL ACTIVITIES

Subpart A—Definitions

Sec.
114.1 Definitions.

Subpart B—Filing Complete Applications and Determining Priority Indices

114.2 Cutoff dates for filing applications.
114.3 Election where two or more categories under section 5(a) apply.
114.4 Procedure if funds are inadequate to make all payments.
114.5 Determination of priority indices and priority groupings for applications.
114.6 Determination of subpriority indices for applications.
114.7 Priority and approval conditioned upon readiness to proceed with construction.

Subpart C—Policy Determinations in Processing of Applications

114.11 Membership of nonresident pupils.
114.12 Changes in boundaries, classification and governing authority of applicants.
114.14 Estimated average daily membership under section 5(a)(3).
114.15 Determination of undue financial burden.
114.16 Additional payments under section 8.
114.17 School facilities for children whose membership is of temporary duration only.
114.18 Determination of eligibility under section 14.

Subpart D—Criteria for Waivers Under the Act

114.30 Application for waivers.
114.31 Criteria for waiver under section 5(e) of minimum number requirement of 20 in section 3(c).
114.32 Criteria for waiver under section 5(e) of percentage requirements for federally connected and nonfederally connected membership in section 5(c).
114.33 Criteria for waiver under section 5(e) for children residing on Federal property.
114.34 Criteria for waiver under section 5(e) of limitation on number of federally connected children eligible for payment in section 5(f).
114.35 Criteria for waiver of percentage requirement in section 14(a).
114.36 Criteria for waiver of substantial percentage requirement in section 14(b).
114.37 Criteria for waiver of substantial percentage requirement in section 14(c).

Subpart E—Certification of Payments

114.41 Certification of payments.
114.42 Certification of payments, section 14.
114.43 Payments.

Subpart F—General Provisions With Regard to Construction of Minimum School Facilities

114.51 Works of art.
114.53 Excellence of architecture and design of minimum school facilities.
114.55 Applicability of General Provisions Regulations.
114.58 Procurement of school facilities.

Subpart G—Sections 9 and 10

114.61 Conditions for assistance under section 10.
114.62 Requests for section 10 school construction.
114.63 Property management: Sections 9 and 10.
114.64 Disposal of federally owned temporary school facilities provided under section 9.
114.65 Transfer to local educational agencies of title to federally owned school facilities provided under section 10.

Appendix A—Guidelines

AUTHORITY: Pub. L. 81-815 (school construction in areas affected by Federal activities), as amended, 64 Stat. 967 (20 U.S.C. 631-645), unless otherwise noted.

Subpart A—Definitions

§ 114.1 Definitions.

As used in this part, the term:

(a) "Act" means Pub. L. 815 (except section 16 thereof), 81st Congress (64 Stat. 967), as amended.

(20 U.S.C. 631-645)

(b) "Applicant" means a local educational agency which has filed a complete application for assistance in school construction under the Act and this part.

(20 U.S.C. 633-635(a))

(c) "Attendance area" means, in relation to a particular public school, the geographical area in which the children who are normally served by that school reside. An attendance area for elementary school need not necessarily be coterminous with an attendance area for a secondary school.

(20 U.S.C. 635(e), 644)

(d) "Available and usable school facilities" includes:

(1) *Existing school facilities.* Included are all those facilities for which payments have been made under the Act, and all facilities constructed as school buildings and used continuously for classroom purposes. Excluded are basement rooms, hallways, or other space the use of which for school purposes (in view of their character, inaccessibility or other equally cogent reason) seriously prejudices the educational objective, or has impaired or will impair the health or safety of the school children. Also excluded are facilities which have been abandoned or must be abandoned by the end of the second year following the increase period for which the application is filed. These requirements also apply to buildings owned by other Federal agencies which are available for the education of children counted by applicants under section 14 of the Act.

(2) *Facilities under contract.* Included are all those facilities, including those for which funds have been reserved or approved under the Act, for which construction contracts have been let on or before the contracts-let date. After such date, only that portion of such facilities to be financed with funds reserved or approved under the Act is included.

(3) *Potential facilities.* With respect to sections 8, 14(a) and 14(c) of the Act, all those minimum school facilities which, with full utilization of all practicably available financial resources, could

V 40 168 APR 8 75 XUM

be provided from local, State, or Federal sources (other than the Act), will be considered as available and usable. Such utilization by the applicant is a condition precedent to Federal assistance under the Act. The estimated capacity of such facilities shall be equal to the total amount of all such resources divided by the most current estimated cost per pupil for providing minimum school facilities in the State. In determining, for purposes of this subparagraph, whether financial resources are practicably available, the amount representing the unused bonding limit in the State but not in excess of 12 percent of its assessed valuation will be considered to be a financial resource practicably available.

(4) *Portable classrooms.* Included are temporary, relocatable, demountable, mobile, trailer or other such units, but only if:

(i) They have been purchased with funds paid under the Act; or

(ii) The State educational agency by law, regulation, or policy, requires such facilities to be counted as permanent capacity units in the computation of State construction aid.

(20 U.S.C. 634, 640, 644(c), 645(10))

(e) "Average daily membership" (hereinafter referred to as ADM) for any school in any school year means average daily membership as determined in accordance with State law or, in the absence of State law governing such a determination, such term means the aggregate of the sums of the days of membership of each child in the school divided by the number of days school was in session. Only days on which pupils were under the guidance and direction of teachers in the teaching process will be considered to be days in session. The ADM for a group of schools having varying lengths of terms is the sum of the ADM obtained for the individual schools divided by the number of schools in such group.

(20 U.S.C. 635 (a), (c), (d), 645(5))

(f) "Average daily membership of federally connected pupils" in each category of federally connected children (as described by clauses (1), (2), and (3) of section 5(a) of the Act) is the number of such children determined in the following manner: on a day not earlier than the fourth day of legal school session of the regular school year and prior to the cutoff date for filing the preapplication, a membership survey of all pupils claimed in each category of federally connected children must be made by either (1) conducting a parent-pupil survey to determine the child's residence on Federal property and the parent's employment, or active duty assignment in the uniformed services, or (2) obtaining certifications from the various employers or the appropriate housing officials as to the employment of the parents of the children claimed or the residence of such children on such day. A membership survey of all pupils must also be made as of such day and such survey shall be the official membership report of the applicant local educational agency for such day. The membership survey used must be conducted in either the third or fourth year of the 4-year increase period. If application is made under section 5(a)(3) of the Act, the survey date must be within 3 months of the date the membership survey is initiated.

(20 U.S.C. 635, 644, 645(1), (5))

(g) "Base year" means the third or fourth school year preceding the fiscal year in which an application is filed, as may be designated in the application, except that in the case of an application based on children referred to in paragraph (2) or paragraph (3) of section 5(a) of the Act, the base year shall in no event be later than the regular school year 1973–74. Thus such term refers to the year preceding the 4-year increase period for which an application is filed.

(20 U.S.C. 645(15))

(h) "Classrooms" means (1) regular classrooms, including recitation, lecture, and general purpose rooms; and (2) special classrooms, including kindergarten rooms, science laboratories, shops, music, art and visual education, business education, and homemaking rooms.

(20 U.S.C. 645(9))

(i) "Complete application," except for applications under section 10 of the Act, means a preapplication (Exhibit M–1 of FMC 74–7), an application (Exhibit M–4 of FMC 74–7), and such supplemental information as may be requested by the Commissioner, all of which have been appropriately filed.

(20 U.S.C. 636(a); FMC 74–7)

(j) "Contracts-let date" means the date on which the Commissioner's notice setting the cutoff date for the receipt of applications for a fiscal year is filed with the Office of the Federal Register.

(20 U.S.C. 634)

(k) "Filed" means that all necessary parts of the preapplication or the complete application, as appropriate (bearing the required certifications and verifications by the State educational agency), are received by the Commissioner on or before the applicable cutoff date.

(20 U.S.C. 636(a), 636(b)(2)(B), 644(e))

(l) "Initial equipment" means any movable equipment necessary and appropriate to equip minimum school facilities. Such term does not include equipment purchased to replace any equipment which is obsolete or worn out and which was purchased with funds under the Act. Initial equipment to be procured with funds under the Act must be approved in advance in accordance with the provisions of § 114.58.

(20 U.S.C. 645 (9), (10))

(m) "Local educational agency" means a local educational agency as defined by section 15(11) of the Act. If the responsibility for providing school facilities for a local educational agency is vested in a State agency, the term includes such State agency together with such local educational agency.

(20 U.S.C. 645(11))

(n) "Member" of a class shall be determined, where appropriate, in accordance with the provisions of section 15(5) of the Act. In the absence of State law, or regulation, a member is a child who is on the current roll of the school. Such a child shall be considered a member from the date of enrollment until he permanently leaves the class or school for one of the causes recognized as sufficient by the State. The date of permanent withdrawal shall be the date on which it is officially known that the pupil has left school, and not necessarily the first day after the date of last attendance.

(20 U.S.C. 645(5))

(o) "Membership of children of temporary duration only" means the school membership of children whose residence in the school district of the local educational agency the Commissioner determines will probably be for more than one year and for less than 6 years beyond the date of the approval of the complete application and whose number is excluded from computation of maximum payments under section 5 of the Act.

(20 U.S.C. 635, 639)

(p) "Minimum school facilities" means classrooms and auxiliary rooms and initial equipment necessary to operate a program of free public education for the membership of the applicant at normal capacity in accordance with the laws and customs of the State.

(1) Such term does not include athletic stadiums, or structures, or facilities intended primarily for athletic exhibitions, contests, or games, or other events for which admission is to be charged to the general public.

(2) Except as used in sections 9 and 10 of the Act, such term does not include interests in land or off-site improvements.

(3) Such term includes

(i) An auditorium or a gymnasium only if the Commissioner determines that such a structure is justified by the size of the school's enrollment, the educational program to be conducted by the school, and the standards and practices in the State. Such a structure may provide fixed or moveable seating only for the normal capacity of the school; and

(ii) Air conditioning in all States which are, in whole or in part, south of the 39° parallel if an authorized representative of the State educational agency certifies to the Commissioner that air conditoned school facilities are currently being constructed with State and local funds within such State. Such term includes air conditioning in all other States only if such certification is accompanied by the results of a survey which shows that air conditioning is provided in a majority of recently constructed school facilities within the State.

(iii) In appropriate situations, particularly under section 14 of the Act, the construction of consolidated school facilities (in cases of consolidation of small districts) or the replacement of small, isolated, inadequate, buildings with modern facilities, even though there may otherwise be enough classroom space to house all the children.

(iv) Dual-use fallout shelter space which is provided as a regular safety feature. If the spaces within the buildings prove to provide shelter from fallout at little or no additional cost, they may also be considered as minimum school facilities.

(20 U.S.C. 645 (9), (10); Senate Report No. 90–726, November 6, 1967, 41)

(q) "Normal capacity" of a school room is the number of pupil stations which the room accommodates under ordinary conditions in accordance with the laws and customs of the State governing free public education.

(20 U.S.C. 634, 640, 644(c))

(r) "Parent-pupil survey" means a questionnaire which is provided by the applicant and filled out by a parent in order to substantiate residence or employment on Federal property. Such survey must include:

(1) Pupil-enrollment information (which may be obtained from school records), including:

(i) Name of pupil;

(ii) Date of birth; and

(iii) Name of public school, grade, and teachers; and

(2) Pupil-residence and parent-employment information including:

(i) Address of pupil residence (including the name of the Federal facility if such address is located on Federal property);

(ii) Name (as it appears on employer's payroll record) of parent (mother, father, legal guardian or other person standing in loco parentis) who is employed on Federal property and with whom such pupil resides, unless the parent is a member of the uniformed services on active duty;

(iii) Name and address of Federal property on which the parent is employed unless the parent is a member of the uniformed services on active duty:

(iv) If the parent is a member of the uniformed services on active duty, the name, the rank, serial number, and branch of service of such parent:

(v) If the parent is a civilian employed on a Federal vessel, the name of vessel, hull number, and name of controlling agency must be obtained;

(vi) Signature of the parent supplying the information and the date of the signature must be obtained: and

(vii) The name and address of employer (unless the parent is a member of uniformed services on active duty).

(3) Only in unusual circumstances may partially completed survey forms or forms which are signed by a person other than parent, or person standing in loco parentis, be accepted. In such circumstances the form must show why the parent did not sign, and when, how, and from whom the residence and employment information was obtained.

(20 U.S.C. 634, 635(a))

(s) "Preapplication" means both Exhibit M–1, of FMC 74–7 and such supplemental information as may be requested by the Commissioner.

(20 U.S.C. 636(a); FMC 74–7)

(t) "Priority indices" means the indices established pursuant to this part based on relative urgency of need for the purpose of determining the order of approval of project applications, and the order of payments within each priority grouping.

(20 U.S.C. 633)

(u) "Remote or isolated areas" means attendance areas or local educational agencies or portions thereof designated as such by the Commissioner for the purposes of waivers under sections 5(e) and 14 of the Act (see Subpart D of this part). Such designation will be based upon the following factors:

(1) Topography;

(2) Geographic isolation;

(3) Traffic conditions;

(4) Climatic conditions; and

(5) Other similar conditions which make it impracticable to transport students to other school facilities of the applicant or to any adjacent local educational agency.

(20 U.S.C. 635(e), 644)

(v) "Repairs" means, for the purpose of applications under section 10 of the Act, only those repairs which must be accomplished without delay in order to avoid further deterioration of the school facilities or to protect the safety of individuals occupying the facility. Such term does not for that purpose include the remodeling or rearrangement of existing facilities to permit grade pattern reorganization or the providing of minimum school facilities.

(20 U.S.C. 635, 640(a))

(w) "Subpriority indices" means the indices established pursuant to § 114.6 for the purpose of determining the order of approval of project applications having identical priority indices, when appropriated funds are insufficient to fund all such project applications.

(20 U.S.C. 633, 634, 644(e))

(x) "Total square feet of floor area" means the sum of the square feet of each usable floor (including partitions and exterior walls) within the perimeter of outside walls at the respective floor levels. Covered passageways with one or more sides open are deemed to have one-half the square feet of floor area they would otherwise have.

(20 U.S.C. 645(6))

(y) "Unhoused" pupils or "inadequately housed" pupils means:

(1) For the purpose of determining priority, the difference between the total estimated membership as of the end of the increase period and the total normal capacity of available and usable school facilities; or

(2) For the purpose of determining the need for minimum school facilities, the difference between the total estimated membership as of the end of the second year following the end of the increase period and the total normal capacity of available and usable school facilities.

(20 U.S.C. 634, 640, 644(c), 645(10))

(z) "Uniformed services" means the Army, Navy, Air Force, Marine Corps, Coast Guard, Environmental Science Services Administration, and Public Health Service.

(20 U.S.C. 635(a)(1)(B))

Subpart B—Filing Complete Applications and Determining Priority Indices

§ 114.2 Cutoff dates for filing applications.

The Commissioner will, by notices published in the FEDERAL REGISTER, set cutoff dates for the filing of applications under this part for each fiscal year.

(20 U.S.C. 633, 636(a), 640(a), 644(e))

§ 114.3 Election where two or more categories under section 5(a) apply.

A district may combine children described in sections 5(a)(1) and 5(a)(2) of the Act to meet the percentage-increase requirements for eligibility purposes. If eligibility requirements are met by such combination, the maximum Federal payment will be computed on the basis of the number of children described in each section at the respective rates of payment specified therefor. However, if children eligible to be counted under section 5(a)(1) or 5(a)(2) of the Act are counted under section 5(a)(3) to meet eligibility requirements for that section, the maximum Federal payment will be computed on the basis of the number of children counted under section 5(a)(3) at the rate of payment specified for that section.

(20 U.S.C. 635)

§ 114.4 Procedure if funds are inadequate to make all payments.

(a) Section 2 of the Act provides that for each fiscal year the Commissioner is to determine the portion of the funds appropriated under the Act which will be available for carrying out the provisions of sections 9 and 10 and that the remainder of such funds shall be available for paying to local educational agencies the Federal share of the cost of projects for the construction of school facilities for which applications have been approved under section 6. Section 3 of the Act provides that the Commissioner shall by regulation prescribe an order of priority, based on relative urgency of need, to be followed in approving applications in the event the funds appropriated under the Act and remaining available on any cutoff date for payment to local educational agencies are less than the Federal share of the cost of the projects with respect to which applications have been filed prior to such date (and for which funds under the Act have not already been obligated). Only applications meeting the conditions for approval under the Act (other than section 6(b)(2)(C)) will be considered applications for purposes of the preceding sentence. Such an order of priority is to provide

V 40 168
APR 8 75
XUM

that applications for payments based upon increases in the number of children either residing on, or residing with a parent employed on, property which is part of a low-rent housing project assisted under the United States Housing Act of 1937, as amended, will not be approved for any fiscal year until all other applications under paragraphs (2) and (3) of section 5(a) have been approved for that fiscal year. Section 14(e) of the Act provides, in part, that in determining the order in which such applications shall be approved, the Commissioner shall consider the relative educational and financial needs of the local educational agencies which have submitted approvable applications and the nature and extent of the Federal responsibility. Section 14(h) provides that it is the policy of the Congress that the provision of assistance pursuant to sections 14(a) and 14(b) of the Act shall be given a priority at least equal to that given to payments made pursuant to section 10 of the Act.

(20 U.S.C. 632, 635(c)(2), 636(b)(2)(C), 639, 640, 644)

(b) Pursuant to the above provisions of the Act, applications for assistance under the provisions of sections 9, 10, 16, 14(a), and 14(b) will have priority funding over applications under section 6 (as limited by section 5), and sections 8 and 14(c) of the Act. That portion of payments for applications filed in accordance with the provisions of section 6 (as limited by section 5) and section 8 of the Act based upon increases in the number of children either residing on, or residing with a parent employed on, Federal property (other than property which is part of an eligible low-rent housing property) will have priority in funding over that portion of payments that is based upon increases in the number of children countable for payment under sections 5(a)(2) and 5(a)(3) who either reside on, or reside with a parent employed on, an eligible low-rent housing property.

(20 U.S.C. 635, 636, 638, 639, 640, 644, 646)

(c) For each fiscal year, the Commissioner will first determine the estimated requirements for all applications filed under sections 9, 10, and 16 and sections 14(a) and 14(b) of the Act. Funds available therefor will be allocated first to applications under section 16 of the Act. The remainder of such funds will be allocated to section 14(a), and 14(b) to section 9, and to section 10, in the ratio of the estimated requirements under each section to the total requirements for all such sections.

(20 U.S.C. 632, 639, 640, 644, 646)

(d) Each approvable application under sections 9, 10, 14(a), and 14(b) of the Act will be assigned a priority rating determined in the manner specified in this section and in § 114.5, and a priority listing will be established for each such section. The funds allocated as prescribed in paragraph (c) of this section will be reserved for applications on such priority listing in order of priority indices. When all such applications have been funded, any remaining available funds will be reserved for applications under section 6 (as limited by section 5), section 8 and section 14(c).

(20 U.S.C. 635, 636, 638, 644)

(e) For each fiscal year, a priority listing also will be established for applications under sections 6 (as limited by section 5) and 8 of the Act for that portion of payments which is based on increases in the number of children either residing on, or residing with a parent employed on, an eligible low-rent housing property. Funds will be reserved for applications on such a priority listing after funds have been reserved for all other approvable applications under section 6 (as limited by section 5), section 8, and section 14(c), filed for that fiscal year.

(20 U.S.C. 633, 634, 635, 636, 637, 638, 644)

§ 114.5 Determination of priority indices and priority groupings for applications.

(a) For applications under sections 6 and 14 of the Act, a priority index will be determined for the first pending requested construction project of each applicant by adding (1) the percentage that the estimated number of federally connected children countable for payment in the local educational agency (or, except under section 14(a) and 14(b), in the approved attendance area) is of the total estimated membership of all children therein at the close of the applicable period; and (2) the percentage of the estimated school membership within the local educational agency (or in the approved attendance area) which at the same time is without minimum school facilities. However, in no case shall the amount used in determining the priority index exceed twice the percentage obtained in paragraph (a)(1) of this section. No priority, except under sections 14(a) and 14(b), shall be established for any applicant having less than 20 unhoused children in the local educational agency (or in the approved attendance area).

(20 U.S.C. 633)

(b) For requests under section 10 of the Act, a priority index will be determined for the first pending requested project of each applicant by adding (1) the percentage that the estimated number of children for whom minimum school facilities are to be provided is of the total estimated number of all children residing and attending school on the installation at the close of the applicable period; and (2) the percentage of the estimated school membership at such installation which is without minimum school facilities as of the same time. However, in no case will the combined percentage used in determining the priority index exceed twice the percentage arrived at in subparagraph (1) of this paragraph. In determining the order of priority for approving applications under section 10, applications will be classified in priority groups for establishing priority in funding from funds allocated for applications under section 10 as prescribed in paragraph (c) of § 114.4 and a priority listing will be established for each such group in the following order: (i) Applications requesting major repairs necessary for the safety of school children or to prevent further deterioration of existing school facilities; (ii) applications in cases where the local educational agency which operates the school program in school facilities located on Federal property has given assurance and a firm commitment to the Commissioner that, upon completion of the proposed project, it will accept ownership of such school facilities under section 10(b) of the Act; (iii) applications in cases where there are unhoused pupils; and (iv) applications requesting the construction of capacity or noncapacity school facilities, or the rehabilitation or remodeling of existing school facilities which is required to bring the school facilities up to a standard which will permit the offering of a contemporary educational program.

(20 U.S.C. 640)

(c) In those cases in which an applicant has filed more than one project application (or in the case of section 10, when two or more applications are filed which fall within the same priority grouping, as established in paragraph (b) of this section), the priority index for the second project will be determined by: (1) Dividing the normal capacity of first project by the total estimated membership at the close of the applicable period and (2) reducing the applicant's priority index by twice the percentage so obtained. When more than two project applications have been filed, the priority index for each succeeding project shall be reduced by the cumulative total percentage, in the manner provided for in the preceding sentence, of all approved projects of the applicant.

(20 U.S.C. 633, 640, 644)

§ 114.6 Determination of subpriority indices for applications.

(a) In the event that the funds available are sufficient to cover only a portion of the project applications with identical priority indices (as determined under § 114.5), a subpriority index for each project application will be determined by dividing (1) the estimated number of federally connected children countable for payment in the local educational agency (or in the approved attendance area) or, in the case of section 10 of the Act, the number of children for whom school facilities are to be provided on Federal property by (2) the total estimated membership of all children in such an area at the close of the applicable period.

(20 U.S.C. 633, 634, 640, 644)

(b) In those cases where an applicant has more than one eligible project application in an identical priority index group, the subpriority index of the first project in such group will be computed in accordance with paragraph (a) of this section, and the subprority index of the second priority will be determined

by (1) dividing the normal capacity of the first project by the total estimated membership at the close of the applicable period and (2) reducing the applicant's subpriority index as determined in paragraph (a) of this section by twice the percentage so obtained. The subpriority index for each succeeding project will be reduced by the cumulative total capacity, as provided in the first sentence of this paragraph, of all the approved projects of the applicant.

(20 U.S.C. 633, 634, 640, 644)

§ 114.7 Priority and approval conditioned upon readiness to proceed with construction.

Initial approval of a project application under this part will be cancelled if the applicant is not ready to proceed with construction within 120 days after the date of initial approval unless such period is extended by the Commissioner for good cause shown. The applicant's project and entitlement may be subordinated by reason of such failures to other project applications of lower rank or the applicant may forfeit its priority in the discretion of the Commissioner.

(20 U.S.C. 633, 634, 636(b)(1)(D), 644)

Subpart C—Policy Determinations in Processing of Applications

§ 114.11 Membership of nonresident pupils.

For purposes of sections 5, 8, 9, and 14 of the Act and the regulations in this part, in determining an applicant's membership, a nonresident pupil who attends a school in the applicant local educational agency on a tuition or nontuition basis may be counted in the applicant's membership if a written agreement for such attendance has been entered into between the local educational agencies concerned, and if that agreement has been approved by the Commissioner. No such agreement will be approved by the Commissioner unless it provides for education on either a tuition or nontuition basis for a period of 20 years from the date of execution of such agreement.

(20 U.S.C. 645(5))

§ 114.12 Changes in boundaries, classification and governing authority of applicants.

(a) If the applicant is a party to any merger, consolidation, or other similar action which may affect its boundaries, identity, governing authority, classification or control, it shall notify the Commissioner as soon as practicable of the effective date of that action, the extent and character thereof, and the legal authority under which the action was or is to be effected.

(b) A local educational agency succeeding to the territory of one or more local educational agencies whose applications were approved (or in due course would have been approved) prior to the change in boundaries or organization may secure all the rights and benefits which were vested in such application(s) by notifying the Commissioner and by submitting the following:

(1) A letter from the authorized representative of the successor local educational agency (i) requesting that the successor local educational agency be substituted for the original applicant agencies, and (ii) stating that the successor local educational agency agrees to be bound by the obligations and assurances undertaken or made by such original applicant local educational agencies in their applications to the same extent as such original applicants would have been bound;

(2) An opinion of the appropriate legal officer of the County or State showing that (i) the change in boundaries or organization was accomplished in accordance with the laws of the State; and (ii) that the assignment and acceptance or the transfer of the interest of the applicant local educational agency to the successor local educational agency is in accordance with the laws of the State and is effective to accomplish the changes described; and

(3) Assignments, citations or quotations as follows:

(i) If the State law provides for the settlement of the assets and liabilities (including such matters as right to successorship in property, debts, obligations, unfulfilled contracts, details of the assumption of bonded indebtedness, State aid and taxes) the appropriate quotations from or citations to specific State laws involved should be submitted; or

(ii) If the State law does not clearly provide for the disposition of such property rights, an assignment from each of the former local educational agencies to the successor agencies should be submitted showing (a) the transfer of ownership of the building or buildings under construction or contract, (b) the transfer of any unexpended funds or rights to funds for the approved projects then on hand, and (c) the transfer of all rights and obligations of the applicant local educational agencies in and to any project application not yet approved and any future payments or benefits which might accrue under the pending applications.

(c) The rights and benefits under the Act of the successor agency cannot be greater than the total of all rights and benefits which originally were vested in the component agencies which had valid applications on file to the effective date of the change in boundaries or organization.

(20 U.S.C. 645(11))

§ 114.14 Estimated average daily membership under section 5(a)(3).

For the purpose of eligibility and entitlement under section 5(a)(3) of the Act, the estimated number of children in average daily membership during the year shall be 97 percent of the difference between (1) the total number of children in membership whose parents are employed (as determined by a parent-pupil survey made as of any specific date during the increase period) in establishments with respect to which a responsible official thereof certifies that there has been an increase in employment subsequent to the base year in order to fulfill Federal contracts or subcontracts, and (2) the number of such children whose parents moved into the applicant school district subsequent to such a base year.

(20 U.S.C. 635(a)(3), (d)(2)(B))

§ 114.15 Determination of undue financial burden.

A determination under section 5(c) of the Act of undue financial burden on the taxing and borrowing authority of an applicant will be made as follows:

(a) If the cost of providing minimum school facilities for the increase in eligible federally connected children under section 5(a)(3) of the Act plus the outstanding bonded debt for building purposes, would result in the necessity of incurring a percentage obligation against assessed valuation in building bonds or other debentures which exceeds the average percentage of such indebtedness incurred for such obligations by school districts in the applicant's State, an undue financial burden is deemed to exist;

(b) In marginal cases, additional consideration may be given to such factors as (1) dollars per child in assessed valuation, (2) increase in total assessed valuation in relation to increase in membership during the increase period, (3) ratio of assessed valuation to true value, and (4) special State laws or practices.

(20 U.S.C. 635(c))

§ 114.16 Additional payments under section 8.

(a) An amount not to exceed 10 percent of any amount appropriated under the Act (exclusive of any sums appropriated for administration) may be reserved and used by the Commissioner to make grants to applicants (except to applicants under section 14 of the Act) when (1) the application would be approved but for the applicant's inability, unless aided by such a grant, to finance the nonfederal share of the cost of a project; or (2) after the approval of the application the project cannot, without such grant, be completed because of flood, fire, or similar emergency affecting either the work on the project or the applicant's ability to finance the nonfederal share of the cost of the project.

(b) Under paragraph (a)(1) of this section, a complete application (except applications under section 14 of the Act and applications with respect to which the Commissioner has waived or reduced eligibility requirements under section 5(e) of the Act) may be considered for payment of part or all of the nonfederal share of the cost of any project which does not include more than minimum facilities for unhoused children only if: (1) The application contains a request for payment under the Act; (2) the estimated number of children countable for payment under section 5 of the Act for the increase period equals or exceeds the number obtained by taking 12 percent of the average daily membership of the applicant district for the base year applicable to the increase period under consideration, except that, if 1

V 40168
APR 8 75

or more years in the increase period were included in a previous application for which payment has been made or may be made, the percent shall be 9 percent if 1 year was included, 6 percent if 2 years were included, and 3 percent if 3 years were included; (3) the applicant has exhausted all fiscal resources, including State aid, bonding authority, and Federal aid, which are practicably available to it and is unable to pay the nonfederal share of the cost of the project; (4) it has been reached on the priority or suppriority indices established under this part; and (5) Federal money reserved under paragraph (a) of this section is available. The additional payment to the applicant under this section may not exceed the cost of providing minimum school facilities for the number of unhoused children as of the end of the increase period, less all financial resources practicably available to the applicant as of the same period; nor may it exceed the difference between (i) the actual cost of providing minimum facilities for the federally connected pupils eligible for payment under the Act, or the average cost in the State of providing such facilities, whichever is the lesser, and (ii) the Federal funds made available to the applicant under section 5 of the Act plus local and State funds which may be made available for this purpose.

(c) Under paragraph (a)(2) of this section, a request by the applicant may be considered for the additional payment of part or all of the funds required to complete a project (to the extent that the completed project will not provide more than minimum school facilities for unhoused children) for which a project application under the Act has been approved only if: (1) Federal money reserved under paragraph (a) of this section is available; (2) the applicant cannot complete the project because of flood, fire, or similar emergency affecting either the work on the project or the applicant's ability to finance the nonfederal share of the cost of the project; and (3) the applicant has exhausted all financial resources practicably available to it, including State aid, bonding authority, and Federal aid. The payment to be made under this paragraph may not exceed the amount required to pay the additional cost caused by the emergency less any financial resources of the applicant practicably available for such purposes, including the proceeds of any insurance.

(20 U.S.C. 638)

§ 114.17 School facilities for children whose membership is of temporary duration only.

(a) If the Commissioner determines that the membership of some of the children of the applicant, representing otherwise countable Federal increases under section 5 of the Act, will be of temporary duration only, the membership of such children must be excluded in computing maximum payments under such section 5.

(20 U.S.C. 639)

(b) The Commissioner when proper request therefor is made in a complete application, may: (1) Make available to such applicant such temporary school facilities as may be necessary to take care of the membership of such children as the Commissioner determines will be of temporary duration only, as defined in § 114.1(o), or (2) where the applicant gives assurance in a complete application that at least minimum school facilities will be provided for such children, pay (on such terms and conditions as he deems appropriate to carry out the purposes of the Act) to such applicant for use in constructing school facilities an amount not greater than the amount which he estimates will be necessary to make available temporary facilities for such children, but the amount so paid shall not exceed the cost of constructing minimum school facilities for such children. In no case will provision for such children be made unless they are deemed to be without minimum school facilities.

(20 U.S.C. 634, 639)

§ 114.18 Determination of eligibility under section 14.

(a) The requirements contained in section 14(a)(1) of the Act will be deemed to have been met when one of the following conditions exist:

(1) The total number of children who reside on Indian lands (for whom the applicant is providing, or upon completion of the school facilities for which provision is made, will provide, free public education, and whose membership in the schools of such applicant has not formed and will not form the basis for payments under other provisions of the Act) is at least 15 and represent as least 33⅓ percent of the total number of children for whom the applicant is providing free public education (such percentage requirement may, however, be waived by the Commissioner under § 114.35);

(2) The Indian lands in the school district of the applicant represent at least 33⅓ percent of the total land area of the school district; or

(3) The applicant is providing, or upon completion of the school facilities for which provision is made will provide, free public education to 100 or more children who reside on Indian lands located outside the local educational agency.

(20 U.S.C. 644(a)(1))

(b) The requirement contained in section 14(a)(4) of the Act will be deemed to have been met when, in accordance with the provisions of paragraph (d) of § 114.1, the applicant does not have available sufficient funds to provide minimum school facilities for at least 95 percent of the total number of children estimated to be in membership in the applicant's schools as of the end of the second year following the end of the increase period for which the application is filed.

(20 U.S.C. 644(a)(4))

(c) The requirement in section 14(b)(1) of the Act will be deemed to have been met when one of the following conditions exist:

(1) The estimated number of children who reside on Indian lands as of the close of the increase period (for whom the applicant is providing, or upon completion of the school facilities for which provision is made, will provide, free public education, and whose membership in the schools of such applicant has not formed and will not form the basis for payments under other provisions of the Act) is at least 15 and represents at least 10 percent of the total number of children for whom the applicant is providing free public education. (Such percentage requirement may, however, be waived by the Commissioner under § 114.36);

(2) The Indian lands in the school district of the applicant represent at least 10 percent of the total land area of such school district; or

(3) The applicant is providing, or upon completion of the school facilities for which provision is made, will provide, free public education to 100 or more children who reside on Indian lands located outside the applicant's school district.

(20 U.S.C. 644(b)(1))

(d) The requirement in section 14(c)(1) of the Act will be deemed to have been met when the following conditions exist:

(1) The total number of children who are inadequately housed by minimum school facilities (for whom the applicant is providing, or upon completion of the school facilities for which provision is made, will provide, free public education, and whose membership in the schools of such applicant has not formed and will not form the basis for payments under other provisions of the Act) is at least 20 and represents at least 33⅓ percent of the total number of children for whom the applicant is providing free public education (such percentage requirement may, however, be waived by the Commissioner under § 114.37); and

(2) The Federal property in the school district of the applicant represents at least 33⅓ percent of the total land area of the school district.

(20 U.S.C. 644(c)(1))

(e) The requirement in section 14(c)(4) of the Act will be deemed to have been met when, in accordance with the provisions of paragraph (d) of § 114.1, the applicant does not have available sufficient funds to provide minimum school facilities for at least 95 percent of the total number of children estimated to be in the applicant's schools as of the end of the second year following the end of the increase period for which the application is filed.

(20 U.S.C. 644(c)(4))

Subpart D—Criteria for Waivers Under the Act

§ 114.30 Application for waivers.

Applications for waivers pursuant to section 5(e) of the Act shall be made in accordance with Maximum Grant (OE Form 355). Such application may request a waiver with regard to the entire local educational agency, or any portion thereof, as appropriate.

(20 U.S.C. 635(e))

§ 114.31 Criteria for waiver under section 5(e) of minimum number requirement of 20 in section 5(c).

The Commissioner will not, under section 5(e) of the Act, waive or reduce the minimum increase number of 20 in federally connected membership required by section 5(c) unless the conditions set forth in paragraphs (a) through (d) of this section, or that set forth in paragraph (e) of this section, are met:

(a) The applicant would otherwise be eligible for the assistance requested;

(b) The estimated increase in federally connected membership in the increase period is at least 25 percent of the base year total average daily membership;

(c) The local educational agency is located in a remote or isolated area, or the Federal impact is in an attendance area or other geographical area which is located in an isolated or remote part of the local educational agency;

(d) The local educational agency has need for additional classroom facilities or related school facilities in order to provide minimum school facilities for the estimated number of children in the remote or isolated area who will be in the membership of the schools at the close of the increase period covered by the application;

(e) The Commissioner determines that other exceptional circumstances exist which in his judgment require such waiver or reduction to avoid inequity and to avoid defeating the purposes of the Act.

(20 U.S.C. 635 (c), (e))

§ 114.32 Criteria for waiver under section 5(e) of percentage requirements for federally connected and nonfederally connected membership in section 5(c).

(a) The Commissioner will not, under section 5(e) of the Act, waive or reduce the percentage requirement or requirements in section 5(c) of the Act, waive the requirement contained in the first sentence of section 5(d) of the Act, or reduce the percentage specified in clause (2) of such sentence, unless the conditions set forth in paragraphs (a) (1) through (5) of this section, inclusive, or that set forth in paragraph (a)(6) of this section, are met:

(1) The applicant would otherwise be eligible for the assistance requested;

(2) The applicant specifically states the extent to which it desires the Commissioner to exercise his authority to waive or reduce one or more of such requirements and makes appropriate requests therefor, agreeing that if such a request is granted in whole or in part in computing maximum payment under the Act, only membership of children within the federally impacted attendance area shall be considered;

(3) The applicant has two or more attendance areas, and its jurisdictional area is countywide or is sufficiently extensive as to be reasonably analogous to a countywide school system;

(4) In the increase period for which the application is made the Federal impact is equal to at least 10 percent of the average daily membership in the base year in an attendance area or other geographical area which is located in an isolated or remote part of the local educational agency;

(5) The school district is located in a remote or isolated area, or the Federal impact is in an attendance area or other geographical area which is located in a remote or isolated part of the school district;

(6) The Commissioner determines that other exceptional circumstances exist which in his judgment require such waiver or reduction to avoid inequity and to avoid defeating the purposes of the Act.

(b) If the Commissioner decides to waive or reduce one or more of the requirements set forth in § 114.31 or paragraph (a) of this section:

(1) He will determine which requirement or requirements he will waive, or reduce, and, if the latter, the extent of such a reduction;

(2) He will determine the geographical area of the applicant which will be considered as constituting the federally impacted attendance area; and

(3) The application will otherwise be processed under the Act and this part, taking into consideration only the federally impacted attendance area determined under subparagraph (2), but in no case will payments under this paragraph exceed the amounts computed for the local educational agency as a whole taking into consideration the waivers or reductions made by the Commissioner.

(20 U.S.C. 635(c) and (e))

§ 114.33 Criteria for waiver under section 5(e) for children residing on Federal property.

(a) The Commissioner will not, under section 5(e) of the Act, waive or reduce the percentage increase requirement in section 5(c) of the Act with respect to children residing on Federal property, or waive or reduce the percentage increase requirement in section 5(d) of the Act with respect to nonfederally connected children, unless the conditions set forth in paragraphs (a) (1) through (5) of this section are met:

(1) The applicant would otherwise be eligible for the assistance requested;

(2) The applicant specifically states the waiver it desires or the extent to which it desires a reduction in one or more requirements, and makes an appropriate request therefor in which it agrees that, if such a request is granted in whole or in part, only the Federal property upon which the children reside shall be considered as a federally impacted attendance area in computing maximum payment under the waiver or reduction in requirements and that only children residing on the Federal property constituting the federally impacted attendance area will be considered in determining the increase in membership of federally connected children;

(3) There has been an increase in membership of the children residing on the Federal property constituting the federally impacted attendance area in the increase period for which the application is made of at least 50 and equal to at least 8 percent of the average daily membership of such children in the base year, or there are at least 50 more children residing on such Federal property than were estimated to be in the membership of the applicant's schools at the end of the increase period under the last previous application for which payment has been made or may be made;

(4) The applicant has need for additional classrooms or related school facilities on the basis of the local educational agency as a whole, or the school facilities of such applicant are not reasonably accessible to the children residing on the Federal property constituting the federally impacted attendance area because of their location or the infeasibility of transporting the children residing on such Federal property to such facilities; and

(5) The school facilities to be constructed with the funds made available to the applicant upon approval of the waiver will be located on the Federal property or close enough thereto to serve the children residing thereon.

(b) If the Commissioner decides to waive or reduce the percentage increase requirement in section 5(c) of the Act with respect to children residing on Federal property, or the percentage increase requirement with respect to nonfederally connected children in section 5(d) of the Act:

(1) He will determine which requirements he will waive or reduce and the extent of any such waiver or reduction; and

(2) He will determine the geographical area of the applicant which will be considered as constituting the federally impacted attendance area; and

(3) The application will otherwise be processed under the Act and this part, taking into consideration only the federally impacted attendance area determined under subparagraph (2), but in no case will payments under this paragraph exceed the amount computed for the local educational agency as a whole, taking into consideration the waivers or reductions made by the Commissioner.

(20 U.S.C. 635(c), (d), and (e))

§ 114.34 Criteria for waiver under section 5(e) of limitation on number of federally connected children eligible for payment in section 5(f).

Waivers of the limitation on the number of federally connected children eligible for payment will be made in accordance with the following standards and procedures:

(a) Waivers for children residing in Federal housing:

(1) The Commissioner will determine the geographical area of the applicant which will be considered the federally impacted attendance area;

V 40 168 APR 8 75 5 XUM

(2) The application will otherwise be processed under the Act and this part, taking into consideration only the federally impacted attendance area determined under paragraph (a)(1) of this section, but in no case will payments under this paragraph exceed the amounts computed for the local educational agency as a whole taking into consideration the waivers or reductions made by the Commissioner.

(3) The applicant must show that, after receiving Federal funds based primarily on the eligibility of children residing in Federal housing and using them to construct school facilities to serve such children, some or all of the Federal housing became nonfederal property, and as a result:

(i) There is a reduction in the number of federally connected children for whom school facilities were constructed;

(ii) Additional Federal housing was or will be constructed in another attendance area of the local educational agency;

(iii) Not less than 8 years after the Federal housing becomes nonfederal property, the increase in a 4-year period in federally connected membership residing in the additional Federal housing is at least 50 and at least 8 percent of the average daily membership of such children in the base year of the increased period;

(iv) The local educational agency has need for additional school facilities for the local educational agency as a whole as of the end of the second year following the increase period for which the application is filed; and

(v) The school facilities to be constructed will be located reasonably close to the area in which the new increase in federally connected membership resides.

(4) The application will be processed taking into consideration only the increase in membership in a 4-year increase period of the children residing in the additional Federal housing. Payment will be limited to providing minimum school facilities for such children estimated to be in membership as of the second year following the increase period.

(b) Waivers for children whose parents are employed in temporary activities on Federal property:

(1) The Commissioner will determine the geographical area of the applicant which will be considered the federally impacted attendance area; and

(2) The application will otherwise be processed under the Act and this part, taking into consideration only the federally impacted attendance area determined under paragraph (b)(1) of this section, but in no case will payments under this paragraph exceed the amounts computed for the agency as a whole taking into consideration the waivers or reductions made by the Commissioner;

(3) The applicant must show that, after receiving Federal funds based primarily on the membership of children whose parents were engaged in temporary activities on Federal property (such as the construction of a dam, power station, highway, or reclamation project) such funds were used to provide school facilities to serve primarily the children whose parents were so engaged; the temporary activity on Federal property was completed or greatly reduced, and as a result, the following conditions exist:

(i) The children whose parents were engaged in such temporary activities have moved out of the area;

(ii) Not less than 8 years after the temporary activity on Federal property was completed or greatly reduced, the increase in a four-year period in the membership of children whose parents are engaged in temporary activities on Federal property in a second area (remote from the first area of temporary Federal activity) is at least 50 and at least 8 percent of the base year average daily membership of such children;

(iii) The local educational agency has need for additional school facilities in the second area of temporary activity as of the end of the second year following the increase period for which the application is filed; and

(iv) The school facilities to be constructed will be located reasonably close to the area in which the new increase in federally connected membership resides;

(4) The application will be processed taking into consideration only the increase in membership in a 4-year increase period of the children whose parents are engaged in the new temporary projects on Federal property, and payment will be limited to providing minimum school facilities for such children estimated to be in membership as of the second year following the increase period.

(20 U.S.C. 635(e)(3), (f))

§ 114.35 Criteria for waiver of percentage requirement in section 14(a).

(a) The Commissioner will not waive the substantial percentage requirement imposed by section 14(a)(1) of the Act unless the conditions set forth in paragraphs (a)(1) through (6) of this section, or that set forth in paragraph (a)(7) of this section, are met:

(1) The applicant would otherwise be eligible for the assistance requested;

(2) The applicant makes a request to waive such percentage requirement;

(3) The applicant's school district is countywide or is sufficiently extensive as to be analogous to a countywide school district;

(4) There has been a concentration of children residing on Indian lands located in a remote or isolated area;

(5) The number of children residing on Indian lands located in the remote or isolated area and estimated to be in membership in the applicant's schools as of the close of the membership period for which the application is filed is at least 15 and constitutes at least 20 percent of the total number of children in membership in the district as a whole and for whom the applicant is providing free public education;

(6) The Federal lands in the applicant's school district constitute at least 80 percent of the total area of such district;

(7) The Commissioner determines that other exceptional circumstances exist which in his judgment require such waiver or reduction to avoid inequity and to avoid defeating the purpose of the Act.

(b) If the Commissioner waives the specified percentage requirement under paragraph (a) of this section, the application will be processed under the Act and this part, taking into consideration only the remote or isolated attendance area; but in no case will payments under this paragraph exceed the cost of construction of minimum school facilities in the local educational agency for the number of all children in the approved waiver area which the Commissioner determines will be in membership in the schools of the applicant as of the close of the second year following the close of the membership period for which the application is filed, and who would otherwise be without such facilities, less the amount of financial resources which the Commissioner determines to be practicably available to the applicant from local, State, or other Federal sources.

(20 U.S.C. 644(a))

§ 114.36 Criteria for waiver of substantial percentage requirement in section 14(b).

(a) The Commissioner will not waive the substantial percentage requirement imposed by section 14(b)(1) of the Act unless the conditions set forth in paragraphs (a)(1) through (6) of this section, or that set forth in paragraph (a)(7) of this section, are met:

(1) The applicant would otherwise be eligible for the assistance requested;

(2) The applicant makes a request to waive such percentage requirement;

(3) The applicant's school district is countywide or is sufficiently extensive as to be analogous to a countywide school district;

(4) There has been a concentration of children who are inadequately housed by minimum school facilities located in a remote or isolated area;

(5) The number of children who are inadequately housed by minimum school facilities located in the remote or isolated area and estimated to be in membership in the applicant's schools as of the close of the membership period for which the application is filed is at least 20 and constitutes at least 20 percent of the total number of children in membership in the local educational agency as a whole and for whom the applicant is providing free public education;

(6) The Federal lands in the applicant's school district constitute at least 80 percent of the total area of such district;

(7) The Commissioner determines that other exceptional circumstances exist which in his judgment require such waiver or reduction to avoid defeating the purpose of the Act.

(b) If the Commissioner waives the specified percentage requirement under paragraph (a) of this section, the application will be processed under the Act and this part, taking into consideration only the remote or isolated attendance area; but in no case will payments under this paragraph exceed the cost of construction of minimum school facilities for the number of children which the Commissioner determines will reside on Indian lands in the remote or isolated area and who will be in membership in the schools of such applicant as of the close of the second year following the close of the membership period for which the application is filed, and who would otherwise be without such facilities, and which cost has not been, and is not to be recovered by the applicant from other sources, including payments by the United States under any other provisions of the Act or any other law.

(20 U.S.C. 644(b))

§ 114.37 Criteria for waiver of substantial percentage requirement in section 14(c).

(a) The Commissioner will not waive the substantial percentage requirement imposed by section 14(c)(1) of the Act unless the conditions set forth in paragraphs (a)(1) through (6) of this section, or that set forth in paragraph (a)(7) of this section, are met:

(1) The applicant would otherwise be eligible for the assistance requested;

(2) The applicant makes a request to waive such percentage requirement;

(3) The applicant's school district is countywide or is sufficiently extensive as to be analogous to a countywide school district;

(4) There has been a concentration of children who are inadequately housed by minimum school facilities located in a remote or isolated area;

(5) The number of children who are inadequately housed by minimum school facilities located in the remote or isolated area and estimated to be in membership in the applicant's schools as of the close of the membership period for which the application is filed is at least 20 and constitutes at least 20 percent of the total number of children in membership in the local educational agency as a whole and for whom the applicant is providing free public education;

(6) The Federal lands in the applicant's school district constitute at least 80 percent of the total area of such district;

(7) The Commissioner determines that other exceptional circumstances exist which in his judgment require such waiver or reduction to avoid defeating the purpose of the Act.

(b) If the Commissioner waives the specified percentage requirement under paragraph (a) of this section, then the application will be processed under the Act and this part, taking into consideration only the remote or isolated attendance area; but in no case shall payments hereunder exceed the cost of construction of minimum school facilities for the number of children in the remote or isolated attendance area (or approved attendance area) which the Commissioner determines are inadequately housed and who will be in increase in the schools of such applicant as of the close of the second year following the close of the membership period for which the application is filed, and who would otherwise be without such facilities, minus any portion of the cost which has not been, and is not to be, recovered by the applicant from other sources, including any amount which the Commissioner determines is or will be practicably available to the applicant from any local, State, or Federal sources.

(20 U.S.C. 644(c))
